<snip>

An electric circuit consists of a source of power, a load, and something (like wires) connecting them. Transformers can be used if the source is providing alternating current. A voltage transformer is connected in parallel with the load so that the source, the transformer, and the load all see the same voltage. It can also be used to match a load to a source. A common example of a voltage transformer is the power transformer in a piece of equipment that changes the AC line voltage to whatever other voltages are required by the equipment.

A current transformer, on the other hand, is connected in series with the load so that the source, load, and transformer all have the same current flowing through them. The most common use of a current transformer is to measure the current flowing into a load. A clamp-on ammeter is a common example.

Historical examples of voltage and current transformers are the "picture tube brighteners" that were commonly used in TV sets to prolong the useful life of the CRT. There were two types, parallel and series. The parallel types were used in transformer operated TVs and consisted of a step-up transformer to raise the heater voltage of the CRT above normal to increase emission. The series type was used in sets with the tube heaters in series and consisted of a step-down transformer that raised the heater current above normal. Of course, raising either the voltage or the current also raised the other. These were, respectively, voltage and current transformers.

A loop antenna is a distributed source with the voltage being generated along the length of the wire and also having a magnetic field so that it can be used as part of a transformer. This blurs the distinction between a current and voltage transformer.

I haven't used PCB123 but I have used ExpressPCB which is similar. The purpose of these products is to sell PC boards made by the company that provides the software. Since this is the case, there is no provision (at least in ExpressPCB) to print a layout in a way that can be used to etch a board. Also, at least for ExpressPCB, the NRE is way too expensive to have one board made for home use. If you find these things to not be true for PCB123, please let us know; it would be welcome news.

Another thing that I haven't done but have heard is that clear mylar isn't a good medium for making masks; the ink/toner won't go on thickly enough to be opaque. Vellum is a better choice.

Good luck,

Well then, when I send in the files they need to produce the PCB how will I know it's going to come out right, wait unless the software shows me a layout of the PCB on my monitor and I just do a print screen and photoshop it?

A costumer would be not so bright to spend hundreds of USD on a bunch of PCB's that don't come out right.

PCB123's minimum cost is $109 for 2pcs of 9 square inch board. You must be from a third world backwater country if you think that is a high price.

You don't get the concept. They lock you into buying boards only from them. Otherwise they would just let you produce Gerber files from the tool.

Why not use a good, open source tool like FreePCB? That is what I recommend.

Rick

You're supposed to be good enough to look at the layout on the screen and know. The whole point of the rapid-turn PCB houses is that they make you a board so that you don't have to.

That's a much higher price than BatchPCB, which charges $2.50/sqin + $10/order.

$109/board is too much for my hobby budget, although I routinely pay that much for professional stuff.

I use Eagle, but I started before the open-source tools got good enough to be real. They have a limited-size free (but not open source) version.

Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted twice monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

We are seeking a replacement maintainer for the following information bulletin formerly posted to rec.radio.amateur.* (and currently archived at http://www.faqs.org/faqs/radio/personal-intro/):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this article updated and automatically posted again at a regular interval. This would include establishing contact with the original maintainer for any necessary permissions. We would prefer to seek a new, dedicated maintainer at this time, rather than start auto-posting the original article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to rec-radio-info-request@panix.com.

Actually ExpressPCB doesn't completely lock you in.  They will make
Gerber files for you for $60 AFTER you have ordered some boards.

The datasheet for the J310 specifies a pinch-off voltage range
of -2.0 to -6.5V. Completely normal production variation may be
quite different than the spec sheet curve. So it sounds like
Clifford has J310s that have a relatively small pinch-off voltage,
perhaps even out of spec, and the ~2V drop of the diode chain is
biasing the FET off.

Data sheet for the Fairchild parts: http://www.fairchildsemi.com/ds/J3/J310.pdf

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35f23326

```
the rec.radio.amateur.moderated Moderation Team had decided to consider       |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup.  After a successful trial         |
period (90 days, through early July 2009), we decided to adopt this           |
change permanently.                                                           |
```

Approved rec.radio.amateur.* newsgroups are those that are currently listed in the latest version of the "List of Big Eight Newsgroups" which is crossposted monthly to news.announce.newgroups, news.groups, and news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those that have been created consistent with the suggestions in "So You Want to Create an Alt Newsgroup" at:

  http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either "radio.amateur" or "ham-radio" in their names, including uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved newsgroups up-to-date. In case we have overlooked any, and a submission is rejected in error as a result, the rejected submitter can E-mail us at our administrative contact address (in the signature at the bottom of this article, and the default Reply-To for the rejection message) requesting that it be added, and that the article be approved. We may still choose to reject articles crossposted to any alt.* newsgroup with an inappropriate name, including obscene language, embedded name-calling, or encouragement of unlawful conduct.

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

So, a deal that's 99.44% sucky is better than a deal that's 100% sucky?

I dunno, I think I'd rather get some free layout tools and learn to use
them.

Depends on how you are using it. ExpressPCB is great if you need a quick prototype, and, if it works out, you can get Gerbers to go into production. The software is very easy to use; hardly any learning curve at all. It's just not appropriate for hobby projects. I used it when laying out the board myself was quicker than writing instructions for our regular layout person.

They also include a schematic capture program which is equally easy to use and, if all you need is a schematic, is fine. It's made for Windows but I'm using it under Linux with the aid of Wine (a popular Windows emulator).

URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team.  We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

 radio/personal-intro
 Subject: Guide to the rec.radio Newsgroups
 Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
 Last Posted: 9 Nov 2001 06:18:17 GMT
 Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article       |
is that it does not mention newer amateur radio newsgroups created since      |
it was written, including:                                                    |

 rec.radio.amateur.antenna                                                    |
 rec.radio.amateur.boatanchors                                                |
 rec.radio.amateur.dx                                                         |
 rec.radio.amateur.equipment                                                  |
 rec.radio.amateur.homebrew                                                   |
 rec.radio.amateur.moderated                                                  |
 rec.radio.amateur.space                                                      |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions.  We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently listed in the latest version of the "List of Big Eight Newsgroups" which is crossposted monthly to news.announce.newgroups, news.groups, and news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those that have been created consistent with the suggestions in "So You Want to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either "radio.amateur" or "ham-radio" in their names, including uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved newsgroups up-to-date. In case we have overlooked any, and a submission is rejected in error as a result, the rejected submitter can E-mail us at our administrative contact address (in the signature at the bottom of this article, and the default Reply-To for the rejection message) requesting that it be added, and that the article be approved. We may still choose to reject articles crossposted to any alt.* newsgroup with an inappropriate name, including obscene language, embedded name-calling, or encouragement of unlawful conduct.

Please direct any comments, questions, or criticisms to rec-radio-amateur-moderated-request@panix.com.

We're back with the Active Cantenna to finally do some range testing. Thanks to Amateur Radio and a couple of video cameras, we put you right in the action. Ride Shotgun with Jim as we test WiFi's advertised 300' range. We were pleasantly surprised....

There are more great web sites under review in Website Roundup'.

Tommy performs a little Digital Photography Magic by producing a 10 Mega Pixel image from a 6 Mega Pixel camera!

PLUS, there's a surprise visit from some other popular IPTV Show hosts.

The show runs about 39 minutes.

This posting includes a media file:
http://www.podtrac.com/pts/redirect.wmv/www.amateurlogic.tv/transmitter/video/amlogic04_hi.wmv

///
AmateurLogic.TV Episode 3

http://www.podtrac.com/pts/redirect.wmv/www.amateurlogic.tv/transmitter/video/amlogic03_hi_.wmv

No interviews this time... We build a high performance Active Cantenna' from parts that you should be able to find locally. The big advantage is that you can have a very long cable to the cantenna without any signal loss, which is not possible on other designs.

The construction is shown in enough detail that one could follow along and build their own.

Jim is back with another Website Roundup' segment.

And Tommy introduces Photo Tips'. This episode's topic is White Balance.

The show runs about 46 minutes.

This posting includes a media file:
http://www.podtrac.com/pts/redirect.wmv/www.amateurlogic.tv/transmitter/video/amlogic03_hi_.wmv

http://www.podtrac.com/pts/redirect.wmv/www.amateurlogic.tv/transmitter/video/amlogic02_hi.wmv

We visit Inner City Broadcasting's Radio Studios in Jackson and speak with Roger Lamb, Director of Technical Operations.

Plus we introduce two new segments to the show:

Jim hosts Website Roundup', where we discuss interesting sites.

From The Bench' with George hacks a Firewire cable to determine the correct wiring diagram for DV.

The entire show runs 57 minutes and change.

This posting includes a media file:
http://www.podtrac.com/pts/redirect.wmv/www.amateurlogic.tv/transmitter/video/amlogic02_hi.wmv

Oops. WWVB does have an amplitude component and is not quite on-off keying (OOK). There's a -17dB drop in RF signal level at the beginning of each 1 second marker pulse. It was -10dB prior to 2005.

Yes, I have done my homework on the WWVB signal. I am at the fringe of
the 100 uV/m contour. I would very much like to see the signal on an
oscilloscope when I test this. They have a receiver not far from here
in Gaithersburg, MD and the signal is often strong during the day. So
much so that I don't follow why they say there is this day/night signal
strength fluctuation. It looks much more random to me.

The WWVB signal is not truly on-off keying. I believe they use a 10 dB modulation factor for the AM signal. This is close to on-off I agree. But they also phase modulate the signal and I will be demodulating both to see which one works best in my design.

The ADC in my design is truly one bit. It is an LVDS input on an FPGA. I looked at delta-sigma (or is it sigma-delta? ;) conversion and got code from the chip vendor for a simplistic implementation. I don't think I have the power budget for that and am using a much simpler 1 bit ADC at 4x the carrier rate. The bit stream is multiplied by quadrature carriers at 60 kHz and each stream summed for 1/30 of a second to implement what can be considered a DFT bin, a decimated FIR filter or a decimated down conversion; take your pick, they are all mathematically the same in this case because the sampling is synchronous to the carrier (or very close to synchronous).

What comes out the other end of this processing gains nearly 40 dB in SNR. My simulations show a recoverable signal when it is more than 20 dB below the noise.

Of course, I have not tested this yet on a real signal. I want to run some tests on the antenna and coupling transformer to verify the simulation. Then I will start working with the FPGA to see if I can make the LVDS input do what I want. I have ideas on how to bend digital circuits to do my bidding. This LVDS input is why I want as large a signal as possible from the antenna. With the high impedance input on the chip I should be able to boost the signal pretty well with just passive devices and signal processing.

The loop antenna is rather large. I would like to end up with something smaller. Once I get this working with a shielded loop antenna I will check out the ferrite core antennas. My understanding is that they don't produce as much signal.

> 60Khz/ 2Hz = 30,000
> before the antenna bandwidth becomes a problem.

I'm not sure how you came up with 2 Hz for the bandwidth. In this case the bandwidth is not just twice the bit rate. I believe the stated "system" bandwidth is around 5 Hz (from a 1995 paper prior to addition of the phase modulation). Regardless, I am sampling at 30 Hz and if I expect to see significant changes in phase or amplitude within one sample time, I need an appropriate bandwidth.

Even so, that is not the limiting factor. The limiting factor is the difficulty in holding tune with drift in passive component values. The Q can be raised by increasing the turns ratio on the transformer, but it becomes so sensitive to the parasitic capacitance that the sensitivity drops 10 dB with a 1 pF change.

Thanks. I will take a look at that.

> Incidentally, I used a WWVB code simulator driving a signal generator
> to test my receiver:
> <http://www.leapsecond.com/notes/wwvb2.htm>

I will be needing a time code simulator. I designed a commercial product that works with the IRIG-B time code which is similar. The functionality is not hard, it is just a matter of generating the data, encoding it into the modulation pattern, then impressing the carrier with the modulation. Working in an FPGA this sort of stuff is easy.

The trouble is if you make the same mistake in both the generator and receiver they work just fine in simulation, but not with other equipment. lol

I'll take a look at this link.

> If you're seriously into this, I suggest asking questions on the
> time-nuts mailing list:
> <https://www.febo.com/mailman/listinfo/time-nuts>

I might look into that. Certainly it can't hurt to get more input.

SNR would be good, but I am concerned with maximizing the signal actually.

I think you aren't reading what I am writing. I said I wanted a Q over
100, not 1 million. I don't get why you keep talking in hyperbole.
What you are describing is not even a tradeoff between signal strength
and SNR. If there is no coupling, there is no signal.

> An antenna with high (expressed as ESR) radiation resistance might have a

> modest Q, but gives far better SNR because it couples to free space.

I have not found anything to indicate this produces a better receive antenna. I have a formula for the effective height of a loop antenna which is what determines the received signal strength at the antenna. It does not calculate the radiation resistance, it uses the coil parameters and the wire resistance. Is that a wrong formula?

> Raw volts don't matter, you can always throw more amplifiers at it (as
> long as they don't corrupt the SNR also!).

Maybe you didn't read my other posts. I am not using an amplifier. I am running the antenna and coupler output directly into a digital input.

The receiver input is high impedance, approximately 10 MOhms with a low capacitance between the differential inputs of not more than 10 pF.

Your description of what is happening is very terse and full of shortened terms that I don't understand. What do you mean "line up that 10p resonance with the operating frequency"? I assume you are referring to the 10 pF input capacitance. How does this get "lined up" with anything?

When you talk about reactances canceling, that sounds a lot like a tuned circuit at resonance. That is what I *am* doing and where this thread started. One problem with that is the lack of precision or stability of the parasitic capacitance. Any idea how to deal with that?

Have you looked at the simulation data I had posted? I think you are describing exactly the circuit we are simulating which I believe is an accurate representation of the circuit I plan to build. Is that not correct?

Is this a current transformer or a voltage transformer?

It may sound like hyperbole, but it's mathematically sound. The midpoint theorem, for example, guarantees that, between two points, you must've hit some point inbetween, somewhere, as long as the function is continuous. More usefully, functions arising in electronics are often one-to-one, so it's not only true that you are guaranteed midpoints, but you'll find them in order, too.

If you aren't looking at the extreme cases, you aren't doing your job. Whatever's left inbetween can simply be interpolated!

The point here being, an antenna which doesn't couple into free space obviously has a crappy SNR. The signal level can be anything, it doesn't matter. The signal need not be small, because internal losses generate thermal noise. With sufficient Q, you can push that thermal noise up to your receiver threshold (which you said is an ADC) and detect signal. It'll be bandlimited, ~60kHz noise, a useless signal, but present nonetheless.

In general, antennas which do couple strongly to free space have low Qs. A 1/2 wave resonant dipole has a Q of only 1 or 2, so bothering to call it resonant is actually kind of weak. This is similarly true for a large loop, which of course would be highly impractical here. So there must be some middle case where SNR is reasonably unaffected, which will be the best choice antenna.

Since atmospheric noise dominates, the antenna can stand to be pretty small.

>> Raw volts don't matter, you can always throw more amplifiers at it (as
>> long as they don't corrupt the SNR also!).

You hadn't mentioned that before...

> The receiver input is high impedance, approximately 10 MOhms with a low
> capacitance between the differential inputs of not more than 10 pF.

Any ESR? Example, the ATmega series 10 bit ADC specifies, I think, around 10pF + 10k ESR (somewhat depending on how many mux switches it's going through to get there).

> Your description of what is happening is very terse and full of
> shortened terms that I don't understand.

I could write a book on the subject to explore it in detail, but there are many available already, and there are too many holes in my knowledge to really be worth it, plus this is Usenet, you get what you pay for. I was hoping you'd Google in the blanks.

> What do you mean "line up that
> 10p resonance with the operating frequency"? I assume you are referring
> to the 10 pF input capacitance. How does this get "lined up" with
> anything?

There's yet another theorem in networks that has to do with matching.

A resonant tank's impedance varies wildly with frequency. But it will always be resistive at resonance. If you connect this to another network, which has a resistive input impedance at the same frequency, you don't care what the L and C are, it will simply work -- old fashioned resistor divider action!

You *do* have to worry about L and C and reactance and bandwidth to solve for the frequency response and stuff, but you can at least approximate that with Q factor (i.e., how much loss is draining power out of the system).

So if your ADC input is exactly 10p + 10M, you could resonate it with 0.7H (well...), which has a resonant impedance of 264k, and thus a reasonable Q of 38. (The real world typically bitchslaps the theorist at this point, as 0.7H chokes with <10pF parasitic capacitance and Q > 38 at 60kHz don't exist.) If the capacitance's ESR is less than 6.9kohms (i.e., 264k / 38), it won't have significant effect.

You can couple to this tank via parallel or series. If you did series, the input impedance would be 264k / 38, or 6.9k, not horrible; going from the 0.78 ohm loop to this in a single transformer requires a 1:100 CT, which works fine at 60kHz. (This CT would require high inductance, so as to avoid skewing results, but that's typical of a CT. An amorphous core CT would probably suffice. So at least that part is physically realizable.) Note the irony of coupling a current loop to a current loop, where in both cases, the CT looks like a small impedance relative to the loop it's within. That's simply how huge the impedance at the ADC is.

Since all these resistances are matched, the power transfer theorem holds, and you're pushing as much voltage and power into the ADC as possible. The bandwidth is about 1.6kHz, so the thermal noise floor is around 5uV at the ADC. A received power of 1nW will generate 0.1V, which is probably a reasonable figure. The SNR of the receiver is limited by quantization noise for <14 bits, thermal for >14 bits. A 16 bit converter wouldn't be too expensive at this sample rate (note it's the analog sample-and-hold speed which limits direct conversion performance; a sigma-delta, running at 100Hz, with no S&H, won't see jack).

> When you talk about reactances canceling, that sounds a lot like a tuned
> circuit at resonance. That is what I *am* doing and where this thread
> started. One problem with that is the lack of precision or stability of
> the parasitic capacitance. Any idea how to deal with that?

Considering theoretical 0.7H chokes aren't commercially available, you might swamp it with more C, which stabilizes the value, and requires less L to resonate. Rub: resonant impedance is lower, so the Q of the components must be higher in order to achieve the same performance. Even with a Q of 200, you still need over 0.25H, which is just as unlikely a combination. Well, if you really wanted to try, maybe a gapped ferrite-cored inductor could be made. Still, the only practical choice seems to be lower signal level.

So ultimately, the question is, how little signal can you tolerate before you need an amplifier? How many bits of conversion, how much sample rate can you afford before a linear amplifier becomes cheaper on the power budget?

> Have you looked at the simulation data I had posted? I think you are
> describing exactly the circuit we are simulating which I believe is an
> accurate representation of the circuit I plan to build. Is that not
> correct?

It's getting closer, but with adjustments (to the transformer inductance) to make the resonances line up (same frequencies). Plus whatever compromise you need to make on gain.

Tim

```

```
>order.
>
>$109/board is too much for my hobby budget, although I routinely pay that
>much for professional stuff.

Yep.. $109 seems a bit steep, unless you need them really fast.

Oshpark charges $5/sqin for 3pcs, for sharp looking boards.
FR4 .063" 2-layers 1oz copper. purple boards, gold flashed.
About a 12-14 day turnaround. I think they are made in the US.
They also do 4 layer boards for $10/sqin.

Thre are several Chinese shops that will do 10pcs of 5x5cm boards
for ~$10, larger sizes for a bit more. About a month turnaround.
Seeed Studio, and a couple of others.

Lets see..  for a 9sqin board..

PCB123
     $109/2 = $54.50 per board

BatchPCB
     9sqin x $2.50 = $22.50 per board
     +$10 order = $32.50 for first board
     $55 for 2 boards.

Oshpark
     9sqin x $5 = $45.
     $45/3 = $15 per board

So PCB123 is ~2x the price of BatchPCB, and >3x the price of Oshpark.

What was the turn around time at PCB123? Not everyone can wait a month
or more for prototype boards.

I had a muffed delivery from Sunstone once that almost sank a project.
Turn around is important for many projects.

I am working on a simulation for a loop antenna in LTspice and I can't figure out why the signal strength features are what they are. The model uses a pair of loosely coupled inductors to model the transmitter and antenna loop with a separate pair of tightly coupled inductors to model the coupling transformer. A cap on the primary circuit is the tuning cap and a cap on the secondary is parasitic effects of the circuit board leading to the inputs on the IC.

There is a resonance near the frequency I would expect, but it is not so close actually. I can't figure why it is about 5% off. There is a second resonance fairly high up that I can't figure at all. None of the component values seem to combine appropriately to produce this peak. When looking at the tuning capacitor voltage there is an anti-resonance that is exactly at the frequency corresponding to the secondary resonance with the transformer and the parasitic capacitance. That makes sense to me, but it is pretty much the only part that jibes with what I can figure out.

I have uploaded a zip file with the schematic and a measurement file.

I have to say I don't follow the distinction. It is a transformer, no?

I expect if you reflect the CT secondary stuff (don't forget Lsec) back to
the primary, your answer will appear. Offhand I can't reason out which
sum of L and C makes the resonance, but it's a four pole series-parallel
resonant circuit, analysis should lay it bare.

Are you sure about this? When you say to reflect the secondary back to the primary that means the primary inductance would be doubled? I believe the coupling of the two coils means they are one and the same for the purposes of the circuit analysis, no?

You can't reason which sum of L and C makes the resonance and I can't either. The calculation is off by about 5% and I can't explain that. I can explain a null at about 290 kHz. That is the resonance of the secondary with the secondary capacitance. I can't explain the other peak at 363 kHz at all. A higher frequency would imply a smaller L and/or C. How do you combine them to produce that? Consider the two caps to be in series???

Sure. If you bring the 10p over to the primary, it looks like 10p * (30m / 5u), or whatever the ratio was (I don't have it in front of me now), in parallel with the primary. (I misspoke earlier, you can safely ignore Ls, because k = 1. There's no flux which is not common to both windings.)

Inductors effectively in parallel also increase the expected resonant frequency. If you have this,

```
.             L1
.      +-----UUU--+------+------+
.      | +        |      |      |
.  ( Vsrc )      === C    > R    3 L2
.      | -        |      >      3
.      |          |      |      |
.      +----------+------+------+
.                              _|_ GND
```

You might expect the resonant frequency is L2 + C, but it's actually (L1 || L2) = Leq. If L1 is not substantially larger than L2, the resonant frequency will be pulled higher.

Incidentally, don't forget to include loss components. I didn't see any explict R on the schematic. I didn't check if you set the LTSpice default parasitic ESR (cap), or DCR or EPR (coil) on the components. Besides parasitic losses, your signal is going *somewhere*, and that "where" consumes power!

The actual transmitter is most certainly not a perfect current source inductor, nor is the receiver lossless. This simulation has no expression for radiation in any direction that's not directly between the two antennas: if all the power transmitted by the current source is reflected back, even though it's through a 0.1% coupling coefficient, it has to go somewhere. If it's coming back out the antenna, and it's not being burned in the "transformer", it's coming back into the transmitter. This is at odds with reality, where a 100% reflective antenna doesn't magically smoke a distant transmitter, it simply reflects 99.9% back into space. The transmitter hardly knows.

In this example, if you set R very large, you'll see ever more voltage on the output, and ever more current draw from Vsrc. You can mitigate this by increasing L1 still further, but the point is, if the source and load (R) aren't matched in some fashion, the power will reflect back to the transmitter and cause problems (in this case, power reflected back in-phase causes excessive current draw; in the CCS case, reflected power in-phase causes minimal voltage generation and little power transmission).

Power is always coming and going somewhere, and if you happen to forget this fact, it'll reflect back and zap you in the butt sooner or later!

Summary: Short reminder for unmoderated newsgroups that crossposting is permitted
Keywords: FAQ, ham, amateur, radio, moderated, unmoderated, crossposting,
permitted

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted quarterly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/
d7d337db35f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider       |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup.  After a successful trial         |
```

period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently listed in the latest version of the "List of Big Eight Newsgroups" which is crossposted monthly to news.announce.newgroups, news.groups, and news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those that have been created consistent with the suggestions in "So You Want to Create an Alt Newsgroup" at:

  http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either "radio.amateur" or "ham-radio" in their names, including uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved newsgroups up-to-date. In case we have overlooked any, and a submission is rejected in error as a result, the rejected submitter can E-mail us at our administrative contact address (in the signature at the bottom of this article, and the default Reply-To for the rejection message) requesting that it be added, and that the article be approved. We may still choose to reject articles crossposted to any alt.* newsgroup with an inappropriate name, including obscene language, embedded name-calling, or encouragement of unlawful conduct.

Please direct any comments, questions, or criticisms to rec-radio-amateur-moderated-request@panix.com.

>component values seem to combine appropriately to produce this peak.
<snip>

Pulling out the old reactance paper, there are a couple of expected interactions using the values present:

Around 50KHz (89.42uH+48uH) with 50.42nF (L3+L1) with C1
Around 290KHz (89.42uH+48uH) with 6.25nF (L3+L1) with C2*N^2
Around 360KHz 48uH with 6.25nF L1 with C2*N^2
nL1/nL2=N=25

The mid-resonance is a dip or rejection.

What's the issue?

RL

I want to add sockets TO-3 for the pass transistors in my 12 volt power
supply. The trouble is I can not find current(I) specifications for the
sockets. I really dont know what I should expect for a spec, guessing 10
amps for a good quality unit. Any help would be greatly appreciated.

It depends on the socket. They seem to average about 10 amps for the most
part. Some are rated from 5 to 20 amps. There are some special ones out
that seem to be rated for about 50 amps. I think they are made for some
special large pin to3 size transistors.

Here is a data sheet on one of the 'normal' types.
http://www.mouser.com/catalog/specsheets/5068080G.pdf

Pass transistors need a heatsink ,so why should you need sockets.
Connection with a PCB located circuit is usually done with �sliding
solder tags� wired to the PCB , but of course you can also directly
solder the wires to the transistor pins.

> If you aren't looking at the extreme cases, you aren't doing your job.
> Whatever's left inbetween can simply be interpolated!

>
> The point here being, an antenna which doesn't couple into free space obviously has a crappy SNR. The signal level can be anything, it doesn't matter. The signal need not be small, because internal losses generate thermal noise. With sufficient Q, you can push that thermal noise up to your receiver threshold (which you said is an ADC) and detect signal. It'll be bandlimited, ~60kHz noise, a useless signal, but present nonetheless.
>
> In general, antennas which do couple strongly to free space have low Qs. A 1/2 wave resonant dipole has a Q of only 1 or 2, so bothering to call it resonant is actually kind of weak. This is similarly true for a large loop, which of course would be highly impractical here. So there must be some middle case where SNR is reasonably unaffected, which will be the best choice antenna.

I was warned a long time ago to be wary of people speaking in "glittering generalities". You seem to insist on using terms without giving a mathematical basis. How about if we use some math?

V = (2 * pi * A * N * E * cos(theta)) / lambda

V is the voltage on the antenna,
A is the loop area,
N is the number of turns,
E is the field strength,
theta is the rotation angle of the antenna and the transmitter (just consider this term to be 1,
lamba is the wavelength (c/f)

This is multiplied by the Q factor when resonated by a capacitor. So higher Q, higher signal.

Where in here do you think I am having a problem?

> Since atmospheric noise dominates, the antenna can stand to be pretty small.

You are making assumptions that don't hold true in my design.

>>> Raw volts don't matter, you can always throw more amplifiers at it (as long as they don't corrupt the SNR also!).
>>
>> Maybe you didn't read my other posts. I am not using an amplifier. I am running the antenna and coupler output directly into a digital input.

We are still having communications difficulties. You keep talking in
terms I can't relate to. I don't need you to write a book, but I do
need you to communicate clearly.

I am using a 1 bit ADC. Don't assume that I am doing what you have done
in the past.

I'm trying to build a 80/40 meter receiver and I'd like to be able to switch the RF input between the two bandpass filters. This sort of thing is usually done with relays but I'd like to avoid that if possible. A SN74CBT3306 would be ideal but I think the on-resistance would be too high, thought it's hard to tell from the data sheet. Are there other devices that would be suitable for this application? What do you think about using 2N7000's for this job?

The input and output capacitors of the double-tuned filters are 2200 & 2700 pF so the stray capacitance of the switching circuitry would not affect the response very much.

Thanks in advance

I don't recall every seeing CMOS switches used for switching  LC cicuits.
Maybe for switching stages, but I can't think of an example of that.

If it's not a switch, which has the disadvantage of not being close to
where the circuit needs switching, it's a relay.  If it's not a relay,
```

then switching diodes are called in. Lots of people were using small signal diodes for switching in the early days, then PIN diodes came along they got the glory. The one issue seems that under some circumstances, they can add distortion.

In the very old days, the tuned circuits were plugged in, very troublesome but it avoided switches. Once semicondcutors came along, they were cheap and small enough that duplication often made sense, switch whole stages, including the tuned circuits, rather than switching the coils alone. That gives you more leeway, with active stages in there, any loss from CMOS switches goes way down.

Re-read what Tim Williams said.

A way to translate what he's saying into your simulation is to include the radiation resistance of the antenna into your simulation, and reduce the coupling -- 1e-6 is probably good enough. I am, frankly, not sure where this is best put in your radiation resistance, but just increasing the series resistance on L3 is probably sufficient; putting it in as a parallel resistance in L3 is probably more accurate, but would be more useful as a way of separating the radiation resistance effect from the winding resistance of L3 (which is, I assume, where your figure comes from).

Do you have the ability to measure the Q of your antenna as built, and compare it to the Q calculated from the known L, C, and winding resistance? That should give you a good estimate of the radiation resistance, or at least radiation resistance + other losses.

In receivers like for instance those of ICOM (R71 etc.) and Kenwood (R1000 etc.), the input and IF bandpass filters were switched with diodes (N4148 or equivalent). With a current of ~10 mA through a diode this works rather well, regarding both IM and loss. But because at that time circuits weren't simulated, it was overlooked that due to the diode capacitance, filters supposed to be switched out, still exerted (often a nasty) influence. To eliminate that, you'll also have to use a diode switch as a short circuit for the filter not in use.

Hello
IMHO diodes switches are by far the way to go.
They have been used for years in TV tuners at UHF frequencies.
They are very small and allow to place the switch exactly where it should
be.
They can support power as in TX/RX or att�nuator swithes.
Cmos IC's are used too in some SDR receivers but having to bring RF tracks
to a small SMD implies stray capacitance and inductance problems.

I built a passive 60KHz bandpass filters out of a collection of
ferrite cores from an old modem front end. I left it at a previous
consulting job, but can resurrect the design if necessary.
Incidentally, during my limited testing at home, I found that the
biggest determent to decent reception was all the switching power
supply noise found around the house. I finally ended up using a
battery power oscilloscope
<http://802.11junk.com/jeffl/pics/drivel/slides/tek213.html>
a gel cell for powering the RF amp, and turning off the main power to
the house. Then, I could sorta see a signal.

>They have a receiver not far from here
>in Gaithersburg, MD and the signal is often strong during the day. So
>much so that I don't follow why they say there is this day/night signal
>strength fluctuation. It looks much more random to me.

<http://tf.nist.gov/tf-cgi/wwvbgraph_e.cgi?5636103007>
Very random. Compare the above graph with Santa Clara which looks
less random:
<http://tf.nist.gov/tf-cgi/wwvbgraph_e.cgi?5636105007>

On the east coast, besides a weak signal, you also have the potential
for 60KHz interference from the UK:
<http://en.wikipedia.org/wiki/MSF_time_signal>

I had a 100KHz LORAN antenna on the roof of a former employer. The
signal was just fine, until someone turned on the mercury vapor arc
parking lot lamps at night. They were changed to low pressure sodium,
which made testing possible at night.

Incidentally, got any clue as to the vertical scale? My guess(tm) is
20 uv/meter signal strength per division, but I'm not sure.

>The WWVB signal is not truly on-off keying. I believe they use a 10 dB

>modulation factor for the AM signal. This is close to on-off I agree.

It's now 17dB drop at the beginning of each UTC second. The change
came in about 2008.

>But they also phase modulate the signal and I will be demodulating both
>to see which one works best in my design.

The BPSK signal is much better at rejecting interference and digging
the signal out of the noise. I don't know exactly how much, but I'm
sure it's in a NIST publication somewhere.

>The ADC in my design is truly one bit. It is an LVDS input on an FPGA.
> I looked at delta-sigma (or is it sigma-delta? ;)

It's delta-sigma.

>The loop antenna is rather large. I would like to end up with something
>smaller. Once I get this working with a shielded loop antenna I will
>check out the ferrite core antennas. My understanding is that they
>don't produce as much signal.

Not exactly. Small loopsticks receive a proportional amount of noise.
The ratio of signal to atmospheric noise remains roughly the same
within a fixed bandwidth for any antenna. That's why tiny little
loopsticks, inside "atomic time" wristwatches work. The small
loopsticks also use the magnetic field instead of the electric field,
which is why they can be made so small.
<http://en.wikipedia.org/wiki/Loop_antenna#Small_loops>

Ok, I made a bad guess(tm). Even at 5Hz BW, the maximum Q of
   60KHz / 5Hz = 12,000
is not going to happen in a loop or loopstick antenna.

>Even so, that is not the limiting factor. The limiting factor is the

Agreed.

Holy crap! That's a lot of trouble to see a signal. By "see" I assume
you mean on the scope. How large was the signal?

The place where I am working currently is not very close to much and
there isn't much in the house. I'm told the fridge is the biggest
source of noise. We'll see how the CFL lamps do.

Funny, last night my two RCC's both updated like they should. One is an
analog clock and runs at 8x speed to get the hour ahead. In the fall it
does this to go 11 hours ahead. Quite a sight! They both did the job,
but my PC didn't update until it had been on for awhile, without being
connected to the I'net.

Loop antennas have a null that can be steered toward the source of
interference. I expect that will solve that problem...

That's for an ideal receiver. I have my limitations and I have no idea
how that will impact the reception.

Actually I always say that with a smiley as it can be either.

In my case I am not worried that the SNR isn't better, I just need a
strong enough signal to drive the LVDS input. I will be providing
feedback to eliminate any DC bias, but even that will only be so good.
The input is claimed to have no hysteresis, but even a tiny amount can
ruin this design. I will only know if this will work when I try it.

```

The second one is a current transformer. They both consist of coils around a magnetic core driving some kind of load. The difference is the source of power and that causes them to behave very differently as well as being constructed differently.

Let's assume ideal components (a good place to start when learning a new concept). The voltage transformer is driven by a source that provides a constant voltage, no matter what the load. The transformer takes this voltage and converts it to some other voltage depending on the turns ratio; Vout = Vin * Ts / Tp. For example, if the primary has 100 turns and the secondary has 20 turns and the primary is supplied with 50 volts, the secondary will provide 10 volts. As the secondary load changes, this voltage remains the same but the current changes. If the secondary is open-circuited, the voltage still stays the same. If the secondary is short-circuited, the current becomes infinite; that's why real voltage transformers are protected by fuses or similar devices.

Now for the current transformer, it is driven by a source that provides a constant current no matter what the load. The transformer takes this current and converts it to some other current depending on the turns ratio; Iout = Iin * Tp / Ts (note the inversion of the turns ratio). For example, if the primary has 1 turn (a common number for real transformers) and the secondary has 5 turns and the primary is supplied with 5 amps, the secondary will provide 1 amp. As the secondary load changes, this current remains the same but the voltage changes. If the secondary is short-circuited, the current still stays the same. If the secondary is open-circuited, the voltage becomes infinite; that's why real portable current transformers have a shorting switch on the secondary that the operator must close before disconnecting the load.

Also, note the difference in the number of turns, voltage transformers have a lot of turns and current transformers have few turns.

For a loop antenna with an external resonating capacitor, a voltage transformer would be connected in parallel with the loop and capacitor; all three in a parallel circuit. A current transformer would be connected in series with the antenna and capacitor so that the three form a series circuit. If the loop itself is used as the primary of the transformer and another winding is used as the secondary, the distinction between the two types is blurred. Also, a real antenna is neither a voltage source nor a current source but something in between.

Turning off the house was easier than finding the multiple sources of noise at 60KHz. What drove me nuts for about an hour was that much of the noise was coming from my bench oscilloscope. Argh.

This is typical. WWVH through an active preamp showing the effect of power line noise (probably from attached switching power supplies).
<http://www.prc68.com/I/Images/AMRAD110.GIF>
and after adding some better line filtering:
<http://www.prc68.com/I/Images/AMRAD_BT.GIF>
Main page:
<http://www.prc68.com/I/LF-Ant.shtml>

I didn't log the setup or take pictures. So, let's do the math and guesswork.
<http://vk1od.net/calc/FS2RPCalc.htm>
I plugged in some guesses and recollections as to what the antenna (Q=30) and amp (+20dB gain) were doing and got:
<http://802.11junk.com/jeffl/crud/WWVH-rx-signal-estimate.jpg>
-15.8dBm or about 36mv into 50 ohms. I amplified this about 20dB with two or three U310 JFET's (I forgot what I did) to about 3V rms on the scope. I didn't bother with the 50 ohm to scope input Z conversion. Most of what I saw was noise, noise, and more noise. However, if I was patient, I could see the data fade in an out. As I vaguely recall, it was less than 1 division or about 0.1v change.

>The place where I am working currently is not very close to much and
>there isn't much in the house. I'm told the fridge is the biggest
>source of noise. We'll see how the CFL lamps do.

Sigh. Most of what I found at 60KHz was coming from lightning storms over Florida. The local sources were all switching power supplies, including those in my test equipment. I didn't have an CFL or LED room lights at the time. I've recently found them to be a rather nasty noise source. Also, the switching power supply wall warts were rather awful. My standard test is to fire up my antique IC-735 HF xceiver, attach a long length of RG-58c/u to the antenna with a resonant loop at the end, tune it to 100KHz (as low as it will go), and sniff around the house.

What you'll see on a spectrum analyzer.
<http://www.prc68.com/I/Spec_0002.shtml>
If you're thinking of removing all that junk with a 5Hz wide digital filter in software, please note that you'll need to have the input A/D handle the total power of almost all that junk. Also, the amplifier that you're trying to avoid between the antenna and A/D will also need to be rather linear, and therefore rather high power, in order to avoid producing more spurious junk via intermodulation products.

So that's how they change daylight savings time. If I had known, I would have stayed and watched. Thanks for the tip.

The depth of the notch seems to be less as the antenna shrinks in size. I'm not sure about this as I haven't attempted to recently model a 60KHz magnetic loop with 4NEC2, but that's what my tinkering shows. If there were a deep notch, most of the home "atomic clock" receivers would be orientation sensitive and I would expect warnings in the docs.

Well, you have to start somewhere, and an ideal receiver is a good place to start. The advantage is that reality only makes everything worse, never better. You should be able to build the BPSK demodulator, and then use a PC to decode the data. I've seen several such programs that do not require I/Q outputs. Here's one based on

FreeBSD intended to sync the system clock to WWV/WWVH:
<http://docs.freebsd.org/doc/4.0-RELEASE/usr/share/doc/ntp/driver36.htm>
I'm sure there are others.

>In my case I am not worried that the SNR isn't better, I just need a
>strong enough signal to drive the LVDS input.

Gain at 60KHz is very cheap. Watch out for overload issues. If you design it to work at full scale with whatever you get at 50uV/m, and the signal climbs to 100uV/m, your input A/D isn't going to be very happy. AGC will help, but I don't think it will be needed if you calculate your signal levels so that the A/D input amp isn't clipping.

Out of service for a day. It seems that about 30 years of chemistry experiments has finally destroyed much of the kitchen sink plumbing. I hate plumbing.

In Europe we have DCF-77 which is at 77.5 kHz.
The trouble receiving it is similar to WWVB.
I have several clocks in the house but some of them have only very
weak sync. Also, to save battery they only sync once every 12 hours
or so. At DST change, they may display the wrong time for a couple
of days, especially the one in the kitchen. I need to relocate it
to a place where I know there is better signal.

The problem is (harmonics of) switching power supplies here as well.
Once I had a big open-frame SMPS that I used to power my radio equipment
and that switched around 25 kHz. Under the right circumstances, the
3rd harmonic wiped away all DCF-77 receiving within 5 meters or so.
Old CRT computer monitors also were problematic.

I presume you have some specific needs, low power being among them,
to stay focussed on WWVB for your clock sync. Most computer users
would use GPS now, or simply sync via the internet. GPS has a different
receiving conditions problem, but at least it isn't so much affected
by prominently present local interference.

Of course a GPS receiver requires a lot more power than a WWVB receiver,
although this has come down over the years.   Using some sort of on/off
switching (syncing with the received time and then having it run free
for some time) may help a bit, the battery powered radio clocks do
that as well.

I can't say I understand the distinction.

This is ok so far.

I don't follow how any of this has to do with a difference in the
transformers. Bth transformers obey both equations you have presented.
Both transformers change the voltage as well as the current, no?

> Also, note the difference in the number of turns, voltage transformers
> have a lot of turns and current transformers have few turns.

I don't see how this follows from what you have written. What is there
about these two transformers that define the number of turns? The
current transformers I am interested in using use 100 or 300 turns. Is
that a lot or just a few?

What I have gotten from this is that Tim's original usage of the terms implies how the transformer is connected to the antenna. As you say, a voltage transformer will be connected across the coil in parallel with the capacitor and a current transformer will be connected in series with the antenna and capacitor.

I was planning to use the antenna wire itself in the middle of the antenna loop as the primary of the transformer. So I guess that will be a current transformer. I may try a simulation to see just what happens with a parallel connection.

Yes, like I said, not much in this house and there is not much near it. I have a laptop and my roommate (when he is here) uses one along with an iPhone. I suppose they might generate some noise, but he turns off his laptop at night I'm sure. Otherwise, there just isn't much in the house that isn't 10 or 15 years old. I have a car radio on a linear regulator and an electric shaver that sits charging (part of the time). Otherwise it should be pretty quiet electrically here.

I'm not sure why you used 1900 meters for the distance. I also don't
get why you used 5 ohms for the receiver input impedance.

There's just not much of that in this house.

What A/D? Oh, you mean the LVDS input. How do you saturate a 1 bit ADC?

I wouldn't say the *depth* of the null depends on the size of the loop.
I think it is a null with a Q, much like a resonance peak, but a null
of course. The smaller the loop, the sharper the null like a high Q
resonance, so the orientation becomes very critical. In theory at
least, the null is perfect, 0 signal.

> I'm sure there are others.

PC?!!! We don't need no stinking PCs! The demodulator is simple. The
signal is beat with a quadrature reference which will bring it down to 0
Hz. This gives two values, a sin and a cos signal. Take the ratio and
do an arcTan. This is a simple table lookup made simpler by some
convenient math relations. For example, the table only needs to cover
0� to 45� since the ratio can be swapped for 45� to 90� and the other
three quadrants distinguished by the sign bits.

Some folks would like you to think this has to be done like a high
fidelity receiver, but it only has to pull the signal out of the noise.

If this is *signal* strength then it won't matter. If this is noise you are talking about, I'm not sure it will be a problem, the signal will still be able to be dug out with enough processing gain.

Not much fun, but then what it if you have to work on your knees and get dirty? I don't enjoy working on my car anymore either.

Hi
Such effects do exist with any switches.
Behaviour of filters with a very mismathed input and output impedances is
very
unpredictable.
For switching IF filters logic would be to cascade them and shunt the too
narrow ones.
I have never seen this implemented.

14p DIP reed relays (2 relays / package) already suggested by their
construction, to short circuit filters not in use, in order to prevent spurious
responses. That was in the 80s. Too expensive for mass production though.

>Behaviour of filters with a very mismathed input and output impedances is
>very
>unpredictable.

What matters is the spurious response via parasitic and other undesirable
capacitances or common inductances.

>For switching IF filters logic would be to cascade them and shunt the too
>narrow ones.
>I have never seen this implemented.

With each IF filter adding ~6 dB loss, either something has to be done about
gain correction or S-meter display. I built the 455 KHz IF with 2 filters for
each bandwidth and a low gain (~12 dB max) dual gate mosfet amplifier between
the filters. Switching bandwidth included removing the supply of the mosfets not
in use. The result was excellent - I verified that with a spectrum analyzer.

>
> Sure. If you bring the 10p over to the primary, it looks like 10p * (30m / 5u), or whatever the ratio was (I don't have it in front of me now), in parallel with the primary. (I misspoke earlier, you can safely ignore Ls, because k = 1. There's no flux which is not common to both windings.)

Reflecting the capacitance through the transformer changes it by the square of the turns ratio assuming the coupling coefficient is sufficiently high. I am simulating K at 1.

This is also true for the inductance, but in the opposite manner. So going from the 25 turn side to the 1 turn side, the effective capacitance is multiplied by 625 and the effective inductance (or resistance) is divided by 625. In fact, in LTspice you indicate the turns ratio by setting the inductance of the two coils by this ratio.

I see now that the reflected secondary capacitance is in parallel with the primary, rather than in parallel with the primary capacitor. That explains a lot... I'll have to hit the books to see how to calculate this new arrangement. I found a very similar circuit in the Radiotron Designer's Handbook. In section 4.6(iv)E on page 152 they show a series-parallel combination that only differs in the placement of the resistance in the parallel circuit. It need to be placed inline with the inductor... or is placing it parallel correct since this is the reflected resistance of the secondary? I'll have to cogitate on that a bit. I'm thinking it would be properly placed inline with the capacitor in the reflection since it is essentially inline in the secondary. Either way I expect it will have little impact on the resonant frequency and I can just toss all the resistances simplifying the math.

I do see one thing immediately. The null in Vcap I see is explained by the parallel resonance of the secondary cap with the secondary inductor. If you reflect that cap back to the primary in parallel with the primary inductor (resonating at the same frequency) it explains the null in the capacitor C1 voltage I see. C2' (reflected) and L1 make a parallel resonance with a high impedance dropping the primary cap current and voltage to a null. This null is calculated accurately.

What I need to do is change the impedance equation from Radiotron to one indicating the voltage at Vout relative to the input signal. I think I can do that by treating the circuit as a voltage divider taking the ratio of the impedance at the input versus the impedance at the primary coil. No?

I see, L1 and L2 are in parallel because the impedance of Vsrc is very low. That is not the circuit I am simulating however. The loop of the antenna and the loop of the inductor are in series along with the primary capacitor. I'm not sure what the resistor is intended to represent, perhaps transformer losses? The resistance of L1 was added to the simulation model along with the resistance of the secondary coil which you have not shown... I think. It seems to me you have left out the tuning capacitor on the primary.

> The actual transmitter is most certainly not a perfect current source inductor, nor is the receiver lossless. This simulation has no expression for radiation in any direction that's not directly between the two antennas: if all the power transmitted by the current source is reflected back, even though it's through a 0.1% coupling coefficient, it has to go somewhere. If it's coming back out the antenna, and it's not being burned in the "transformer", it's coming back into the transmitter. This is at odds with reality, where a 100% reflective antenna doesn't magically smoke a distant transmitter, it simply reflects 99.9% back into space. The transmitter hardly knows.

Interesting point. My primary goal with this is to simulate the resonance of the tuning so I can understand how to best tune the circuit. In many of the simulations I run the Q ends up being high enough that a very small drift in the parasitic capacitance on the secondary detunes the antenna and drops the signal level. It sounds like there are other losses that will bring the Q much lower.

I would also like to have some idea of the signal strength to expect. My understanding is that the radiation resistance of loop antennas is pretty low. So not much energy will be radiated out. No?

You make it sound as if in the simulation, even with a small coupling coefficient all the energy from antenna inductor will still couple back into the transmitter inductor regardless of the K value. Do I misunderstand you? It seems to result in the opposite, minimizing this back coupling. Or are you saying that the simulation needs to simulate the radiation resistance to show radiated losses?

> In this example, if you set R very large, you'll see ever more voltage on the output, and ever more current draw from Vsrc. You can mitigate this by increasing L1 still further, but the point is, if the source and load (R) aren't matched in some fashion, the power will reflect back to the transmitter and cause problems (in this case, power reflected back in-phase causes excessive current draw; in the CCS case, reflected power in-phase causes minimal voltage generation and little power transmission).
>
> Power is always coming and going somewhere, and if you happen to forget this fact, it'll reflect back and zap you in the butt sooner or later!
>
> Tim

Actually, my goal was to build the receiver and I realized that my design would require the largest signal I could get from the antenna. I never realized I would end up having to learn quite so much about antenna design.

I've been planning to create a PCB with lots of options so I can test a number of configurations. Nothing about the simulation makes me doubt the utility of this idea.

One thing that continues to bug me is that nothing I have seen gives me a hint on how to factor in the distributed capacitance of the antenna shield. I am using RG6 with 16 pF/Ft and likely will end up with 100 foot of coax total. At some point I'll just have to make some measurements and see what the real world does.

You'll be much better off simply using the conventional radio approach than trying to simulate everything, especially when circuit equivalents are nebulous like this.

After all, if you can't quite tell what it *should* look like, how would you know if you could implement your model once you've found a satisfactory result?

What kind of antenna are you looking at, loop? The first thing to know about a loop is, if it's a very small loop (I'm guessing, at this frequency, it is), its radiation resistance is very low, meaning, you can treat it as a nearly pure inductance (Q > 10 I think is typical), and its bandwidth (even with a matched load) will be correspondingly narrow.

The nature of the incoming signal could be modeled as a voltage or current source; how doesn't really matter, because it isn't really either, it's a power source that couples in. Again, you don't have voltage without current and vice versa, it's all about power flow, and the matching that allows the power to flow.

Since the loop is inductive, your first priority is to resonate it with a capacitor at the desired frequency. This will require a very precise value, and even for a single frequency, may require a variable capacitor to account for manufacturing tolerances. In the AM BCB, a Q of 10 gets you 50-160kHz bandwidth, so you only get a few channels for any given tuning position. And if the Q is higher, you get even fewer.

Now that you've got a high Q resonant tank, you can do two things: couple into the voltage across the capacitor, or the current through the inductor. You need only a small fraction of either, because the Q is still going to be large. This can be arranged with a voltage divider (usually the capacitor is split into a huge hunk and a small variable part, e.g., 300pF variable + 10nF, output from across the 10nF), a transformer (a potential transformer across the cap, or a current transformer in series with the inductor), an inductive pickup (the big loop carries lots of volts, but you only need a few, so a much smaller loop can be placed inside the big loop), an impractically large inductor (like in my example circuit, which models radiation resistance as a parallel equivalent), etc. Whatever the case, you need to match transmission line impedance (e.g., 50 ohms) to radiation resistance (whichever series or parallel equivalent you have).

Once you get the signal into a transmission line, with a reasonable match (Z ~= Z_line, or alternately, SWR ~= 1), you can do whatever you want with it. Put it into an amplifier (don't forget to match it, too), etc. Yes, you're going to have funny behavior at other frequencies, and if you're concerned about those frequencies, you'll have to choose the coupling circuit and adjustable (or selectable) components accordingly. But for the most part, you completely ignore any frequency that you aren't tuning for, usually enforcing that concept by inserting filters to reject any stragglers.

Example: suppose you have a loop of 5uH and need to tune it to 500kHz. It

has a reactance of 15.7 ohms. Suppose further it has Q = 20. The ESR
(not counting DCR and skin effect) is X_L / Q, or 0.78 ohms; alternately,
the EPR is X_L * Q, or 314 ohms. The capacitor required is 20.3nF. If we
use a current transformer to match to a 50 ohm line, it needs an impedance
ratio of 1:64, or a turns ratio of 1:8. If we use a voltage transformer,
it's of course 8:1. (A capacitor divider is unsuitable for resonant
impedances less than line impedance, since it can only divide the
impedance down. If the inductance were a lot larger, it could be used.)
To a rough approximation, a smaller inductive loop, of 1/8 diameter of the
larger, I think, would also work.

Magnetic fields are hard to shield.  In a power transformer, it would be
more effective to use more iron in the core and more turns in the
windings to reduce the flux density.  While a steel shell probably
provides a limited amount of shielding, it's more likely there to provide
mechanical protection.  At the same time, it gives a better appearance.

Maybe protect the windings, too.

Definitely, nobody specifies between just a frame transformer and a metal cased one. I'd honestly never given it any thought. Bigger transformers often seem to be more likely to be cased in metal, so structural support may apply. I don'thave it handy, but that one Hammond catalog I got decades ago I think offered the same voltage/amps in open frame and metal enclosed versions, which would add more to "looks" than anything else.

I have heard of the leads breaking off open frame transofrmers, right where they come off the winding, which isn't a good thing. Any metal cased transformer, I don't recall that happening, which may mean there is some sort of terminal block inside, rather than just bringing out the wire. Certainly I've seen open frame transformers where the wire from the windings are brought to terminal points, which helps protect the winding wire. it also exposes the line voltage going into that transformer, which in some cases can't be a good thing.

Michael

>
> What's the issue?

290 kHz matches the calculations you just gave. But 290 kHz is the null
(or dip as you call it) from C2 and L2 (or L1 and C2 reflected with N^2).

I thought I wasn't getting the 60 kHz resonance, but I was mistakenly
adding the two capacitances together. So that is closer. Using L3+L1
with C1 I get 60.46 kHz while it is measured at 60 dead on in
simulation. That's nearly a 1% error.

I solved the equations finally. I found some info on the impedance of
series and parallel circuits. With that info I wrote the equation for
the ratio of Vout/Vin and found the roots. Turns out it is not so bad.
  The equation is a fourth order, but it has no x^3 or x^1 terms and so
is actually a quadratic of x^2. Solving the quadratic gives the exact
figures for 60 kHz and 393 kHz peaks. Since this is from taking the
square root of x^2, there are also solutions at the negative values... duh!

Reflecting C2 through the transformer to create C2', the two nulls I
found can be calculated by the resonance of L1 and C2' (290 kHz null on
C1) or L1 with C1 and C2' (96500 Hz null on L3).

Or if it's installed in a perforated enclosure.  Paper and wire
varnish
don't protect as well against sharp objects.

I have seen chrome in imported equipment where everything is chrome
plated.  I've also seen some with a finish that looks sort of gold
colored.  Perhaps it is some kind of zinc chromate coating.

I don't know what you mean by the "conventional radio approach".

> you know if you could implement your model once you've found a
> satisfactory result?

I was simulating a specific circuit for a specific purpose. I got the answer I was looking for.

> bandwidth (even with a matched load) will be correspondingly narrow.

Yes, I plan to use a shielded loop. I have found some contradictory info on the effectiveness of the "shield". One reference seems to have measurements that show it is primarily E-field coupled in the longer distance portion of the near-field.

I am aware of the low radiation resistance and have not included that factor in my simulation. The Q of just the antenna loop is around 100 as calculated from the ratio of reactance to resistance.

> The nature of the incoming signal could be modeled as a voltage or current
> source; how doesn't really matter, because it isn't really either, it's a

> power source that couples in. Again, you don't have voltage without current and vice versa, it's all about power flow, and the matching that allows the power to flow.

A friend in a loop antenna Yahoo group suggested the use of the transformer coupling with a low k to model the signal reception.

> Since the loop is inductive, your first priority is to resonate it with a capacitor at the desired frequency. This will require a very precise value, and even for a single frequency, may require a variable capacitor to account for manufacturing tolerances. In the AM BCB, a Q of 10 gets you 50-160kHz bandwidth, so you only get a few channels for any given tuning position. And if the Q is higher, you get even fewer.

Yes, that is loop antenna 101 I think. It was when I added a coupling transformer with 100:1 turns ratio that I was told I needed to consider the parasitics. I have found it is not useful to go much above 25 or 33:1 on the turns ratio. I am receiving a single frequency, 60 kHz. There is no need for a wide bandwidth. Ultimately, I prefer a Q of > 100 for the higher gain. If it gets too high, the off tuning by variations (drift) in the parasitic capacitance affects the antenna gain appreciably.

> Now that you've got a high Q resonant tank, you can do two things: couple into the voltage across the capacitor, or the current through the inductor. You need only a small fraction of either, because the Q is still going to be large. This can be arranged with a voltage divider (usually the capacitor is split into a huge hunk and a small variable part, e.g., 300pF variable + 10nF, output from across the 10nF), a transformer (a potential transformer across the cap, or a current transformer in series with the inductor), an inductive pickup (the big loop carries lots of volts, but you only need a few, so a much smaller loop can be placed inside the big loop), an impractically large inductor (like in my example circuit, which models radiation resistance as a parallel equivalent), etc. Whatever the case, you need to match transmission line impedance (e.g., 50 ohms) to radiation resistance (whichever series or parallel equivalent you have).

Transmission line? What transmission line? The antenna is directly connected to the receiver which has a very high input impedance. Why do I need to consider radiation resistance? I have not read that anywhere.

> Once you get the signal into a transmission line, with a reasonable match (Z ~= Z_line, or alternately, SWR ~= 1), you can do whatever you want with it. Put it into an amplifier (don't forget to match it, too), etc. Yes, you're going to have funny behavior at other frequencies, and if you're concerned about those frequencies, you'll have to choose the coupling circuit and adjustable (or selectable) components accordingly. But for the most part, you completely ignore any frequency that you aren't tuning for, usually enforcing that concept by inserting filters to reject any

I'm not familiar with the concept of voltage transformer vs. current
transformer. How do you mean that?

How did you get the 1:64 impedance ratio and the 1:8 turns ratio? I
don't follow that. Are you saying the line impedance should match the
ESR? Why exactly would it need to match the ESR?

I trust this resource:
http://vk1od.net/antenna/shieldedloop/
He's got gobs of analytical articles.

> Yes, that is loop antenna 101 I think. It was when I added a coupling transformer with 100:1 turns ratio that I was told I needed to consider the parasitics. I have found it is not useful to go much above 25 or 33:1 on the turns ratio. I am receiving a single frequency, 60 kHz. There is no need for a wide bandwidth. Ultimately, I prefer a Q of > 100 for the higher gain. If it gets too high, the off tuning by variations (drift) in the parasitic capacitance affects the antenna gain appreciably.

High Q isn't the goal, high radiation resistance is -- the bigger the loop, the better it couples with free space, until it's a wave length around.

You can go ahead and make a teeny coil out of polished silver litz wire, and push the Q up into the hundreds, but all you'll see is internal resistance, hardly anything attributable to actual radiation. Since the losses dominate over radiation, it makes a crappy antenna. But you know that from looking at it -- it's a tiny lump, of course it's not going to see the outside world.

It is true, however, that a small coil, with low losses, will have low noise. AM radios rely on this, which is how they get away with tiny hunks of ferrite for picking up radio.

Of course, it doesn't hurt that AM stations are 50kW or so, to push over atmospheric noise.

> Transmission line? What transmission line? The antenna is directly connected to the receiver which has a very high input impedance. Why do I need to consider radiation resistance? I have not read that anywhere.

Ok, then you can merge the matching transformer, transmission line and receiver input transformer into one -- an even larger stepup into whatever

impedance it's looking at (what's "very high", kohms? Mohms?) will get you
that much more SNR.

> I'm not familiar with the concept of voltage transformer vs. current
> transformer. How do you mean that?

Current transformer measures current (its winding is in series), potential
transformer measures voltage (in parallel).

> How did you get the 1:64 impedance ratio and the 1:8 turns ratio? I
> don't follow that. Are you saying the line impedance should match the
> ESR? Why exactly would it need to match the ESR?

ESR (and Q) measured on the coil corresponds to radiation resistance
(series equivalent) *plus* internal losses (also series equivalent). You
can't separate the two components, so you can only get the best power
match by the good old impedance theorem.

~1:64 is 50 ohm / 0.78 ohm, and N2/N1 = sqrt(Z2/Z1), or 8:1 turns ratio.

Tim

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team.  We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

 radio/personal-intro
 Subject: Guide to the rec.radio Newsgroups

Please note that high Q will destroy the modulation sidebands on
the signal you're listening to.

In aviation, there are non-directional beacons which are transmitting
in a frequency around 300 kHz (1 km wavelength). The antennas cannot
obviously be of efficient length (250 m / 800 ft), so they are short
(20 m / 70 ft) force-tuned to the transmitting frequency. This creates
so high Q that the identification modulation sidebands for the customary
1050 Hz audio do not fit in, and the ID is modulated using 400 Hz audio.

I appreciate the advice from everyone, but much of it is not in the proper context and way off target. "High" Q is how high? Where are the modulation sidebands? My point is that I have already considered this. The modulation sidebands of this signal are on the order of low 10's of Hz. This signal is modulated at a 1 bit per second rate. I will be demodulating a 30 Hz sample rate. So a bandwidth of 100 Hz is plenty which corresponds to a Q of around 500.

I said I was looking for a Q over 100, maybe I should have said a Q of a bit over 100. By the time it gets to 300 it is to peaky to hold a tune setting. That is the problem I am concerned with.

Ok, but that is nothing like my application, receiving WWVB.

I'm not clear on why you keep referring to radiation resistance for a
receiving antenna.  Does this result in a larger received signal?  I am
concerned with maximizing the voltage at the input to the receiver.

> You can go ahead and make a teeny coil out of polished silver litz wire,

I have no idea why you are talking about Litz wire and tiny coils. I
never said I was looking to maximize the Q. I said I wanted a Q of over
100. I should have said, slightly over 100. A higher Q clearly does
increase the voltage on the input in my simulations. Is there something
wrong with my simulations?

Yes, a higher stepup ratio gets larger signal up to a point. That point
is determined by the parasitic capacitance of the receiver input. That
capacitance is reflected back through the transformer and affects the
antenna tuning. In my simulations it creates a filter with two resonances.

>> I'm not familiar with the concept of voltage transformer vs. current

Series and parallel with what? I'm not following this. I have trouble
with series and parallel resonance, but I'm starting to get the concept.
Sometimes it is hard to tell how a circuit is being stimulated.

Internal losses of what? How do you determine the internal losses?

> ~1:64 is 50 ohm / 0.78 ohm, and N2/N1 = sqrt(Z2/Z1), or 8:1 turns ratio.

Ok, so you were matching the hypothetical ESR to the hypothetical line impedance.

I'd still be wary of high Q. The antenna is, by definition, in close interaction with its surroundings, and a high-Q thing is quickly detuned.

At those low frequencies, the atmospheric and other outside noise is far larger than the internal noise of an amplifier, so in my opinion, the way to go is a loop tuned to 60 kHz with as low Q as easily comes without extra attenuation and a good pre-amplifier. The preamp can then contain a tuned interstage tank for interference suppression.

I understand. But this is intended to be *very* low power and I haven't
found an amp I can use that is in the low double digits uW power
consumption range. I plan to use no amp and go straight to digital.

I don't think that's possible. Unless your input A/D converter can
operate in the microvolt region, it's going to have a difficult time
dealing with the low signal levels. Fortunately, WWVB is on-off
keying with no amplitude component, so there's no incentive to add an
AGC controlled input amplifier in order to maximize the A/D converters
dynamic range. Still, you need to work with something more than a few
bits above the noise level. Incidentally, after midnight, you WWVB
delivers about 100 uV/meter or more to continental US.
<http://tf.nist.gov/tf-cgi/wwvbmonitor_e.cgi> (Java required)
I've seen it strong enough that I can see the waveform on an
oscilloscope after a 60Khz passive filter.

As for bandwidth, the code is sent at 1 baud (1 bit/sec) which
produces about a 2Hz occupied bandwidth. Therefore, the maximum Q of
the antenna would need to be:
  60Khz/ 2Hz = 30,000
before the antenna bandwidth becomes a problem.

Incidentally, while Googling away merrily, I found this on SPICE
models for a loop antenna. It's not quite in your xformer format, but
it might be useful:
<http://sidstation.loudet.org/antenna-theory-en.xhtml>
I won't pretend to understand what the author is doing until I read it
more carefully.

Incidentally, I used a WWVB code simulator driving a signal generator
to test my receiver:
<http://www.leapsecond.com/notes/wwvb2.htm>

If you're seriously into this, I suggest asking questions on the
time-nuts mailing list:
<https://www.febo.com/mailman/listinfo/time-nuts>

> I'm not clear on why you keep referring to radiation resistance for a receiving antenna. Does this result in a larger received signal? I am concerned with maximizing the voltage at the input to the receiver.

You're also not concerned about that -- you're concerned about maximizing SNR at the receiver.

A Q of a million will get you gobs of "gain", but if it doesn't couple into free space, it's only the thermal noise of the loss generating that signal.

An antenna with high (expressed as ESR) radiation resistance might have a modest Q, but gives far better SNR because it couples to free space.

Raw volts don't matter, you can always throw more amplifiers at it (as long as they don't corrupt the SNR also!).

> Yes, a higher stepup ratio gets larger signal up to a point. That point is determined by the parasitic capacitance of the receiver input. That capacitance is reflected back through the transformer and affects the antenna tuning. In my simulations it creates a filter with two resonances.

Oooh, capacitance! I like capacitance. Capacitance is easy to cancel...inductors are good at that. :)

What's a nearby inductor working against that capacitance? The current transformer in your simulation, if its inductance can be controlled, would be an excellent candidate. The circuit effectively becomes a double tuned interstage transformer, like,

http://www.jrmagnetics.com/rf/doubtune/doubccl_c.php
This is two resonators coupled with a cap, but any coupling method will do. Capacitive, magnetic (putting the coils end-to-end) or electromagnetic (coils side-by-side) coupling does equally well; normal arrangements have them all in phase, so in practice, unshielded coils will need smaller coupling capacitance than designed, etc.

If you line up that 10p resonance with the operating frequency, you should get gobs more gain. In fact, because the reactances cancel, the driven impedance will be much higher than you were expecting, and so will the gain. The CT might go from, say, 1:8 up to, who knows, 1:20? 1:100?

The bandwidth of that coupling (not necessarily of the antenna itself, so they should be similar bandwidths) is determined by the coupling coefficient (in the coupled-inductors case, simply k) and Q of the components.

If your receiver datasheet specifies an equivalent input circuit, you might be able to estimate the equivalent loss and optimize gain.

Hi,

I would like to know if it is possible to modify (simply) a transistor
radio so it can pick up frequencies on other ranges. I particularly
want 300 to 400 khz FM.

Cheers, Camerart.

It would not be very easy to do that.  It would be easier to take some of
the ICs that are designed around those frequencies and build a FM receiver.

It is easy to modify a FM receiver to go from about 50 to 120 MHZ.  Outside
this range requires more work.

What are you trying to do?

There's virtually nothing at 300 to 400KHz, and it won't be FM. So I don't know if you typed that wrong, or have some other scheme in mind.

There was a time when retuning FM broadcast radios was't uncommon, move them to the "public service band" or the amateur 2M band. Shorten the front end coils (or spread them out more, they would generally be air wound) or see if the trimmer capacitors are such that they can returne to the other range (higher in frequency). But there were problems. The most important is that FM broadcast is wideband FM, while the 2way of the public service band or 2m amateur is narrow band. At best little audio would be recovered. The FM broadcast signals are wideband, so the receivers are wideband, so even if you could recover the modulation, adjacent signals could interfere.

If you had a need for a wideband FM receiver, then yes, the front end could be modified or a converter put ahead of it.

But it's still not clear what you want. The 300 to 400KHz in your post suggests you want to add an FM detector to an existing radio, that happens to have a 455KHz or so IF. If that's the case, find something with a matching IF that is for FM. COrdless phones, better baby monitors, better 49MHz walkie talkies, old clunky cellphones, they all have FM IF strips, and generally landed at 455KHz or 450KHz. You could extract the FM IF strip and use it as a module. WHether it's 455KHz or 450Khz would vary on the design, you might have to poke around, or make do witha 450KHz IF strip (which may not matter, since many existing receivers in the solid state age use 450KHz anyway). Then just connect it to the existing radio's IF strip.

More recent equipment is likely to use some other scheme, or use such tiny and high density components that you can't get anything useable out of it.

An FM radio usually has an IF of 10.7 MHz so in order to use it between 300 and
400 KHz would require to change the value of the LO to a fixed 11.05 or 10.35
MHz, and to change the input circuit to a bandpass for the desired range.
Problem is that the LO will be relatively close to the IF and could swamp it,
especially when the mixer doesn't suppress the LO (like in a DBM) and the IF
filters don't have a good enough stopband rejection. It probably is simpler to
use a dedicated FM demodulator IC like (antique) TBA120, CA3089 etc. as their
sensitivity will be high enough. At those low frequencies, in principle it is
also possible to use the four CMOS EXOR (or even NAND) gates, as preamp, phase
detector and VCO, for a comparable sensitivity.

You are sure you didn't mean to write "300 to 400 MHz FM"?

Thanks

That is a real old web site - saw it many times before.

The problem is - not many safety razor blades anymore - other then
cardboard cutters or utility knife blades.

With the commercial broadcast bands going digital - it is hard to find a
good signal anymore.. Even KDKA is hard to hear at night with the
digital signal of another station in about the same exact place.

Hi,

You are absolutely correct. The way things are changing, I wonder if
future generations will appreciate old tech!

Thanks.

Regards,

Nandu.

Yes, noise can be a problem I understand. I am hoping to get the bandwidth down much more than most receivers so the noise won't be so big a factor. With a signal bandwidth of a handful of Hz, it should be possible.

> The problem is (harmonics of) switching power supplies here as well.

Yes, this is actually a demo to illustrate how low power an FPGA can be. An FPGA will run both the clock and the receiver and use power from the environment rather than batteries.

> Of course a GPS receiver requires a lot more power than a WWVB receiver,

> that as well.

Yes, the receiver itself only has to run part of the time, >10% perhaps. The clock has to run 100% obviously. Interesting enough, the FPGA has a base power consumption (0 Hz) of nearly 50% of the power budget and I am confident it will still make the goal.

(Quick reply... still working on my expanding plumbing problem).

The 1900 meters is because I screwed up. It should be about 1900Km
from San Francisco to Denver. However, any distance greater than zero
will suffice for this calculation. The controlling numbers are the
100uV/m field strength, the -3dB antenna gain, and the receiver
bandwidth (5Hz). All of the other numbers can change without having
any effect on the recovered power. The 5 ohms rx input Z was because
the original antenna that I used, was a base loaded 100ft "whip"
antenna with a rather impedance. I couldn't decide if the field
strength to receive power form wanted the antenna impedance before the
50 ohm matching network, or if it treated the matching as part of the
antenna. I flipped a coin and chose 5 ohms. I guess for a loop,
100-200 ohms would be more appropriate. Again, the value makes no
difference in the calculations.

(Back to plumbing and fixing the 48" farm jack that my neighbor
borrowed and returned looking like a pretzel).

But this is all relative. My first "atomic clock" ran on the same set of AA batteries for five or six year, and the second set is now four years old. The Centrios "atomic" wall clock (digital) uses one AA battery, I'm not sure how long that's been in. My watch is a Casio Waveceptor, 3 or 4 years old, which has a solar cell to refresh the battery and it's never been less than fully charged.

Fice or six years seems almost as good as 'shelf life" and while I had a small LCD clock (not "atomic") that seemed to run a long time on an AA cell, I'm not sure it was all that lower current than the 'atomic clock".

I'm more impressed by the clock running off 1.5v than that the batteries last reasonably long.

These things are amazing, considering the effort people used to put into making WWVB receivers, admittedly the "atomic clock" craze has very much benefitted from the power increase at the station.

I do orient them, but here in Montreal it's the rare night that they don't sync up, and I don't think since I've had more than one that they all miss

```
the sync.

I'm interested in putting together a 1.25m repeater sometime in the next year and I'm casting about for possible solutions. It seems that I have two routes: 1) modify a GE Mastr II or 2) find a SEA ESP-1000. Using modified GE Mastr IIs is a well-regarded way of doing it, but I am unfamiliar with the SEA ESP-1000. I'm slightly inclined to get one of those because it seems that I can get one all ready to go for slightly more than an unmodified Mastr II AND it's all in a convenient rackmount chassis.

There seems to be a dearth of information on the ESP-1000 though. Can I get some pointers to manuals or whatever else may be helpful?

Very true. A transformer is a transformer and all obey the same equations. But that doesn't prevent real transformers from being called voltage or current transformers. And it doesn't prevent them from being constructed differently or their outputs behaving differently.

Part of the problem is that real-world AC current sources are rather rare. So current transformers are seldom connected as shown in the example that was given. They are usually connected in series between a voltage source and some other load, frequently for the purpose of measuring the current. This is what gives rise to the different constructions.

Voltage transformers have to withstand the source voltage across their primaries so they have to have enough turns to prevent the core from saturating. The actual number of turns depends on the voltage, frequency, and core size and material.

Current transformers are generally constructed to have minimum primary voltage drop so they have few turns on the primary, frequently only one. Considerations of frequency, core size and material still apply, of course. The differences in the name and construction are determined by the intended use. Many current transformers consist of a secondary winding on a toroidal core. The primary is supplied by the user by passing a wire through the hole in the core; thus, one turn.

For a loop antenna with a secondary, there is voltage across the antenna winding and current through it. Which is the secondary responding to? The current, since this is what produces the magnetic field. But, since this current is flowing through some number of turns and developing a voltage, it could also be considered a voltage transformer, which is why I said the distinction is blurred.

That is simply because that System caused the SEA Group to be driven
into Bankruptcy, and nearly BROKE the Marine Division for a decade.
They are just now coming out of that slump. There are NO services
available from SEA, for ANY of those Units currently, and it is not
likely that there ever will be in the future. Al the Engineering Talent
has moved on, to other employers, or reTIRED. Just Say'en.. buy a couple
used Kenwood 1.25 Meter Radios and combine them in a Repeater Package.
that is you best bet for a supportable repeater.

Posting-Frequency: posted quarterly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently listed in the latest version of the "List of Big Eight Newsgroups" which is crossposted monthly to news.announce.newgroups, news.groups, and news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those that have been created consistent with the suggestions in "So You Want to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either "radio.amateur" or "ham-radio" in their names, including uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved newsgroups up-to-date. In case we have overlooked any, and a submission is rejected in error as a result, the rejected submitter can E-mail us at our administrative contact address (in the signature at the bottom of this article, and the default Reply-To for the rejection message) requesting that it be added, and that the article be approved. We may still choose to reject articles crossposted to any alt.* newsgroup with an inappropriate name, including obscene language, embedded name-calling, or encouragement of unlawful conduct.

Please direct any comments, questions, or criticisms to rec-radio-amateur-moderated-request@panix.com.

Summary: Recruitment announcement for ham-radio-related FAQ articles
Keywords: FAQ, Intro, amateur, ham, radio, recruit, recruitment

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted quarterly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

We are seeking a replacement maintainer for the following information bulletin formerly posted to rec.radio.amateur.* (and currently archived at http://www.faqs.org/faqs/radio/personal-intro/):

 radio/personal-intro
 Subject: Guide to the rec.radio Newsgroups
 Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)

```
 Last Posted: 9 Nov 2001 06:18:17 GMT
 Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article       |
is that it does not mention newer amateur radio newsgroups created since      |
it was written, including:                                                    |

 rec.radio.amateur.antenna                                                    |
 rec.radio.amateur.boatanchors                                                |
 rec.radio.amateur.dx                                                         |
 rec.radio.amateur.equipment                                                  |
 rec.radio.amateur.homebrew                                                   |
 rec.radio.amateur.moderated                                                  |
 rec.radio.amateur.space                                                      |
```

We are willing to provide any technical support necessary to get this article updated and automatically posted again at a regular interval. This would include establishing contact with the original maintainer for any necessary permissions. We would prefer to seek a new, dedicated maintainer at this time, rather than start auto-posting the original article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

AmateurLogic.TV Episode 55

Posted: 12 Jun 2013 03:00 AM PDT
http://www.podtrac.com/pts/redirect.wmv/www.amateurlogic.tv/transmitter/video/amlogic55_hi.wmv

Join Tommy and George as they relive their Excellent Adventure to Dayton Hamvention 2013. See what goodies we

brought home, George’s award, visit with Midnight Science, Joe Eisenberg K0NEB, Bob Heil K9EID, Ray Novak N9JA, and more.

We also announce the very lucky winner of the Field Day Giveaway contest
who’s receiving the Icom IC-7200 plus a

custom shop paint job and accessories from GigaParts, MFJ, and Heil Sound.

1:12:02 of Hamvention fun.

I recall, as a kid building a crystal set with my father.
we used a razor blade and a piece of pencil graphite, but never got it to work.

Later, with a "crystal diode"...it worked.

That was in 1957 and I still have the roll of wire were used to wind the coil

I found this

http://www.midnightscience.com/

So I guess there is still interest.

I am disappointed how there are so few good radio stations
but am very glad there is still NPR.

The real problem is the blades needed to be the Blue Blades. The other ones did not work well if at all. The blue was not paint, but some form of coating on the blades that kept them from rusting. I am not sure if it is similar to the blueing on guns or not.

I guess my childhood was more upscale. I remember having a tiny box that=
=20
was a crystal radio, complete with tuning dial. Maybe three inches long,=20
two inches wide? SOmething like that. It was a commercial product. I=20
have no idea if it was given to me, or I kind of used it because my father=
=20
had it. I can't even remember if it worked, I vague remember something=20
about clipping it to some metal frame, it had an alligator clip or two.
That had to be the early sixties.

Then in the early seventies, I had one of those plastic crystal radios, a=
=20
famous brand that doens't come to mind right now. A plastic case with a=20
slider for tuning, it had a piece of plastic in a circule, kid of like an=
=20
antenna, and I think the whole thing was blue. Only one earphoe, but soe=
=20
metal to hold it onto your head. That worked, though I can't remember the=
=20
antenna, and I seem to recall multiple stations at the same time, so not=20
much selectivity. I can't remember if that was a kit or not.

NPR is pretty interesting, but a mite too liberal for my standards, what I crave is some good old "Wolfman Jack" or even back a bit more, "Innersanctem" {sp?} and the squeaking door! XERF DelRio?

Yep.When I was a tad older I got, as a gift, one of those plastic
crystal radio kits, it was yellow.

The kid next door had one but his was "louder" than mine.

We experimented by swapping them and determining that it was not the
antenna, then we exchanged diodes and it turned out his diode was more
sensitive than mine.
```

A few years later I put one one stage transistor amplifier in it
and one of my friends wanted it so badly that I ended up swapping him
the radio for a huge box of parts.

Still plenty of stations that rebroadcast the old programs, but there is still nothing like live radio.

As to NPR and liberalism...they have /many/ good programs that have
nothing to do politics of any sort.

The sad part about the AM band is that at night when you can move out of=20
the local, so much of it is syndicated, and usually the same show or two.
The local stations love it, filler for a time when audience is down, but=20
no thrill when tuning the band.  There was a local station carrying "Coast=
=20
to COast" and every time it looked like the station was going to fail,=20
everyone would say "but what about Coast to Coast?" as if they couldn't=20
get the program so easily up and down the dial.  And when that station did=
=20
finally die, another station grabbed it right away.  Sad, that station=20
used to have local programming overnight.

For about a decade, I'd listen to WBZ out of Baston overnight if the local=
=20
overnight programming wasn't interesting that night, and the overnight=20
syndicated programming wasn't interesting.  WBZ has a good reach=20
overnight, and except for the fading, might as well be local then.  And=20
they know it, so they keep local programming (though often the guests and=
=20
calls are not just about Boston) and basically invite callers from all=20
over.

Reception got sporadic when a local station started up at 1040, just above=
=20
WBZ.

And I'm finding I'm not listening to much radio late at night.

   Michael  VE2BVW

The real problem is the razor blade had to be a "Blue Blade". I think they were only made by Gillette. This was not a paint, but some form of coating on the blade. Not sure if it was similar to the blueing on guns or not.

There was a local station carrying "Coast to COast" and every time it looked like the station was going to fail, everyone would say "but what about Coast to Coast?" as if they couldn't get the program so easily up and down the dial. And when that station did finally die, another station grabbed it right away. Sad, that station used to have local programming overnight.

I'm retired now, but when I was working I'd spend many hours a day driving and radio was very important to me. When radio pretty much died I stocked up on CD's but that was hardly the same...it got boring pretty fast.

Now, I find myself listening to a few hours of NPR on weekends and that's about it.

BTW: I am also a ham radio operator, but am no longer active.
I actually prefer Usenet.

Gun blueing is available at sporting goods and gun stores. Try it and
see if it works. Then tell us all.

There are atleast two kinds. One is the cold blueing that is just brushed on and wiped off. Not too much trouble, but the process I was thinking of is the hot blueing that is lots of trouble. Both are not worth my time or money to try just for a one time deal. Also I do not have any high impedance ear phones..hihi.

     My "foxhole" radio never did perform, but our nearest 500 watt station was 30 miles away.
The "Technical experts" writing of the day explained that the sensitive spot on the blue blade
was the fine line where the blue coating met the sharpened edge, where there was no blue.
Some think that since the bare sharpened edge tended to rust, there could have been a
crude junction of sort where the beginning of rust interacted chemically with something in the
blue substance. Wada U think?
     Later in life, maybe 1958 or so, Tucson Radio Supply had CK722's for less than $15. I
sprung for one, and tried the "Foxhole" thing again. Hey, it received several stations, one on
top of the other. You could see several AM towers nearby. Discovered that you didn't need
any razor blade at all. Just touching two slightly corroded copper wires together did the same
thing. All H*** broke loose when the price of surplus 1N23's got less than $2. Then selectivity

became an issue.

Old Chief Lynn, W7LTQ since 1948 (CW every month or so)

> blue substance. Wada U think?

It may also have been impurities in the blade that caused it to work.

While cleaning out things, I found some FAN brand blued steel blades, purchased by a late friend in the 1970's.

Maybe someday I will find someone local to me (Jerusalem) that wants
to try them. :-)

73,

Geoff.

I suspect there are still plenty of those Blue Blade razors at the back of
medecine closets.  Just pushed back as new things come in.  Or maybe the
time is passed, the blades have finally been tossed out "nobody will ever
use these".

Kind of like old radios, a period when they are common but nobody wants
them, then later they are desired, but attrition has reduced the numbers.

I have a turret drum that came from an old boatanchor (Murphy B40D).

Here is the front-end schematic:

http://www.portabletubes.co.uk/boats/schem1.jpg

I want to use this drum, but I want to employ transistors not valves.

Now today, I presume we can select a transistor to replace a valve, and it will be as good as, if not better than the old valve.

Any recommendations for suitable transistors for the local oscillator and the rf amplifiers? I'm trying not to have to modify the circuitry inside the drum.
Thanks.

Edit1: I'm thinking of using the hollow state circuitry after the Front-End. Best way to maintain the excellent audio of this receiver.

Edit2: I probably should draw out the tuned circuits only that are in the drum, post a link, and draw comments from that. Hopefully then a solid-state circuit can be built up.

That said, low impedances look like constant voltage sources or shorts, and carry a lot of current, while high impedances look like constant current sources or opens, and develop a lot of voltage. It's plenty of an approximation, but when you call an SWR < 1.2 a good match, it doesn't take much in either direction to produce that.

This is relative to system impedance (50 ohms, say), or if not in a system with characteristic impedances, then some factor of Zo (377 ohms). At "lumped constant" frequencies, Zo and SWR and stuff aren't all that relevant anymore, but the concepts always apply.

Here is a picture of the Front End as is and a picture with the RF
valves removed, but keeping (for now) the valve oscillator and mixer.

http://tinyurl.com/cp8cjcf

Section 1 includes drum pins 1-5, section 2 pins 6-10, section 3 pins
11-15 and oscillator pins 16-20.

Need modern transistor cicuit for the two RF stages.

kWc6:]B@48BMMk[XdoGBce;Xgdn:bFj4XL=f

G'day,

I have modified valve receivers in the past by using dual gate
mosfets.   In my parts drawer now, I still have a couple of MFE131s,
but any dual gate mosfet should work OK although now they are usually
only available in surface mount.

I also used single gate juunction fets for the oscillator and BFO.
The ones I have left are MPF102.

Fets work OK in valve receivers as RF ampliiers, but not well as IF
amplifiers where the primary of the IF tramsformer is shunted by the
low output impedance of the fet.

Your B40 circuit looks a little tricky to use.   Probably a resitive
load for the second RF amplifier would be OK (about 1K?) and I think
some experimenting with the oscillator circuit would be necessary to
find a satifactory arrangement.

Good luck.   I reckon you'll be busy for a while!

73, Ric,   VK7RO.

IMO it's an electrical code requirement or navy military designation every military grade transformer I've see is hermetically sealed

HeY OT:

I would use cascode mosfets 'cause that's the only way to eliminate the Miller
effect they used to make valve tuners that cascoded triodes then they invented
valves that could get around the miller effect so no more cascode triodes
IMO you could use matched GaS fets on 7pin or 9 pin valve plugs then in that
circuit your going to have to transform the low output impedance of the fets to
the high impedance out of the valves with a small toroid transformer
and bias the gates properly

Replacing valves with semiconductors can result in much better performance but
such an operation (optimizing for performance) rarely is a one to one
replacement.

>Any recommendations for suitable transistors for the local oscillator
>and the rf amplifiers? I'm trying not to have to modify the circuitry
>inside the drum.
>Thanks.

The two RF amps, the oscillator and the mixer could be replaced with BF981, a
dual gate mosfet that can be handled easily (no SMD). However, with a one to one
replacement, R113 & 114 have to be paralleled with an RF choke, >= 10 x the

inductance of the primary of TR103. R117 will have to be changed to a much smaller value, about 100 ohm. The second gate of the mixer BF981 must be connected to R120 / C130. No bias required. What has to be changed too is the supply voltage: for the BF981, Vds <=20V.

>

>solid-state circuit can be built up.

A better modification, based on the much higher gain from the BF981 as compared to the RF and mixer valves, would be to omit the 2nd RF stage IOW use TR102 and TR103 as bandpass filter instead. Instead of a BF981 as mixer, better performance could be obtained from a Gilbert cell with jfets like (matched) J310 or preferably, single gate small-signal mosfets like the BF987, because of its low Cgs of 35fF.

Regards,
Jan

List of Solutions Manuals and Test Banks=20
----------------------------------------

contact to :         mattosbw1@gmail.com                     mattosbw1(at)g=
mail.com

  =20

NOTE :  "THIS SERVICE IS NOT AVAILABLE FOR :   CHINA, INDIA, RUSSIA, PAKIST=
AN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MAL=
DIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is =
available (it is a partial list). Then if you need solutions manual only co=
ntact me by email.=20

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TE=
ST BANKS.

I do not review the forums, just send me an email. Please do not use emails=
 from servers "LIVE" , all they are take as spam emails in my inbox.

- Electrical, Electronics & Computer Engineering :
--------------------------------------------------
```

Solution Manual Design for Electrical and Computer Engineers (J. Eric Salt =
& Robert Rothery)
Solution Manual Electrical Systems Design (Theodore R. Bosela)
Solution Manual Electrical Engineering : Concepts and Applications S.A. Rez=
a Zekavat)
Solution Manual Electrical Engineering : Principles and Applications (3rd E=
d., Hambley)
Solution Manual Electrical Engineering : Principles and Applications (4th E=
d., Hambley)
Solution Manual Electrical Engineering : Principles and Applications (5th E=
d., Hambley)
Solution Manual Electrical Engineering : Principles and Applications (6th E=
d., Hambley)
Solution Manual Electronics (2nd Ed., Hambley)
Solution Manual Electronics : A Systems Approach (4th Ed., Neil Storey)
Solution Manual Introduction to Electronic Circuit Design (Richard Spencer =
& Mohammed Ghausi)
Solution Manual Foundations of Electric Circuits (J.R. Cogdell)
Solution Manual Foundations of Electric Power (J.R. Cogdell)
Solution Manual Foundations of Electronics (J.R. Cogdell)
Solution Manual Foundations of Electrical Engineering (2nd Ed., John R. Cog=
dell)
Solution Manual Essentials of Electrical and Computer Engineering (David V.=
 Kerns, Jr., J. David Irwin)
Solution Manual Physics of Semiconductor Devices (Jean-Pierre Colinge, Cynt=
hia A. Colinge)
Solution Manual Electronics and Communications for Scientists and Engineers=
 (Martin Plonus)
Solution Manual Cryptography & Network Security (Behrouz A Forouzan)
Solution Manual Data Communications and Networking (3rd Ed., Behrouz A. For=
ouzan)
Solution Manual Data Communications and Networking (4th Ed., Behrouz A. For=
ouzan)
Solution Manual TCP/IP Protocol Suite (2nd Ed., Behrouz Forouzan)
Solution Manual TCP/IP Protocol Suite (3rd Ed., Behrouz Forouzan)
Solution Manual TCP/IP Protocol Suite (4th Ed., Behrouz Forouzan)
Solution Manual Local Area Networks (Behrouz A Forouzan)
Solution Manual Microcontroller Theory and Applications with the PIC18F (M.=
 Rafiquzzaman)
Solution Manual Communication Systems : Analysis and Design (Harold P.E. St=
ern & Samy A. Mahmoud)
Solution Manual Introduction to Communication Systems (3rd Ed., Ferrell G. =
Stremler)
Solution Manual Introduction to Digital Communications (Michael B. Pursley)
Solution Manual Digital Communications : A Discrete-Time Approach (Michael =
Rice)
Solution Manual Introduction to Digital Communication (2nd Ed., Rodger E. Z=
iemer & Roger W. Peterson)
Solution Manual Introduction to Spread Spectrum Communications (Rodger E. Z=
iemer, Roger L. Peterson & David E. Borth)
Solution Manual Micro and Smart Systems (G. K. Ananthasuresh, K. J. Vinoy, =

```
S. Gopalakrishnan, K. N. Bhat, V. K. Aatre)
Solution Manual Analog Integrated Circuit Design (2nd Ed., Tony Chan Caruso=
ne, David A. Johns, Kenneth W. Martin)
Solution Manual Analog Integrated Circuits for Communication : Principles, =
Simulation and Design (2nd Ed., Donald Pederson & Kartikeya Mayaram)
Solution Manual Satellite Communications (2nd Ed, Pratt, Bostian, Allnutt)
Solution Manual Business Data Communications (Behrouz A Forouzan)
Solution Manual Logic and Computer Design Fundamentals (4th Ed., Mano & Kim=
e)
Solution Manual Linear Robust Control (Michael Green, David J. N. Limebeer)
Solution Manual Adaptive Control (2nd Ed., Karl Johan Astrom, Bjorn Wittenm=
ark)
Solution Manual Advanced Engineering Electromagnetics (2nd Ed., Constantine=
 A. Balanis)=20
Solution Manual Digital Logic Circuit Analysis and Design (Victor P. Nelson=
, H. Troy Nagle, Bill D. Carroll, David Irwin)
Solution Manual Digital Control Engineering : Analysis and Design (M. Sami =
Fadali & Antonio Visioli)
Solution Manual Digital Control Engineering : Analysis and Design (2nd Ed.,=
 M. Sami Fadali & Antonio Visioli)
Solution Manual Computer-Controlled Systems : Theory and Design (3rd Ed., K=
arl Johan Astrom & Bjorn Wittenmark)
Solution Manual Electric Circuits (7th Ed., Nilsson & Riedel)
Solution Manual Electric Circuits (8th Ed., Nilsson & Riedel)
Solution Manual Electric Circuits (9th Ed., Nilsson & Riedel)
Solution Manual Introductory Circuits for Electrical and Computer Engineeri=
ng (James Nilsson, Susan Riedel)
Solution Manual Electromagnetic Noise and Quantum Optical Measurements (Her=
mann A. Haus)
Solution Manual Optical Fiber Communications (4th Ed., Gerd Keiser)
Solution Manual Fiber Optic Communications (5th Ed., Joseph C. Palais)
Solution Manual Electromagnetics (Branislav M. Notaros)
Solution Manual Electromagnetics for Engineers (Fawwaz T. Ulaby)
Solution Manual Fundamentals of Applied Electromagnetics (5th Ed., Fawwaz T=
. Ulaby)
Solution Manual Applied Electromagnetics : Early Transmission Lines Approac=
h (Stuart Wentworth)=20
Solution Manual Fundamentals of Electromagnetics with Engineering Applicati=
ons (Stuart Wentworth)
Solution Manual Electromagnetics for Engineers : With Applications to Digit=
al Systems and Electromagnetic Interference (Clayton Paul)
Solution Manual MEMS & Microsystems : Design and Manufacture (1st Ed., Tai-=
Ran Hsu)
Solution Manual MEMS & Microsystems : Design, Manufacture, and Nanoscale En=
gineering (2nd Ed., Tai-Ran Hsu)
Solution Manual Probability and Statistics for Engineering and the Sciences=
 (7th Ed., Jay L. DeVore)=20
Solution Manual Probability and Stochastic Processes : A Friendly Introduct=
ion for Electrical and Computer Engineers (2nd Ed., Roy Yates & David Goodm=
an)
Solution Manual Process Systems Analysis and Control (3rd Ed. Donald Cougha=
nowr, Steven LeBlanc)=20
Solution Manual Fuel Cell Engines (Matthew M. Mench)
```

Solution Manual Fuel Cell Fundamentals (1st Ed., Ryan O'Hayre, et. al)
Solution Manual Fuel Cell Fundamentals (2nd Ed., Ryan O'Hayre, Whitney Cole=
lla, Suk-Won Cha, Fritz Prinz)
Solution Manual Control Systems Engineering (4th Ed., Norman Nise)
Solution Manual Control Systems Engineering (5th Ed., Norman Nise)
Solution Manual Control Systems Engineering (6th Ed., Norman Nise)
Solution Manual Automatic Control Systems (8th Ed., Benjamin C. Kuo, Farid =
Golnaraghi)
Solution Manual Automatic Control Systems (9th Ed., Farid Golnaraghi, Benja=
min C. Kuo)
Solution Manual Basic Electricity for Industry : Circuits and Machines - Ca=
nadian Edition (Doug Edgar)
Solution Manual Basic Engineering Circuit Analysis (8th Ed., Irwin & Nelms)
Solution Manual Basic Engineering Circuit Analysis (9th Ed., Irwin & Nelms)
Solution Manual Basic Engineering Circuit Analysis (10th Ed., Irwin & Nelms=
)
Solution Manual A Brief Introduction to Circuit Analysis (J. David Irwin)
Solution Manual Semiconductor Devices : Basic Principles (Jasprit Singh)
Solution Manual Semiconductor Device Fundamentals (Robert F. Pierret)
Solution Manual Advanced Semiconductor Fundamentals (2nd Ed., Robert F. Pie=
rret)
Solution Manual Device Electronics for Integrated Circuits (3rd Ed., Richar=
d S. Muller, Theodore I. Kamins)
Solution Manual Fundamentals of Semiconductor Devices (Anderson)
Solution Manual Scientific Computing (2nd Ed., Michael T. Heath)
Solution Manual System Identification : An Introduction (Karel J. Keesman)
Solution Manual Scientific Computing with Case Studies (Dianne P. O'Leary)
Solution Manual Pattern Recognition and Machine Learning (Christopher M. Bi=
shop)
Solution Manual Modern Semiconductor Devices for Integrated Circuits (Chenm=
ing C. Hu)
Solution Manual Analysis and Design of Analog Integrated Circuits (4th Ed.,=
 Paul Gray, et al.)
Solution Manual Analysis and Design of Analog Integrated Circuits (5th Ed.,=
 Paul Gray)
Solution Manual Analysis and Design of Digital Integrated Circuits (3rd Ed.=
, Hodges)=20
Solution Manual Introduction to Electric Circuits (6th Ed., Dorf & Svoboda)
Solution Manual Introduction to Electric Circuits (7th Ed., Dorf & Svoboda)
Solution Manual Introduction to Electric Circuits (8th Ed., Dorf & Svoboda)
Solution Manual Modulation, Detection and Coding (Tommy =D6berg)
Solution Manual Principles of Communications: Systems, Modulation, and Nois=
e (5th Ed., R.E. Ziemer & W.H. Tranter)=20
Solution Manual Principles of Communications (6th Ed., R.E. Ziemer & W.H. T=
ranter)=20
Solution Manual The Analysis and Design of Linear Circuits (4th Ed, Thomas =
& Rosa)
Solution Manual The Analysis and Design of Linear Circuits : Laplace Early =
(4th Ed, Thomas & Rosa)
Solution Manual The Analysis and Design of Linear Circuits (5th Ed, Thomas)
Solution Manual The Analysis and Design of Linear Circuits (6th Ed, Thomas,=
 Rosa & Toussaint)
Solution Manual The Analysis and Design of Linear Circuits (7th Ed, Thomas,=

 Rosa & Toussaint)
Solution Manual Dynamic Modeling and Control of Engineering Systems (2nd Ed=
., J. Lowen Shearer, Bohdan Kulakowski, John Gardner)
Solution Manual Modern Control Systems (11th Ed., Dorf & Bishop)
Solution Manual Modern Control Systems (12th Ed., Dorf & Bishop)
Solution Manual System Dynamics (4th Ed., Katsuhiko Ogata)
Solution Manual System Dynamics (1st Ed., William Palm III)
Solution Manual System Dynamics (2nd Ed., William Palm III)
Solution Manual System Dynamics and Response (S. Graham Kelly)
Solution Manual System Dynamics for Engineering Students : Concepts and App=
lications (Nicolae Lobontiu)
Solution Manual Optimal Control (2nd Ed., Frank Lewis & Vassilis Syrmos)
Solution Manual Optimal Control (3rd Ed., Frank Lewis, Draguna Vrabie & Vas=
silis Syrmos)
Solution Manual Optimal Control Theory : An Introduction (Donald E. Kirk)
Solution Manual Power Electronics (1st Ed., Daniel W. Hart)
Solution Manual Power Electronic Circuits (Issa Batarseh)
Solution Manual Power Electronics : Circuits, Devices and Applications (3rd=
 Ed., Muhammad H. Rashid)
Solution manual Power Electronics : A First Course (Ned Mohan)
Solution Manual Power Electronics : Converters, Applications, and Design (3=
rd Ed., Ned Mohan, Tore Undeland & William Robbins)
Solution Manual Electric Power Systems : A First Course (Ned Mohan)
Solution Manual Electric Machines and Drives : A First Course (Ned Mohan)
Solution Manual Intuitive Probability and Random Processes using MATLAB (St=
even Kay)
Solution Manual Signals and Systems using MATLAB (Luis Chaparro)
Solution Manual Analog Signals and Systems (Erhan Kudeki & David C. Munson,=
 Jr.)
Solution Manual Continuous and Discrete Time Signals and Systems (Mrinal Ma=
ndal, Amir Asif)
Solution Manual Digital Signal and Image Processing (Tamal Bose)
Solution Manual Digital Image Processing (2nd Ed., Rafael Gonzalez, Richard=
 Woods)
Solution Manual DSP First : A Multimedia Approach (James H. McClellan, Rona=
ld W. Schafer, Mark A. Yoder)
Solution Manual Discrete-Time Signal Processing (2nd Ed., Alan Oppenheim, R=
onald Schafer, John Buck)
Solution Manual Discrete-Time Signal Processing (3rd Ed., Alan Oppenheim & =
Ronald Schafer)
Solution Manual Signal Processing First (James H. McClellan, Ronald W. Scha=
fer, Mark A. Yoder)
Solution Manual Statistical Digital Signal Processing and Modeling (Monson =
Hayes)
Solution Manual Digital Signal Processing (Thomas J. Cavicchi)
Solution Manual Digital Signal Processing System Design : LabVIEW-Based Hyb=
rid Programming (2nd Ed., Kehtarnavaz)
Solution Manual Digital Signal Processing (2nd Ed., Mitra)
Solution Manual Digital Signal Processing (3rd Ed., Mitra)
Solution Manual Digital Signal Processing (4th Ed., Mitra)
Solution Manual Digital Signal Processing (4th Ed., John G. Proakis, Dimitr=
is K Manolakis)
Solution Manual Digital Signal Processing (Charles Schuler & Mahesh Chugani=

)
Solution Manual Digital Signal Processing : Fundamentals and Applications (=
Li Tan)
Solution Manual Digital Signal Processing : An Experimental Approach (Shlom=
o Engelberg)
Solution Manual Digital Signal Processing : System Analysis and Design (Pau=
lo S. R. Diniz)
Solution Manual Digital Signal Processing : A Modern Introduction (Ashok Am=
bardar)
Solution Manual Engineering Optimization : Theory and Practice (4th Ed., Si=
ngiresu S. Rao)
Solution Manual Applied Optimization with MATLAB Programming (1st Ed., P. V=
enkataraman)
Solution Manual Applied Optimization with MATLAB Programming (2nd Ed., P. V=
enkataraman)
Solution Manual Introduction to Applied Optimization (2nd Ed., Urmila Diwek=
ar)
Solution Manual Logic Synthesis and Verification Algorithms (Gary Hachtel &=
 Fabio Somenzi)
Solution Manual Adaptive Filtering : Algorithms and Practical Implementatio=
n (3rd Ed., Paulo S. R. Diniz)
Solution Manual Introduction to Scientific Computation and Programming (Dan=
iel T. kaplan)
Solution Manual Principles of Signal Detection and Parameter Estimation (Be=
rnard C. Levy)=20
Solution Manual Electric Machines Analysis and Design Applying MatLab (Cath=
ey)
Solution Manual Fundamentals of Electrical Engineering (Giorgio Rizzoni)
Solution Manual Principles and Applications of Electrical Engineering (4th =
Ed, Rizzoni)
Solution Manual Principles and Applications of Electrical Engineering (5th =
Ed, Rizzoni)
Solution Manual Fundamentals of Electric Circuits (2nd Ed., Alexander & Sad=
iku)
Solution Manual Fundamentals of Electric Circuits (3rd Ed., Alexander & Sad=
iku)
Solution Manual Fundamentals of Electric Circuits (4th Ed., Alexander & Sad=
iku)
Solution Manual MSP430 Microcontroller Basics (John Davies)
Solution Manual Programming Massively Parallel Processors : A Hands-on Appr=
oach (David Kirk & Wen-mei Hwu)
Solution Manual Embedded Systems and Software Validation (Abhik Roychoudhur=
y)
Solution Manual Embedded Systems Design with Platform FPGAs : Principles an=
d Practices (Ronald Sass, Andrew Schmidt)
Solution Manual Embedded DSP Processor Design : Application Specific Instru=
ction Set Processors (Dake Liu)
Solution Manual Embedded Microcontrollers and Processor Design (Charles Gre=
g Osborn)
Solution Manual Embedded System Design : A Unified Hardware/Software Introd=
uction (Vahid & Givargis)
Solution Manual Embedded Microcomputer Systems : Real Time Interfacing (2nd=
 Ed., Jonathan W. Valvano)

Solution Manual Introduction to Programming with C++ (2nd Ed., Y. Daniel Li=
ang)
Solution Manual Matlab : A Practical Introduction to Programming and Proble=
m Solving (Stormy Attaway)
Solution Manual Matlab : A Practical Introduction to Programming and Proble=
m Solving (2nd Ed., Stormy Attaway)
Solution Manual Principles of Computer System Design : An Introduction (Jer=
ome Saltzer & M. Frans Kaashoek)
Solution Manual The Illustrated Network : How TCP/IP Works in a Modern Netw=
ork (Walter Goralski)
Solution Manual Electronic Design Automation : Synthesis, Verification, and=
 Test (Laung-Terng Wang, Yao-Wen Chang & Kwang-Ting Cheng)
Solution Manual Digital Design (Frank Vahid)=20
Solution Manual Digital Design with RTL Design, Verilog and VHDL (2nd Ed., =
Frank Vahid)
Solution Manual Digital Logic Design Principles (Balabanian & Carlson)
Solution Manual Fundamentals of Logic Design (5th Ed., Charles H. Roth)
Solution Manual Real-Time Systems and Software (Alan Shaw)
Solution Manual Introduction to VLSI Circuits and Systems (John P. Uyemura)
Solution Manual Chip Design for Submicron VLSI : CMOS Layout & Simulation (=
John Uyemura)
Solution Manual Classical Electrodynamics (2nd Ed., John David Jackson)
Solution Manual Objects, Abstraction, Data Structures and Design : Using C+=
+ (Elliot B. Koffman & Paul A. T. Wolfgang)
Solution Manual Objects, Abstraction, Data Structures and Design Using Java=
 Version 5.0 (Elliot B. Koffman & Paul A. T. Wolfgang)
Solution Manual Computer Architecture and Organization : An Integrated Appr=
oach (Murdocca & Heuring)
Solution Manual Wiley Pathways Networking Basics (1st Ed., Ciccarelli, Faul=
kner, FitzGerald, Dennis & Miller)=20
Solution Manual Software Engineering : Principles and Practice (3rd Ed., Ha=
ns van Vliet)
Solution Manual Software Design : From Programming to Architecture (Eric Br=
aude)
Solution Manual Software Engineering : An Object-Oriented Perspective (Eric=
 Braude)
Solution Manual Software Engineering : Modern Approaches (2nd Ed., Eric Bra=
ude & Michael Bernstein)
Solution Manual Neural and Adaptive Systems : Fundamentals through Simulati=
ons (Jos=E9 Principe, Neil Euliano & W. Curt Lefebvre)=20
Solution Manual Fundamentals of Electronic Circuit Design (David J. Comer &=
 Donald T. Comer)
Solution Manual Microelectronic Circuit Design (2nd Ed., Jaeger & Blalock)
Solution Manual Microelectronic Circuit Design (3rd Ed., Jaeger & Blalock)
Solution Manual Microelectronic Circuit Design (4th Ed., Jaeger & Blalock)
Solution Manual Introduction to Microelectronic Fabrication : Volume 5 of M=
odular Series on Solid State Devices (2nd Ed., Richard Jaeger)
Solution Manual Microelectronic Circuits (5th Ed., Adel S. Sedra, K. C. Smi=
th)=20
Solution Manual VHDL for Engineers (Kenneth Short)
Solution Manual Fundamentals of Digital Logic with VHDL Design (1st Ed., Br=
own & Vranesic)
Solution Manual Fundamentals of Digital Logic with VHDL Design (2nd Ed., Br=

```
own & Vranesic)
Solution Manual Fundamentals of Digital Logic with VHDL Design (3rd Ed., Br=
own & Vranesic)
Solution Manual CMOS Analog Circuit Design (2nd Ed., Phillip E. Allen, Doug=
las R. Holberg)
Solution Manual Design of Analog CMOS Integrated Circuits (Behzad Razavi)
Solution Manual Design of Integrated Circuits for Optical Communications (B=
ehzad Razavi)
Solution Manual Fundamentals of Microelectronics, Preliminary Edition (Behz=
ad Razavi)
Solution Manual Fundamentals of Microelectronics (1st Ed., Behzad Razavi)
Solution Manual RF Microelectronics (2nd Ed., Behzad Razavi)
Solution Manual Design with Operational Amplifiers and Analog Integrated Ci=
rcuits (3rd Ed., Sergio Franco)
Solution Manual Your UNIX : The Ultimate Guide (1st Ed., Sumitabha  Das)
Solution Manual Your UNIX : The Ultimate Guide (2nd Ed., Sumitabha  Das)=20
Solution Manual Microwave Engineering (Annapurna Das)
Solution Manual Microwave Engineering (3rd Ed., David M. Pozar)
Solution Manual Microwave Engineering (4th Ed., David M. Pozar)
Solution Manual Microwave and RF Design of Wireless Systems (David M. Pozar=
)
Solution Manual Introduction to Wireless Systems (P. M. Shankar)=20
Solution Manual Microwave Transistor Amplifiers : Analysis and Design (2nd =
Ed., Guillermo Gonzalez)
Solution Manual Control Systems (Madan Gopal)
Solution Manual A First Lab in Circuits and Electronics (Yannis Tsividis)
Solution Manual Power System Analysis : Analysis and Design (John Grainger)
Solution Manual Power Systems Analysis (2nd Ed., Hadi Saadat)
Solution Manual Power Systems Analysis and Design (4th Ed., J.Duncan Glover=
 and Mulukutla S. Sarma)
Solution Manual An Introduction to Digital and Analog Communications (2nd E=
d., Simon Haykin & Michael Moher)
Solution Manual Communication Systems (4th Ed., Simon Haykin)
Solution Manual Communication Systems (5th Ed., Simon Haykin)
Solution Manual Communication Systems (4th Ed., A. Bruce Carlson, Paul B. C=
rilly, Janet Rutledge)
Solution Manual Communication Systems (5th Ed., A. Bruce Carlson, Paul B. C=
rilly)
Solution Manual Signals and Systems (2nd Ed., Simon Haykin & Barry Van Veen=
)
Solution Manual Introduction to Computing Systems : From bits & gates to C =
& beyond (1st Ed., Patt and Patel)
Solution Manual Introduction to Computing Systems : From bits & gates to C =
& beyond (2nd Ed., Patt and Patel)
Solution Manual Elements of the Theory of Computation (2nd Ed., Lewis & Pap=
adimitriou)
Solution Manual Introduction to Languages and the Theory of Computation (3r=
d Ed., John Martin)
Solution Manual Introduction to Languages and the Theory of Computation (4t=
h Ed., John Martin)
Solution Manual Mechanical & Electrical Systems in Buildings (4th Ed., Rich=
ard Janis & William Tao)
Solution Manual Silicon VLSI Technology : Fundamentals, Practice, and Model=
```

ing (Plummer, Deal & Griffin)
Solution Manual Dynamic Electromagnetics (Paul Diament)
Solution Manual Engineering Electromagnetics (2nd Ed., Nathan Ida)=20
Solution Manual Engineering Electromagnetics (Kenneth Demarest)
Solution Manual Engineering Electromagnetics (Umran S. Inan & Aziz Inan)
Solution Manual Field and Wave Electromagnetics (1st Ed., David Cheng)
Solution Manual Fundamentals of Engineering Electromagnetics (David Cheng)
Solution Manual Database Design and Implementation (Edward Sciore)
Solution Manual Information Modeling and Relational Databases (2nd Ed., Ter=
ry Halpin & Tony Morgan)
Solution Manual Probability, Statistics, and Random Processes For Electrica=
l Engineering (3rd Ed., Alberto Leon-Garcia)
Solution Manual Detection and Estimation Theory (Thomas Schonhoff & Arthur =
Giordano)
Solution Manual The Intel Microprocessors (8th Ed., Barry B. Brey)
Solution Manual Wireless Networking (Kumar, Manjunath & Kuri)
Solution Manual Wireless Communications : Principles and Practice (2nd Ed.,=
 Theodore S. Rappaport)
Solution Manual Digital Electronics and Design with VHDL (Volnei A. Pedroni=
)
Solution Manual System-on-Chip Test Architectures : Nanometer Design for Te=
stability (Wang, Stroud & Touba)
Solution Manual Digital Design (Verilog) : An Embedded Systems Approach Usi=
ng Verilog (Peter Ashenden)
Solution Manual Digital Design (VHDL) : An Embedded Systems Approach Using =
VHDL (Peter Ashenden)
Solution Manual Computer Organization and Design : The Hardware/Software In=
terface (3rd Ed., Patterson & Hennessy)
Solution Manual Computer Organization and Design : The Hardware/Software In=
terface (4th Ed., Patterson & Hennessy)
Solution Manual Fundamentals of Computer Organization and Design (Sivarama =
P. Dandamudi)
Solution Manual Wireless Communications & Networking (Vijay Garg)
Solution Manual Network Flows : Theory, Algorithms, and Applications (Ravin=
dra K. Ahuja, Thomas L. Magnanti, James B. Orlin)
Solution Manual Network Analysis, Architecture, and Design (3rd Ed., James =
McCabe)
Solution Manual Computer Networks : A Systems Approach (4th Ed., Peterson &=
 Davie)
Solution Manual Computer Networks ISE : A Systems Approach (4th Ed., Peters=
on & Davie)
Solution Manual Computer Networks : A Systems Approach (5th Ed., Peterson &=
 Davie)
Solution Manual Digital Design and Computer Architecture (David Harris & Sa=
rah Harris)
Solution Manual Digital Design and Computer Architecture (2nd Ed., David Ha=
rris & Sarah Harris)
Solution Manual Fault-Tolerant Systems (Israel Koren & C. Krishna)
Solution Manual Computer Architecture : Pipelined and Parallel Processor De=
sign (Michael J. Flynn)=20
Solution Manual Computer Architecture : A Quantitative Approach (4th Ed., H=
ennessy & Patterson)
Solution Manual Computer Architecture : A Quantitative Approach (5th Ed., H=

```
ennessy & Patterson)
Solution Manual High-Performance Embedded Computing : Architectures, Applic=
ations, and Methodologies (Wayne Wolf)
Solution Manual Pattern Recognition (3rd Ed., Theodoridis & Koutroumbas)
Solution Manual Pattern Recognition (4th Ed., Theodoridis & Koutroumbas)
Solution Manual Data Mining : Concepts and Techniques (2nd Ed., Han & Kambe=
r)
Solution Manual Data Mining : Concepts and Techniques (3rd Ed., Han , Kambe=
r & Pei)
Solution Manual Cyber Attacks : Protecting National Infrastructure, STUDENT=
 EDITION (Edward Amoroso)
Solution Manual Distributed and Cloud Computing : From Parallel Processing =
to the Internet of Things (Kai Hwang , Jack Dongarra & Geoffrey Fox)
Test bank Making Media : Foundations of Sound and Image Production (3rd Ed.=
, Jan Roberts-Breslin)
Solution Manual Commonsense Reasoning (Erik Mueller)
Solution Manual Introduction to Data Compression (3rd Ed., Khalid Sayood)
Solution Manual Programming Language Pragmatics (2nd Ed., Michael Scott)
Solution Manual Programming Language Pragmatics (3rd Ed., Michael Scott)
Solution Manual Computer Graphics for Java Programmers (2nd Ed., Leen Ammer=
aal & Kang Zhang)
Solution Manual Database Modeling and Design : Logical Design (4th Ed., Teo=
rey, Lightstone & Nadeau)
Solution Manual Database Modeling and Design : Logical Design (5th Ed., Teo=
rey, Lightstone, Nadeau & Jagadish)
Solution Manual Computers As Components : Principles of Embedded Computing =
System Design (1st Ed., Wayne Wolf)
Solution Manual Computers As Components : Principles of Embedded Computing =
System Design (2nd Ed., Wayne Wolf)
Solution Manual Computers As Components : Principles of Embedded Computing =
System Design (3rd Ed., Marilyn Wolf)
Solution Manual Virtual Machines : Versatile Platforms for Systems and Proc=
esses (Jim Smith & Ravi Nair)
Solution Manual Comprehensive Functional Verification : The Complete Indust=
ry Cycle (Wile, Goss & Roesner)
Solution Manual User Interface Design and Evaluation (Stone, Jarrett, Woodr=
offe & Minocha)
Solution Manual Network Algorithmics : An Interdisciplinary Approach to Des=
igning Fast Networked Devices (George Varghese)
Solution Manual Data Modeling Essentials (3rd Ed., Simsion & Witt)
Solution Manual A Student Guide to Object-Oriented Development (Carol Britt=
on & Jill Doake)
Solution Manual Routing, Flow, and Capacity Design in Communication and Com=
puter Networks (Pioro & Medhi)
Solution Manual Knowledge Representation and Reasoning (Brachman & Levesque=
)
Solution Manual Communication Networking : An Analytical Approach (Anurag K=
umar, D. Manjunath & Joy Kuri)
Solution Manual Principles and Practices of Interconnection Networks (Dally=
 & Towles)
Solution Manual Game Physics (David Eberly)
Solution Manual Engineering a Compiler (Keith Cooper & Linda Torczon)
Solution Manual Constraint Processing (Rina Dechter)
```

Solution Manual Design Methods for Reactive Systems : Yourdon, Statemate, a=
nd the UML (R. J. Wieringa)
Solution Manual Temporal Data & the Relational Model (C.J. Date, Darwen & L=
orentzos)
Solution Manual Java Made Simple (2nd Ed., P. K. McBride)
Solution Manual The Firmware Handbook (Jack Ganssle)
Solution Manual Optical Networks : A Practical Perspective (2nd Ed., Ramasw=
ami & Sivarajan)
Solution Manual Optical Networks : A Practical Perspective (3rd Ed., Ramasw=
ami, Sivarajan & Sasaki)
Solution Manual Usability Engineering : Scenario-Based Development of Human=
-Computer Interaction (Rosson & Carroll)
Solution Manual The Designer's Guide to VHDL (2nd Ed., Peter Ashenden)
Solution Manual Transactional Information Systems : Theory, Algorithms, and=
 the Practice of Concurrency Control and Recovery (Weikum & Vossen)
Solution Manual Parallel Computer Architecture : A Hardware/Software Approa=
ch (Culler, Singh & Gupta)
Solution Manual Advanced Compiler Design and Implementation (Steven Muchnic=
k)
Solution Manual Parallel Programming with MPI (Peter Pacheco)
Solution Manual An Introduction to Parallel Programming (Peter Pacheco)
Solution Manual Distributed Algorithms (Nancy Lynch)
Solution Manual Electrical and Electronic : Principles and Technology (3rd =
Ed., John Bird)
Solution Manual Electrical and Electronic : Principles and Technology (4th =
Ed., John Bird)
Solution Manual Electrical Circuit Theory and Technology (3rd Ed., John Bir=
d)
Solution Manual Electrical Circuit Theory and Technology (4th Ed., John Bir=
d)
Solution Manual Electronic Circuits : Fundamentals & Applications (3rd Ed.,=
 Mike Tooley)
Solution Manual A Practical Guide to SysML : The Systems Modeling Language =
(Friedenthal, Moore & Steiner)
Solution Manual Multidimensional Signal, Image, and Video Processing and Co=
ding (John Woods)
Solution Manual Multidimensional Signal, Image, and Video Processing and Co=
ding (2nd Ed., John Woods)
Solution Manual Bioelectrical Signal Processing in Cardiac and Neurological=
 Applications (Leif S=F6rnmo & Pablo Laguna)
Solution Manual Foundations of Analog and Digital Electronic Circuits (Anan=
t Agarwal & Jeffrey Lang)
Solution Manual Introduction to Linear Circuit Analysis and Modelling : Fro=
m DC to RF (Luis Moura & Izzat Darwazeh)
Solution Manual Embedded Systems Architecture : A Comprehensive Guide for E=
ngineers and Programmers (Tammy Noergaard)
Solution Manual Bioimpedance and Bioelectricity Basics (2nd Ed., Grimnes & =
Martinsen)
Solution Manual Simulation with Arena (5th Ed., Kelton, Sadowski & Swets)
Solution Manual Simulation Modeling and Analysis with ARENA (Tayfur Altiok =
& Benjamin Melamed)
Solution Manual The Visual Story : Creating the Visual Structure of Film, T=
V and Digital Media (2nd Ed., Bruce Block)

Solution Manual The Shut Up and Shoot Documentary Guide : A Down & Dirty DV=
 Production (Anthony Artis)
Solution Manual Portable Video : ENG & EFP (5th Ed., Medoff & Fink)
Solution Manual Voice and Vision : A Creative Approach to Narrative Film an=
d DV Production (Mick Hurbis-Cherrier)
Solution Manual Writing for Multimedia and the Web : A Practical Guide to C=
ontent Development for Interactive Media (3rd Ed., Timothy Garrand)
Solution Manual Developing and Maintaining a Design-Tech Portfolio : A Guid=
e for Theatre, Film & TV (Rafael Jaen)
Solution Manual Producing for TV and Video : A Real-World Approach (Cathrin=
e Kellison)
Solution Manual Producing for TV and New Media : A Real-World Approach for =
Producers (2nd Ed., Cathrine Kellison)
Solution Manual Placing Shadows : Lighting Techniques for Video Production =
(3rd Ed., Gloman & Tom LeTourneau)
Solution Manual Film Directing Fundamentals : See Your Film Before Shooting=
 (3rd Ed., Nicholas Proferes)
Solution Manual Introduction to Media Production : The Path to Digital Medi=
a Production (3rd Ed., Musburger & Kindem)
Solution Manual Introduction to Media Production : The Path to Digital Medi=
a Production (4th Ed., Kindem & Musburger)
Solution Manual Directing the Documentary (5th Ed., Michael Rabiger)
Solution Manual Video Production Handbook (4th Ed., Gerald Millerson & Jim =
Owens)
Solution Manual Making Media : Foundations of Sound and Image Production (J=
an Roberts-Breslin)
Solution Manual Prepare to Board! Creating Story and Characters for Animati=
on Features and Shorts (Nancy Beiman)
Solution Manual Light and Lens : Photography in the Digital Age (Robert Hir=
sch)
Solution Manual The Radio Station : Broadcast, Satellite & Internet (7th Ed=
., Michael Keith)
Solution Manual Developing Story Ideas (2nd Ed., Michael Rabiger)
Solution Manual Radio Production Worktext : Studio and Equipment (5th Ed., =
Reese, Gross & Gross)
Solution Manual Broadcast News Writing, Reporting, and Producing (4th Ed., =
Ted White)
Solution Manual Problem Solving and Programming Concepts (7th Ed., Sprankle=
)
Solution Manual Problem Solving and Programming Concepts (8th Ed., Sprankle=
 & Hubbard)
Solution Manual A Balanced Introduction to Computer Science (2nd Ed., David=
 Reed)
Solution Manual Introduction to Computing and Programming with Java : A Mul=
timedia Approach (Guzdial & Ericson)
Solution Manual Starting Out with Programming Logic and Design (Tony Gaddis=
)
Solution Manual Starting Out with Programming Logic and Design (2nd Ed., To=
ny Gaddis)
Solution Manual Tools For Structured and Object-Oriented Design (7th Ed., B=
ohl & Rynn)
Solution Manual Programming with Alice and Java (Lewis & DePasquale)
Solution Manual e-Business and e-Commerce How to Program (Harvey M. Deitel,=

 Paul J. Deitel, Tem R. Nieto)
Solution Manual XML How to Program (Harvey M. Deitel, Paul J. Deitel, Tem R=
. Nieto, Ted Lin, Praveen Sadhu)
Solution Manual Python How to Program (Harvey M. Deitel, Paul J. Deitel, Jo=
nathan P. Liperi Ben Wiedermann)
Solution Manual Perl How to Program (Harvey M. Deitel, Paul J. Deitel, Tem =
R. Nieto, D. C. McPhie)
Solution Manual C How to Program (4th Ed., Harvey & Paul Deitel)
Solution Manual C How to Program (5th Ed., Harvey & Paul Deitel)
Solution Manual C++ How to Program (6th Ed., Harvey & Paul Deitel)
Solution Manual Visual Basic.NET How to Program (2nd Ed., Harvey M. Deitel,=
 Paul J. Deitel, Tem R. Nieto)
Solution Manual Visual C++ 2008 How to Program (2nd Ed., Harvey & Paul Deit=
el)
Solution Manual Internet & World Wide Web : How to Program (4th Ed., Harvey=
 & Paul Deitel)=20
Solution Manual Web Technologies : A Computer Science Perspective (Jeffrey =
C. Jackson)
Solution Manual Mastering the Internet, XHTML and JavaScript (2nd Ed., Ibra=
him Zeid)
Solution Manual Weaving a Website : Programming in HTML, Java Script, Perl =
and Java (Susan Anderson-Freed)
Solution Manual Simply C++ : An Application-Driven Tutorial Approach (Harve=
y & Paul Deitel)
Solution Manual Visual C# 2005 How to Program (2nd Ed., Harvey & Paul Deite=
l)
Solution Manual Visual C# 2008 How to Program (3rd Ed., Harvey & Paul Deite=
l)
Solution Manual Visual C# 2010 How to Program (4th Ed., Harvey & Paul Deite=
l)
Solution Manual Simply C# : An Application-Driven Tutorial Approach (Harvey=
 & Paul Deitel, Hoey & Yaeger)
Solution Manual Java : An Introduction to Problem Solving and Programming (=
4th Ed., Walter Savitch)
Solution Manual Java : An Introduction to Problem Solving and Programming (=
5th Ed., Savitch & Carrano)
Solution Manual Introduction to Computing and Programming with Java : A Mul=
timedia Approach (Guzdial & Ericson)
Solution Manual Java How to Program (7th Ed., Harvey & Paul Deitel)
Solution Manual Java How to Program : Early Objects Version (8th Ed., Paul =
Deitel)
Solution Manual Java How to Program : Late Objects Version (8th Ed., Paul D=
eitel)
Solution Manual Java For Students (5th Ed., Bell & Parr)
Solution Manual Java, Java, Java, Object-Oriented Problem Solving (3rd Ed.,=
 Morelli & Walde)
Solution Manual Java : An Eventful Approach (Bruce, Danyluk & Murtagh)
Solution Manual Introduction to Java Programming with JBuilder (3rd Ed., Y.=
 Daniel Liang)
Solution Manual Starting Out with Visual Basic 2008 (4th Ed., Gaddis & Irvi=
ne)
Solution Manual Starting Out with Visual Basic 2010 (5th Ed., Gaddis & Irvi=
ne)

Solution Manual Starting Out with Python (Tony Gaddis)
Solution Manual Starting Out with Python (2nd Ed., by Tony Gaddis)
Solution Manual Object-Oriented Programming in Python (Goldwasser & Letsche=
r)
Solution Manual Introduction to MathCAD 11 (Ronald W. Larsen)
Solution Manual Introduction to MathCAD 13 (2nd Ed., Ronald W. Larsen)
Solution Manual MatLAB Programming (David Kuncicky)
Solution Manual Introduction to Maple 8 (David Schwartz)
Solution Manual Introduction to FORTRAN 90 (2nd Ed., Larry R. Nyhoff & Sanf=
ord Leestma)
Solution Manual Fortran 90/95 for Scientists and Engineers (1st Ed., Stephe=
n J. Chapman)
Solution Manual Fortran 90/95 for Scientists and Engineers (2nd Ed., Stephe=
n J. Chapman)
Solution Manual Fortran 95/2003 for Scientists and Engineers (3rd Ed., Step=
hen J. Chapman)
Solution Manual Introduction to Java (Stephen J. Chapman)
Solution Manual Java Software Solutions for AP Computer Science A (2nd Ed.,=
 Lewis, Loftus & Cocking)
Solution Manual Business Data Networks and Telecommunications (6th Ed., Ray=
mond R. Panko)
Solution Manual Business Data Networks and Telecommunications (7th Ed., Ray=
mond R. Panko)
Solution Manual Business Data Communications (Allen Dooley)
Solution Manual Object-Oriented Programming in C++ (4th Ed., Robert Lafore)
Solution Manual C++ : Classes and Data Structures (Jeffrey Childs)
Solution Manual Data Structures Outside-In with Java (Sesh Venugopal)
Solution Manual Data Structures and Abstractions with Java (2nd Ed., Frank =
M. Carrano)
Solution Manual Data Structures and Algorithms in Java (Peter Drake)
Solution Manual Practical Introduction to Data Structures and Algorithm Ana=
lysis : C++ Edition (2nd Ed., Clifford A. Shaffer)
Solution Manual Computer Vision : A Modern Approach (David Forsyth & Jean P=
once)
Solution Manual Computer Graphics Using Java 2D and 3D (Hong Zhang & Y. Dan=
iel Liang)
Solution Manual Computer Graphics Using OpenGL (3rd Ed., Francis Hill Jr. &=
 Stephen Kelley)
Solution Manual Computer Graphics with OpenGL (3rd Ed., Donald Hearn & M. P=
auline Baker)
Solution Manual User-Centered Web Site Development : A Human-Computer Inter=
action Approach (McCracken & Wolfe)
Solution Manual Fundamentals of Game Design (Ernest Adams & Andrew Rollings=
)
Solution Manual Introduction to The Game Industry (Moore & Sward)
Solution Manual Fundamentals of Math and Physics for Game Programmers (Wend=
y Stahler)
Solution Manual Usability Engineering : Process, Products & Examples (Laura=
 Leventhal & Julie Barnes)
Solution Manual Web Usability : A User-Centered Design Approach (Jonathan L=
azar)
Solution Manual Structured Computer Organization (5th Ed., Andrew S. Tanenb=
aum)

Solution Manual Assembly Language for Intel-Based Computers (5th Ed., Kip I=
rvine)
Solution Manual Assembly Language for x86 Processors (6th Ed., Kip R. Irvin=
e)
Solution Manual Fundamentals of Multimedia (Ze-Nian Li & Mark Drew)
Solution Manual Digital Media Primer (Yue-Ling Wong)
Solution Manual Essentials for Design Macromedia Director MX 2004 Comprehen=
sive (Tara Gray)
Solution Manual Modern Systems Analysis and Design (4th Ed., Jeffrey Hoffer=
, Joey George, & Joseph Valacich)
Solution Manual Modern Systems Analysis and Design (5th Ed., Jeffrey Hoffer=
, Joey George, & Joseph Valacich)
Solution Manual Modern Systems Analysis and Design (6th Ed., Jeffrey Hoffer=
, Joey George, & Joseph Valacich)
Solution Manual Modern Database Management (8th Ed., Hoffer, Prescott & Top=
i)
Solution Manual Modern Database Management (9th Ed., Hoffer, Prescott & Top=
i)
Solution Manual Modern Database Management (10th Ed., Hoffer, Ramesh & Topi=
)
Solution Manual Database Systems Using Oracle (2nd Ed., Nilesh Shah)
Solution Manual An Advanced Course in Database Systems : Beyond Relational =
Databases (Dietrich & Urban)
Solution Manual Data and Text Mining : A Business Applications Approach (Th=
omas Miller)
Solution Manual Network Management : Concepts and Practice, A Hands-On Appr=
oach (J. Richard Burke)
Solution Manual Computer and Communication Networks (Nader F. Mir)
Solution Manual High Performance TCP/IP Networking (Mahbub Hassan & Raj Jai=
n)
Solution Manual Computer Security : Principles and Practice (William Stalli=
ngs & Lawrie Brown)
Solution Manual Computer Forensics : Principles and Practices (Volonino, An=
zaldua & Godwin)
Solution Manual Disaster Recovery : Principles and Practices (April Wells, =
Charlyne Walker & Timothy Walker)
Solution Manual Firewalls and VPNs : Principles and Practices (Richard Tibb=
s & Edward Oakes)=20
Solution Manual Network Defense and Countermeasures : Principles and Practi=
ces (Chuck Easttom)
Solution Manual Corporate Computer and Network Security (1st Ed., Raymond P=
anko)
Solution Manual Corporate Computer and Network Security (2nd Ed., Raymond P=
anko)
Solution Manual IP Telephony Using CallManager Express Lab Portfolio (Chery=
l Schmidt & Ernie Friend)
Solution Manual High-Speed Networks and Internets : Performance and Quality=
 of Service (2nd Ed., William Stallings)
Solution Manual Object-Oriented Modeling and Design with UML (2nd Ed., Mich=
ael Blaha & James Rumbaugh)
Solution Manual Operating Systems : Internals and Design Principles (5th Ed=
., William Stallings)
Solution Manual Operating Systems : Internals and Design Principles (6th Ed=

., William Stallings)
Solution Manual Distributed Systems : Principles and Paradigms (2nd Ed., Ta=
nenbaum & Van Steen)
Solution Manual Modern Operating Systems (3rd Ed., Andrew Tanenbaum)
Solution Manual Computer Networks (4th Ed., Andrew S. Tanenbaum)
Solution Manual Computer Networks (5th Ed., Andrew S. Tanenbaum, David J. W=
etherall)
Solution Manual Operating Systems Design and Implementation (3rd Ed., Andre=
w Tanenbaum & Albert Woodhull)
Solution Manual UNIX Unbounded : A Beginning Approach (5th Ed., Amir Afzal)
Solution Manual Introduction to Operating Systems and Networks (Ruth Watson=
)
Solution Manual Operating Systems (3rd Ed., Harvey Deitel, Paul Deitel & Da=
vid Choffnes)
Solution Manual Operating Systems Principles (Lubomir Bic & Alan Shaw)
Solution Manual A Practical Guide to Linux : Commands, Editors, and Shell P=
rogramming (Mark Sobell)
Solution Manual A Practical Guide to Red Hat Linux : Fedora Core and Red Ha=
t Enterprise Linux (2nd Ed., Mark Sobell)
Solution Manual A Practical Guide to Red Hat Linux : Fedora Core and Red Ha=
t Enterprise Linux (3rd Ed., Mark Sobell)
Solution Manual A Practical Guide to Fedora and Red Hat Enterprise Linux: C=
ollege Edition (Mark Sobell)
Solution Manual A Practical Guide to Ubuntu Linux (Mark Sobell)
Solution Manual Automata, Computability and Complexity : Theory and Applica=
tions (Elaine Rich)
Solution Manual Modern Digital Electronics (R.P. Jain)
Solution Manual Linear Systems and Signals (B.P. Lathi)
Solution Manual Modern Digital and Analog Communications Systems (3rd Ed., =
B. P. Lathi)
Solution Manual Introduction to Digital Systems (Milo D. Ercegovac, Lang & =
Moreno)
Solution Manual Embedded Systems : Architechture, Programming and Design (R=
aj Kamal)
Solution Manual Modern Power System Analysis (D. P. Kothari & I. J. Nagrath=
)
Solution Manual Basic Electrical Engineering (2nd Ed., D.P. Kothari, I.J. N=
agrath)
Solution Manual Electric Machines (3rd Ed., D.P. Kothari, I.J. Nagrath)
Solution Manual Circuits and Networks (A. Sudhakar & S. Palli Shyammohan)
Solution Manual Electrical and Electronic Technology (9th Ed., Edward Hughe=
s, John Hiley, Keith Brown & Ian McKenzie-Smith)
Solution Manual Electrical and Electronic Technology (10th Ed., Edward Hugh=
es, John Hiley, Keith Brown & Ian McKenzie-Smith)
Solution Manual Electric Motors and Drives : Fundamentals, Types and Applic=
ations (3rd Ed., Austin Hughes)=20
Solution Manual Modern Processor Design : Fundamentals of Superscalar Proce=
ssors (John P. Shen)
Solution Manual Computer Networks : Principles, Technologies and Protocols =
for Network Design (N. Olifer & V. Olifer)=20
Solution Manual Computer Networking : Internet Protocols in Action (Jeanna =
Matthews)
Solution Manual Computer Organization (5th Ed., Hamacher et al.)

```
Solution Manual CMOS Digital Integrated Circuits : Analysis and Design (3rd=
 Ed., Sung-Mo Kang & Yusuf Leblebici)
Solution Manual Introduction to Logic Design (1st Ed., Alan B Marcovitz)=20
Solution Manual Introduction to Logic Design (2nd Ed., Alan B Marcovitz)=20
Solution Manual Introduction to Logic Design (3rd Ed., Alan B Marcovitz)=20
Solution Manual Introduction to Logic and Computer Design (Alan B Marcovitz=
)
Solution Manual Digital Principles and Design (Donald D. Givone)
Solution Manual Programmable Logic Controllers (3rd Ed., Frank Petruzella)
Solution Manual Programmable Logic Controllers (4th Ed., Frank Petruzella)

List of Solutions Manuals and Test Banks=20
----------------------------------------
```

contact to :   mattosbw1@gmail.com   mattosbw1(at)g=
mail.com

=20

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR :   CHINA, INDIA, RUSSIA, PAKIST=
AN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MAL=
DIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is =
available (it is a partial list). Then if you need solutions manual only co=
ntact me by email.=20

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TE=
ST BANKS.

I do not review the forums, just send me an email. Please do not use emails=
 from servers "LIVE" , all they are take as spam emails in my inbox.

- Electrical, Electronics & Computer Engineering :

Solution Manual Antenna Theory and Design (2nd Ed., Stutzman & Thiele)
Solution Manual Antenna Theory and Design (3rd Ed., Stutzman & Thiele)
Solution Manual Antennas for All Applications (3rd Ed., John Kraus & Ronald=
 Marhefka)
Solution Manual Principles of Neurocomputing for Science and Engineering (F=
redric M. Ham & Ivica Kostanic)
Solution Manual Introduction to Algorithms (2nd Ed., Cormen, et al.)
Solution Manual Algorithms (Dasgupta, et al.)
Solution Manual Introduction to Random Signals and Applied Kalman Filtering=
 with Matlab Exercises (4th Ed., Robert Grover Brown, Patrick Y. C. Hwang)
Solution Manual Applied Operating Systems Concepts (Silberschatz, Galvin & =
Gagne)

Solution Manual Operating System Concepts (6th Ed., Silberschatz, Galvin & =
Gagne)
Solution Manual Operating System Concepts (7th Ed., Silberschatz, Galvin & =
Gagne)
Solution Manual Operating System Concepts (8th Ed., Silberschatz, Galvin & =
Gagne)
Solution Manual Operating Systems Concepts with Java (6th Ed., Silberschatz=
, Galvin & Gagne)
Solution Manual Operating System Concepts with Java (7th Ed., Silberschatz,=
 Galvin & Gagne)
Solution Manual Operating System Concepts with Java (8th Ed., Silberschatz,=
 Galvin & Gagne)
Solution Manual C++ Program Design (3rd Ed., Cohoon & Davidson)
Solution Manual Java : Program Design 5.0 (Cohoon & Davidson)
Solution Manual Programming in C++ : Lessons and Applications (Timothy B. D=
'Orazio)
Solution Manual Applied C : An Introduction and More (Alice Fischer)
Solution Manual Programming Languages : Principles and Paradigms (1st Ed., =
Allen Tucker & Robert Noonan)
Solution Manual Programming Languages : Principles and Paradigms (2nd Ed., =
Allen Tucker & Robert Noonan)
Solution Manual Introduction to Parallel Computing (2nd Ed., Grama, Karypis=
, Kumar & Gupta)
Solution Manual Parallel Programming in C with MPI and Open MP (Michael J Q=
uinn)
Solution Manual Data Communications and Network Security (Houston H. Carr &=
 Charles Snyder)
Solution Manual Data Communications and Networks (David Miller)
Solution Manual Management Information Systems (3rd Ed., Post & Anderson)
Solution Manual Management Information Systems (4th Ed., Post & Anderson)
Solution Manual Database Management Systems (3rd Ed. Post)
Solution Manual Management Information Systems (9th Ed., James A. O'Brien, =
George Marakas)
Solution Manual Introduction to Systems Analysis and Design (Whitten & Bent=
ley)
Solution Manual Systems Analysis & Design : An Active Approach (2nd Ed., Ma=
rakas)
Solution Manual An Introduction to Object-Oriented Programming with Java (4=
th Ed., C. Thomas Wu - Otani)
Solution Manual An Introduction to Object-Oriented Programming with Java (5=
th Ed., C. Thomas Wu - Otani)
Solution Manual A Comprehensive Introduction to Object-Oriented Programming=
 With Java (C. Thomas Wu)
Solution Manual Data Structures and the Java Collections Framework (1st Ed.=
, William Collins)
Solution Manual Data Structures and the Java Collections Framework (2nd Ed.=
, William Collins)
Solution Manual Data Structures and the Standard Template Library (William =
Collins)
Solution Manual Database System Concepts (4th Ed., Silberschatz)
Solution Manual Database System Concepts (5th Ed., Silberschatz)
Solution Manual Database System Concepts (6th Ed., Silberschatz, Korth & Su=
darshan)

Solution Manual Database Management Systems (3rd Ed., Ramakrishnan & Gehrke=
)
Solution Manual Fundamentals of Network Security (Eric Maiwald)
Solution Manual Computing Concepts (1st Ed., Haag, et al.)
Solution Manual Computing Concepts (2nd Ed., Haag et al.)
Solution Manual Microsoft Office 2003 (Haag et al.)
Solution Manual Advanced Programming Using Visual Basic .NET (2nd Ed., Juli=
a Case Bradley & Anita Millspaugh)
Solution Manual Advanced Programming Using Visual Basic 2005 (3rd Ed., Juli=
a Case Bradley & Anita Millspaugh)
Solution Manual Programming with Java (Julia Case Bradley & Anita Millspaug=
h)
Solution Manual Programming in C#.Net (1st Ed., Julia Case Bradley & Anita =
Millspaugh)
Solution Manual Programming in Visual C# 2005 (2nd Ed., Julia Case Bradley =
& Anita Millspaugh)
Solution Manual Learning Programming Using Visual Basic.Net (Bill Burrows &=
 Joe Lanford)
Solution Manual Programming in Visual Basic.NET : Visual Basic.NET 2005 (6t=
h Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming in Visual Basic .Net : 2003 Update Edition (5th=
 Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Survey of Operating Systems (2nd Ed., Jane Holcombe & Charl=
es Holcombe)
Solution Manual Principles of Voice and Data Communications (Regis J. Bates=
 & Marcus Bates)
Solution Manual Mike Meyers' Network+ Guide To Managing and Troubleshooting=
 Networks (Michael Meyers)
Solution Manual Introduction to Windows Server 2003 (Eric Ecklund)
Solution Manual Programming The Web : An Introduction (Barrie Sosinsky & Va=
lda Hilley)
Solution Manual Programming The Web Using XML (Ellen Pearlman & Eileen Mull=
in)
Solution Manual Internet Marketing : Building Advantage in a Networked Econ=
omy (2nd Ed., Rafi Mohammed et al.)
Solution Manual Internet Technologies at Work (Fred T. Hofstetter)
Solution Manual Internet Literacy (4th Ed., Fred T. Hofstetter)
Solution Manual Software Engineering : A Practitioner's Approach (5th Ed., =
Roger Pressman)
Solution Manual Software Engineering : A Practitioner's Approach (6th Ed., =
Roger Pressman)=20
Solution Manual Software Engineering : A Practitioner's Approach (7th Ed., =
Roger Pressman)
Solution Manual Web Engineering : A Practioner's Approach (1st Ed., Roger S=
. Pressman & David Lowe)
Solution Manual Object-Oriented Software Engineering (Stephen Schach)
Solution Manual Object-Oriented and Classical Software Engineering (5th Ed.=
, Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (6th Ed.=
, Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (7th Ed.=
, Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (8th Ed.=

, Steve Schach)
Solution Manual Introduction to Object-Oriented Analysis and Design (Steve =
Schach)
Solution Manual Communication Networks (2nd Ed., Alberto Leon-Garcia & Indr=
a Widjaja) =20
Solution Manual Fundamentals of Digital Logic with Verilog Design (1st Ed.,=
 Stephen Brown & Zvonko Vranesic)
Solution Manual Fundamentals of Digital Logic with Verilog Design (2nd Ed.,=
 Stephen Brown & Zvonko Vranesic)
Solution Manual Continuous and Discrete Control Systems (John Dorsey)
Solution Manual Engineering Circuit Analysis (6th Ed., William Hayt, Jack K=
emmerly & Steven Durbin)=20
Solution Manual Engineering Circuit Analysis (7th Ed., William Hayt, Jack K=
emmerly & Steven Durbin)=20
Solution Manual Engineering Electromagnetics (7th Ed., William Hayt & John =
Buck)
Solution Manual Engineering Electromagnetics (8th Ed., William Hayt & John =
Buck)
Solution Manual Principles of Electronic Materials and Devices (2nd Ed., Sa=
fa O. Kasap)
Solution Manual Principles of Electronic Materials and Devices (3rd Ed., Sa=
fa O. Kasap)
Solution Manual Programming in Haskell (Graham Hutton)
Solution Manual Probability and Random Processes With Applications to Signa=
l Processing and Communications (Miller & Childers)
Solution Manual Logic in Computer Science : Modelling and Reasoning about S=
ystems (2nd Ed., Michael Huth & Mark Ryan)
Solution Manual Introduction to Distributed Algorithms (2nd., Gerard Tel)
Solution Manual Information Theory, Inference and Learning Algorithms (Davi=
d J. C. MacKay)
Solution Manual Digital Systems Engineering (William Dally & John Poulton)
Solution Manual Concepts in Programming Languages (by John Mitchell)
Solution Manual Simulation Modeling and Analysis (3rd Ed., Averill Law & Da=
vid Kealton)
Solution Manual Simulation Modeling and Analysis with Expertfit Software (4=
th Ed., Averill Law)
Solution Manual System Modeling and Analysis : Foundations of System Perfor=
mance Evaluation (Hisashi Kobayashi & Brian Mark)
Solution Manual Wireless Communications (Andrea Goldsmith)
Solution Manual Testing of Digital Systems (N. K. Jha & S. Gupta)
Solution Manual Space-Time Coding (Hamid Jafarkhani)
Solution Manual Space-Time Block Coding for Wireless Communications (Erik L=
arsson & Petre Stoica)
Solution Manual Smart Electronic Materials : Fundamentals and Applications =
(Jasprit Singh)
Solution Manual Radio-Frequency Electronics : Circuits and Applications (Jo=
n Hagen)
Solution Manual Photonic Devices (Jia-ming Liu)
Solution Manual Networking Wireless Sensors (Bhaskar Krishnamachari)
Solution Manual Mobile Wireless Communications (Mischa Schwartz)
Solution Manual Introduction to Color Imaging Science (Hsien-Che Lee)
Solution Manual Fundamentals of Wireless Communication (David Tse & Pramod =
Viswanath)

```
Solution Manual Fundamentals of Modern VLSI Devices (Yuan Taur & Tak H. Nin=
g)
Solution Manual Electronic and Optoelectronic Properties of Semiconductor S=
tructures (Jasprit Singh)
Solution Manual An Introduction to Statistical Signal Processing (Robert M.=
 Gray)
Solution Manual An Introduction to Radio Frequency Engineering (Christopher=
 Coleman)
Solution Manual The Science of Radio : with MATLAB=AE and ELECTRONICS WORKB=
ENCH=AE Demonstrations (2nd Ed., Paul J. Nahin)
Solution Manual Algebraic Codes for Data Transmission (Richard Blahut)
Solution Manual Fundamentals of Solid State Electronics (C.T. Sah)
Solution Manual Fundamentals of Solid State Engineering (2nd Ed., Manijeh R=
azeghi)
Solution Manual Robot Modeling and Control (Spong, Hutchinson & Vidyasagar)
Solution Manual Theory of Applied Robotics : Kinematics, Dynamics and Contr=
ol (Reza N. Jazar)
Solution Manual Control of Robot Manipulators in Joint Space (R. Kelly, V. =
Santib=E1=F1ez, A. Lor=EDa)
Solution Manual Modelling and Control of Robot Manipulators (2nd Ed., Loren=
zo Sciavicco, Bruno Siciliano)=20
Solution Manual Robotics : Modelling, Planning and Control (Bruno Siciliano=
, Lorenzo Sciavicco, Luigi Villani & Giuseppe Oriolo)
Solution Manual Fundamentals of Semiconductor Fabrication (Gary S. May, Sim=
on M. Sze)
Solution Manual Semiconductor Devices : Physics and Technology (2nd Ed, Sim=
on M. Sze)
Solution Manual Semiconductor Devices : Physics and Technology (3rd Ed, Sim=
on M. Sze & Ming-Kwei Lee)
Solution Manual Electric Machinery (6th Ed., Fitzgerald)
Solution Manual Electric Machinery Fundamentals (4th Ed., Chapman)
Solution Manual Electric Machinery Fundamentals (5th Ed., Chapman)
Solution Manual Electric Machinery and Power System Fundamentals (Chapman)
Solution Manual Local Area Networks (2nd Ed., Keiser)
Solution Manual Signals and Systems : Analysis of Signals Through Linear Sy=
stems (1st Ed., M.J. Roberts)
Solution Manual Fundamentals of Signals and Systems (M.J. Roberts)
Solution Manual Introduction to Signals and Systems (Lindner)
Solution Manual Semiconductor Physics and Devices : Basic Principles (3rd E=
d., Donald Neamen)
Solution Manual Semiconductor Physics and Devices : Basic Principles (4th E=
d., Donald Neamen)
Solution Manual An Introduction to Semiconductor Devices (Donald Neamen)
Solution Manual Microelectronic Circuit Analysis and Design (3rd Ed., Donal=
d Neamen)
Solution Manual Microelectronic Circuit Analysis and Design (4th Ed., Donal=
d Neamen)
Solution Manual Electronic Circuit Analysis and Design (2nd Ed., Donald Nea=
men)
Solution Manual Design for Electrical and Computer Engineers (1st Ed., Ralp=
h Ford & Chris Coulston)=20
Solution Manual Fundamentals of Modeling and Analyzing Engineering Systems =
(Cha, Rosenberg, Dym)
```

Solution Manual Linear Systems (Panos J. Antsaklis & Anthony N. Michel)
Solution Manual A Linear Systems Primer (Panos J. Antsaklis & Anthony N. Mi=
chel)
Solution Manual Principles of Linear Systems (Philip E. Sarachik)
Solution Manual Linear Systems Control : Deterministic and Stochastic Metho=
ds (Elbert Hendricks, Ole Jannerup & Paul Haase S=F8rensen)
Solution Manual Power Systems Harmonics : Fundamentals, Analysis and Filter=
 Design (George J. Wakileh)
Solution Manual Principles of Adaptive Filters and Self-learning Systems (A=
nthony Zaknich)=20
Solution Manual Algebraic Methods for Nonlinear Control Systems (2nd Ed., C=

Solution Manual Programming the World Wide Web (6th Ed., Robert W. Sebesta)
Solution Manual XML: Language Mechanics and Applications (Dwight Peltzer)
Solution Manual Practical Perl with CGI Applications (Elizabeth Chang)
Solution Manual Developing Web Applications with Active Server Pages (Thom =
Luce)
Solution Manual Structure and Interpretation of Signals and Systems (Edward=
 A. Lee & Pravin Varaiya)
Solution Manual Languages and Machines : An Introduction to the Theory of C=
omputer Science (2nd Ed., Thomas Sudkamp)
Solution Manual Languages and Machines : An Introduction to the Theory of C=
omputer Science (3rd Ed., Thomas Sudkamp)
Solution Manual How to Break Software Security (James A. Whittaker & Herber=
t H. Thompson)
Solution Manual Software Quality Assurance : From Theory to Implementation =
(Daniel Galin)
Solution Manual Object Oriented Software Development Using Java (2nd Ed., X=
iaoping Jia)
Solution Manual Introduction to the Team Software Process (Watts S. Humphre=
y)
Solution Manual Software Project Management : A Real-World Guide to Success=
 (Joel Henry)
Solution Manual Software Engineering (7th Ed., Ian Sommerville)
Solution Manual Software Engineering (8th Ed., Ian Sommerville)
Solution Manual Software Engineering (9th Ed., Ian Sommerville)
Solution Manual Software Engineering (3rd Ed., Shari Lawrence Pfleeger & Jo=
anne Atlee)
Solution Manual Software Engineering : Theory and Practice (4th Ed., Shari =
Lawrence Pfleeger & Joanne Atlee)
Solution Manual Object-Oriented Programming featuring Graphical Application=
s in Java (Michael Laszlo)
Solution Manual Project-Based Software Engineering : An Object-Oriented App=
roach (Evelyn Stiller & Cathie LeBlanc)
Solution Manual Engineering of Software, The: A Technical Guide for the Ind=
ividual (Dick Hamlet & Joe Maybee)
Solution Manual Concepts of Programming Languages (7th Ed., Robert W. Sebes=
ta)
Solution Manual Concepts of Programming Languages (8th Ed., Robert W. Sebes=
ta)
Solution Manual Concepts of Programming Languages (9th Ed., Robert W. Sebes=
ta)
Solution Manual Advanced Java : Internet Applications (2nd Ed., Art Gittlem=
an)

Solution Manual Objects to Components with Java 2 Platform (Art Gittleman)
Solution Manual C for Java Programmers (Tomasz Muldner)
Solution Manual Pointers on C (Kenneth Reek)
Solution Manual C++ Programming with Design Patterns Revealed (Tomasz Muldn=
er)
Solution Manual The C++ Programming Language (3rd Ed., Bjarne Stroustrup)
Solution Manual Operating Systems : A Systematic View (6th Ed., William S. =
Davis & T.M. Rajkumar)
Solution Manual Unix: The Textbook (2nd Ed., Syed Mansoor Sarwar, Robert Ko=
retsky & Syed Aqeel Sarwar)
Solution Manual Operating Systems (3rd Ed., Gary Nutt)
Solution Manual LINUX & UNIX Programming Tools : A Primer for Software Deve=
lopers (Syed Mansoor Sarwar & Khaled H. Al-Saqabi)
Solution Manual Addison-Wesley's Interactive Linux Tutorial and Reference (=
Edutrends, Inc.)
Solution Manual Linux : The Textbook (Syed Mansoor Sarwar, Robert Koretsky =
& Syed Aqeel Sarwar)
Solution Manual Kernel Projects for Linux (Gary Nutt)
Solution Manual OSP : An Environment for Operating System Projects (Michael=
 Kifer & Scott A. Smolka)
Solution Manual Distributed Computing : Principles and Applications (M.L. L=
iu)
Solution Manual Distributed Operating Systems and Algorithm Analysis (Randy=
 Chow & Theodore Johnson)
Solution Manual Mastering Networks : An Internet Lab Manual (Jorg Liebeherr=
 & Magda El Zarki)
Solution Manual Computer Networking Complete Package (3rd Ed., James Kurose=
 & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach Featuring the Int=
ernet (3rd Ed., James Kurose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach (4th Ed., James K=
urose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach (5th Ed., James K=
urose & Keith Ross)
Solution Manual Producing Great Sound for Film and Video (3rd Ed., Jay Rose=
)
Solution Manual Network Management : Principles and Practice (Mani Subraman=
ian)
Solution Manual Computer Security : Art and Science (Matt Bishop)
Solution Manual Introduction to Computer Security (Matt Bishop)
Solution Manual Creating Powerful Brands (4th Ed., Leslie de Chernatony, Ma=
lcolm McDonald, Elaine Wallace)
Solution Manual How to Break Software Security (James A. Whittaker & Herber=
t H. Thompson)
Solution Manual Parallel Programming in C with MPI and Open MP (Michael Qui=
nn)
Solution Manual Modern Recording Techniques (6th Ed., Miles Huber & Runstei=
n)
Solution Manual Creating Powerful Radio : Getting, Keeping and Growing Audi=
ences News, Talk, Information & Personality Broadcast, HD, Satellite & Inte=
rnet (Valerie Geller)
Solution Manual Electronic Media Law and Regulation (5th Ed., Kenneth Creec=
h)

```
Solution Manual Electronic Media Management, Revised (5th Ed., Pringle & St=
arr)
Solution Manual Convergent Journalism an Introduction: Writing and Producin=
g Across Media (Quinn & Filak)
Solution Manual Flash Journalism : How to Create Multimedia News Packages (=
Mindy McAdams)

List of Solutions Manuals and Test Banks=20
----------------------------------------

contact to :         mattosbw1@gmail.com                    mattosbw1(at)g=
```

mail.com
  =20

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR :   CHINA, INDIA, RUSSIA, PAKIST=
AN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MAL=
DIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is =
available (it is a partial list). Then if you need solutions manual only co=
ntact me by email.=20

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TE=
ST BANKS.

I do not review the forums, just send me an email. Please do not use emails=
 from servers "LIVE" , all they are take as spam emails in my inbox.

- Math, Statistics & Probability :

Solution manual Advanced Engineering Mathematics (8th Ed., Erwin Kreyszig)
Solution manual Advanced Engineering Mathematics (9th Ed., Erwin Kreyszig)
Solution manual Advanced Engineering Mathematics (10th Ed., Erwin Kreyszig)
Solution manual Advanced Engineering Mathematics (2nd Ed, Michael Greenberg=
)
Solution manual Advanced Engineering Mathematics (6th Ed., Peter O'Neil)=20
Solution manual Statistics and Finance : An Introduction (David Ruppert)
Solution manual Modern Mathematical Statistics with Applications (2nd Ed., =
Jay L. Devore and Kenneth N. Berk)
Solution manual A Survey of Classical and Modern Geometries : With Computer=
 Activities (Arthur Baragar)
Solution manual Differential Equations for Engineers and Scientists (Yunus =
A. Cengel, William J. Palm III)=20
Solution manual Mathematics for Carpentry and the Construction Trades (3rd =
Ed., Alfred P. Webster & Kathryn E. Bright)
Solution manual Calculus : Early Transcendental Functions (3rd Ed., Robert =
T. Smith & Roland B. Minton)

Solution manual Calculus : Early Transcendental Functions (4th Ed., Robert T. Smith & Roland B. Minton)
Solution manual Elements of Engineering Probability and Statistics (Rodger E. Ziemer)
Solution manual Statistics and Probability for Engineers and Scientists, Preliminary Edition (Bhisham C. Gupta, Irwin Guttman)
Solution manual Statistics and Data Analysis : From Elementary to Intermediate (Ajit Tamhane, Dorothy Dunlop)
Solution manual Statistics and Data Analysis for Financial Engineering (David Ruppert)
Solution manual Mathematical Physics with Partial Differential Equations (James Kirkwood)
Solution manual Essential Statistics, Regression, and Econometrics (Gary Smith)
Solution manual Mathematical Methods for Physicists : A Comprehensive Guide (7th Ed., George Arfken, Hans Weber & Frank Harris)
Solution manual Statistics for Physical Sciences - An Introduction (Brian Martin)
Solution Manual Mathematical Statistics for Economics and Business (Ron C. Mittelhammer)
Solution manual Advanced Modern Engineering Mathematics (3rd Ed., Glyn James)
Solution manual Modern Engineering Mathematics (4th Ed., Glyn James)
Solution manual Foundations of Geometry (2nd Ed., Gerard Venema)
Solution manual Discrete Mathematics and Its Applications (7th Ed., Kenneth Rosen)
Solution manual Differential Equations and Dynamical Systems (3rd Ed., Lawrence Perko)=20
Solution manual Introductory Differential Equations with Boundary Value Problems (3rd Ed., Martha Abell & James Braselton)
Solution manual A Modern Introduction to Differential Equations (2nd Ed., Henry J. Ricardo)=20
Solution manual Elementary Differential Equations (7th Ed., Boyce)
Solution manual Elementary Differential Equations (8th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations (9th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations and Boundary Value Problems (7th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations and Boundary Value Problems (8th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations and Boundary Value Problems (9th Ed., Boyce & Diprima)
Solution manual Differential Equations : An Introduction to Modern Methods and Applications (James Brannan & William Boyce)
Solution manual Differential Equations with Boundary Value Problems : An Introduction to Modern Methods and Applications (James Brannan & William Boyce)
Solution manual Calculus (Briggs & Cochran)
Solution manual Calculus - Single Variable (Briggs & Cochran)
Solution manual Calculus - MultiVariable (Briggs & Cochran)
Solution manual Calculus : Early Transcendentals (Briggs & Cochran)
Solution manual Calculus : Early Transcendentals - Single Variable (Briggs

& Cochran)
Solution manual Calculus : Early Transcendentals - MultiVariable (Briggs & =
Cochran)
Solution manual Calculus for Scientists and Engineers : Early Transcendenta=
ls (Briggs, Cochran & Gillett)
Solution manual Calculus for Scientists and Engineers : Early Transcendenta=
ls - Single Variable (Briggs, Cochran & Gillett)
Solution manual Calculus for Scientists and Engineers : Early Transcendenta=
ls - Multivariable (Briggs, Cochran & Gillett)
Solution manual An Introduction to Mathematical Cryptography (J. Hoffstein,=
 J. Pipher, J.H. Silverman)
Solution manual Practical Business Statistics (Andrew Siegel)
Solution manual Advanced Calculus : A Transition to Analysis (Thomas Dence =
& Joseph Dence)
Solution manual Calculus : Early Transcendentals Combined (8th Ed., Anton, =
Bivens & Davis)
Solution manual Calculus : Early Transcendentals Combined (9th Ed., Anton, =
Bivens & Davis)
Solution manual Calculus : Multivariable (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Multivariable (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Early Transcendentals Single Variable (8th Ed., =
Anton, Bivens & Davis)
Solution manual Calculus : Early Transcendentals Single Variable (9th Ed., =
Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Combined (8th Ed., Anton, B=
ivens & Davis)
Solution manual Calculus : Late Transcendentals Combined (9th Ed., Anton, B=
ivens & Davis)
Solution manual Calculus : Late Transcendentals Single Variable (8th Ed., A=
nton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Single Variable (9th Ed., A=
nton, Bivens & Davis)
Solution manual Introduction to the Finite Element Method : Theory, Program=
ming and Applications (Erik G. Thompson)
Solution manual A Physicist's Guide to Mathematica (2nd Ed., Patrick Tam)
Solution manual Mathematics for Engineers : A Modern Interactive Approach (=
3rd., Anthony Croft & Robert Davison)
Solution manual Measurement and Data Analysis for Engineering and Science (=
Patrick F Dunn)
Solution manual Elementary Linear Algebra (4th Ed., Stephen Andrilli & Davi=
d Hecker)
Solution manual Elementary Linear Algebra Edition Abridged (9th Ed., Anton =
& Rorres)
Solution manual Elementary Linear Algebra (9th Ed., Anton)
Solution manual Elementary Linear Algebra with Applications (9th Ed., Anton=
 & Rorres)
Solution manual Boundary Value Problems and Partial Differential Equations =
(6th Ed., David Powers)
Solution manual Introductory Statistics : Using Technology (5th Ed., Prem S=
. Mann)
Solution manual Introductory Statistics (6th Ed., Prem S. Mann)
Solution manual Introductory Statistics (7th Ed., Prem S. Mann)
Solution manual Basic Real Analysis (Houshang H. Sohrab)

Solution manual Essentials of Integration Theory for Analysis (Daniel W. St=
roock)
Solution manual Statistical Methods (3rd Ed., Rudolf Freund, Donna Mohr, Wi=
lliam Wilson)
Solution manual Doing Bayesian Data Analysis : A Tutorial Introduction with=
 R (John Kruschke)
Solution manual Modern Algebra : An Introduction (6th Ed., John Durbin)
Solution manual The Art and Craft of Problem Solving (2nd Ed., Paul Zeitz)
Solution manual Numerical Linear Algebra (Gr=E9goire Allaire, Sidi Mahmoud =
Kaber, K. Trabelsi)
Solution manual Introductory Statistics for the Behavioral Sciences (6th Ed=
., Welkowitz, Cohen & Ewen)
Solution manual Statistics : Principles and Methods (5th Ed., Richard Johns=
on)
Solution manual Statistics : Principles and Methods (6th Ed., Richard Johns=
on)
Solution manual Statistical Bioinformatics : with R (Sunil K. Mathur)
Solution manual A Modern Introduction to Differential Equations (2nd Ed., H=
enry Ricardo)
Solution manual Parameter Estimation and Inverse Problems (Richard Aster, B=
rian Borchers & Clifford Thurber)
Solution manual Parameter Estimation and Inverse Problems (2nd Ed., Richard=
 Aster, Brian Borchers & Clifford Thurber)
Solution manual Codes : An Introduction to Information Communication and Cr=
yptography (Norman L. Biggs)
Solution manual Geometry and Its Applications (2nd Ed., Walter A. Meyer)
Solution manual Elementary Differential Geometry (2nd Ed., A.N. Pressley)
Solution manual Fractal Geometry : Mathematical Foundations and Application=
s (2nd Ed., Kenneth Falconer)
Solution manual Analytical and Computational Methods of Advanced Engineerin=
g Mathematics (Grant B. Gustafson & Calvin H. Wilcox)
Solution manual How to Read and Do Proofs : An Introduction to Mathematical=
 Thought Processes (4th Ed., Daniel Solow)
Solution manual How to Read and Do Proofs : An Introduction to Mathematical=
 Thought Processes (5th Ed., Daniel Solow)
Solution manual A Probability Path (Sidney Resnick)
Solution manual Adventures in Stochastic Processes (Sidney I. Resnick)
Solution manual Probability, Reliability, and Statistical Methods in Engine=
ering Design (Achintya Haldar, Sankaran Mahadevan)
Solution manual An Engineers Guide to MATLAB (3rd Ed., Magrab, Azarm, Balac=
handran, Duncan, Herold & Walsh)
Solution manual Intuitive Probability and Random Processes using MATLAB (St=
even Kay)
Solution manual Modeling Random Processes for Engineers and Managers (James=
 Solberg)
Solution manual Probability and Random Processes with Applications to Signa=
l Processing (3rd Ed., Henry Stark & John W. Woods)
Solution manual Probability, Statistics, and Random Processes for Engineers=
 (4th Ed., Henry Stark & John W. Woods)
Solution manual Probability, Statistics, and Random Processes For Electrica=
l Engineering (3rd Ed., Alberto Leon-Garcia)
Solution manual Probability Concepts in Engineering : Emphasis on Applicati=
ons to Civil and Environmental Engineering (2nd Ed., Ang & Tang)

Solution manual Applied Statistics for Engineers and Physical Scientists (3=
rd Ed., Johannes Ledolter & Robert Hogg)
Solution manual Applied Statistics and Probability for Engineers (3rd Ed., =
Montgomery & Runger)
Solution manual Applied Statistics and Probability for Engineers (4th Ed., =
Montgomery & Runger)
Solution manual Applied Statistics and Probability for Engineers (5th Ed., =
Montgomery & Runger)
Solution manual Engineering Statistics (3rd Ed., Montgomery, Runger & Hubel=
e)
Solution manual Engineering Statistics (4th Ed., Montgomery, Runger & Hubel=
e)
Solution manual Engineering Statistics (5th Ed., Montgomery, Runger & Hubel=
e)
Solution manual Introduction to Statistical Quality Control (5th Ed., Montg=
omery)
Solution manual Introduction to Statistical Quality Control (6th Ed., Montg=
omery)
Solution manual Introduction to Statistical Quality Control (7th Ed., Montg=
omery)
Solution manual Statistical Quality Control : A Modern Introduction - Inter=
national Student Version (6th Ed., Montgomery)
Solution manual Statistical Quality Control : A Modern Introduction - Inter=
national Student Version (7th Ed., Montgomery)
Solution manual Calculus : One Variables (10th Ed., Salas, Hille, Etgen)
Solution manual Calculus : One and Several Variables (8th Ed., Salas, Hille=
, Etgen)
Solution manual Calculus : One and Several Variables (10th Ed., Salas, Hill=
e, Etgen)
Solution manual Squaring the Circle : Geometry in Art and Architecture (Pau=
l Calter)
Solution manual Technical Mathematics (5th Ed., Paul Calter & Michael Calte=
r)
Solution manual Technical Mathematics with Calculus (5th Ed., Paul Calter &=
 Michael Calter)
Solution manual Technical Mathematics with Calculus, Canadian Edition (Paul=
 Calter & Michael Calter)
Solution manual Technical Mathematics with Calculus, 2nd Canadian Edition (=
Paul Calter, Michael Calter, Paul Wraight, Don Spencer)
Solution manual Technical Mathematics with Calculus (6th Ed., Paul Calter &=
 Michael Calter)
Solution manual Techniques of Problem Solving (Luis Fern=E1ndez, Haedeh Goo=
ransarab)
Solution manual Probability and Statistics in Engineering (4th Ed., Hines, =
Montgomery, Goldsman & Borror)
Solution manual A First Course in Design and Analysis of Experiments (Gary =
W. Oehlert)
Solution manual Design and Analysis of Experiments (6th Ed., Douglas Montgo=
mery)
Solution manual Design and Analysis of Experiments (7th Ed., Douglas Montgo=
mery)
Solution manual Design and Analysis of Experiments (8th Ed., Douglas Montgo=
mery)

Solution Manual Experimental Methods for Engineers (8th Ed., Jack P. Holman=
)
Solution manual Introduction to Engineering Experimentation (2nd Ed., Wheel=
er & Ganji)
Solution manual Introduction to Engineering Experimentation (3rd Ed., Wheel=
er & Ganji)
Solution manual Introduction to the Design & Analysis of Experiments (Canav=
os & Koutrouvelis)
Solution manual Modern Methods For Quality Control and Improvement (2nd Ed.=
, Wadsworth, Stephens, Godfrey)
Solution manual Essential Statistics for Economics, Business and Management=
 (Teresa Bradley)
Solution manual Statistics and Econometrics : Methods and Applications (Ash=
enfelter, Levine & Zimmerman)
Solution manual Applied Combinatorics (5th Ed., Alan Tucker)
Solution manual Applied Combinatorics (6th Ed., Alan Tucker)
Solution manual Vector Calculus (Miroslav Lovric)
Solution manual Applied Multivariate Techniques (Subhash Sharma)
Solution manual Mathematical Modeling (3rd Ed., Mark Meerschaert)
Solution manual Discrete Mathematics : Mathematical Reasoning and Proof wit=
h Puzzles, Patterns, and Games (Douglas Ensley, J. Winston Crawley)
Solution manual Probability, Random Variables and Random Signal Principles =
(4th Ed., Peyton Z., Jr. Peebles)
Solution manual Introduction to C++, Excel MATLAB & Basic Engineering Numer=
ical Methods V1.1 (Harvey Stenger & Charles Smith)
Solution manual Numerical Methods for Engineers and Scientists : An Introdu=
ction with Applications Using MATLAB (1st Ed., Amos Gilat & Vish Subramania=
m)
Solution manual Numerical Methods for Engineers and Scientists : An Introdu=
ction with Applications Using MATLAB (2nd Ed., Amos Gilat & Vish Subramania=
m)
Solution manual MATLAB : An Introduction with Applications (2nd Ed., Amos G=
ilat)
Solution manual MATLAB : An Introduction with Applications (3rd Ed., Amos G=
ilat)
Solution manual MATLAB : An Introduction with Applications (4th Ed., Amos G=
ilat)
Solution manual Matlab : A Practical Introduction to Programming and Proble=
m Solving (Stormy Attaway)
Solution manual Matlab : A Practical Introduction to Programming and Proble=
m Solving (2nd Ed., Stormy Attaway)
Solution manual Data, Statistics, and Decision Models with Excel (Harnett &=
 Horrell)=20
Solution manual Understanding Analysis (Stephen Abbott)
Solution manual Time Series Analysis With Applications in R (2nd Ed., Jonat=
han D. Cryer & Kung-Sik Chan)
Solution manual Time Series Analysis and Its Applications : With R Examples=
 (2nd Ed., Robert Shumway & David Stoffer)
Solution manual Doing Statistics for Business with Excel : Data, Inference,=
 and Decision Making (2nd Ed. Pelosi & Sandifer)
Solution manual Engineering with Excel (3rd Ed., Ronald W. Larsen)
Solution manual Spreadsheet Tools for Engineers Using Excel 2007 (Byron Got=
tfried)

Solution manual Spreadsheet Tools for Engineers using Excel (2nd Ed. Byron =
Gottfried)
Solution manual Spreadsheet Tools for Engineers using Excel (3rd Ed. Byron =
Gottfried)
Solution manual Introduction to Matlab 7 (Etter, Kuncicky & Moore)
Solution manual Introduction to Matlab 6 for Engineers (1st Ed., William Pa=
lm III)
Solution manual Introduction to Matlab 7 for Engineers (2nd Ed., William Pa=
lm III)
Solution manual Introduction to Matlab for Engineers (3rd Ed., William Palm=
 III)
Solution manual A Concise Introduction to MATLAB (William J Palm III)
Solution manual Numerical Methods for Engineers (Bilal M. Ayyub, Richard H.=
 McCuen)
Solution manual Numerical Methods for Engineers (4th Ed. Steven Chapra, Ray=
mond Canale)
Solution manual Numerical Methods for Engineers (5th Ed. Steven Chapra, Ray=
mond Canale)
Solution manual Numerical Methods for Engineers (6th Ed. Steven Chapra, Ray=
mond Canale)
Solution manual Applied Numerical Methods with MATLAB for Engineers and Sci=
entists (1st Ed., Steven Chapra)
Solution manual Applied Numerical Methods with MATLAB for Engineers and Sci=
entists (2nd Ed., Steven Chapra)
Solution manual Applied Numerical Methods with MATLAB for Engineers and Sci=
entists (3rd Ed., Steven Chapra)
Solution manual MATLAB for Engineers (1st Ed., Holly Moore)
Solution manual MATLAB for Engineers (2nd Ed., Holly Moore)
Solution manual Statistics for Engineers and Scientists (1st Ed., William N=
avidi)
Solution manual Statistics for Engineers and Scientists (2nd Ed., William N=
avidi)
Solution manual Statistics for Engineers and Scientists (3rd Ed., William N=
avidi)
Solution manual Principles of Statistics for Engineers and Scientists (Will=
iam Navidi)
Solution manual Elementary Statistics (1st Ed., William Navidi, Barry Monk)
Solution manual Probability (Jim Pitman)
Solution manual Basic Probability Theory (Robert B. Ash)
Solution manual An Introduction to Stochastic Modeling (3rd Ed., Samuel Kar=
lin & Howard M. Taylor)
Solution manual An Introduction to Stochastic Modeling (4th Ed., Mark Pinsk=
y & Samuel Karlin)
Solution manual Stochastic Calculus for Finance (Steven E. Shreve)
Solution manual Markov Processes for Stochastic Modeling (Oliver Ibe)
Solution manual Mathematical Statistics with Applications (K.M. Ramachandra=
n & Chris Tsokos)
Solution manual Probability : A Graduate Course (Allan Gut)=20
Solution manual Linear Algebra Done Right (2nd Ed., Sheldon Axler)
Solution manual Precalculus : A Prelude to Calculus (Sheldon Axler)=20
Solution manual Statistics for Business (Derek Waller)
Solution manual An Introduction to the Mathematics of Financial Derivatives=
 (2nd Ed., Salih Neftci)

Solution manual Elementary Number Theory with Applications (2nd Ed., Thomas=
 Koshy)
Solution manual Introduction to Probability Models (9th Ed., Sheldon Ross)
Solution manual Introduction to Probability Models (10th Ed., Sheldon Ross)
Solution manual Introductory Statistics (2nd Ed., Sheldon Ross)
Solution manual Introductory Statistics (3rd Ed., Sheldon Ross)
Solution manual Introduction to Probability and Statistics for Engineers an=
d Scientists (4th Ed., Sheldon Ross)
Solution manual Basic Mathematics through Applications (4th Ed. by Akst, Br=
agg)
Solution manual Developmental Mathematics (6th Ed., Bittinger & Beecher)
Solution manual Developmental Mathematics (7th Ed., Bittinger & Beecher)
Solution manual Developmental Mathematics : Basic Mathematics and Algebra (=
1st Ed., Lial, Hornsby, McGinnis, Salzman & Hestwood)
Solution manual Developmental Mathematics : Basic Mathematics and Algebra (=
2nd Ed., Lial, Hornsby, McGinnis, Salzman & Hestwood)
Solution manual Essential Mathematics (2nd Ed., Margaret Lial & Stanley Sal=
zman)
Solution manual Essential Mathematics (3rd Ed., Margaret Lial & Stanley Sal=
zman)
Solution manual Prealgebra & Introductory Algebra (2nd Ed. by Elayn El Mart=
in-Gay)
Solution manual Prealgebra (5th Ed., Bittinger, Ellenbogen & Johnson)
Solution manual Prealgebra (5th Ed., Elayn El Martin-Gay)
Solution manual Prealgebra : An Integrated Approach (Lial & Hestwood)
Solution manual Integrated Arithmetic and Basic Algebra (4th Ed., Jordan & =
Palow)
Solution manual Introductory Algebra through Applications (1st Ed., Akst & =
Bragg)
Solution manual Introductory Algebra through Applications (2nd Ed., Akst & =
Bragg)
Solution manual Beginning Algebra (10th Ed., Lial, Hornsby & McGinnis)
Solution manual Elementary Algebra Early Graphing for College Students (3rd=
 Ed., Allen R. Angel)
Solution manual Intermediate Algebra with Applications & Visualization (3rd=
 Ed., Rockswold & Krieger)
Solution manual Intermediate Algebra (10th Ed., Lial, Hornsby & McGinnis)
Solution manual Beginning and Intermediate Algebra (4th Ed., Lial, Hornsby =
& McGinnis)
Solution manual Elementary and Intermediate Algebra : Graphs & Models (3rd =
Ed., Bittinger, Ellenbogen & Johnson)
Solution manual Algebra for College Students (4th Ed., Mark Dugopolski)
Solution manual Algebra for College Students (5th Ed., Mark Dugopolski)
Solution manual Algebra For College Students (6th Ed., Robert F Blitzer)
Solution manual Algebra for College Students (3rd Ed., Allen R. Angel)
Solution manual Algebra for College Students (6th Ed., Lial, Hornsby & McGi=
nnis)
Solution manual Statistics, Data Analysis, and Decision Modeling (3rd Ed., =
James Evans)
Solution manual Statistics, Data Analysis, and Decision Modeling (4th Ed., =
James Evans)
Solution manual College Geometry : A Discovery Approach (2nd Ed., David Kay=
)

Solution manual College Geometry : Using The Geometer's Sketchpad - Prelimi=
nary Edition (Barbara Reynolds & William Fenton)
Solution manual College Geometry : A Problem Solving Approach with Applicat=
ions (2nd Ed., Musser, Trimpe & Maurer)
Solution manual A Survey of Mathematics with Applications (8th Ed., Angel, =
Abbott & Runde)
Solution manual A Survey of Mathematics with Applications: Expanded Edition=
 (8th Ed., Angel, Abbott & Runde)
Solution manual Mathematical Ideas (11th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas: Expanded Edition (11th Ed., Miller, Hee=
ren & Hornsby)
Solution manual Mathematical Thinking : Problem-Solving and Proofs (2nd Ed.=
, John P. D'Angelo & Douglas B. West)
Solution manual Thinking Mathematically (4th Ed., Robert F. Blitzer)
Solution manual Introduction to Mathematical Thinking: Algebra and Number S=
ystems (Will J. Gilbert & Scott A. Vanstone)
Solution manual Mathematical Reasoning : Writing and Proof (1st Ed., Ted A.=
 Sundstrom)
Solution manual Mathematical Reasoning : Writing and Proof (2nd Ed., Ted A.=
 Sundstrom)
Solution manual Mathematical Reasoning for Elementary Teachers (4th Ed., Ca=
lvin T. Long & Duane W. DeTemple)
Solution manual Mathematical Reasoning for Elementary Teachers (5th Ed., Lo=
ng, DeTemple & Millman)
Solution manual Mathematics for Elementary School Teachers (4th Ed., O'Daff=
er, Charles, Cooney, Dossey & Schielack)
Solution manual Mathematics for Elementary Teachers (2nd Ed., Sybilla Beckm=
ann)
Solution manual Finite Mathematics and Calculus with Applications (7th Ed.,=
 Lial, Greenwell & Ritchey)
Solution manual Finite Mathematics and Calculus with Applications (8th Ed.,=
 Lial, Greenwell & Ritchey)
Solution manual Additional Calculus Topics (11th Ed., Barnett, Ziegler & By=
leen)
Solution manual College Mathematics for Business, Economics, Life Sciences =
& Social Sciences (11th Ed., Barnett, Ziegler & Byleen)
Solution manual Introductory Mathematical Analysis for Business, Economics =
and the Life and Social Sciences (12th Ed., Haeussler, Paul & Wood)
Solution manual Finite Mathematics for Business, Economics, Life Sciences a=
nd Social Sciences (11th Ed., Barnett, Ziegler, Byleen)
Solution manual Finite Mathematics (9th Ed., Lial, Greenwell & Ritchey)
Solution manual Calculus and Its Applications (9th Ed., Bittinger & Ellenbo=
gen)
Solution manual Calculus for Business, Economics, Life Sciences & Social Sc=
iences (11th Ed., Barnett, Ziegler & Byleen)
Solution manual Calculus with Applications (9th Ed., Lial, Greenwell & Ritc=
hey)
Solution manual Calculus with Applications : Brief Version (9th Ed., Lial, =
Greenwell & Ritchey)
Solution manual Concepts of Calculus with Applications (Martha Goshaw)
Solution manual University Calculus : Elements with Early Transcendentals (=
Hass, Weir & Thomas, Jr.)
Solution manual Thomas' Calculus, Early Transcendentals: Media Upgrade (11t=

```
h Ed., Thomas Jr., Weir, Hass & Giordano)
Solution manual Thomas' Calculus: Media Upgrade (11th Ed., Thomas Jr., Weir=
, Hass & Giordano)
Solution manual University Calculus : Alternate Edition (Hass, Weir & Thoma=
s, Jr.)
Solution manual Differential Equations Computing and Modeling (4th Ed., Edw=
ards & Penney)
Solution manual Differential Equations and Boundary Value Problems : Comput=
ing and Modeling (4th Ed., Edwards & Penney)
Solution manual Elementary Differential Equations with Boundary Value Probl=
ems (6th Ed., Edwards & Penney)
Solution manual Elementary Differential Equations (6th Ed., Edwards & Penne=
y)
Solution manual Fundamentals of Differential Equations (7th Ed., Nagle, Saf=
f & Snider)
Solution manual Fundamentals of Differential Equations with Boundary Value =
Problems (5th Ed., Nagle, Saff & Snider)
Solution manual Differential Equations and Linear Algebra (3rd Ed., Goode &=
 Annin)
Solution manual College Algebra with Trigonometry (9th Ed., Raymond A. Barn=
ett)
Solution manual College Algebra Enhanced with Graphing Utilities (5th Ed., =
Sullivan & Sullivan III)
Solution manual College Algebra (10th Ed., Lial, Hornsby & Schneider)
Solution manual College Algebra : Graphs and Models (3rd Ed., Bittinger, Be=
echer, Ellenbogen & Penna)
Solution manual College Algebra : Graphs and Models (4th Ed., Bittinger, Be=
echer, Ellenbogen & Penna)
Solution manual College Algebra Essentials (8th Ed., Michael Sullivan)
Solution manual College Algebra (3rd Ed., Judith A. Beecher, Judith A. Penn=
a & Marvin L. Bittinger)
Solution manual College Algebra (8th Ed., Michael Sullivan)
Solution manual College Algebra (9th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry for College Readiness (Margaret L.=
 Lial & John Hornsby)
Solution manual Algebra and Trigonometry Enhanced with Graphing Utilities (=
5th Ed., Sullivan & Sullivan III)
Solution manual Algebra and Trigonometry : Graphs & Models (4th Ed., Bittin=
ger, Beecher, Ellenbogen & Penna)
Solution manual Trigonometry : A Unit Circle Approach (8th Ed., Michael Sul=
livan)
Solution manual Precalculus (3rd Ed., Lial, Hornsby & Schneider)
Solution manual Precalculus (4th Ed., Lial, Hornsby & Schneider)
Solution manual Precalculus : Enhanced with Graphing Utilities (5th Ed., Su=
llivan & Sullivan III)
Solution manual Precalculus : Functions and Graphs (3rd Ed. Mark Dugopolski=
)
Solution manual Precalculus : Graphs & Models and Graphing (4th Ed., Bittin=
ger, Beecher, Ellenbogen & Penna)
Solution manual Discrete and Combinatorial Mathematics (5th ed., Ralph P. G=
rimaldi)
Solution manual Discrete Mathematics (Sherwood Washburn, Thomas Marlowe & C=
harles T. Ryan)
```

Solution manual Discrete Mathematics (5th ed., John Dossey, Albert Otto, La=
wrence Spence & Charles Vanden Eynden)
Solution manual Mathematics for New Technologies (Don Hutchison & Mark Yann=
otta)
Solution manual Fundamental Finite Element Analysis and Applications: with =
Mathematica and Matlab Computations (Asghar Bhatti)
Solution manual Advanced Topics in Finite Element Analysis of Structures: W=
ith Mathematica and MATLAB Computations (Asghar Bhatti)=20
Solution manual The Finite Element Method in Engineering (4th Ed., by Rao)
Solution manual An Introduction to the Finite Element Method (3rd Ed., J. N=
. Reddy)
Solution manual Fundamentals of Finite Element Analysis (1st Ed., David V. =
Hutton)=20
Solution manual Simulation Modeling and Analysis (3rd Ed., Averill Law & Da=
vid Kelton)
Solution manual Simulation Modeling and Analysis (4th Ed., Averill Law)
Solution manual The Finite Element Method : Its Basis and Fundamentals (6th=
 Ed., Zienkiewicz, R. L. Taylor & J.Z. Zhu)
Solution manual Algebra : Form and Function (William McCallum, Eric Connall=
y & Deborah Hughes-Hallett)
Solution manual Algebra : Form and Function, Preliminary Edition (William M=
cCallum, Eric Connally & Deborah Hughes-Hallett)
Solution manual Applied Calculus (2nd Ed., Deborah Hughes-Hallett, et al.)
Solution manual Applied Calculus (3rd Ed., Deborah Hughes-Hallett, et al.)
Solution manual Applied Calculus (4th Ed., Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Multivariable (3rd Ed., William G. McCallum, Deb=
orah Hughes-Hallett, et al.)
Solution manual Calculus : Multivariable (4th Ed., William G. McCallum, Deb=
orah Hughes-Hallett, et al.)
Solution manual Calculus : Multivariable (5th Ed., William G. McCallum, Deb=
orah Hughes-Hallett, et al.)
Solution manual Calculus : Single Variable (3rd Ed., Deborah Hughes-Hallett=
, Andrew M. Gleason, et al.)
Solution manual Calculus : Single Variable (4th Ed., Deborah Hughes-Hallett=
, Andrew M. Gleason, et al.)
Solution manual Calculus : Single Variable (5th Ed., Deborah Hughes-Hallett=
, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (3rd Ed., Deborah Hughe=
s-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (4th Ed., Deborah Hughe=
s-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (5th Ed., Deborah Hughe=
s-Hallett)
Solution manual Functions Modeling Change : A Preparation for Calculus - Te=
xas Edition (2nd Ed., Eric Connally, Deborah Hughes-Hallett & Andrew M. Gle=
ason)
Solution manual Functions Modeling Change : A Preparation for Calculus (2nd=
 Ed., Eric Connally, Deborah Hughes-Hallett, et al.)
Solution manual Functions Modeling Change : A Preparation for Calculus (3rd=
 Ed., Eric Connally)
Solution manual Differential Equations (A. King, J. Billingham, S. Otto)=20
Solution manual Regression Methods in Biostatistics : Linear, Logistic, Sur=
vival, and Repeated Measures Models (Eric Vittinghoff, David Glidden, Steph=

en Shiboski, Charles McCulloch)
Solution manual A Modern Introduction to Probability and Statistics : Under=
standing Why and How (F.M. Dekking, C. Kraaikamp, H.P. Lopuha=E4, L.E. Mees=
ter)
Solution manual Statistical Methods for the Analysis of Repeated Measuremen=
ts (Charles S. Davis)
Solution manual Bayesian Core : A Practical Approach to Computational Bayes=
ian Statistics (Jean-Michel Marin, Christian Robert)
Solution manual The Bayesian Choice : From Decision-Theoretic Foundations t=
o Computational Implementation (2nd Ed., Christian Robert)
Solution manual Essentials of Stochastic Processes (Rick Durrett)
Solution manual Methods of Multivariate Statistics (Muni Srivastava)
Solution manual Regression Analysis : Theory, Methods, and Applications (As=
hish Sen & Muni Srivastava)
Solution manual Applied Probability and Statistics (Mario Lefebvre)
Solution manual Basic Probability Theory with Applications (Mario Lefebvre)
Solution manual Foundations of Hyperbolic Manifolds (2nd Ed., John Ratcliff=
e)
Solution manual Fourier and Laplace Transforms (R. J. Beerends , H. G. ter =
Morsche)
Solution manual Infinite-Dimensional Dynamical Systems (James C. Robinson)
Solution manual Mathematical Methods for Physics and Engineering, (3rd Ed.,=
 Riley, Hobson & Bence)
Solution manual Numerical Methods in Engineering with MATLAB (Jaan Kiusalaa=
s)=20
Solution manual Numerical Methods in Engineering with Python (Jaan Kiusalaa=
s)
Solution manual An Introduction to Numerical Analysis (Endre Suli and David=
 Mayers)
Solution manual Fundamentals of Engineering Numerical Analysis (Parviz Moi=
n)
Solution manual Statistical Design (George Casella)
Solution manual Statistical Inference (2nd Ed., George Casella, Roger L. Be=
rger)
Solution manual Monte Carlo Statistical Methods (2nd Ed., Christian P. Robe=
rt, George Casella)
Solution manual Introducing Monte Carlo Methods with R (Christian Robert & =
George Casella)
Solution manual Introduction to Mathematical Structures and Proofs (Larry J=
. Gerstein)
Solution manual Introduction to Mathematical Structures and Proofs (2nd Ed.=
, Larry J. Gerstein)
Solution manual Analyzing Categorical Data (Jeffrey S. Simonoff)=20
Solution manual Fundamentals of Complex Analysis with Applications to Engin=
eering, Science, and Mathematics (3rd Ed., E. Saff & Arthur Snider)
Solution manual Probability & Statistics for Engineers & Scientists (8th Ed=
., Walpole, Myers, Ye)
Solution manual Probability & Statistics for Engineers & Scientists (9th Ed=
., Walpole, Myers, Ye)
Solution manual Statistics for Engineering and the Sciences (5th Ed., Mende=
nhall & Sincich)

List of Solutions Manuals and Test Banks=20
----

contact to :   mattosbw1@gmail.com   mattosbw1(at)g=
mail.com
  =20

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR :   CHINA, INDIA, RUSSIA, PAKIST=
AN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MAL=

DIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is =
available (it is a partial list). Then if you need solutions manual only co=
ntact me by email.=20

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TE=
ST BANKS.

I do not review the forums, just send me an email. Please do not use emails=
 from servers "LIVE" , all they are take as spam emails in my inbox.

- Math, Statistics & Probability :

Solution manual A Second Course in Statistics : Regression Analysis (6th Ed=
., Mendenhall & Sincich)
Solution manual A Second Course in Statistics : Regression Analysis (7th Ed=
., Mendenhall & Sincich)
Solution manual Miller & Freund's Probability and Statistics for Engineers =
(7th Ed., Johnson, Miller, Freund)
Solution manual Miller & Freund's Probability and Statistics for Engineers =
(8th Ed., Johnson, Miller, Freund)
Solution manual Numerical Methods Using Matlab (4th Ed., Mathews & Fink)
Solution manual Applied Numerical Analysis Using MATLAB (2nd Ed., Laurene v=
. Fausett)
Solution manual Applied Numerical Analysis (7th Ed., Curtis F. Gerald, Patr=
ick O. Wheatley)
Solution manual Friendly Introduction to Numerical Analysis (Bradie)
Solution manual Elementary Linear Algebra (2nd Ed., Spence, Insel & Friedbe=
rg)
Solution manual Elementary Linear Algebra with Applications (9th Ed., Kolma=
n & Hill)
Solution manual Introductory Linear Algebra : An Applied First Course (8th =
Ed., Kolman & Hill)
Solution manual Linear Algebra with Applications (6th Ed., S. Leon)
Solution manual Linear Algebra with Applications (7th Ed., S. Leon)
Solution manual Linear Algebra with Applications (8th Ed., S. Leon)

Solution manual Linear Algebra for Engineers and Scientists Using Matlab (H=
ardy)
Solution manual Linear Algebra with Applications (3rd Ed., Bretscher)
Solution manual Linear Algebra with Applications (4th Ed., Bretscher)
Solution manual Modern Matrix Algebra (Hill & Kolman)
Solution manual Matrix Methods : Applied Linear Algebra (3rd Ed., Richard B=
ronson & Gabriel B. Costa)
Solution manual A Transition to Abstract Mathematics : Learning Mathematica=
l Thinking and Writing (2nd Ed., Randall Maddox)
Solution manual Partial Differential Equations and Boundary Value Problems =
with Fourier Series (2nd ed., Asmar)
Solution manual Applied Partial Differential Equations (4th Ed., Haberman)
Solution manual Technical Calculus (5th Ed., Dale Ewen, Joan S. Gary & Jame=
s E. Trefzger)
Solution manual Technical Mathematics (2th Ed., Dale Ewen, Joan S. Gary & J=
ames E. Trefzger)
Solution manual Technical Mathematics with Calculus (2th Ed., Dale Ewen, Jo=
an S. Gary & James E. Trefzger)
Solution manual Introductory Mathematics (4th Ed., Cook)
Solution manual Mathematics for the Technical Trades (Cook)
Solution manual College Mathematics (7th Ed., Cleaves & Hobbs)
Solution manual Fundamentals of Statistics (2nd Ed., Michael III Sullivan)
Solution manual Fundamentals of Statistics (3rd Ed., Michael III Sullivan)
Solution manual Statistics : Informed Decisions Using Data (2nd Ed., Michae=
l III Sullivan)
Solution manual Statistics : Informed Decisions Using Data (3rd Ed., Michae=
l III Sullivan)
Solution manual Statistics : Informed Decisions Using Data (4th Ed., Michae=
l III Sullivan)
Solution manual Modern Elementary Statistics (12th Ed., John E. Freund, Ben=
jamin M. Perles)
Solution manual Statistics : The Art and Science of Learning From Data (Agr=
esti & Franklin)
Solution manual Statistics : The Art and Science of Learning From Data (2nd=
 Ed., Agresti & Franklin)
Solution manual Statistics : The Art and Science of Learning From Data (3rd=
 Ed., Agresti & Franklin)
Solution manual Elementary Statistics : Picturing the World (3rd Ed., Larso=
n & Farber)
Solution manual Elementary Statistics : Picturing the World (4th Ed., Larso=
n & Farber)
Solution manual Elementary Statistics : Picturing the World (5th Ed., Larso=
n & Farber)
Solution manual A First Course in Statistics (9th Ed., McClave & Sincich)
Solution manual A First Course in Statistics (10th Ed., McClave & Sincich)
Solution manual A First Course in Statistics (11th Ed., McClave & Sincich)
Solution manual Statistics (10th Ed., McClave & Terry Sincich)
Solution manual Statistics (11th Ed., McClave & Terry Sincich & William Men=
denhall)
Solution manual Statistics (12th Ed., McClave & Terry Sincich)
Solution manual Interactive Statistics (3rd Ed., Martha Aliaga & Brenda Gun=
derson)
Solution manual Statistics for the Life Sciences (3rd Ed., Samuels & Witmer=

```
)
Solution manual Statistics for the Life Sciences (4th Ed., Samuels, Witmer =
& Schaffner)
Solution manual Applied Statistics and the SAS Programming Language (5th Ed=
., Cody & Smith)
Solution manual Biostatistics for the Health Sciences (R. Clifford Blair & =
Richard Taylor)
Solution manual Biostatistics : How It Works (Steve Selvin)
Solution manual Business Statistics : First Course (4th Ed., Levine, Krehbi=
el & Berenson)
Solution manual Business Statistics : First Course (5th Ed., Levine, Krehbi=
el & Berenson)
Solution manual Business Statistics : First Course (6th Ed., Levine, Krehbi=
el & Berenson)
Solution manual Course in Business Statistics (4th Ed., Groebner, Shannon, =
Fry & Smith)
Solution manual Business Statistics : A Decision Making Approach (6th Ed., =
Groebner, Shannon, Fry & Smith)
Solution manual Business Statistics : A Decision-Making Approach (7th Ed., =
Groebner, Shannon, Fry & Smith)
Solution manual Business Statistics : A Decision-Making Approach (8th Ed., =
Groebner, Shannon, Fry & Smith)
Solution manual Statistics for Business & Economics (10th Ed., McClave, Ben=
son & Sincich)   =20
Solution manual Statistics for Managers Using Excel (5th Ed., Levine)=20
Solution manual Statistics for Managers Using Microsoft Excel (4th Ed., Lev=
ine, Stephan, Krehbiel & Berenson)
Solution manual Statistics for Business and Economics (5th Ed., Newbold, Ca=
rlson & Thorne)
Solution manual Statistics for Business and Economics (6th Ed., Newbold, Ca=
rlson & Thorne)
Solution manual Statistics for Business and Economics (7th Ed., Newbold, Ca=
rlson & Thorne)
Solution manual Basic Business Statistics : Concepts and Applications (10th=
 Ed., Berenson, Krehbiel & Levine)
Solution manual Basic Business Statistics (11th Ed., Berenson, Levine & Kre=
hbiel)
Solution manual John E. Freund's Mathematical Statistics with Applications =
(7th Ed., Miller)
Solution manual John E. Freund's Mathematical Statistics with Applications =
(8th Ed., Miller)
Solution manual Probability and Statistical Inference (7th Ed., Hogg & Tani=
s)
Solution manual Probability and Statistical Inference (8th Ed., Hogg & Tani=
s)
Solution manual Introduction to Mathematical Statistics (6th Ed., Hogg, Cra=
ig & McKean)
Solution manual Introduction to Mathematical Statistics (7th Ed., Hogg, Cra=
ig & McKean)
Solution manual Introduction to Mathematical Statistics and Its Application=
s (4th Ed., Larsen & Marx)
Solution manual Introduction to Mathematical Statistics and Its Application=
s (5th Ed., Larsen & Marx)
```

Solution manual A Brief Course in Mathematical Statistics (Hogg & Tanis)
Solution manual Fundamentals of Probability, with Stochastic Processes (3rd= Ed., Saeed Ghahramani)
Solution manual A First Course in Probability (7th Ed., Sheldon Ross)
Solution manual A First Course in Probability (8th Ed., Sheldon Ross)
Solution manual Applied Multivariate Statistical Analysis (6th Ed., Johnson= & Wichern)
Solution manual Multivariate Data Analysis (6th Ed., Hair, Black, Babin, An=derson & Tatham)
Solution manual Multivariate Data Analysis (7th Ed., Hair, Black, Babin, An=derson)
Solution manual Essential MATLAB for Engineers and Scientists (3rd Ed., Bri=an Hahn & Dan Valentine)
Solution manual Essential MATLAB for Engineers and Scientists (4th Ed., Bri=an Hahn & Dan Valentine)
Solution manual Essential MATLAB for Engineers and Scientists (5th Ed., Bri=an Hahn & Dan Valentine)
Solution manual Introduction to Applied Statistical Signal Analysis : Guide= to Biomedical and Electrical Engineering Applications (3rd Ed. Richard Shi=avi)
Solution manual Construction Mathematics (Surinder Virdi & Roy Baker)
Solution manual Numerical Methods in Biomedical Engineering (Stanley Dunn, =Alkis Constantinides & Prabhas Moghe)
Solution manual Probability and Statistics with Integrated Software Routine=s (Ronald Deep)
Solution manual Finite Element Analysis with Error Estimators : An Introduc=tion to the FEM and Adaptive Error Analysis for Engineering Students (J. Ak=in)
Solution manual Basic Engineering Mathematics (4th Ed., John Bird)
Solution manual Engineering Mathematics (4th Ed., John Bird)
Solution manual Engineering Mathematics (5th Ed., John Bird)
Solution manual Higher Engineering Mathematics (5th Ed., John Bird)
Solution manual Construction Mathematics (Virdi & Baker)
Solution manual Mathematics for Electrical Engineering and Computing (Mary =Attenborough)
Solution manual Probability and Random Processes : With Applications to Sig=nal Processing and Communications (Miller & Childers)
Solution manual Introductory Statistics for Engineering Experimentation (Pe=ter Nelson, Karen Copeland & Marie Coffin)
Solution manual Understanding Engineering Mathematics (Bill Cox)
Solution manual Statistics And Probability For Engineering Applications Wit=h Microsoft Excel (Decoursey)
Solution manual Business Math Using Calculators : With 10-Key Computer Assi=sted Instruction (Burton)
Solution manual Mathematics for Economics and Business (5th Ed., Ian Jacque=s)
Solution manual Business Math, Brief (7th Ed., Cleaves & Hobbs)
Solution manual Math for Merchandising: A Step-by-Step Approach (3rd Ed., M=oore)
Solution manual Mathematics for Business (7th Ed., Salzman , Miller & Clend=enen)
Solution manual Mathematics for Business (8th Ed., Salzman , Miller & Clend=enen)

Solution manual Basic College Mathematics with Early Integers (K. Elayn Mar=
tin-Gay)
Solution manual Developmental Mathematics (K. Elayn Martin-Gay)
Solution manual An Introduction to Analysis (3rd Ed., William Wade)
Solution manual An Introduction to Analysis (4th Ed., William Wade)
Solution manual A Friendly Introduction to Analysis (2nd Ed., Witold A.J. K=
osmala)
Solution manual Advanced Calculus (Gerald Folland)
Solution manual Analysis : With an Introduction to Proof (4th Ed., Steven R=
. Lay)
Solution manual Essentials of Basic College Mathematics (John Jr Tobey, Jr.=
, Jeffrey Slater)
Solution manual Basic College Mathematics (5th Ed., John Tobey & Jeffrey Sl=
ater)
Solution manual Prealgebra (3rd Ed., Jamie Blair, John Tobey & Jeffrey Sla=
ter)
Solution manual Elementary Algebra Early Graphing for College Students (3rd=
 Ed., Allen Angel)
Solution manual Elementary Algebra (Michael Sullivan III, Katherine R. Stru=
ve & Janet Mazzarella)
Solution manual Elementary Algebra for College Students (7th Ed., Allen R. =
Angel)
Solution manual Experiencing Introductory and Intermediate Algebra Through =
Functions and Graphs (3rd Ed., JoAnne Thomasson & Robert Pesut)
Solution manual Introductory Algebra (3rd Ed., K. Elayn Martin-Gay)
Solution manual Beginning Algebra (6th Ed., John Jr Tobey & Jeffrey Slater)
Solution manual Beginning Algebra : Early Graphing (Jamie Blair, John Tobey=
 & Jeffrey Slater)
Solution manual Beginning and Intermediate Algebra (2nd Ed., Jamie Blair, J=
ohn Tobey & Jeffrey Slater)
Solution manual Introductory Algebra (4th Ed., Robert Blitzer)
Solution manual Introductory and Intermediate Algebra (2nd Ed., Robert Blit=
zer)
Solution manual Intermediate Algebra for College Students (7th Ed., Allen A=
ngel)
Solution manual Intermediate Algebra (Michael Sullivan III & Katherine Stru=
ve)
Solution manual Intermediate Algebra (3rd Ed., K. Elayn Martin-Gay)
Solution manual Essentials of Intermediate Algebra for College Students (Ro=
bert Blitzer)
Solution manual Intermediate Algebra (4th Ed., Robert Blitzer)
Solution manual Intermediate Algebra for College Students (5th Ed., Robert =
Blitzer)
Solution manual Algebra A Combined Approach (3rd Ed., K. Elayn Martin-Gay)
Solution manual Elementary & Intermediate Algebra (Michael Sullivan III, Ka=
therine R. Struve & Janet Mazzarella)
Solution manual Essentials of Introductory and Intermediate Algebra for Col=
lege Students (Robert F. Blitzer)
Solution manual Algebra for College Students (3rd Ed., Allen R. Angel)
Solution manual Algebra for College Students (5th Ed., Robert F Blitzer)
Solution manual College Algebra Essentials (8th Ed., Michael Sullivan)
Solution manual College Algebra (4th Ed., Robert Blitzer)
Solution manual College Algebra Essentials (2nd Ed., Robert F. Blitzer)

Solution manual College Algebra : An Early Functions Approach (Robert F. Bl=
itzer)
Solution manual College Algebra : Concepts Through Functions (1st Ed., Mich=
ael Sullivan III & Michael Sullivan)
Solution manual College Algebra : Concepts Through Functions (2nd Ed., Mich=
ael Sullivan III & Michael Sullivan)
Solution manual College Algebra Enhanced with Graphing Utilities (4th Ed., =
Michael Sullivan III & Michael Sullivan)
Solution manual Essentials of College Algebra : Enhanced with Graphing Util=
ities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Algebra and Trigonometry (8th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry (3rd Ed., Robert F. Blitzer)
Solution manual Algebra and Trigonometry: An Early Functions Approach (Robe=
rt Blitzer)=20
Solution manual Algebra & Trigonometry (7th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry Enhanced With Graphing Utilities (=
4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Trigonometry (7th Ed., Michael Sullivan)
Solution manual Trigonometry (8th Ed., Michael Sullivan)
Solution manual Trigonometry Enhanced with Graphing Utilities (4th Ed., Mic=
hael Sullivan III & Michael Sullivan)
Solution manual Precalculus (8th Ed., Michael Sullivan)
Solution manual Precalculus (3rd Ed., Robert Blitzer)
Solution manual Precalculus (4th Ed., Robert Blitzer)
Solution manual Precalculus (1st Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual Precalculus : A Right Triangle Approach (2nd Ed., J. S. Rat=
ti & Marcus S. McWaters)
Solution manual Precalculus Essentials (2nd Ed., Robert Blitzer)
Solution manual Precalculus Essentials (3rd Ed., Robert Blitzer)
Solution manual Precalculus : Concepts Through Functions, A Unit Circle App=
roach to Trigonometry (1st Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus : Concepts Through Functions, A Unit Circle App=
roach to Trigonometry (2nd Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus : Concepts Through Functions, A Right Triangle =
Approach to Trigonometry (1st Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus : Concepts Through Functions, A Right Triangle =
Approach to Trigonometry (2nd Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus Enhanced with Graphing Utilities (4th Ed., Mich=
ael Sullivan III & Michael Sullivan)
Solution manual Precalculus Enhanced with Graphing Utilities (5th Ed., Mich=
ael Sullivan III & Michael Sullivan)
Solution manual Precalculus Essentials : Enhanced with Graphing Utilities (=
4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Excursions in Modern Mathematics (5th Ed., Peter Tannenbaum=
)
Solution manual Excursions In Modern Mathematics with Mini-Excursions (6th =
Ed., Peter Tannenbaum)
Solution manual Quantitive Reasoning & the Environment (Greg Langkamp & Jos=
eph Hull)
Solution manual Fundamentals of Mathematics (10th Ed., William M Setek & Mi=
chael A Gallo)
Solution manual Learning Math in Elementary and Middle School & IMAP Packag=
e (4th Ed., Cathcart, Pothier, Vance & Bezuk)

Solution manual Understanding the Math You Teach: Content and Methods for P=
rekindergarten Through Grade 4 (Anita C. Burris)
Solution manual Algebra Connections (Ira J. Papick & UMO University of Miss=
ouri)
Solution manual Calculus Connections (Asma Harcharras, Dorina Mitrea)
Solution manual Data Analysis and Probability Connections: Mathematics for =
Middle School Teachers (Debra A. Perkowski & Michael Perkowski)
Solution manual Geometry Connections (John K. Beem)
Solution manual Elementary Math Modeling Updated (2nd Ed., Mary Ellen Davis=
 & C. Henry Edwards)
Solution manual Additional Calculus Topics (11th Ed., Raymond Barnett, Mich=
ael Ziegler & Karl Byleen)
Solution manual Finite Math and Its Application (9th Ed., Larry J Goldstein=
, David I Schneider & Martha J. Siegel)
Solution manual Finite Mathematics and Its Application (10th Ed., Larry J G=
oldstein, David I Schneider & Martha J. Siegel)
Solution manual Introductory Mathematical Analysis for Business, Economics =
and the Life and social Sciences (11th Ed., Haeussler, Paul & R.J. Wood)
Solution manual Introductory Mathematical Analysis for Business, Economics =
and the Life and Social Sciences (12th Ed., Haeussler, Paul & R.J. Wood)
Solution manual Additional Calculus Topics (9th Ed., Raymond Barnett, Micha=
el Ziegler & Karl Byleen)
Solution manual College Mathematics for Business, Economics, Life Sciences =
and Social Sciences (10th Ed., Raymond Barnett, Michael Ziegler & Karl Byle=
en)
Solution manual Brief Calculus and Its Applications (11th Ed., Larry Goldst=
ein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Brief Calculus and Its Applications (12th Ed., Larry Goldst=
ein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Calculus and its Applications (10th Ed., Larry Goldstein, D=
avid Schneider, David Lay)
Solution manual Calculus and its Applications (11th Ed., Larry Goldstein, D=
avid Schneider, David Lay & Nakhle Asmar)
Solution manual Calculus and its Applications (12th Ed., Larry Goldstein, D=
avid Schneider, David Lay & Nakhle Asmar)
Solution manual Calculus for Business, Economics, Life Sciences and Social =
Sciences (10th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual Calculus, Early Transcendentals (6th Ed., C. Henry Edwards =
& David Penney)
Solution manual Calculus, Early Transcendentals (7th Ed., C. Henry Edwards =
& David Penney)
Solution manual Calculus (9th Ed., Dale Varberg, Edwin Purcell & Steve Rigd=
on)
Solution manual Calculus Early Transcendentals (Dale Varberg, Edwin Purcell=
 & Steve Rigdon)
Solution manual Calculus (3rd Ed., Monty Strauss, Gerald Bradley & Karl Smi=
th)
Solution manual Calculus (6th Ed., Henry Edwards & David E. Penney)
Solution manual Single Variable Calculus (3rd Ed., Monty Strauss, Gerald Br=
adley & Karl Smith)
Solution manual Vector Calculus (3rd Ed., Susan Colley)
Solution manual Applied Linear Algebra (Peter Olver & Cheri Shakiban)
Solution manual Differential Equations and Linear Algebra (2nd Ed., Jerry F=

arlow, James E. Hall, Jean Marie McDill & Beverly West)
Solution manual Differential Equations and Linear Algebra (2nd Ed., C. Henr=
y Edwards & David Penney)
Solution manual Differential Equations and Linear Algebra (3rd Ed., C. Henr=
y Edwards & David Penney)
Solution manual Differential Equations (2nd Ed., John Polking, Al Boggess &=
 David Arnold)
Solution manual Differential Equations with Boundary Value Problems (2nd ed=
., John Polking, Al Boggess & David Arnold)
Solution manual Discrete Mathematics with Graph Theory (3rd Ed., Edgar Good=
aire & Michael Parmenter)
Solution manual Essential Discrete Mathematics (Todd Feil & Joan Krone)
Solution manual Statistical Methods for the Social Sciences (4th Ed., Agres=
ti & Finlay)
Solution manual A Brief Course in Mathematical Statistics (Tanis & Hogg)
Solution manual Business Mathematics, 10th Ed. (Miller, Salzman & Clendenen=
)
Solution manual Elementary Statistics (6th Ed., Weiss)
Solution manual Elementary Statistics (7th Ed., Weiss)
Solution manual Elementary Statistics (8th Ed., Weiss)
Solution manual Elementary Statistics Using the Graphing Calculator: For th=
e TI-83/84 Plus (Mario Triola)
Solution manual Elementary Statistics Using the TI-83/84 Plus Calculator (2=
nd Ed., Mario Triola)
Solution manual Elementary Statistics Using the TI-83/84 Plus Calculator (3=
rd Ed., Mario Triola)
Solution manual Elementary Statistics Update (9th Ed., Mario Triola)
Solution manual Elementary Statistics (10th Ed., Mario Triola)
Solution manual Elementary Statistics (11th Ed., Mario Triola)
Solution manual Elementary Statistics - Technology Update (11th Ed., Mario =
Triola)
Solution manual Essentials of Statistics (2nd Ed., Mario Triola)
Solution manual Essentials of Statistics (3rd Ed., Mario Triola)
Solution manual Essentials of Statistics (4th Ed., Mario Triola)
Solution manual Introductory Statistics (7th Ed., Neil Weiss)
Solution manual Introductory Statistics (8th Ed., Neil Weiss)
Solution manual Introductory Statistics (9th Ed., Neil Weiss)
Solution manual Intro Stats (2nd Ed., De Veaux, Velleman & Bock)
Solution manual Intro Stats (3rd Ed., De Veaux, Velleman & Bock)
Solution manual Stats: Data and Models, (De Veaux, Velleman & Bock)
Solution manual Stats: Data and Models, (2nd Ed., De Veaux, Velleman & Bock=
)
Solution manual Elementary Statistics Using Excel (2nd Ed., Mario Triola)=
=20
Solution manual Elementary Statistics Using Excel (3rd Ed., Mario Triola)=
=20
Solution manual Elementary Statistics Using Excel (4th Ed., Mario Triola)=
=20
Solution manual Stats : Modeling the World (2nd Ed., Bock, Velleman & De Ve=
aux)
Solution manual Stats : Modeling the World (3rd Ed., Bock, Velleman & De Ve=
aux)
Solution manual Statistical Reasoning for Everyday Life (2nd Ed., Bennett, =

```
Briggs & Triola)
Solution manual Statistical Reasoning for Everyday Life (3rd Ed., Bennett, =
Briggs & Triola)
Solution manual Business Statistics (Triola & Franklin)
Solution manual Business Statistics (1st Ed., Sharpe, De Veaux & Velleman)
Solution manual Business Statistics (2nd Ed., Sharpe, De Veaux & Velleman)
Solution manual Business Statistics : A First Course (Sharpe, De Veaux & Ve=
lleman)
Solution manual Biostatistics for the Biological and Health Sciences with S=
tatdisk (Marc Triola & Mario Triola)
Solution manual Biostatistics : A Guide to Design, Analysis and Discovery (=
2nd Ed., Ronald Forthofer, Eun Lee, Mike Hernandez)
Solution manual A Course in Probability (Neil A. Weiss)
Solution manual Probability and Statistics (3rd Ed., DeGroot & Schervish)
Solution manual Probability and Statistics (4th Ed., DeGroot & Schervish)
Solution manual Statistics for Science and Engineering (John Kinney)
Solution manual Mathematical Proofs :  A Transition to Advanced Mathematics=
 (1st Ed., Chartrand, Polimeni & Zhang)
Solution manual Mathematical Proofs : A Transition to Advanced Mathematics =
(2nd Ed., Chartrand, Polimeni & Zhang)
Solution manual Elementary Number Theory (5th Ed., Kenneth H. Rosen)
Solution manual History of Mathematics : Brief Version (Victor J. Katz)
Solution manual Geometry : An Investigative Approach (2nd Ed., Phares G. O'=
Daffer & Stanley Clemens)
Solution manual A First Course in Abstract Algebra (7th Ed., John Fraleigh)
Solution manual Complex Variables with Applications (3rd Ed., David Wunsch)
Solution manual Numerical Analysis with CD-ROM (Timothy Sauer)
Solution manual Numerical Analysis and Scientific Computation (Jeffery Lead=
er)
Solution manual Linear Algebra and Differential Equations (Gary Peterson & =
James Sochacki)
Solution manual Elementary Differential Equations (2nd Ed., Werner Kohler &=
 Lee Johnson)
Solution manual Elementary Differential Equations with Boundary Value Probl=
ems (2nd Ed., Werner Kohler & Lee Johnson)
Solution manual Fundamentals of Differential Equations (6th Ed., Kent B. Na=
gle, Late, Edward B. Saff & Arthur David Snider)
Solution manual Fundamentals of Differential Equations and Boundary Value P=
roblems (4th Ed., Kent B. Nagle, Late, Edward B. Saff & Arthur David Snider=
)
Solution manual Linear Algebra and Its Applications with CD-ROM, Update (3r=
d Ed., David C. Lay)
Solution manual Introduction to Linear Algebra (5th ed., Lee W. Johnson, R.=
 Dean Riess & Jimmy T. Arnold)
Solution manual Calculus for the Life Sciences (Marvin L. Bittinger, Neal B=
rand & John Quintanilla)
Solution manual Calculus with Applications for the Life Sciences (Raymond N=
. Greenwell, Nathan P. Ritchey & Margaret L. Lial)
Solution manual Calculus : An Integrated Approach to Functions and Their Ra=
tes of Change, Preliminary Edition (Robin J. Gottlieb)
Solution manual Calculus (9th Ed., George B. Thomas, Jr. & Ross L. Finney)
Solution manual Thomas' Calculus, Alternate Edition (9th Ed., George B. Tho=
mas, Jr. & Ross L. Finney)
```

Solution manual Calculus : A Complete Course (2nd Ed., Ross L. Finney, Fran=
klin D. Demana, Bert K. Waits & Daniel Kennedy)
Solution manual Calculus (Elgin H. Johnston & Jerry Mathews)
Solution manual Thomas' Calculus, Updated (10th Ed., George B. Thomas, Jr.,=
 Ross L. Finney, Maurice D. Weir & Frank R. Giordano)
Solution manual Thomas' Calculus (11th Ed., George B. Thomas, Jr., Maurice =
D. Weir, Joel D. Hass & Frank R. Giordano)
Solution manual Thomas' Calculus Early Transcendentals (11th Ed., George B.=
 Thomas, Jr., Maurice D. Weir, Joel D. Hass & Frank R. Giordano)
Solution manual University Calculus (Joel D. Hass, Maurice D. Weir & George=
 B. Thomas, Jr.)
Solution manual University Calculus : Alternate Edition (Joel D. Hass, Maur=
ice D. Weir & George B. Thomas, Jr.)
Solution manual Thomas' Calculus, Media Upgrade (11th Ed., George B. Thomas=
, Jr., Maurice D. Weir & Frank R. Giordano)
Solution manual Thomas' Calculus, Early Transcendentals, Media Upgrade (11t=
h Ed., George B. Thomas, Jr., Maurice D. Weir, Joel D. Hass & Frank R. Gior=
dano)
Solution manual Calculus with Applications (8th Ed., Margaret L. Lial, Raym=
ond N. Greenwell & Nathan P. Ritchey)
Solution manual Calculus with Applications, Brief Version (8th Ed., Margare=
t L. Lial, Raymond N. Greenwell & Nathan P. Ritchey)
Solution manual Finite Mathematics with Applications (9th Ed., Margaret L. =
Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Finite Mathematics with Applications (10th Ed., Margaret L.=
 Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Finite Mathematics (8th Ed., Margaret L. Lial, Raymond N. G=
reenwell & Nathan P. Ritchey)
Solution manual Mathematics with Applications (9th Ed., Margaret L. Lial, T=
homas W. Hungerford & John Holcomb)
Solution manual Mathematics with Applications (10th Ed., Margaret L. Lial, =
Thomas W. Hungerford & John Holcomb)
Solution manual Mathematical Ideas (10th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas (11th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas Expanded Edition (10th Ed., Miller, Heer=
en & Hornsby)
Solution manual Mathematical Ideas Expanded Edition (11th Ed., Miller, Heer=
en & Hornsby)
Solution manual Using and Understanding Mathematics : A Quantitative Reason=
ing Approach (3rd Ed., Bennett & Briggs)
Solution manual Using and Understanding Mathematics : A Quantitative Reason=
ing Approach (4th Ed., Bennett & Briggs)
Solution manual Using and Understanding Mathematics : A Quantitative Reason=
ing Approach (5th Ed., Bennett & Briggs)
Solution manual A Problem Solving Approach to Mathematics (9th Ed., Billste=
in, Libeskind & Lott)
Solution manual A Survey of Mathematics with Applications (7th Ed., Angel, =
Abbott & Runde)
Solution manual A Survey of Mathematics with Applications: Expanded Edition=
 (7th Ed., Angel, Abbott & Runde)
Solution manual Mathematics All Around (3rd Ed., Tom Pirnot)
Solution manual Mathematics for Elementary School Teachers (3rd Ed., Phares=
 O'Daffer, Randall Charles, Thomas Cooney, John Dossey & Jane Schielack)

Solution manual Mathematics for Elementary School Teachers (4th Ed., Phares=
 O'Daffer, Randall Charles, Thomas Cooney, John Dossey & Jane Schielack)
Solution manual Mathematics for Elementary Teachers with Activities (Sybill=
a Beckmann)=20
Solution manual Mathematics for Elementary Teachers plus Activities Manual =
(2nd Ed., Sybilla Beckmann)
Solution manual A Problem Solving Approach to Mathematics for Elementary Sc=
hool Teachers (8th Ed., Billstein, Libeskind & Lott)
Solution manual A Problem Solving Approach to Mathematics for Elementary Sc=
hool Teachers (9th Ed., Billstein, Libeskind & Lott)
Solution manual A Problem Solving Approach to Mathematics for Elementary Sc=
hool Teachers (10th Ed., Billstein, Libeskind & Lott)
Solution manual Essentials of Using and Understanding Mathematics : A Quant=
itative Reasoning Approach (Jeffrey Bennett & William Briggs)
Solution manual Technical Calculus with Analytic Geometry (4th Ed., Allyn W=
ashington)
Solution manual Basic Technical Mathematics (8th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics (9th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics with Calculus (8th Ed., Allyn W=
ashington)
Solution manual Basic Technical Mathematics with Calculus (9th Ed., Allyn W=
ashington)
Solution manual Basic Technical Mathematics with Calculus Metric Version (8=
th Ed., Allyn Washington)
Solution manual Introduction to Technical Mathematics (5th Ed., Washington,=
 Triola & Reda)
Solution manual A Graphical Approach to Precalculus (4th Ed., Hornsby, Lial=
 & Rockswold)=20
Solution manual A Graphical Approach to Precalculus with Limits (3rd Ed., H=
ornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Precalculus with Limits : A Unit Ci=
rcle Approach (4th Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Precalculus with Limits : A Unit Ci=
rcle Approach (5th Ed., Hornsby, Lial & Rockswold)
Solution manual Precalculus : Functions and Graphs (5th Ed., Demana, Waits,=
 Foley & Kennedy)
Solution manual Precalculus : Graphical, Numerical, Algebraic (7th Ed., Dem=
ana, Waits, Foley & Kennedy)
Solution manual Precalculus : Graphs and Models Graphing Calculator Manual =
Package (3rd Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Precalculus : Graphs and Models Graphing Calculator Manual =
Package (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Functioning in the Real World : A Precalculus Experience (2=
nd Ed., Gordon, F. Gordon, Tucker & Siegel)
Solution manual Precalculus with Modeling and Visualization (3rd Ed., Gary =
K. Rockswold)
Solution manual Precalculus with Modeling and Visualization (4th Ed., Gary =
K. Rockswold)
Solution manual Precalculus (2nd Ed., Beecher, Penna & Bittinger)
Solution manual Precalculus (3rd Ed., Beecher, Penna & Bittinger)
Solution manual Precalculus (3rd Ed., Mark Dugopolski)
Solution manual Precalculus (4th Ed., Mark Dugopolski)
Solution manual Precalculus : Functions and Graphs (2nd Ed., Mark Dugopolsk=

```
i)
Solution manual Precalculus : Functions and Graphs (3rd Ed., Mark Dugopolsk=
i)
Solution manual Fundamentals of Precalculus (Mark Dugopolski)
Solution manual Trigonometry (1st Ed., Mark Dugopolski)
Solution manual Trigonometry (2nd Ed., Mark Dugopolski)
Solution manual Trigonometry (3rd Ed., Mark Dugopolski)
Solution manual Trigonometry (8th Ed., Lial, Hornsby & Schneider)
Solution manual Trigonometry (9th Ed., Lial, Hornsby & Schneider)
Solution manual Trigonometry : A Circular Function Approach (Marie Aratari)
Solution manual A Graphical Approach to Algebra and Trigonometry (4th Ed., =
Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Algebra and Trigonometry (5th Ed., =
Hornsby, Lial & Rockswold)
Solution manual Algebra and Trigonometry : Graphs and Models Graphing Calcu=
lator Manual Package (3rd Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Algebra and Trigonometry (2nd Ed., Beecher, Penna & Bitting=
er)
Solution manual Algebra and Trigonometry (3rd Ed., Beecher, Penna & Bitting=
er)
Solution manual College Algebra and Trigonometry (1st Ed., J. S. Ratti & Ma=
rcus S. McWaters)
Solution manual College Algebra and Trigonometry (2nd Ed., J. S. Ratti & Ma=
rcus S. McWaters)
Solution manual College Algebra and Trigonometry (3rd Ed., Mark Dugopolski)
Solution manual College Algebra and Trigonometry (4th Ed., Mark Dugopolski)
Solution manual College Algebra and Trigonometry : A Unit Circle Approach (=
5th Ed., Mark Dugopolski)
Solution manual Algebra and Trigonometry with Modeling and Visualization (3=
rd Ed., Gary Rockswold)
Solution manual Algebra and Trigonometry with Modeling and Visualization (4=
th Ed., Gary Rockswold)
Solution manual College Algebra and Trigonometry (3rd Ed., Lial, Hornsby & =
Schneider)
Solution manual College Algebra and Trigonometry (4th Ed., Lial, Hornsby & =
Schneider)
Solution manual A Graphical Approach to College Algebra (4th Ed., John Horn=
sby, Margaret Lial & Gary Rockswold)
Solution manual A Graphical Approach to College Algebra (5th Ed., John Horn=
sby, Margaret Lial & Gary Rockswold)
Solution manual College Algebra : Graphs and Models Graphing Calculator Man=
ual Package (3rd Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual College Algebra (J. S. Ratti & Marcus S. McWaters)
Solution manual College Algebra with Modeling and Visualization (3rd Ed., G=
ary Rockswold)
Solution manual College Algebra with Modeling and Visualization (4th Ed., G=
ary Rockswold)
Solution manual Essentials of College Algebra with Modeling and Visualizati=
on (3rd Ed., Gary Rockswold)
Solution manual Essentials of College Algebra (Lial, Hornsby & Schneider)
Solution manual Essentials of College Algebra, Alternate Edition (Lial, Hor=
nsby & Schneider)
Solution manual Essentials of College Algebra (10th Ed., Lial, Hornsby & Sc=
```

hneider)
Solution manual College Algebra (3rd Ed., Mark Dugopolski)=20
Solution manual College Algebra (4th Ed., Mark Dugopolski)=20
Solution manual College Algebra (5th Ed., Mark Dugopolski)
Solution manual College Algebra in Context with Applications for the Manage=
rial, Life, and Social Sciences (1st Ed., Ronald Harshbarger & Lisa Yocco)
Solution manual College Algebra in Context with Applications for the Manage=
rial, Life, and Social Sciences (2nd Ed., Ronald Harshbarger & Lisa Yocco)
Solution manual College Algebra (2nd Ed., Judith Beecher, Judith Penna & Ma=
rvin Bittinger)
Solution manual College Algebra (9th Ed., Margaret Lial, John Hornsby & Dav=
id Schneider)
Solution manual Essentials of Geometry for College Students (2nd Ed., Marga=
ret Lial, Barbara Brown, Arnold Steffenson & L. Murphy Johnson)
Solution manual Algebra for College Students (5th Ed., Margaret Lial, John =
Hornsby & Terry McGinnis)
Solution manual Introductory and Intermediate Algebra (2nd Ed., Margaret Li=
al, John Hornsby & Terry McGinnis)
Solution manual Introductory and Intermediate Algebra (3rd Ed., Margaret Li=
al, John Hornsby & Terry McGinnis)
Solution manual Introductory and Intermediate Algebra (4th Ed., Margaret Li=
al, John Hornsby & Terry McGinnis)
Solution manual Beginning and Intermediate Algebra (3rd Ed., Margaret Lial,=
 John Hornsby & Terry McGinnis)
Solution manual Beginning and Intermediate Algebra (4th Ed., Margaret Lial,=
 John Hornsby & Terry McGinnis)
Solution manual Elementary and Intermediate Algebra (1st Ed., Tom Carson, E=
llyn Gillespie & Bill Jordan)
Solution manual Elementary and Intermediate Algebra (2nd Ed., Tom Carson, E=
llyn Gillespie & Bill Jordan)
Solution manual Elementary and Intermediate Algebra (3rd Ed., Tom Carson, B=
ill Jordan)
Solution manual Introductory and Intermediate Algebra : A Combined Approach=
 (2nd Ed., Marvin Bittinger & Judith Beecher)
Solution manual Introductory and Intermediate Algebra (3rd Ed., Marvin Bitt=
inger & Judith Beecher)
Solution manual Introductory and Intermediate Algebra through Applications =
(2nd Ed., Geoffrey Akst & Sadie Bragg)
Solution manual Elementary and Intermediate Algebra (1st Ed., George Woodbu=
ry)
Solution manual Elementary and Intermediate Algebra (2nd Ed., George Woodbu=
ry)
Solution manual Elementary and Intermediate Algebra (2nd Ed., Mark Dugopols=
ki)=20
Solution manual Elementary and Intermediate Algebra (3rd Ed., Mark Dugopols=

Solution manual Elementary and Intermediate Algebra : Concepts and Applicat=
ions (4th Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Beginning and Intermediate Algebra with Applications and Vi=
sualization (Gary Rockswold & Terry Krieger)
Solution manual Elementary and Intermediate Algebra : Graphs & Models (2nd =
Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Foundations of Mathematics (Marvin Bittinger & Judith Penna=

)
Solution manual Intermediate Algebra (9th Ed., Marvin Bittinger)
Solution manual Intermediate Algebra (10th Ed., Marvin Bittinger)
Solution manual Intermediate Algebra : Graphs & Models (2nd Ed., Marvin Bit=
tinger, David Ellenbogen & Barbara Johnson)
Solution manual Intermediate Algebra : Graphs & Models (3rd Ed., Marvin Bit=
tinger, David Ellenbogen & Barbara Johnson)
Solution manual Intermediate Algebra (8th Ed., Margaret Lial, John Hornsby =
& Terry McGinnis)
Solution manual Intermediate Algebra (9th Ed., Margaret Lial, John Hornsby =
& Terry McGinnis)
Solution manual Intermediate Algebra with Applications and Visualization (2=
nd Ed., Gary Rockswold & Terry Krieger)
Solution manual Intermediate Algebra (Tom Carson, Ellyn Gillespie & Bill Jo=
rdan)
Solution manual Intermediate Algebra (2nd Ed., Tom Carson, Ellyn Gillespie =
& Bill Jordan)
Solution manual Intermediate Algebra (3rd Ed., Tom Carson, Bill Jordan)
Solution manual Intermediate Algebra: Concepts and Applications (7th Ed., M=
arvin Bittinger & David Ellenbogen)
Solution manual Beginning Algebra (10th Ed., Margaret Lial, John Hornsby & =
Terry McGinnis)
Solution manual Prealgebra and Introductory Algebra (Marvin Bittinger & Dav=
id Ellenbogen)
Solution manual Prealgebra and Introductory Algebra (2nd Ed., Marvin Bittin=
ger & David Ellenbogen)
Solution manual Introductory Algebra (9th Ed., Marvin Bittinger)
Solution manual Introductory Algebra (10th Ed., Marvin Bittinger)
Solution manual Prealgebra and Introductory Algebra (2nd Ed., Margaret Lial=
, John Hornsby, Terry McGinnis & Diana Hestwood)
Solution manual Prealgebra and Introductory Algebra (3rd Ed., Margaret Lial=
, Diana Hestwood, John Hornsby & Terry McGinnis)
Solution manual Elementary Algebra with Early Systems of Equations (Tom Car=
son & Ellyn Gillespie)
Solution manual Elementary Algebra (2nd Ed., Tom Carson, Ellyn Gillespie & =
Bill Jordan)
Solution manual Elementary Algebra (3rd Ed., Tom Carson, Bill Jordan)
Solution manual Elementary Algebra : Concepts and Applications (6th Ed., Ma=
rvin Bittinger & David Ellenbogen)
Solution manual Elementary Algebra : Concepts and Applications (7th Ed., Ma=
rvin Bittinger & David Ellenbogen)
Solution manual Introductory Algebra (Richelle Blair)
Solution manual Introductory Algebra (8th Ed., Margaret Lial, John Hornsby =
& Terry McGinnis)
Solution manual Introductory Algebra (9th Ed., Margaret Lial, John Hornsby =
& Terry McGinnis)
Solution manual Beginning Algebra with Applications and Visualization (Gary=
 Rockswold & Terry Krieger)
Solution manual Integrated Arithmetic and Basic Algebra (3rd Ed., Bill Jord=
an & William Palow)
Solution manual Introductory Algebra through Applications (Geoffrey Akst & =
Sadie Bragg)
Solution manual Prealgebra (3rd Ed., Margaret Lial & Diana Hestwood)

Solution manual Prealgebra (4th Ed., Margaret Lial & Diana Hestwood)
Solution manual Prealgebra (4th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Prealgebra (5th Ed., Marvin Bittinger, David Ellenbogen & B=
arbara Johnson)
Solution manual Prealgebra (2nd Ed., Tom Carson)
Solution manual Basic Mathematics (9th Ed., Marvin Bittinger)
Solution manual Basic Mathematics (10th Ed., Marvin Bittinger)
Solution manual Basic Mathematics Preliminary Edition (Robert Prior)
Solution manual Basic Mathematics with Early Integers (Marvin Bittinger & J=
udith Penna)
Solution manual Basic College Mathematics (7th Ed., Margaret Lial, Stanley =
Salzman & Diana Hestwood)
Solution manual Basic College Mathematics (8th Ed., Margaret Lial, Stanley =
Salzman & Diana Hestwood)
Solution manual Basic Mathematics through Applications (3rd Ed., Geoffrey A=
kst & Sadie Bragg)
Solution manual Fundamental Mathematics through Applications (3rd Ed., Geof=
frey Akst & Sadie Bragg)
Solution manual Wave Motion (J. Billingham & A. C. King)
Solution manual Solving ODEs with MATLAB (L. F. Shampine, I. Gladwell & S. =
Thompson)
Solution manual Numerical Solution of Partial Differential Equations: An In=
troduction (2nd Ed., K. W. Morton & D. F. Mayers)
Solution manual Measure Theory and Filtering : Introduction and Application=
s (Lakhdar Aggoun & Robert J. Elliott)
Solution manual Mathematical Models in Biology : An Introduction (Elizabeth=
 S. Allman & John A. Rhodes)
Solution manual Insurance Risk and Ruin (David C. M. Dickson)=20
Solution manual Data Analysis and Graphics Using R : An Example-based Appro=
ach (2nd Ed., John Maindonald & John Braun)
Solution manual Applied Optimization with MATLAB Programming (1st Ed., P. V=
enkataraman)
Solution manual Applied Optimization with MATLAB Programming (2nd Ed., P. V=
enkataraman)
Solution manual Convex Optimization (Stephen Boyd & Lieven Vandenberghe)
Solution manual Concrete Abstract Algebra : From Numbers to Gr=F6bner Bases=
 (Niels Lauritzen)
Solution manual A Concrete Approach to Abstract Algebra : From the Integers=
 to the Insolvability of the Quintic (Jeffrey Bergen)
Solution manual Calculus : Concepts and Methods (Ken Binmore & Joan Davies)
Solution manual An Introduction to Partial Differential Equations (Yehuda P=
inchover & Jacob Rubinstein)
Solution manual An Introduction to Ordinary Differential Equations (James C=
. Robinson)
Solution manual An Introduction to Mathematical Physiology and Biology (2nd=
 Ed., J. Mazumdar)
Solution manual An Introduction to Financial Option Valuation : Mathematics=
, Stochastics and Computation (Desmond Higham)
Solution manual An Interactive Introduction to Mathematical Analysis (Jonat=
han Lewin)
Solution manual An Introduction to Mathematical Finance: Options and Other =
Topics (1st Ed., Sheldon M. Ross)

NOTE :  "THIS SERVICE IS NOT AVAILABLE FOR :   CHINA, INDIA, RUSSIA, PAKIST=
```

AN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MAL=
DIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is =
available (it is a partial list). Then if you need solutions manual only co=
ntact me by email.=20

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TE=
ST BANKS.

I do not review the forums, just send me an email. Please do not use emails=
 from servers "LIVE" , all they are take as spam emails in my inbox.

- Physics & Astronomy :

Solution manual Introduction to Solid State Physics (8th Ed., Charles Kitte=
l)
Solution manual Quantum Physics (3rd Ed., Stephen Gasiorowicz)
Solution manual Fundamentals of Nuclear Reactor Physics (Elmer Lewis)
Solution manual Physics of Solar Energy (C. Julian Chen)
Solution manual Solar Engineering of Thermal Processes (3rd Ed., John Duffi=
e & William Beckman)
Solution manual Physics of Condensed Matter (Prasanta Kumar Misra)
Solution Manual Human Body Dynamics (Aydin Tozeren)
Solution manual Solid-State Physics : Introduction to the Theory (2nd Ed., =
James Patterson, Bernard Bailey)
Solution manual Introduction to Nuclear Engineering (3rd Ed., John R. Lamar=
sh & Anthony J. Baratta)
Solution manual Nuclear Energy : An Introduction to the Concepts, Systems, =
and Applications of Nuclear Processes (6th Ed., Raymond L. Murray)
Solution manual Fundamentals of Electromagnetics with Engineering Applicati=
ons (Stuart M. Wentworth)
Solution manual Physics (7th Ed. by Paul E. Tippens)=20
Solution manual Physics (6th Ed., Cutnell & Johnson) =20
Solution manual Physics (7th Ed., Cutnell & Johnson) =20
Solution manual Physics (8th Ed., Cutnell & Johnson)=20
Solution manual Physics (9th Ed., Cutnell & Johnson)

```
Solution manual Essentials of Physics (Cutnell & Johnson)=20
Solution manual Understanding Physics (1st Ed., Cummings, Laws, Redish & Co=
oney)
Solution manual Introductory Physics : Building Understanding (Jerold Touge=
r)
Solution manual Physics Matters : An Introduction to Conceptual Physics (Ja=
mes Trefil & Robert Hazen)
Solution manual How Things Work : The Physics of Everyday Life (3rd Ed., Lo=
uis Bloomfield)
Solution manual An Introduction to Modern Astrophysics (2nd Ed., Bradley W.=
 Carroll & Dale A. Ostlie)
Solution manual Foundations of Astrophysics (Barbara Ryden & Bradley Peters=
on)
Solution manual Modern Physics (3rd Ed., Kenneth S. Krane)
Solution manual Physics (5th Ed., Halliday, Resnick, Krane)
Solution manual Fundamentals of Physics (6th Ed., David Halliday, Robert Re=
snick & Jearl Walker)
Solution manual Fundamentals of Physics (7th Ed., David Halliday, Robert Re=
snick & Jearl Walker)
Solution manual Fundamentals of Physics (8th Ed., David Halliday, Robert Re=
snick & Jearl Walker)
Solution manual Fundamentals of Physics (9th Ed., David Halliday, Robert Re=
snick & Jearl Walker)
Solution manual The Physics of Everyday Phenomena : A Conceptual Introducti=
on to Physics (3rd Ed., Thomas Griffith)
Solution manual The Physics of Everyday Phenomena : A Conceptual Introducti=
on to Physics (4th Ed., Thomas Griffith)
Solution manual The Physics of Everyday Phenomena : A Conceptual Introducti=
on to Physics (5th Ed., Thomas Griffith)
Solution manual The Physics of Everyday Phenomena : A Conceptual Introducti=
on to Physics (6th Ed., W. Thomas Griffith & Juliet W. Brosing)
Solution manual The Physics of Everyday Phenomena : A Conceptual Introducti=
on to Physics (7th Ed., W. Thomas Griffith & Juliet W. Brosing)
Solution manual Integrated Science (2nd Ed., Tillery et al.)
Solution manual Integrated Science (3rd Ed., Tillery et al.)
Solution manual Integrated Science (4th Ed., Tillery et al.)
Solution manual Physical Science (5th Ed., Tillery)
Solution manual Physical Science (6th Ed., Tillery)
Solution manual Physical Science (7th Ed., Tillery)
Solution manual Physical Science (8th Ed., Tillery)
Solution manual The Physical Universe (11th Ed., Konrad Krauskopf & Arthur =
Beiser)
Solution manual The Physical Universe (12th Ed., Konrad Krauskopf & Arthur =
Beiser)
Solution manual Physics of the Life Sciences (Jay Newman)
Solution manual Introduction to Biomedical Engineering (2nd Ed., John Ender=
le, Susan Blanchard, Joseph Bronzino)
Solution manual Introduction to Biomedical Engineering (3rd Ed., John Ender=
le, Joseph Bronzino)
Solution manual Physics in Biology and Medicine (3rd Ed., Paul Davidovits)
Solution manual Physics in Biology and Medicine (4th Ed., Paul Davidovits)
Solution manual Optics (1st Ed., Ajoy  Ghatak)
Solution manual Optics (4th Ed., Eugene Hecht)
```

Solution manual Nonlinear Optics (3rd Ed., Robert Boyd)
Solution manual Introduction to Optics (3rd Ed., Frank L Pedrotti, Leno M P=
edrotti & Leno S Pedrotti)
Solution manual Principles of Physical Optics (Charles Bennett)
Solution manual Optics : Principles and Applications (Kailash Sharma)
Solution manual Continuum Electromechanics (James R. Melcher)
Solution manual Electromagnetic Noise and Quantum Optical Measurements (Her=
mann A. Haus)
Solution Manual Fuel Cell Engines (Matthew M. Mench)
Solution Manual Fuel Cell Fundamentals (1st Ed., Ryan O'Hayre, et. al)
Solution Manual Fuel Cell Fundamentals (2nd Ed., Ryan O'Hayre, Whitney Cole=
lla, Suk-Won Cha, Fritz Prinz)
Solution manual Matter and Interactions I : Modern Mechanics (2nd Ed., Ruth=
 W. Chabay & Bruce A. Sherwood)
Solution manual Matter and Interactions : Volume 1 : Modern Mechanics (3rd =
Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Matter and Interactions II : Electric and Magnetic Interact=
ions (2nd Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Matter and Interactions : Volume 2 : Electric and Magnetic =
Interactions (3rd Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Thermal Stresses (2nd Ed., Noda, Hetnarski & Tanigawa)
Solution manual Introduction to Statistical Physics (Kerson Huang)
Solution manual Extended Irreversible Thermodynamics (3rd Ed., D. Jou, J. C=
asas-Vazquez & G. Lebon)
Solution manual An Introduction to Thermodynamics and Statistical Mechanics=
 (2nd Ed, Keith Stowe)
Solution manual Equilibrium and Non-Equilibrium Statistical Thermodynamics =
(Michel Le Bellac, Fabrice Mortessagne & G. George Batrouni)
Solution manual Elements of Statistical Mechanics: With an Introduction to =
Quantum Field Theory and Numerical Simulation (Ivo Sachs & Siddhartha Sen)
Solution manual Quantum Transport (2nd Ed., Supriyo Datta)
Solution manual Ocean Waves and Oscillating Systems (Johannes Falnes)
Solution manual Statistical Mechanics (2nd Ed., R.K. Pathria)
Solution manual Statistical Mechanics (3rd Ed., R.K. Pathria , Paul D. Beal=
e)
Solution manual Quantum Mechanics : From Basic Principles to Numerical Meth=
ods and Applications (Louis Marchildon)
Solution manual Quantum Mechanics (Gennaro Auletta, Mauro Fortunato & Giorg=
io Parisi)=20
Solution manual Fundamentals of Quantum Mechanics (C.L. Tang)
Solution manual Astronomy : A Physical Perspective (2nd Ed., Marc L. Kutner=
)=20
Solution manual Classical Mechanics (Douglas Gregory)=20
Solution manual Electromagnetic Field Theory Fundamentals (2nd Ed., Singh G=
uru & Hiziroglu)
Solution manual Special Relativity : From Einstein to Strings (P.M. Schwarz=
 & J.H. Schwarz)
Solution manual Gravity : An Introduction to Einstein's General Relativity =
(James Hartle)
Solution manual A Short Course in General Relativity (3rd Ed., James Foster=
 & J. David Nightingale)=20
Solution manual Statistical Thermodynamics (Normand Laurendeau)=20
Solution Manual Introductory Statistical Thermodynamics (Nils Dalarsson , M=

ariana Dalarsson & Leonardo Golubovic)
Solution manual Statistical Thermodynamics and Microscale Thermophysics (Va=
n P. Carey)
Solution manual Thermal Physics (Ralph Baierlein) =20
Solution manual Topics in Atomic Physics (Charles E. Burkhardt, Jacob J. Le=
venthal)
Solution manual Foundations of Quantum Physics (Charles E. Burkhardt, Jacob=
 J. Leventhal)
Solution manual Essential University Physics (2nd Ed., Richard Wolfson)
Solution manual Essential College Physics (Andrew Rex, Richard Wolfson)
Solution manual Applied Physics (8th Ed., Dale Ewen, Ronald Nelson, Neill S=
churter & Erik Gundersen)
Solution manual Applied Physics (9th Ed., Dale Ewen, Neill Schurter & Erik =
Gundersen)
Solution manual Analytical Mechanics (7th Ed., Grant R. Fowles, George Cass=
iday)
Solution manual Orbital Mechanics for Engineering Students (1st Ed., Howard=
 Curtis)
Solution manual Orbital Mechanics for Engineering Students (2nd Ed., Howard=
 Curtis)
Solution manual Diagnostic Ultrasound Imaging : Inside Out (Thomas Szabo)
Solution manual Astronomy : A Beginner's Guide to the Universe (5th Ed., Er=
ic Chaisson & Steve McMillan)
Solution manual The Cosmic Perspective (5th Ed., Jeffrey O. Bennett, Megan =
Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Cosmic Perspective Media Update (4th Ed., Jeffrey O. Be=
nnett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Essential Cosmic Perspective Media Update (4th Ed., Jef=
frey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Essential Cosmic Perspective Media Update (3rd Ed., Jef=
frey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Essential Cosmic Perspective (3rd Ed., Jeffrey O. Benne=
tt, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual Astronomy Today (5th Ed., Eric Chaisson & Steve McMillan)
Solution manual Astronomy Today (6th Ed., Eric Chaisson & Steve McMillan)
Solution manual Conceptual Physical Science (3rd Ed., Paul G. Hewitt, John =
A. Suchocki & Leslie Hewitt)
Solution manual Conceptual Physical Science (4th Ed., Paul G. Hewitt, John =
A. Suchocki & Leslie Hewitt)
Solution manual Conceptual Integrated Science (Paul G. Hewitt, Suzanne Lyon=
s, John A. Suchocki & Jennifer Yeh)
Solution manual Physics : Concepts & Connections (4th Ed., Art Hobson)
Solution manual Physics : Concepts & Connections (5th Ed., Art Hobson)
Solution manual Conceptual Physics (10th Ed., Paul Hewitt)
Solution manual Conceptual Physics (11th Ed., Paul Hewitt)
Solution manual Conceptual Physics Fundamentals (Paul G. Hewitt)
Solution manual College Physics : A Strategic Approach (2nd Ed., Randall D.=
 Knight, Brian Jones, Stuart Field)
Solution manual College Physics (6th Ed., Jerry Wilson, Anthony Buffa & Bo =
Lou)=20
Solution manual College Physics (7th Ed., Jerry Wilson, Anthony Buffa & Bo =
Lou)
Solution manual College Physics (8th Ed., Young & Geller)

Solution manual Modern Physics (2nd Ed., Randy Harris)
Solution manual Modern Physics for Scientists and Engineers (John Morrison)
Solution manual Solid State Physics : Essential Concepts (David Snoke)
Solution manual Physics with Mastering Physics (3rd Ed., James Walker)
Solution manual Physics with Mastering Physics (4th Ed., James Walker)
Solution manual Active Learning Guide (Alan Van Heuvelen & Eugenia Etkina)
Solution manual E&M TIPERs : Electricity & Magnetism Tasks (C. J. Hieggelke=
, D. P. Maloney, T. L. O'Kuma & Steve Kanim)
Solution manual Physics : Principles with Applications (6th Ed., Douglas C.=
 Giancoli)
Solution manual Physlet=AE Physics : Interactive Illustrations, Exploration=
s and Problems for Introductory Physics (Wolfgang Christian & Mario Belloni=
)
Solution manual University Physics with Modern Physics with Mastering Physi=
cs (11th Ed., Hugh Young & Roger Freedman)
Solution manual University Physics with Modern Physics with Mastering Physi=
cs (12th Ed., Hugh Young & Roger Freedman)
Solution manual Physics for Scientists and Engineers (3rd Ed., Douglas C. G=
iancoli)
Solution manual Physics for Scientists and Engineers with Modern Physics (3=
rd Ed., Douglas Giancoli)
Solution manual Physics for Scientists and Engineers with Modern Physics (4=
th Ed., Douglas Giancoli)
Solution manual Physlet=AE Quantum Physics : An Interactive Introduction (M=
ario Belloni, Wolfgang Christian & Anne Cox)
Solution manual Introduction to Electrodynamics (3rd Ed., David J. Griffith=
s)
Solution manual Introduction to Electrodynamics (4th Ed., David J. Griffith=
s)
Solution manual Introduction to Quantum Mechanics (2nd Ed., David Griffiths=
)
Solution manual Quantum Mechanics : An Accessible Introduction (Robert Sche=
rrer)
Solution manual Modern Quantum Mechanics (J. J. Sakurai)
Solution manual Modern Quantum Mechanics (2nd Ed., J. J. Sakurai & Jim Napo=
litano)
Solution manual The Physics of Sound (3rd Ed., Richard Berg & David Stork)
Solution manual Electromagnetism : Principles and Applications (1st Ed., Pa=
ul Lorrain, Dale R. Corson)
Solution manual Classical Electromagnetism (Jerrold Franklin)
Solution manual Classical Electrodynamics (2nd Ed., John David Jackson)
Solution manual Nanoengineering of Structural, Functional and Smart Materia=
ls (Mark Schulz, Ajit Kelkar, Mannur Sundaresan)
Solution manual Introduction to Color Imaging Science (Hsien-Che Lee)
Solution manual An Introduction to Astrobiology (Iain Gilmour & Mark Sephto=
n)
Solution manual An Introduction to Galaxies and Cosmology (Mark HJones & Ro=
bert Lambourne)
Solution manual An Introduction to the Solar System (Neil McBride & Iain Gi=
lmour)
Solution manual Quantum Physics (Michel Le Bellac)
Solution manual Laser Fundamentals (2nd Ed., William T. Silfvast)
Solution manual Laser Electronics (3rd Ed., Joseph T. Verdeyen)

Solution manual Introductory Quantum Optics (Christopher Gerry & Peter Knig=
ht)
Solution manual Introduction to Plasma Physics: With Space and Laboratory A=
pplications (D. A. Gurnett & A. Bhattacharjee)=20
Solution manual A Short Introduction to Quantum Information and Quantum Com=
putation (Michel Le Bellac)
Solution manual A Quantum Approach to Condensed Matter Physics (Philip L. T=
aylor & Olle Heinonen)
Solution manual A First Course in String Theory (Barton Zwiebach)
Solution manual A First Course in Computational Physics and Object-Oriented=
 Programming with C++ (David Yevick)
Solution manual A Course in Modern Mathematical Physics : Groups, Hilbert S=
pace and Differential Geometry (Peter Szekeres)=20
Solution manual Ultrasonic Nondestructive Evaluation Systems: Models and Me=
asurements (Lester W. Schmerr & Sung-Jin Song)
Solution manual Explorations : Stars Galaxies and Planets (1st Ed. Updated,=
 Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (2nd Ed., Thoma=
s Arny)
Solution manual Explorations : An Introduction to Astronomy (3rd Ed. Update=
d, Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (4th Ed. Update=
d, Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (5th Ed. Update=
d, Thomas Arny)
Solution manual Astronomy : Journey to the Cosmic Frontier (3rd Ed., John D=
. Fix)
Solution manual Astronomy : Journey to the Cosmic Frontier (4th Ed., John D=
. Fix)
Solution manual Astronomy : Journey to the Cosmic Frontier (5th Ed., John D=
. Fix)
Solution manual Pathways to Astronomy with Starry Night Pro (Steven Schnei=
der & Thomas T Arny)
Solution manual From Molecules to Networks (2nd Ed., John Byrne & James Rob=
erts)
Solution manual Biotechnology (David Clark & Nanette Pazdernik)
Solution manual Light and Video Microscopy (Randy Wayne)
Solution manual Mathematical Methods for Physicists : A Comprehensive Guide=
 (7th Ed., George Arfken, Hans Weber & Frank Harris)

NOTE :  "THIS SERVICE IS NOT AVAILABLE FOR :   CHINA, INDIA, RUSSIA, PAKIST=
AN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MAL=
DIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is =
available (it is a partial list). Then if you need solutions manual only co=
ntact me by email.=20

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TE=
```

ST BANKS.

I do not review the forums, just send me an email. Please do not use emails=
 from servers "LIVE" , all they are take as spam emails in my inbox.

- Civil Engineering and Architecture :

Solution manual Mechanical and Structural Vibrations : Theory and Applicati=
ons (Jerry H. Ginsberg)
Solution manual Structural Analysis (4th Ed., Aslam Kassimali)
Solution manual Fundamentals of Structural Analysis (1st Ed., Leet & Uang)
Solution manual Fundamentals of Structural Analysis (2nd Ed., Leet & Uang)
Solution manual Fundamentals of Structural Analysis (3rd Ed., Leet, Uang & =
Gilbert)
Solution manual Fundamentals of Structural Analysis (4th Ed., Leet, Uang & =
Gilbert)
Solution manual A Structures Primer (Harry F. Kaufman)
Solution manual Steel Design (4th Ed., William T. Segui)
Solution manual Advanced Methods of Structural Analysis (Igor A. Karnovsky =
& Olga Lebed)
Solution manual Matrix Structural Analysis, With MASTAN2 (2nd Ed., William =
McGuire, Richard H. Gallagher, Ronald D. Ziemian)
Solution manual Structural and Stress Analysis (2nd Ed., Megson)
Solution manual Structural Steel Design ASD Method (4th Ed., Jack McCormac)
Solution manual Structural Steel Design (4th Ed., Jack McCormac)
Solution manual Structural Steel Design (5th Ed., Jack C. McCormac & Stephe=
n F. Csernak)
Solution manual Structural Steel Design : A Practice Oriented Approach (Abi=
 Aghayere & Jason Vigil)
Solution manual Unified Design of Steel Structures (1st Ed., Louis Geschwin=
dner)
Solution manual Unified Design of Steel Structures (2nd Ed., Louis Geschwin=
dner)
Solution manual Steel Structures : Behavior and LRFD (1st Ed., Ramulu Vinna=
kota)
Solution manual The Engineering of Foundations (1st Ed., Rodrigo Salgado)
Solution manual Construction Project Scheduling and Control (2nd Ed., Saleh=
 A. Mubarak)
Solution manual Introduction to Infrastructure : An Introduction to Civil a=
nd Environmental Engineering (Michael R. Penn, Philip J. Parker)=20
Solution manual Civil and Environmental Systems Engineering (2nd Ed., Charl=

es S. Revelle, Earl Whitlatch, Jeff Wright)
Solution manual Mechanics of Materials : A Modern Integration of Mechanics =
and Materials in Structural Design (Christopher Jenkins & Sanjeev Khanna)
Solution manual Analysis and Design of Shallow and Deep Foundations (Lymon =
Reese, William Isenhower & Shin-Tower Wang)=20
Solution manual Elementary Structures for Architects and Builders (5th Ed.,=
 Ronald Shaeffer)
Solution manual Building Structures (3rd Ed., James Ambrose & Patrick Tripe=
ny)
Solution manual Statics and Strength of Materials for Architecture and Buil=
ding Construction (3rd Ed., Onouye & Kane)
Solution manual Statics and Strength of Materials for Architecture and Buil=
ding Construction (4th Ed., Onouye & Kane)
Solution manual Finite Element Techniques in Structural Mechanics (C. T. F.=
 Ross)
Solution manual Fundamental Finite Element Analysis and Applications: with =
Mathematica and Matlab Computations (Asghar Bhatti)
Solution manual Advanced Topics in Finite Element Analysis of Structures : =
With Mathematica and MATLAB Computations (Asghar Bhatti)
Solution manual Adjustment Computations : Spatial Data Analysis (4th Ed., C=
harles Ghilani & Paul Wolf)
Solution manual Adjustment Computations : Spatial Data Analysis (5th Ed., C=
harles Ghilani)
Solution manual Surveying (5th Ed., Jack McCormac)
Solution manual Surveying (6th Ed., Jack McCormac, Wayne Sarasua, William =
Davis)
Solution manual Surveying with Construction Applications (6th Ed., Barry Ka=
vanagh)
Solution manual Surveying with Construction Applications (7th Ed., Barry Ka=
vanagh)
Solution manual Surveying : Principles and Applications (8th Ed., Barry Kav=
anagh)
Solution manual Surveying Fundamentals and Practices (5th Ed., Jerry Nathan=
son, Michael Lanzafama & Philip Kissam)
Solution manual Surveying Fundamentals and Practices (6th Ed., Jerry Nathan=
son, Michael Lanzafama & Philip Kissam)
Solution manual Structural Analysis (5th Ed., Hibbeler)
Solution manual Structural Analysis (7th Ed., Hibbeler)
Solution manual Structural Analysis - SI Units (7th Ed., Hibbeler)
Solution manual Structural Analysis (8th Ed., Hibbeler)
Solution manual Structural Analysis - SI Units (8th Ed., Hibbeler)
Solution manual Dynamics of Structures (3rd Ed., Chopra)
Solution manual Dynamics of Structures (4th Ed., Chopra)
Solution manual Designing with Geosynthetics (5th Ed., Robert M. Koerner)
Solution manual Geotechnical Earthquake Engineering (Steven L. Kramer)
Solution manual Principles of Geotechnical Engineering (6th Ed., Braja M. D=
as)=20
Solution manual An Introduction to Geotechnical Engineering (2nd Ed., Rober=
t D. Holtz, William D. Kovacs, Thomas C. Sheahan)
Solution manual Foundation Design : Principles and Practices (2nd Ed., Dona=
ld P. Coduto)
Solution manual Geotechnical Engineering: Principles and Practices (2nd Ed.=
, Donald P. Coduto, Man-chu Ronald Yeung & William A. Kitch)

Solution manual Geotechnical Engineering: Principles and Practices - Intern=
ational Version (2nd Ed., Donald P. Coduto, Man-chu Ronald Yeung & William =
A. Kitch)
Solution manual Fundamentals of Structural Stability (George Simitses & Dew=
ey Hodges)
Solution manual Fundamentals of Structural Mechanics (2nd Ed., keith D. Hje=
lmstad)
Solution Manual Structural Dynamics : Theory and Applications (Tedesco, McD=
ougal & Ross)
Solution manual Fundamentals of Structural Dynamics (2nd Ed., Roy Craig & A=
ndrew Kurdila)
Solution manual Concrete (2nd Ed., Sidney Mindess, J. Francis Young, David =
Darwin)=20
Solution manual Design of Concrete Structures (13th Ed., Nilson, Darwin & D=
olan)
Solution manual Design of Concrete Structures (14th Ed., Nilson, Darwin & D=
olan)
Solution manual Structures (6th Ed., Daniel Lewis Schodek & Martin Bechthol=
d)
Solution manual Concrete Structures (Mehdi Setareh & Robert Darvas)
Solution manual Reinforced Concrete Design : A Practical Approach (Brzev & =
Pao)
Solution manual Reinforced Concrete : A Fundamental Approach (6th Ed., Edwa=
rd Nawy)=20
Solution manual Prestressed Concrete : A Fundamental Approach - ACI, AASHTO=
, IBC 2009 Codes Version (5th Ed. Update, Edward Nawy)
Solution manual Reinforced Concrete Design (6th Ed., Chu-Kia Wang, Charles =
Salmon)
Solution manual Reinforced Concrete Design (7th Ed., Chu-Kia Wang, Charles =
Salmon & Jos=E9 Pincheira)
Solution manual Reinforced Concrete Design (6th Ed., George Limbrunner & Ab=
i Aghayere)
Solution manual Reinforced Concrete Design (7th Ed., George Limbrunner & Ab=
i Aghayere)
Solution manual Reinforced Concrete : Mechanics and Design (4th Ed., James =
MacGregor & James Wight)
Solution manual Reinforced Concrete : Mechanics and Design (5th Ed., James =
Wight & James MacGregor)=20
Solution manual Reinforced Concrete : Mechanics and Design - International =
Version (5th Ed., James Wight & James MacGregor)
Solution manual Reinforced Concrete : Mechanics and Design (6th Ed., James =
Wight & James MacGregor)
Solution manual Reinforced Concrete : Mechanics and Design - International =
Edition (6th Ed., James Wight & James MacGregor)
Solution manual Structural Concrete : Theory and Design (3rd Ed., M. Nadim =
Hassoun & Akthem Al-Manaseer)
Solution manual Structural Concrete : Theory and Design (4th Ed., M. Nadim =
Hassoun & Akthem Al-Manaseer)
Solution manual Structural Concrete : Theory and Design (5th Ed., M. Nadim =
Hassoun & Akthem Al-Manaseer)
Solution manual Design of Reinforced Concrete (6th Ed., Jack McCormac & Jam=
es Nelson)
Solution manual Design of Reinforced Concrete (7th Ed., ACI 318-05 Code Edi=

tion, by Jack McCormac)
Solution manual Design of Reinforced Concrete (8th Ed., Jack McCormac & Rus=
sell Brown)
Solution manual Design of Reinforced Concrete (9th Ed., Jack McCormac & Rus=
sell Brown)
Solution manual Structural Analysis : Using Classical and Matrix Methods (3=
rd Ed., James Nelson, Jr., Jack McCormac)
Solution manual Structural Analysis : Using Classical and Matrix Methods (4=
th Ed., Jack McCormac)
Solution manual Pavement Design and Materials (A. T. Papagiannakis, E. A. M=
asad)
Solution manual Pavement Analysis and Design (2nd Ed., Yang H. Huang)
Solution manual Traffic Engineering (4th Ed., Roger P. Roess, Elena S. Pras=
sas, William R. McShane)
Solution manual Traffic and Highway Engineering (3rd Ed., Nicholas Garber &=
 Lester Hoel)
Solution manual Principles of Highway Engineering and Traffic Analysis (3rd=
 Ed., Fred Mannering, Walter Kilareski & Scott Washburn)
Solution manual Principles of Highway Engineering and Traffic Analysis (4th=
 Ed., Fred Mannering, Walter Kilareski & Scott Washburn)
Solution manual Highway Engineering (7th Ed., Paul Wright & Karen Dixon)
Solution manual Soil Mechanics : Concepts and Applications (2nd Ed., Willia=
m Powrie)
Solution manual Unsaturated Soil Mechanics (Ning Lu & William Likos)
Solution manual Soil Mechanics and Foundations (2nd Ed., Muni Budhu)
Solution manual Soil Mechanics and Foundations (3rd Ed., Muni Budhu)
Solution manual Soils and Foundations - SI Units (6th Ed., Liu & Evett)
Solution manual Soils and Foundations (7th Ed., Liu & Evett)
Solution manual Fundamentals of Soil Mechanics for Sedimentary and Residual=
 Soils (Laurence Wesley)
Solution manual Essentials of Soil Mechanics and Foundations : Basic Geotec=
hnics (7th Ed., David McCarthy)
Solution manual Foundations and Earth Retaining Structures (Muniram Budhu)
Solution manual Design Analysis in Rock Mechanics (William G. Pariseau)
Solution manual Probability Concepts in Engineering : Emphasis on Applicati=
ons to Civil and Environmental Engineering (2nd Ed., Ang & Tang)
Solution manual Hydraulic Control Systems (Noah Manring)
Solution manual Open Channel Hydraulics (A. Osman Akan)
Solution manual Open Channel Hydraulics (1st Ed., Terry Sturm)
Solution manual Open Channel Hydraulics (2nd Ed., Terry Sturm)
Solution manual Open-Channel Flow (2nd Ed., M. Hanif Chaudhry)=20
Solution manual Frozen Ground Engineering (2nd Ed., Orlando Andersland & Br=
anko Ladanyi)
Solution manual Hydraulics in Civil and Environmental Engineering (4th Ed. =
Andrew Chadwick)
Solution manual Fundamentals of Hydraulic Engineering Systems (4th Ed., Rob=
ert Houghtalen, A. Osman Akan, Ned H. C. Hwang)
Solution manual Fundamentals of Transportation Engineering : A Multimodal S=
ystems Approach (Jon D. Fricker, Robert K. Whitford)
Solution manual Transportation Engineering : An Introduction (3rd Ed., C. J=
otin Khisty, B. Kent Lall)
Solution manual Introduction to Transportation Engineering (2nd Ed., Banks)
Solution manual Urban Transportation Planning (2nd Ed., Meyer & Miller)

Solution manual Transportation Engineering and Planning (3rd Ed., Papacosta=
s & Prevedouros)
Solution manual Transportation Engineering and Planning - SI Edition (3rd E=
d., Papacostas & Prevedouros)
Solution manual Structural Wood Design : A Practice-Oriented Approach (Abi =
Aghayere & Jason Vigil)
Solution manual Simplified Design of Wood Structures (6th Ed., James Ambros=
e & Patrick Tripeny)
Solution manual Simplified Design of Steel Structures (8th Ed., James Ambro=
se & Patrick Tripeny)
Solution manual Simplified Engineering for Architects and Builders (11th Ed=
., James Ambrose & Patrick Tripeny)
Solution manual Materials and Components of Interior Architecture (7th Ed.,=
 J. Rosemary Riggs)
Solution manual Olin's Construction : Principles, Materials, and Methods (8=
th Ed., H. Leslie Simmons)
Solution manual Basic Construction Materials (8th Ed., Theodore Marotta, Jo=
hn C. Coffey, Cynthia LaFleur-Brown & Christine LaPlante)
Solution manual Fundamentals of Residential Construction (2nd Ed., Edward A=
llen & Rob Thallon)
Solution manual Fundamentals of Building Construction : Materials and Metho=
ds (4th Ed., Edward Allen & Joseph Iano)
Solution manual Fundamentals of Building Construction : Materials and Metho=
ds (5th Ed., Edward Allen & Joseph Iano)
Solution manual Composites for Construction : Structural Design with FRP Ma=
terials (Lawrence Bank)
Solution manual Building Construction : Principles, Materials, and Systems =
(Madan Mehta, Diane Armpriest & Walter Scarborough)
Solution manual Construction Contracts (2nd Ed., Jimmie Hinze)
Solution manual Construction Contracts (3rd Ed., Jimmie Hinze)
Solution manual Construction Planning and Scheduling (3rd Ed., Jimmie W. Hi=
nze)
Solution manual Construction Planning and Scheduling (4th Ed., Jimmie W. Hi=
nze)
Solution manual Sustainable Construction and Design (Regina Leffers)
Solution manual Global Engineering and Construction (J. K. Yates)
Solution manual Construction Mathematics (Virdi & Baker)
Solution manual Materials for Civil and Construction Engineers (3rd Ed., Mi=
chael S. Mamlouk & John P. Zaniewski)
Solution manual Construction Management (3rd Ed., Daniel Halpin)
Solution manual Construction Management (4th Ed., Daniel Halpin & Bolivar S=
enior)
Solution manual Financial Management and Accounting Fundamentals for Constr=
uction (Daniel Halpin & Bolivar Senior)
Solution manual Construction Management Fundamentals (1st Ed., Schexnayder =
& Mayo)
Solution manual Construction Management Fundamentals (2nd Ed., Knutson, Sch=
exnayder, Fiori & Mayo)
Solution manual Construction Planning, Equipment, and Methods (6th Ed., Peu=
rifoy & Schexnayder)
Solution manual Construction Planning, Equipment, and Methods (7th Ed., Peu=
rifoy, Schexnayder & Shapira)
Solution manual Construction Planning, Equipment, and Methods (8th Ed., Peu=

rifoy, Schexnayder, Shapira & Schmitt)
Solution manual Construction Methods and Management (7th Ed., Stephens Nunn=
ally)
Solution manual Construction Methods and Management (8th Ed., Stephens Nunn=
ally)
Solution manual Construction Project Administration (8th Ed., Edward Fisk, =
Wayne Reynolds)
Solution manual Construction Project Administration (9th Ed., Edward Fisk, =
Wayne Reynolds)
Solution manual Construction Project Management (3rd Ed., Gould & Joyce)
Solution manual The Management of Construction : A Project Lifecycle Approa=
ch (F. Lawrence Bennett)
Solution manual Construction Accounting and Financial Management (1st Ed., =
Steven Peterson)
Solution manual Construction Accounting and Financial Management (2nd Ed., =
Steven Peterson)
Solution manual Principles and Practices of Commercial Construction (8th Ed=
., Cameron K. Andres & R.C. Smith)
Solution manual Construction Cost Analysis and Estimating (Phillip Ostwald)
Solution manual Cost Analysis and Estimating for Engineering and Management=
 (Phillip Ostwald & Timothy McLaren)
Solution manual Construction Estimating Using Excel (Stephen J. Peterson)
Solution manual Heating, Ventilation, and Air Conditioning in Buildings (1s=
t Ed., John W. Mitchell, James E. Braun)
Solution manual Heating and Cooling of Buildings : Design for Efficiency (2=
nd Ed., Jan Kreider, Peter Curtiss & Ari Rabl)
Solution manual Heating, Cooling, Lighting : Sustainable Design Methods for=
 Architects (3rd Ed., Norbert Lechner)
Solution manual Mechanical and Electrical Systems in Architecture, Engineer=
ing and Construction (5th Ed., Frank R. Dagostino & Joseph B. Wujek)
Solution manual Mechanical and Electrical Equipment for Buildings (10th Ed.=
, Stein, Reynolds, Grondzik, Kwok)
Solution manual Mechanical and Electrical Equipment for Buildings (11th Ed.=
, Grondzik, Kwok, Stein & Reynolds)
Solution manual Mechanical & Electrical Systems in Buildings (4th Ed., Rich=
ard Janis & William Tao)
Solution manual Introduction to Naval Architecture : Formerly Muckle's Nava=
l Architecture for Marine Engineers (4th Ed., E.C. Tupper)
Solution manual Architectural Drawing and Light Construction (8th Ed., Phil=
ip A. Grau, III & Edward J. Muller)
Solution manual NEW Autodesk Civil 3D : Procedures & Applications (Harry O.=
 Ward)
Solution manual Structural Health Monitoring with Piezoelectric Wafer Activ=
e Sensors (Victor Giurgiutiu)
Solution manual Architecture Design Notebook (2nd Ed., Peter Fawcett)
Solution manual Civil Drafting Technology (7th Ed., David A. Madsen, Terenc=
e M. Shumaker & David P. Madsen)
Solution manual Introduction to Homeland Security (2nd Ed., Bullock & Georg=
e Haddow)

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR :   CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

I do not review the forums, just send me an email. Please do not use emails from servers "LIVE" , all they are take as spam emails in my inbox.

- Environmental Engineering, Earth and Environmental Sciences :

Solution manual Principles of Environmental Engineering and Science (1st Ed., Mackenzie Davis & Susan Masten)
Solution manual Principles of Environmental Engineering and Science (2nd Ed., Mackenzie Davis & Susan Masten)
Solution manual Introduction to Environmental Engineering (Richard Mines & Laura Lackey)
Solution manual Introduction to Environmental Engineering (4th Ed., MacKenzie Davis & David Cornwell)
Solution manual Introduction to Environmental Engineering (5th Ed., MacKenzie Davis & David Cornwell)
Solution manual Introduction to Environmental Engineering and Science (2nd Ed., Gilbert Masters)
Solution manual Introduction to Environmental Engineering and Science (3rd Ed., Gilbert Masters & Wendell Ela)
Solution manual Thermal Environmental Engineering (3rd Ed., Thomas H. Kuehn, James W. Ramsey, James L. Threlkeld)
Solution manual Solar Energy Engineering (Soteris Kalogirou)
Solution manual Environmental Science and Engineering (2nd Ed., J. Glynn Henry, Gary W. Heinke)
Solution manual Solar Engineering of Thermal Processes (2nd Ed., John Duffie & William Beckman)
Solution manual Solar Engineering of Thermal Processes (3rd Ed., John Duffie & William Beckman)
Solution manual Energy Technology and Directions for the Future (Fanchi)
Solution manual Civil and Environmental Systems Engineering (2nd Ed., Charles S.

Revelle, Earl Whitlatch, Jeff Wright)
Solution manual Environmental Engineering : Fundamentals, Sustainability, Design (James Mihelcic, Julie Zimmerman)
Solution manual Environmental Engineering Science (Nazaroff & Alvarez - Cohen)
Solution manual Environmental Engineering (4th Ed., Ruth Weiner & Robin Matthews)
Solution manual Environmental Pollution and Control (4th Ed., Peirce, Vesilind & Weiner)
Solution manual Introduction to Engineering and the Environment (1st Ed., Edward Rubin)
Solution manual Basic Environmental Technology : Water Supply, Waste Management & Pollution Control (5th Ed., Jerry Nathanson)
Solution manual Water and Wastewater Technology - SI Units (5th Ed., Mark J. Hammer, Sr. & Mark Hammer, Jr.)
Solution manual Water and Wastewater Technology (6th Ed., Mark J. Hammer, Sr. & Mark Hammer, Jr.)
Solution manual Water and Wastewater Technology (7th Ed., Mark J. Hammer, Sr. & Mark Hammer, Jr.)
Solution manual Water and Wastewater Engineering (Mackenzie L. Davis)
Solution manual Water and Wastewater Engineering : Water Supply and Wastewater Removal (3rd Ed., Nazih K. Shammas & Lawrence K. Wang)
Solution manual Water Supply and Pollution Control (8th Ed., Viessman Jr., Hammer, Perez & Chadik)
Solution manual Water Supply and Pollution Control - International Version (8th Ed., Viessman Jr., Hammer, Perez & Chadik)
Solution manual Water Treatment : Principles and Design (2nd Ed., by MWH)
Solution manual MWH's Water Treatment: Principles and Design (3rd Ed., John C. Crittenden, R. Rhodes Trussell, David W. Hand, Kerry J. Howe, George Tchobanoglous)
Solution manual Water Resources Engineering (Ralph A. Wurbs & Wesley P. James)
Solution manual Ground and Surface Water Hydrology (Larry W. Mays)
Solution manual Water Resources Engineering 2005 Edition (Larry W. Mays)
Solution manual Water Resources Engineering (2nd Ed., Larry W. Mays)
Solution manual Water Resources Engineering (2nd Ed., Chin)
Solution manual Water Resources Engineering (3rd Ed., Chin)
Solution manual Water Chemistry (Benjamin)
Solution manual Aquatic Pollution : An Introductory Text (3rd Ed., Edward A. Laws)
Solution manual Plant Pathology (5th Ed., George Agrios)
Solution manual Radiation Detection and Measurement (3rd Ed., Glenn Knoll)
Solution manual Radiation Detection and Measurement (4th Ed., Glenn Knoll)
Solution manual Principles of Sequence Stratigraphy (Octavian Catuneanu)
Solution manual The Earth's Ionosphere : Plasma Physics & Electrodynamics (2nd Ed., Michael Kelley)
Solution manual Atmosphere, Ocean and Climate Dynamics : An Introductory Text (Marshall & Plumb)
Solution manual Atmospheric Science : An Introductory Survey (2nd Ed., John Wallace, Peter Hobbs)
Solution manual Environmental Issues : An Introduction to Sustainability (3rd Ed., McConnell & Abel)
Solution manual Environmental Science : Toward A Sustainable Future (10th Ed., Wright & Nebel)
Solution manual Hazard City : Assignments in Applied Geology (3rd Ed., King, Carpenter & Wilson)
Solution manual Introduction to Environmental Geology (4th ERd., Edward Keller)

Solution manual Introduction to Environmental Geology (5th ERd., Edward Keller)
Solution manual The Science of Grapevines : Anatomy and Physiology (Markus Keller)
Solution manual Geoenvironmental Engineering : Site Remediation, Waste Containment, and Emerging Waste Management Technologies (Hari Sharma & Krishna Reddy)
Solution manual Natural Hazards : Earth's Processes as Hazards, Disasters and Catastrophes (2nd Ed., Keller & Blodgett)
Solution manual Essentials of Oceanography (9th Ed., Trujillo & Thurman)
Solution manual Exercises for Weather and Climate (6th Ed., Greg Carbone)
Solution manual Fundamentals of Ground Water (Franklin Schwartz & Hubao Zhang)
Solution manual Practical Problems in Groundwater Hydrology (Scott Bair & Terry Lahm)
Solution manual Groundwater Hydrology (3rd Ed., David Keith Todd & Larry Mays)
Solution manual Groundwater Science (Charles Fitts)
Solution manual Groundwater Science (2nd Ed., Charles Fitts)
Solution manual Frozen Ground Engineering (2nd Ed., Orlando Andersland & Branko Ladanyi)
Solution manual Stormwater Management for Land Development : Methods and Calculations for Quantity Control (Thomas A. Seybert)
Solution manual Urban Hydrology, Hydraulics, and Stormwater Quality : Engineering Applications and Computer Modeling (A. Osman Akan & Houghtalen)
Solution manual Hydraulics in Civil and Environmental Engineering (4th Ed. Andrew Chadwick)
Solution manual Hydrologic Analysis and Design (3rd Ed., Richard H. McCuen)
Solution manual Introduction to Hydrology (5th Ed., Warren Viessman, Jr. , Gary L. Lewis)
Solution manual Fundamentals of Hydraulic Engineering Systems (4th Ed., Robert Houghtalen, A. Osman Akan, Ned H. C. Hwang)
Solution manual Agriculture's Ethical Horizon (Robert Zimdahl)
Solution manual Environmental Contaminants : Assessment and Control (Daniel Vallero)
Solution manual A Problem-Solving Approach to Aquatic Chemistry (James Jensen)
Solution manual Hazardous Waste Management (2nd Ed., Michael LaGrega, Phillip Buckingham & Jeffrey Evans)
Solution manual Environmental Biotechnology : Principles and Applications (1st Ed., Bruce Rittmann & Perry McCarty)
Solution manual Chemistry for Environmental Engineering and Science (5th Ed., Clair Sawyer, Perry McCarty & Gene Parkin)
Solution manual Geology for Engineers and Environmental Scientists (3rd Ed., Alan Kehew)
Solution manual Ocean Waves and Oscillating Systems (Johannes Falnes)
Solution manual Radiation Detection and Measurement (3rd Ed., Glenn Knoll)
Solution manual Probability Concepts in Engineering : Emphasis on Applications to Civil and Environmental Engineering (2nd Ed., Ang & Tang)
Solution manual Hydrology : Water Quantity and Quality Control (2nd Ed., Wanielista, Kersten & Eaglin)
Solution manual Hydrology and Floodplain Analysis (4th Ed., Philip Bedient, Wayne Huber & Baxter Vieux)
Solution manual Hydrology : An Introduction (Brutsaert)
Solution manual Applied Atmospheric Dynamics (Amanda H. Lynch & John J. Cassano)
Solution manual Mid-Latitude Atmospheric Dynamics : A First Course (Jonathan E. Martin)
Solution manual Adjustment Computations : Spatial Data Analysis (4th Ed., Charles

Ghilani & Paul Wolf)
Solution manual Adjustment Computations : Spatial Data Analysis (5th Ed., Charles Ghilani)
Solution manual Ecology (4th Ed., Manuel C. Molles)
Solution manual Industrial Ecology and Sustainable Engineering (T. E. Graedel & Braden R. Allenby)
Solution manual Principles of Environmental Science : Inquiry and Applications (4th Ed., Cunningham)
Solution manual Principles of Environmental Science : Inquiry and Applications (5th Ed., Cunningham)
Solution manual Environmental Science : A Global Concern (9th Ed., Cunningham)
Solution manual Environmental Science : A Global Concern (10th Ed., Cunningham)
Solution manual Essential Environmental Science (1st Ed., Edward Keller & Daniel Botkin)
Solution manual Environmental Science : Earth as a Living Planet (6th Ed., Daniel Botkin & Edward Keller)
Solution manual Environmental Science : Earth as a Living Planet (7th Ed., Daniel Botkin & Edward Keller)
Solution manual Environmental Science : Earth as a Living Planet, Canadian Edition (Daniel Botkin & Edward Keller & Isobel Heathcote)
Solution manual Introduction to Marine Biogeochemistry (2nd Ed., Susan Libes)
Solution manual Farm Management (5th Ed., Ronald Kay, William Edwards & Patricia Duffy)
Solution manual Farm Management (6th Ed., Ronald Kay, William Edwards & Patricia Duffy)
Solution manual Environmental Geology (6th Ed., Carla Montgomery)
Solution manual Environmental Geology (7th Ed., Carla Montgomery)
Solution manual Environmental Geology (8th Ed., Carla Montgomery)
Solution manual Environmental Geology (9th Ed., Carla Montgomery)
Solution manual Natural Disasters (4th Ed., Patrick Abbott)
Solution manual Natural Disasters (5th Ed., Patrick Abbott)
Solution manual Natural Disasters (6th Ed., Patrick Abbott)
Solution manual Natural Disasters (7th Ed., Patrick Abbott)
Solution manual Natural Disasters (8th Ed., Patrick Abbott)
Solution manual Geography Information Systems (2nd Ed., Kang-tsung Chang)
Solution manual Meteorology (2nd Ed., Danielson et al.)
Solution manual Fundamentals of Oceanography (4th Ed., Duxbury, Sverdrup)
Solution manual Fundamentals of Oceanography (5th Ed., Duxbury, Sverdrup)
Solution manual Introduction to Geography (8th Ed., Getis et al.)
Solution manual Introduction to Geography (9th Ed., Getis et al.)
Solution manual Introduction to Geography (10th Ed., Getis et al.)
Solution manual Introduction to Geography (11th Ed., Getis et al.)
Solution manual Physical Geology : The Earth Revealed (4th Ed., Plummer, McGeary & Carlson)
Solution manual Physical Geology : The Earth Revealed (6th Ed., Plummer, McGeary & Carlson)
Solution manual Physical Geology : Earth Revealed (7th Ed., Plummer, McGeary & Carlson)
Solution manual Physical Geology (9th Ed., Plummer, McGeary & Carlson)
Solution manual Physical Geology (10th Ed., Plummer, McGeary & Carlson)
Solution manual Physical Geology (11th Ed., Plummer, McGeary & Carlson)
Solution manual Physical Geology (12th Ed., Plummer, McGeary & Carlson)
Solution manual Exploring the World Ocean (W. Sean Chamberlin & Tommy Dickey)

Solution manual Mastering ArcGIS (3rd Ed., Maribeth Price)
Solution manual Mastering ArcGIS (4th Ed., Maribeth Price)
Solution manual An Introduction to the World's Oceans (7th Ed., Sverdrup et al.)
Solution manual An Introduction to the Worlds Oceans (8th Ed., Sverdrup et al.)
Solution manual An Introduction to the Worlds Oceans (9th Ed., Sverdrup & Armbrust)
Solution manual An Introduction to the Worlds Oceans (10th Ed., Sverdrup & Armbrust)
Solution manual Laboratory Studies in Earth History (8th Ed., Brice et al.)
Solution manual Laboratory Studies in Earth History (9th Ed., Brice et al.)
Solution manual Exploring Geology (1st Ed., Reynolds et al.)
Solution manual Manual of Mineral Science (23rd Ed., Cornelis Klein & Barbara Dutrow)
Solution manual Isotopes : Principles and Applications (3rd Ed., Gunter Faure & Teresa Mensing)
Solution manual Earth Science : Understanding Environmental Systems (Edgar Spencer)
Solution manual Fundamentals of Weed Science (3rd Ed., Robert Zimdahl)
Solution manual Field and Laboratory Exercises in Animal Behavior (Tillberg, Breed & Hinners)
Solution manual Soils : An Introduction (6th Ed., Michael Singer & Donald Munns)
Solution manual Soils, Land, and Life (Stan Buol)
Solution manual Soils in Our Environment (10th Ed., Raymond Miller & Duane Gardiner)
Solution manual Soils in Our Environment (11th Ed., Raymond Miller & Duane Gardiner)
Solution manual Soil Microbiology, Ecology and Biochemistry (3rd Ed., Eldor Paul)
Solution manual Soil in the Environment : Crucible of Terrestrial Life (Daniel Hillel)
Solution manual Design Analysis in Rock Mechanics (William G. Pariseau)
Solution manual Forest Management and Planning (Bettinger, Boston, Siry & Grebner)
Solution manual Agricultural Systems : Agroecology and Rural Innovation for Development (Sieglinde Snapp & Barry Pound)
Solution manual Plant Systematics (Michael Simpson)
Solution manual The Nature and Properties of Soils (14th Ed., Nyle Brady & Raymond Weil)
Solution manual Elements of the Nature and Properties of Soils (2nd Ed., Nyle Brady & Ray Weil)
Solution manual Materials and the Environment : Eco-informed Material Choice (Michael Ashby)
Solution manual Materials and the Environment : Eco-informed Material Choice (2nd Ed., Michael Ashby)

mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR :   CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

I do not review the forums, just send me an email. Please do not use emails from servers "LIVE" , all they are take as spam emails in my inbox.

- Chemistry and Chemical Engineering :

Solution manual An Introduction to Mass and Heat Transfer : Principles of Analysis and Design (Stanley Middleman)
Solution manual Mass Transfer Operations for the Practicing Engineer (Louis Theodore & Francesco Ricci)
Solution manual Principles and Modern Applications of Mass Transfer Operations (1st Ed., Jaime Benitez)
Solution manual Diffusion : Mass Transfer in Fluid Systems (2nd Ed., Cussler)
Solution manual Transport by Advection and Diffusion (Ted Bennett)
Solution manual Separation Process Principles (1st Ed, Seader & Henley)
Solution manual Separation Process Principles (2nd Ed, Seader & Henley)
Solution manual Separation Process Principles (3rd Ed, Seader, Henley & Roper)
Solution manual Separation Process Principles - International Student Version (3rd Ed, Seader, Henley & Roper)
Solution manual Separation Process Engineering : Includes Mass Transfer Analysis (3rd Ed., Phillip C. Wankat)
Solution manual Analysis, Synthesis and Design of Chemical Processes (3rd Ed., Turton, Bailie, Whiting & Shaeiwitz)
Solution manual Analysis, Synthesis and Design of Chemical Processes (4th Ed., Turton, Bailie, Whiting, Shaeiwitz & Bhattacharyya)
Solution manual Analysis, Synthesis and Design of Chemical Processes - International Version (4th Ed., Turton, Bailie, Whiting, Shaeiwitz & Bhattacharyya)
Solution manual Principles of Chemical Separations with Environmental Applications (Richard D. Noble)
Solution manual Product and Process Design Principles : Synthesis, Analysis, and Evaluation (2nd Ed., Seider, Seader & Lewin)
Solution manual Product and Process Design Principles : Synthesis, Analysis, and Design (3rd Ed., Seider, Seader, Lewin & Widagdo)
Solution manual Product and Process Design Principles : Synthesis, Analysis, and Design - International Student Version (3rd Ed., Seider, Seader, Lewin & Widagdo)
Solution manual Principles and Practices of Automatic Process Control (3rd Ed., Smith & Corripio)
Solution manual Process Systems Analysis and Control (3rd Ed. Donald Coughanowr,

Steven LeBlanc)
Solution manual Process Dynamics and Control (2nd Ed., Seborg, Edgard & Mellichamp)
Solution manual Process Dynamics and Control (3rd Ed., Seborg, Edgard, Mellichamp & Doyle)
Solution manual Process Dynamics and Control - International Student Version (3rd Ed., Seborg, Edgard, Mellichamp & Doyle)
Solution manual Process Control : A First Course with MATLAB (P.C. Chau)
Solution Manual Fundamentals of Momentum, Heat and Mass Transfer (5th Ed., Welty)
Solution manual Plant Design and Economics for Chemical Engineers (5th Ed., Peters & Timmerhaus)
Solution manual Basic Principles and Calculations in Chemical Engineering (7th Ed., Himmelblau)
Solution manual Basic Principles and Calculations in Chemical Engineering (8th Ed., Himmelblau)
Solution manual Basic Principles and Calculations in Chemical Engineering - International Edition (8th Ed., Himmelblau)
Solution manual Unit Operations of Chemical Engineering (6th Ed., McCabe & Smith)
Solution manual Unit Operations of Chemical Engineering (7th Ed., McCabe & Smith)
Solution manual Transport Phenomena and Unit Operations : A Combined Approach (Richard G. Griskey)
Solution manual Transport Phenomena in Biological Systems (1st Ed., George Truskey, Fan Yuan & David Katz)
Solution manual Transport Phenomena in Biological Systems (2nd Ed., George Truskey, Fan Yuan & David Katz)
Solution manual Transport Phenomena in Biological Systems - International Edition (2nd Ed., George Truskey, Fan Yuan & David Katz)
Solution manual Transport Phenomena : A Unified Aprroach (Robert S. Brodkey & Harry C. Hershey)
Solution manual Modeling in Transport Phenomena : A Conceptual Approach (2nd Ed., Ismail Tosun)
Solution manual Transport Phenomena (2nd Ed., Bird & Stewart)
Solution manual Solutions to Class 1&2 - Transport Phenomena (Bird)
Solution manual Chemical Engineering Design : Principles, Practice and Economics of Plant and Process Design (Gavin Towler & Ray Sinnott)
Solution manual Chemical Engineering Design : Principles, Practice and Economics of Plant and Process Design (2nd Ed., Gavin Towler & Ray Sinnott)
Solution manual Chemical Engineering Design (Coulson & Richardson's Chemical Engineering - Volume 6) - (4th Ed., Sinnott)
Solution manual Chemical Engineering Design - SI Edition (5th Ed., Sinnott & Towler)
Solution manual Fundamentals of Nuclear Reactor Physics (Elmer Lewis)
Solution manual Nuclear Energy : An Introduction to the Concepts, Systems, and Applications of Nuclear Processes (6th Ed., Raymond L. Murray)
Solution manual Chemical Engineering Design and Analysis : An Introduction (Duncan & Reimer)
Solution manual Introduction to Chemical Engineering : Tools for Today and Tomorrow (5th Ed., Kenneth A. Solen, John Harb)
Solution manual Chemical Reactor Analysis and Design (3rd Ed., Gilbert Froment, Kenneth Bischoff, Juray De Wilde)
Solution manual Chemically Reacting Flow : Theory and Practice (Robert J. Kee, Michael E. Coltrin, Peter Glarborg)
Solution manual Kinetics of Catalytic Reactions (Albert Vannice)

Solution manual An Introduction to Chemical Engineering Kinetics and Reactor Design (Charles G. Hill)
Solution manual Chemical Reactions and Chemical Reactors (George W. Roberts)
Solution manual Chemical Reaction Engineering (3rd Ed., Levenspiel)
Solution manual Fundamentals of Chemical Reaction Engineering (1st Ed., Davis)
Solution manual Conceptual Design of Distillation Systems (1st Ed., Doherty & Malone)
Solution manual Fluid Mechanics for Chemical Engineers with Microfluidics and CFD (2nd Ed., James O. Wilkes)
Solution manual Fluid Mechanics for Chemical Engineers (3rd Ed., Noel de Nevers)
Solution manual Physical and Chemical Equilibrium for Chemical Engineers (2nd Ed., Noel de Nevers)
Solution manual Introduction to Chemical Processes : Principles, Analysis, Synthesis (1st Ed., Regina M. Murphy)
Solution manual Optimization of Chemical Processes (2nd Ed., Edgar & Himmelblau)
Solution manual The Thermodynamics of Phase and Reaction Equilibria (Ismail Tosun)
Solution manual Fundamentals of Chemical Engineering Thermodynamics (Themis Matsoukas)
Solution manual Chemical and Engineering Thermodynamics (3rd Ed., Stanley I. Sandler)
Solution manual Chemical, Biochemical, and Engineering Thermodynamics (4th Ed., Stanley I. Sandler)
Solution manual An Introduction to Applied Statistical Thermodynamics (Stanley I. Sandler)
Solution manual Introduction to Chemical Engineering Thermodynamics (6th Ed., Smith & Van Ness)
Solution manual Introduction to Chemical Engineering Thermodynamics (7th Ed., Smith & Van Ness)
Solution manual Engineering and Chemical Thermodynamics (Koretsky)
Solution manual Introduction to Chemical Principles (9th Ed., Stephen Stoker)
Solution manual Basic Chemistry (2nd Ed., K. Timberlake & W. Timberlake)
Solution manual Phase Equilibria, Phase Diagrams and Phase Transformations : Their Thermodynamic Basis (2nd Ed., Mats Hillert)
Solution manual Principles of Chemical Kinetics (2nd Ed., James House)
Solution manual Chemical Process Safety : Fundamentals with Applications (3rd Ed., Daniel A. Crowl, Joseph F. Louvar)
Solution manual Chemical Process Safety : Fundamentals with Applications - International Edition (3rd Ed., Daniel A. Crowl, Joseph F. Louvar)
Solution manual Elementary Principles of Chemical Processes (3rd Ed., Felder & Rousseau)
Solution manual Elements of Chemical Reaction Engineering (3rd Ed., H. Scott Fogler)
Solution manual Elements of Chemical Reaction Engineering (4th Ed., H. Scott Fogler)
Solution manual Essentials of Chemical Reaction Engineering (H. Scott Fogler)
Solution manual Essentials of Chemical Reaction Engineering - International Edition (H. Scott Fogler)
Solution manual Group Theory with Applications in Chemical Physics (Patrick Jacobs)
Solution manual Food Analysis (3rd Ed., Suzanne Nielsen)
Solution manual Introduction to Physical Chemistry (3rd Ed., Ladd)
Solution manual General Chemistry : Principles and Modern Applications (10th Ed., Ralph H. Petrucci, F. Geoffrey Herring, Jeffry D. Madura, Carey Bissonnette)

Solution manual Virtual ChemLab : Organic Chemistry Lab Manual / Workbook, v2.5, 3rd Ed. (Brian Woodfield & Merritt B. Andrus)
Solution manual Virtual ChemLab : General Chemistry Lab Manual / Workbook, v2.5, 3rd Ed. (Brian Woodfield & Matthew Asplund)
Solution manual Introductory Chemistry (2nd Ed., Nivaldo J. Tro)
Solution manual Introductory Chemistry (3rd Ed., Nivaldo J. Tro)
Solution manual Conceptual Integrated Science (Hewitt, Lyons, Suchocki & Yeh)
Solution manual Introductory Chemistry : Concepts and Connections (4th Ed., Charles Corwin)
Solution manual Prentice Hall Lab Manual Introductory Chemistry (4th Ed., Charles Corwin)
Solution manual Introductory Chemistry : Concepts and Connections (6th Ed., Charles Corwin)
Solution manual Modern Organic Synthesis : An Introduction (George S. Zweifel, Michael H. Nantz)
Solution manual Organic Synthesis (3rd Ed., Michael Smith)
Solution manual Basic Concepts of Chemistry (8th Ed., Leo J. Malone, Theodore Dolter)
Solution manual Basic Concepts of Chemistry (9th Ed., Leo J. Malone, Theodore Dolter)
Solution manual General, Organic and Biological Chemistry : Structures of Life (2nd Ed., Karen Timberlake)
Solution manual Chemistry : An Introduction to General, Organic, and Biological Chemistry (9th Ed., Karen Timberlake)
Solution manual Chemistry : An Introduction to General, Organic, and Biological Chemistry (10th Ed., Karen Timberlake)
Solution manual Conceptual Chemistry (3rd Ed., John A. Suchocki)
Solution manual Explorations in Conceptual Chemistry : A Student Activity Manual (Jeffrey Paradis)
Solution manual Criminalistics : An Introduction to Forensic Science (9th Ed., Richard Saferstein)
Solution manual Physical Chemistry (Thomas Engel & Philip Reid)
Solution manual Physical Chemistry for the Life Sciences (Engel, Drobny & Reid)
Solution manual Quantum Chemistry and Spectroscopy (Thomas Engel & Philip Reid)
Solution manual Themodynamics, Statistical Thermodynamics, and Kinetics (Thomas Engel & Philip Reid)
Solution manual Physical Chemistry (7th. Ed., Peter Atkins & Julio de Paula)
Test bank Organic Chemistry - A Brief Course (3rd Ed., Atkins & Carey)
Solution manual Physical Chemistry (2nd Ed., Robert Mortimer)
Solution manual Physical Chemistry (3rd Ed., Robert Mortimer)
Solution manual Chemistry (4th Ed., Olmsted & Williams)
Solution manual Chemistry : Structure and Dynamics (3rd Ed., Spencer, Bodner & Rickard)
Solution manual Chemistry : Structure and Dynamics (4th Ed., Spencer, Bodner & Rickard)
Solution manual Chemistry : Structure and Dynamics (5th Ed., Spencer, Bodner & Rickard)
Solution manual Chemistry (3rd Ed., Catherine E. Housecroft & Edwin Constable)
Solution manual Chemistry (4th Ed., Catherine E. Housecroft & Edwin Constable)
Solution manual General Chemistry : The Essential Concepts (4th Ed., Raymond Chang)
Solution manual Principles of General Chemistry (2nd Ed., Martin Silberberg)
Solution manual Chemistry : The Molecular Nature of Matter and Change (3rd Ed.,

Martin Silberberg)
Solution manual Chemistry : The Molecular Nature of Matter and Change (5th Ed., Martin Silberberg)
Solution manual Chemistry : The Molecular Nature of Matter and Change (6th Ed., Martin Silberberg)
Solution manual General, Organic and Biochemistry (3rd ed., Katherine Denniston, Joseph Topping & Robert Caret)
Solution manual General, Organic and Biochemistry (4th ed., Katherine Denniston, Joseph Topping & Robert Caret)
Solution manual General, Organic and Biochemistry (5th ed., Katherine Denniston, Joseph Topping & Robert Caret)
Solution manual General, Organic and Biochemistry (6th ed., Katherine Denniston, Joseph Topping & Robert Caret)
Solution manual Introduction to General, Organic and Biochemistry in the Laboratory: Laboratory Manual (9th Ed., Hein, Peisen & Ritchey)
Solution manual Introduction to General, Organic and Biochemistry (9th Ed., Hein, Pattison, Arena & Best)
Solution manual Introduction to General, Organic and Biochemistry (10th Ed., Hein, Pattison, Arena)
Solution manual General, Organic and Biological Chemistry : An Integrated Approach, Laboratory Experiments (Macaulay, Bauer & Bloomfield)
Solution manual General, Organic, and Biological Chemistry : An Integrated Approach (1st Ed., Kenneth W. Raymond)
Solution manual General, Organic, and Biological Chemistry : An Integrated Approach (2nd Ed., Kenneth W. Raymond)
Solution manual General, Organic, and Biological Chemistry : An Integrated Approach (3rd Ed., Kenneth W. Raymond)
Solution manual General, Organic, and Biological Chemistry : A Guided Inquiry (Michael Garoutte)
Solution manual Biophysical Chemistry (James P. Allen)
Solution manual Fundamentals of Chemistry (3rd Ed., David Goldberg)
Solution manual Fundamentals of Chemistry (4th Ed., David Goldberg)
Solution manual Fundamentals of Chemistry (5th Ed., David Goldberg)
Solution manual Chemistry : A Guided Inquiry (4th Ed., Richard Moog & John Farrell)
Solution manual Chemistry : Matter and Its Changes (4th Ed., Brady & Senese)
Solution manual Chemistry : The Study of Matter and Its Changes (5th Ed., Brady & Senese)
Solution manual Chemistry : The Molecular Nature of Matter (6th Ed., Jespersen, Brady, Hyslop)
Solution manual Chemistry : An Everyday Approach to Chemical Investigation (Sally Solomon, Susan Rutkowsky & Charles Boritz)
Solution manual Bioinorganic Chemistry : A Survey (Ei-Ichiro Ochiai)
Solution manual Inorganic Chemistry (James House)
Solution manual Descriptive Inorganic Chemistry (2nd Ed., James House & Kathleen House)
Solution manual Organic Chemistry (8th Ed., T. W. Graham Solomons & Craig B. Fryhle)
Solution manual Organic Chemistry (9th Ed., T. W. Graham Solomons & Craig B. Fryhle)
Solution manual Organic Chemistry (10th Ed., T. W. Graham Solomons & Craig B. Fryhle)
Solution manual Advanced Organic Chemistry Part A : Structure and Mechanisms (5th

Ed., Francis Carey & Richard Sundberg)
Solution manual Advanced Organic Chemistry Part B : Reaction and Synthesis (5th Ed., Francis Carey & Richard Sundberg)
Solution manual Modern Analytical Chemistry (Harvey)
Solution manual General Chemistry Lab Manual (Petra A. M. van Koppen)
Solution manual Organic Structure Determination Using 2-D NMR Spectroscopy : A Problem-Based Approach (Jeffrey Simpson)
Solution manual Practical Interfacing in the Laboratory : Using a PC for Instrumentation, Data Analysis and Control (Stephen E. Derenzo)
Solution manual Bioprocess Engineering Principles (Pauline M. Doran)
Solution manual Bioprocess Engineering Principles (2nd Ed., Pauline M. Doran)
Solution manual Isotopes : Principles and Applications (3rd Ed., Gunter Faure & Teresa Mensing)
Solution manual Fundamentals of Forensic Science (Max Houck & Jay Siegel)
Solution manual Chemistry Case Studies for Allied Health (Colleen Kelley & Wendy Weeks)
Solution manual The Extraordinary Chemistry of Ordinary Things (4th Ed., Carl Snyder)
Solution manual The Art and Science of Chemical Analysis (Christie Enke)
Solution manual Spectrometric Identification of Organic Compounds (7th Ed., Robert Silverstein, Francis Webster, David Kiemle)
Solution manual Bioinstrumentation (John G. Webster)
Solution manual Medical Instrumentation Application and Design (4th Ed., John G. Webster)
Solution manual Microscale General Chemistry Laboratory : with Selected Macroscale Experiments (2nd Ed., Zvi Szafran, Ronald Pike, Judith Foster)
Solution manual Microscale Organic Laboratory : with Multistep and Multiscale Syntheses (4th Ed., Dana Mayo, Ronald Pike, Peter Trumper)
Solution manual Microscale Organic Laboratory : with Multistep and Multiscale Syntheses (5th Ed., Dana Mayo, Ronald Pike, David C. Forbes)
Solution manual Laboratory Manual for Principles of General Chemistry (8th Ed., Jo Allan Beran)
Solution manual Laboratory Manual for Principles of General Chemistry (9th Ed., Jo Allan Beran)

List of Solutions Manuals and Test Banks
----

contact to :   mattosbw1@gmail.com   mattosbw1(a=
t)gmail.com

=20

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR :   CHINA, INDIA, RUSSIA, PAKIST=
AN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MAL=
DIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is =
available (it is a partial list). Then if you need solutions manual only co=
ntact me by email.=20

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TE=
ST BANKS.

I do not review the forums, just send me an email. Please do not use emails=
 from servers "LIVE" , all they are take as spam emails in my inbox.

- Industrial Engineering, Business, Accounting, Economics and Finance :

Solution manual Basics of Engineering Economy (1st Ed., Leland T Blank & An=
thony Tarquin)=20
Solution manual Engineering Economy (5th Ed., Leland T Blank & Anthony Tar=
quin)=20
Solution manual Engineering Economy (6th Ed., Leland T Blank & Anthony Tar=
quin)
Solution manual Engineering Economy (7th Ed., Leland T Blank & Anthony Tar=
quin)
Solution manual Engineering Economy (9th Ed., Gerald J. Thuesen & W.J. Fabr=
ycky)
Solution manual Contemporary Engineering Economics : A Canadian Perspective=
, 3rd Canadian Edition (Chan S. Park, Ming J. Zuo, Ronald Pelot)
Solution manual Contemporary Engineering Economics (4th Ed., Chan Park)
Solution manual Contemporary Engineering Economics (5th Ed., Chan Park)
Solution manual Fundamentals of Engineering Economics (2nd Ed., Chan Park)
Solution manual Fundamentals of Engineering Economics : International Versi=
on (2nd Ed., Chan Park)
Solution manual Fundamentals of Engineering Economics (3rd Ed., Chan Park)
Solution manual Engineering Economy (13th Ed, Sullivan, Wicks & Luxhoj)
Solution manual Engineering Economy (14th Ed, Sullivan, Wicks & Koelling)
Solution manual Engineering Economics : International Version (14th Ed., Su=
llivan, Wicks & Koelling)
Solution manual Engineering Economy (15th Ed, Sullivan, Wicks & Koelling)
Solution manual Engineering Economics : International Version (15th Ed., Su=
llivan, Wicks & Koelling)
Solution manual Capital Investment Analysis for Engineering and Management =
(3rd Ed., John R. Canada, William G. Sullivan, Dennis J. Kulonda, John A. W=
hite)
Solution manual Decision Analysis for Management Judgement (4th Ed. by Paul=
 Goodwin & George Wright)
Solution manual Recursive Methods in Economic Dynamics (C. Irigoyen)=20
Solution manual Practical Business Statistics (Andrew Siegel)
Solution manual Engineering Design (Rudolph J. Eggert)
Solution Manual Creative Design of Products and Systems (Saeed Niku)
Solution Manual Fundamentals of Engineering Design (2nd Ed., Barry Hyman)
Solution Manual Engineering Design (4th Ed., George Dieter & Linda Schmidt)
Solution Manual Engineering Design (5th Ed., George Dieter & Linda Schmidt)
Solution manual Introduction to Engineering : Modeling and Problem Solving =
(Jay Brockman)
Solution manual Engineering Design : A Project-Based Introduction (2nd Ed.,=

```
 Clive L. Dym & Patrick Little)=20
Solution manual Engineering Design : A Project-Based Introduction (3rd Ed.,=
 Clive L. Dym & Patrick Little)
Solution manual Tools and Tactics of Design (Dominick, Demel, Lawbaugh, Fre=
uler, Kinzel & Fromm)
Solution manual Introduction to Statistical Quality Control (5th Ed., Dougl=
as C. Montgomery)
Solution manual Introduction to Statistical Quality Control (6th Ed., Dougl=
as C. Montgomery)
Solution manual Introduction to Statistical Quality Control (7th Ed., Dougl=
as C. Montgomery)
Solution manual Statistical Quality Control : A Modern Introduction - Inter=
national Student Version (6th Ed., Montgomery)
Solution manual Statistical Quality Control : A Modern Introduction - Inter=
national Student Version (7th Ed., Montgomery)
Solution manual Managing, Controlling, and Improving Quality (Douglas Montg=
omery, Cheryl Jennings, Michele Pfund)
Solution manual An Introduction to Investment Banks, Hedge Funds, and Priva=
te Equity : The New Paradigm (David Stowell)
Solution manual Analysis for Financial Management (8th Ed., Robert C. Higgi=
ns)
Solution manual Analysis for Financial Management (9th Ed., Robert C. Higgi=
ns)
Solution manual Core Concepts of Information Technology Auditing (James E. =
Hunton, Stephanie M. Bryant, Nancy A. Bagranoff)
Solution manual Core Concepts of Accounting Information Systems (10th Ed., =
Nancy A. Bagranoff, Mark G. Simkin, Carolyn Strand Norman)
Solution manual Core Concepts of Accounting Information Systems (11th Ed., =
Nancy A. Bagranoff, Mark G. Simkin, Carolyn Strand Norman)
Solution manual Financial Statement Analysis (10th Ed., K. R. Subramanyam &=
 John J. Wild)
Solution manual Financial and Economic Analysis for Engineering and Technol=
ogy Management (2nd Ed., Henry E. Riggs)
Solution manual Introduction to Operations Research (7th Ed., Hillier and L=
ieberman)
Solution manual Introduction to Operations Research (8th Ed., Hillier and L=
ieberman)
Solution manual Introduction to Operations Research (9th Ed., Hillier and L=
ieberman)
Solution manual Methods, Standards, and Work Design (11th Ed., Niebel & Fre=
ivalds)
Solution manual Niebel's Methods, Standards and Work Design (12th Ed., Frei=
valds & Niebel)
Solution manual Simulation Modeling and Analysis (3rd Ed., Averill Law & Da=
vid Kealton)
Solution manual Simulation Modeling and Analysis with Expertfit Software (4=
th Ed., Averill Law)
Solution manual Quality Control (8th Ed., Dale Besterfield)
Solution manual Introduction to Optimum Design (2nd Ed., Jasbir Arora)
Solution manual Introduction to Optimum Design (3rd Ed., Jasbir Arora)
Solution manual Numerical Optimization (2nd Ed., Jorge Nocedal & Stephen Wr=
ight)
Solution manual Optimization : Foundations and Applications (Ronald E. Mill=
```

er)
Solution manual Applied Optimization with MATLAB Programming (1st Ed., P. V=
enkataraman)
Solution manual Applied Optimization with MATLAB Programming (2nd Ed., P. V=
enkataraman)
Solution manual Introduction to Applied Optimization (2nd Ed., Urmila Diwek=
ar)
Solution manual Exploring Engineering : An Introduction to Engineering and =
Design (1st Ed., Philip Kosky, George Wise, Robert Balmer & William Keat)
Solution manual Exploring Engineering : An Introduction to Engineering and =
Design (2nd Ed., Philip Kosky, Robert Balmer, William Keat & George Wise)
Solution manual Quantitative Methods For Management (William E. Pinney, Don=
ald B. McWilliams, Joe Ormsby, Mark Atchison)
Solution manual Modern Methods For Quality Control and Improvement (2nd Ed.=
, Wadsworth, Stephens, Godfrey)
Solution manual Managing Engineering and Technology (4th, Morse & Babcock)
Solution manual Managing Engineering and Technology (5th, Morse & Babcock)
Solution manual Strategic Management : Formulation, Implementation and Conr=
ol (12th Ed., John Pearce & Richard Robinson)
Solution manual Quality Planning and Analysis : From Product Development th=
rough Use (4th Ed., Gryna)
Solution manual Juran's Quality Planning and Analysis for Enterprise Qualit=
y (5th Ed., Gryna, Chua & DeFeo)
Solution manual Quality (4th Ed., Summers)
Solution manual Quality (5th Ed., Summers)
Solution manual Quality Management (2nd Ed., Summers)
Solution manual Quality Management (5th Ed., Goetsch & Davis)
Solution manual Quality Management for Organizational Excellence : Introduc=
tion to Total Quality (6th Ed., David Goetsch & Stanley Davis)
Solution manual Applied Econometric Time Series (2nd Ed., Walter Enders)
Solution manual Applied Econometric Time Series (3rd Ed., Walter Enders)
Solution manual Principles of Econometrics (3rd Ed. Carter Hill, William E.=
 Griffiths, Guay C. Lim)
Solution manual Principles of Econometrics (4th Ed. Carter Hill, William E.=
 Griffiths, Guay C. Lim)
Solution manual Essentials of Econometrics (4th Ed. Damodar N. Gujarati, Da=
wn C. Porter)
Solution manual Basic Econometrics (5th Ed. Damodar N. Gujarati, Dawn C. Po=
rter)
Solution manual Statistics and Econometrics : Methods and Applications (Ash=
enfelter, Levine & Zimmerman)
Solution manual Econometric Analysis (5th Ed., William H. Greene)
Solution manual Econometric Analysis (6th Ed., William H. Greene)
Solution manual Management : A Practical Introduction (4th Ed., Angelo Kini=
cki & Brian Williams)=20
Solution manual Forest Management and Planning (Pete Bettinger, Kevin Bosto=
n, Jacek Siry & Donald Grebner)
Solution manual Foundations of Multinational Financial Management (5th Ed.,=
 Shapiro)
Solution manual Foundations of Multinational Financial Management (6th Ed.,=
 Shapiro & Sarin)
Solution manual Multinational Financial Management (8th Ed., Shapiro)
Solution manual Multinational Financial Management (9th Ed., Shapiro)

Solution manual Doing Statistics for Business with Excel : Data, Inference,=
 and Decision Making (2nd Ed. Pelosi & Sandifer)
Solution manual Data, Statistics, and Decision Models with Excel (Harnett &=
 Horrell)
Solution manual Modern Portfolio Theory and Investment Analysis (7th Ed., E=
lton, Gruber, Brown & Goetzmann)
Solution manual Modern Portfolio Theory and Investment Analysis (8th Ed., E=
lton, Gruber, Brown & Goetzmann)
Solution manual Accounting : What the Numbers Mean (6th Ed., David Marshall=
, Wayne McManus, Dan Viele)
Solution manual Accounting : What the Numbers Mean (7th Ed., David Marshall=
, Wayne McManus, Dan Viele)
Solution manual Accounting : What the Numbers Mean (8th Ed., David Marshall=
, Wayne McManus, Dan Viele)
Solution manual Accounting : What the Numbers Mean (9th Ed., David Marshall=
, Wayne McManus, Dan Viele)
Solution manual Global Accounting and Control : A Managerial Emphasis (Gray=
, Salter, Radebaugh)
Solution manual International Accounting and Multinational Enterprises (6th=
 Ed., Radebaugh, Gray, Black)
Solution manual Quality : A Corporate Force, Managing for Excellence (C. Ha=
rold Aikens)
Solution manual Quality Inspired Management : The Key to Sustainability (C.=
 Harold Aikens)
Solution manual Value Driven Product Planning and Systems Engineering (H. E=
. Cook & L. A. Wissmann)
Solution manual Work Systems : The Methods, Measurement & Management of Wor=
k (Mikell Groover)
Solution manual Design and Analysis of Lean Production Systems (Askin & Gol=
dberg)=20
Solution manual Occupational Safety and Health for Technologists, Engineers=
, and Managers (5th Ed., Goetsch)
Solution manual Occupational Safety and Health for Technologists, Engineers=
, and Managers (6th Ed., Goetsch)
Solution manual Manufacturing Facilities Design and Material Handling (3rd =
Ed., Meyers & Stephens)
Solution Manual Manufacturing Facilities Design and Material Handling (4th =
Ed., Stephens & Meyers)
Solution Manual Fundamentals of Forensic Science (Max Houck & Jay Siegel)
Solution Manual Project Management for Business and Engineering : Principle=
s and Practice (2nd Ed., John Nicholas)
Solution Manual Project Management for Business and Engineering : Principle=
s and Practice (3rd Ed., John Nicholas)
Solution Manual CIMA Official Learning System Integrated Management (4th Ed=
., Ann Norton)
Solution Manual CIMA Official Learning System Enterprise Management (6th Ed=
., Ann Norton & Jenny Hughes)
Solution Manual CIMA Official Learning System Financial Operations (6th Ed.=
, Jo Watkins)
Solution Manual CIMA Official Learning System Financial Management (6th Ed.=
, Luisa Robertson)
Solution Manual CIMA Official Learning System Enterprise Strategy (6th Ed.,=
 Neil Botten)

Solution Manual CIMA Official Learning System Fundamentals of Business Math=
s (4th Ed., Graham Eaton)
Solution Manual CIMA Official Learning System Financial Analysis (4th Ed., =
Catherine Gowthorpe)
Solution Manual CIMA Official Learning System Fundamentals of Financial Acc=
ounting (2nd Ed., Henry Lunt)
Solution Manual CIMA Official Learning System Fundamentals of Financial Acc=
ounting (6th Ed., Henry Lunt)
Solution Manual CIMA Official Learning System Performance Management (6th E=
d., Jo Avis)
Solution Manual CIMA Official Learning System Fundamentals of Management Ac=
counting (2nd Ed., Janet Walker)
Solution Manual CIMA Official Learning System Management Accounting Financi=
al Strategy (4th Ed., John Ogilvie)
Solution Manual CIMA Official Learning System Financial Strategy (6th Ed., =
John Ogilvie)
Solution Manual CIMA Official Learning System Organisational Management and=
 Information Systems (4th Ed., Bob Perry)
Solution Manual CIMA Learning System Enterprise Operations (Bob Perry)
Solution Manual CIMA Learning System Management Accounting - Performance Ev=
aluation (4th Ed., Robert Scarlett)
Solution Manual CIMA Official Learning System - Performance Operations (6th=
 Ed., Robert Scarlett)
Solution Manual CIMA Official Learning System Fundamentals of Business Econ=
omics (2nd Ed., Steve Adams & Paul Periton)
Solution Manual Operations Management in Context (2nd Ed., Rowbotham, Azhas=
hemi & Galloway)
Solution Manual Accounting for Business Studies (Aneirin Sion Owen)
Solution Manual ISO 9001 : 2000 Quality Registration Step-by-Step (3rd Ed.,=
 Fred Dobb)
Solution Manual Systems for Planning and Control in Manufacturing (D. K. Ha=
rrison & D. J. Petty)
Solution Manual Facilities Planning (3rd Ed., Tompkins, White, Bozer & Tanc=
hoco)
Solution Manual Facilities Planning (4th Ed., Tompkins, White, Bozer & Tanc=
hoco)
Solution Manual Facilities Planning and Design (Alberto Garcia-Diaz & J. Ma=
cGregor Smith)
Solution Manual Planning and Control of Manufacturing Operations (John Kenw=
orthy)
Solution Manual Professionalism: Real Skills for Workplace Success (Anderso=
n & Bolt)
Solution Manual Customer Service : Career Success Through Customer Loyalty =
(4th Ed., Timm)
Solution Manual Customer Service : A Practical Approach (3rd Ed., Harris)
Solution Manual Customer Service : A Practical Approach (4th Ed., Harris)
Solution Manual Serving Internal and External Customers (Anne Swartzlander)
Solution Manual The Theory of Interest (3rd Ed., Stephen G. Kellison)
Solution Manual Customer Relationship Management : The Bottom Line to Optim=
izing Your ROI (Anton & Petouhoff)
Solution Manual Engineering Economy and the Decision-Making Process (Joseph=
 C. Hartman)
Solution Manual Engineering Management : Challenges in the New Millennium (=

C. M. Chang)
Solution manual Construction Cost Analysis and Estimating (Phillip Ostwald)
Solution Manual Cost Analysis and Estimating for Engineering and Management=
 (Phillip F. Ostwald & Timothy S. McLaren)
Solution Manual Supply Chain Management (3rd Ed., Sunil Chopra & Peter Mein=
dl)
Solution Manual Supply Chain Management (4th Ed., Sunil Chopra & Peter Mein=
dl)
Solution Manual Designing and Managing the Supply Chain (3rd Ed., David Sim=
chi-Levi & Philip Kaminsky)
Solution Manual Supply Chain Management : From Vision to Implementation (St=
anley E. Fawcett, Lisa M. Ellram, Jeffrey A. Ogden)
Solution Manual Industrial Safety and Health Management (5th Ed., C. Ray As=
fahl)
Solution Manual Industrial Safety and Health Management (6th Ed., C. Ray As=
fahl & David W. Rieske)
Solution Manual Computer Numerical Control : Operation and Programming (3rd=
 Ed., Jon S. Stenerson & Kelly Curran)
Solution Manual Introduction to Management Science (8th Ed., Bernard W. Tay=
lor)
Solution Manual Introduction to Management Science (9th Ed., Bernard W. Tay=
lor)
Solution Manual Introduction to Management Science (10th Ed., Bernard W. Ta=
ylor)
Solution Manual Operations Research : An Introduction (8th Ed., Taha)
Solution Manual Decision Support Systems and Intelligent Systems (7th Ed., =
Turban, Aronson, Ting-Peng Liang)
Solution Manual Decision Support and Business Intelligence Systems (8th Ed.=
, Turban, Aronson, Ting-Peng Liang & Sharda)
Solution Manual Introduction to Information Systems : Canadian Edition (Rai=
ner, Turban, Splettstoesser-Hogeterp, Sanchez-Rodriguez)
Solution Manual Introduction to Information Systems : Supporting and Transf=
orming Business (1st Ed., Rainer, Turban, Potter)
Solution Manual Introduction to Information Systems : Supporting and Transf=
orming Business (2nd Ed., Rainer, Turban)
Solution Manual Information Technology for Management : Transforming Organi=
zations in the Digital Economy (5th Ed., Turban, Leidner, McLean, Wetherbe)
Solution Manual Information Technology for Management : Transforming Organi=
zations in the Digital Economy (6th Ed., Turban, Leidner, McLean, Wetherbe)
Solution Manual Information Technology for Management : Improving Performan=
ce in the Digital Economy (7th Ed., Turban & Volonino)
Solution Manual Information Technology for Management : Improving Strategic=
 and Operational Performance (8th Ed., Efraim Turban & Linda Volonino)=20
Solution Manual Operations Management (7th Ed., Krajewski, Ritzman)
Solution Manual Operations Management : Process and Value Chains (8th Ed., =
Krajewski, Ritzman & Malhotra)
Solution Manual Operations Management : Process and Supply Chains (9th Ed.,=
 Krajewski, Ritzman & Malhotra)
Solution Manual Operations Management : Process and Supply Chains - Global =
Edition (9th Ed., Krajewski, Ritzman & Malhotra)
Solution Manual Operations Management (8th Ed., Jay Heizer & Render)
Solution Manual Operations Management (9th Ed., Jay Heizer & Render)
Solution Manual Operations Management (10th Ed., Jay Heizer & Render)

Solution Manual Introduction to Operations and Supply Chain Management with=
 Advanced Decision Support Tools (1st Ed., Cecil Bozarth)
Solution Manual Introduction to Operations and Supply Chain Management (2nd=
 Ed., Cecil Bozarth, Robert B. Handfield)
Solution Manual Managing Business Process Flows : Principles of Operations =
Management (2nd Ed., Anupind, Chopra, Deshmukh, et al)
Solution Manual Principles Of Operations Management (6th Ed., Heizer & Rend=
er)
Solution Manual Principles Of Operations Management (7th Ed., Heizer & Rend=
er)
Solution Manual Principles Of Operations Management (8th Ed., Heizer & Rend=
er)
Solution Manual Foundations of Operations Management (Ritzman & Krajewski)
Solution Manual Foundations of Operations Management - Canadian Edition (2n=
d Ed., Ritzman, Krajewski, Malhotra & Klassen)
Solution Manual Basic Marketing : A Marketing Strategy Planning Approach (1=
6th Ed., Perreault, Cannon & McCarthy)
Solution Manual Basic Marketing : A Marketing Strategy Planning Approach (1=
7th Ed., Perreault, Cannon & McCarthy)
Solution Manual Foundations of Financial Management (11th Ed., Block & Hirt=
)
Solution Manual Foundations of Financial Management (12th Ed., Block & Hirt=
)
Solution Manual Foundations of Financial Management (13th Ed., Block, Hirt =
& Danielsen)
Solution Manual Decision Modeling with Microsoft=AE Excel (6th Ed., Moore &=
 Weatherford)
Solution Manual Managing Quality : Integrating The Supply Chain (3rd Ed., S=
. Thomas Foster)
Solution Manual Six Sigma : Basic Tools and Techniques (Donna C.S. Summers)
Solution Manual A First Course in Quality Engineering (KS Krishnamoorthi)
Solution Manual Statistical Quality Design and Control (2nd Ed., DeVor, Cha=
ng & Sutherland)
Solution Manual Economics : A Tool for Critically Understanding Society (7t=
h Ed., Riddell, Shackelford, Stamos & Schneider)
Solution Manual Economics : A Tool for Critically Understanding Society (8t=
h Ed., Riddell, Shackelford, Stamos & Schneider)
Solution Manual Introduction to Economic Reasoning (6th Ed., William D. Roh=
lf, Jr.)
Solution Manual Introduction to Economic Reasoning (7th Ed., William D. Roh=
lf, Jr.)
Solution Manual Economics (9th Ed., Michael Parkin)=20
Solution Manual Essential Foundations of Economics (3rd Ed., Robin Bade & M=
ichael Parkin)
Solution Manual Essential Foundations of Economics (4th Ed., Robin Bade & M=
ichael Parkin)
Solution Manual Understanding Modern Economics (Roger LeRoy Miller)
Solution Manual The Economics of Macro Issues (3rd Ed., Roger LeRoy Miller =
& Daniel K. Benjamin)
Solution Manual The Economics of Macro Issues (4th Ed., Roger LeRoy Miller =
& Daniel K. Benjamin)
Solution Manual The Economics of Macro Issues (5th Ed., Roger LeRoy Miller =
& Daniel K. Benjamin)

Solution Manual Foundations of Economics (3rd Ed., Robin Bade & Michael Par=
kin)
Solution Manual Foundations of Economics (4th Ed., Robin Bade & Michael Par=
kin)
Solution Manual International Economics (8th Ed., Dominick Salvatore)
Solution Manual International Economics (9th Ed., Dominick Salvatore)
Solution Manual International Economics (10th Ed., Dominick Salvatore)
Solution Manual International Economics (11th Ed., Dominick Salvatore)
Solution Manual Introduction to International Economics (1st Ed., Dominick =
Salvatore)
Solution Manual Introduction to International Economics (2nd Ed., Dominick =
Salvatore)
Solution Manual Introduction to International Economics (3rd Ed., Dominick =
Salvatore)
Solution Manual Principles of Macroeconomics (10th Ed. Karl E. Case, Ray C.=
 Fair, Sharon C. Oster)
Solution Manual Economics Today (13th Ed., Roger LeRoy Miller)
Solution Manual Economics Today (14th Ed., Roger LeRoy Miller)
Solution Manual Economics Today (15th Ed., Roger LeRoy Miller)
Solution Manual Economics Today (16th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Macro View - Canadian Edition (4th Ed=
., Roger LeRoy Miller)
Solution Manual Economics Today : The Macro View - Canadian Edition (5th Ed=
., Roger LeRoy Miller)
Solution Manual Economics Today : The Macro View (13th Ed., Roger LeRoy Mil=
ler)
Solution Manual Economics Today : The Macro View (14th Ed., Roger LeRoy Mil=
ler)
Solution Manual Economics Today : The Macro View (15th Ed., Roger LeRoy Mil=
ler)
Solution Manual Economics Today : The Macro View (16th Ed., Roger LeRoy Mil=
ler)
Solution Manual Economics Today : The Micro View - Canadian Edition (4th Ed=
., Roger LeRoy Miller)
Solution Manual Economics Today : The Micro View - Canadian Edition (5th Ed=
., Roger LeRoy Miller)
Solution Manual Economics Today : The Micro View (13th Ed., Roger LeRoy Mil=
ler)
Solution Manual Economics Today : The Micro View (14th Ed., Roger LeRoy Mil=
ler)
Solution Manual Economics Today : The Micro View (15th Ed., Roger LeRoy Mil=
ler)
Solution Manual Economics Today : The Micro View (16th Ed., Roger LeRoy Mil=
ler)
Solution Manual Economics (Michael A. Leeds, Peter von Allmen & Richard C. =
Schiming)
Solution Manual Economics : Private Markets and Public Choice (7th Ed., Eke=
lund, Jr., Ressler & Tollison)
Solution Manual Principles of Economics, 7th Ed. (Roy J. Ruffin & Paul R. G=
regory)
Solution Manual The Economics of Public Issues (14th Ed., Miller, Benjamin =
& North)
Solution Manual The Economics of Public Issues (15th Ed., Miller, Benjamin =

& North)
Solution Manual The Economics of Public Issues (16th Ed., Miller, Benjamin =
& North)
Solution Manual The Economics of Public Issues (17th Ed., Miller, Benjamin =
& North)
Solution Manual Macroeconomics (7th Ed., Michael Parkin)
Solution Manual Macroeconomics (8th Ed., Michael Parkin)
Solution Manual Macroeconomics (9th Ed., Michael Parkin)
Solution Manual Foundations of Microeconomics (3rd Ed., Robin Bade & Michae=
l Parkin)
Solution Manual Foundations of Microeconomics (4th Ed., Robin Bade & Michae=
l Parkin)
Solution Manual Foundations of Macroeconomics (3rd Ed., Robin Bade & Michae=
l Parkin)
Solution Manual Foundations of Macroeconomics (4th Ed., Robin Bade & Michae=
l Parkin)
Solution Manual Microeconomic Theory (Andreu Mas-Colell, Michael D. Whinsto=
n, Jerry R. Green)
Solution Manual Microeconomics MyEconLab Homework Edition (Leeds, von Allme=
n & Schiming)
Solution Manual Macroeconomics MyEconLab Homework Edition (Leeds, von Allme=
n & Schiming)
Solution Manual Microeconomics (7th Ed., Michael Parkin)
Solution Manual Microeconomics (8th Ed., Michael Parkin)
Solution Manual Microeconomics (9th Ed., Michael Parkin)
Solution Manual Microeconomics (6th Ed., Robert Pindyck & Daniel Rubinfeld)
Solution Manual Microeconomics (7th Ed., Robert Pindyck & Daniel Rubinfeld)
Solution Manual Macroeconomics (2nd Ed., Stephen D. Williamson)
Solution Manual Macroeconomics (3rd Ed., Stephen D. Williamson)
Solution Manual Macroeconomics (4th Ed., Stephen D. Williamson)
Solution Manual Macroeconomics - Canadian Edition (3rd Ed., Stephen D. Will=
iamson)
Solution Manual Macroeconomics Update Edition (5th Ed., Andrew B. Abel, Ben=
 S. Bernanke)
Solution Manual Macroeconomics (6th Ed., Andrew B. Abel, Ben S. Bernanke & =
Dean Croushore)
Solution Manual Macroeconomics (10th Ed., Robert J. Gordon)
Solution Manual Macroeconomics (11th Ed., Robert J. Gordon)
Solution Manual Macroeconomics - Canadian Edition (3rd Ed., Olivier Blancha=
rd & David R. Johnson)
Solution Manual Macroeconomics (4th Ed., Olivier Blanchard)
Solution Manual Macroeconomics - Canadian Edition (4th Ed., Olivier Blancha=
rd & David R. Johnson)
Solution Manual Macroeconomics (5th Ed., Olivier Blanchard)
Solution Manual Macroeconomics (6th Ed., Olivier Blanchard)
Solution Manual System Engineering Management (4th Ed. Benjamin Blanchard)
Solution Manual Systems Engineering and Analysis (5th Ed., Benjamin Blancha=
rd & Wolter Fabrycky)
Solution Manual Economic Growth (1st Ed., David N. Weil)
Solution Manual Economic Growth (2nd Ed., David N. Weil)
Solution Manual Money, the Financial System, and the Economy (5th Ed., R. G=
lenn Hubbard)
Solution Manual Money, the Financial System, and the Economy (6th Ed., R. G=

lenn Hubbard)
Solution Manual Money, Banking and Financial Markets (2nd Ed., Stephen G. C=
ecchetti)
Solution Manual Money, Banking and Financial Markets (3rd Ed., Stephen G. C=
ecchetti & Kermit L. Schoenholtz)
Solution Manual The Economics of Money, Banking and Financial Markets (8th =
Ed., Frederic S. Mishkin)
Solution Manual The Economics of Money, Banking and Financial Markets (9th =
Ed., Frederic S. Mishkin)
Solution Manual Principles of Money, Banking, and Financial Markets (11th E=
d., Ritter, Silber & Udell)
Solution Manual Principles of Money, Banking, and Financial Markets (12th E=
d., Ritter, Silber & Udell)
Solution Manual Fundamentals of Corporate Finance (Parrino & Kidwell)
Solution Manual Financial Institutions, Markets, and Money (9th Ed., Kidwel=
l, Blackwell, Whidbee & Peterson)
Solution Manual Financial Institutions, Markets, and Money (10th Ed., Kidwe=
ll, Blackwell, Whidbee & Peterson)
Solution Manual International Economics (3rd Ed., James Gerber)
Solution Manual International Economics (4th Ed., James Gerber)
Solution Manual International Economics (5th Ed., James Gerber)
Solution Manual International Economics (7th Ed., Steven Husted & Michael M=
elvin)
Solution Manual International Economics (8th Ed., Steven Husted & Michael M=
elvin)
Solution Manual International Economics (3rd Ed., W. Charles Sawyer & Richa=
rd L. Sprinkle)
Solution Manual World Trade and Payments : An Introduction (9th Ed., Caves,=
 Frankel & Jones)
Solution Manual World Trade and Payments : An Introduction (10th Ed., Caves=
, Frankel & Jones)
Solution Manual International Economics : Theory and Policy (7th Ed., Krugm=
an & Obstfeld)
Solution Manual International Economics : Theory and Policy (8th Ed., Krugm=
an & Obstfeld)
Solution Manual International Money and Finance (7th Ed., Michael Melvin)
Solution Manual Economic Development (9th Ed., Todaro & Smith)
Solution Manual Microeconomics (4th Ed., Jeffrey M. Perloff)
Solution Manual Microeconomics (Don E. Waldman)
Solution Manual Microeconomics : Theory and Applications with Calculus (Jef=
frey M. Perloff)
Solution Manual Microeconomics : Theory and Applications (9th Ed., Browning=
 & Zupan)
Solution Manual Microeconomics : Theory and Applications (10th Ed., Brownin=
g & Zupan)
Solution Manual Microeconomics : Theory and Applications (11th Ed., Edgar K=
. Browning, Mark A. Zupan)
Solution Manual Environmental Economics and Policy (5th Ed., Tom Tietenberg=
)
Solution Manual Environmental and Natural Resource Economics (7th Ed., Tom =
Tietenberg)
Solution Manual Health Economics (3rd Ed., Charles E. Phelps)
Solution Manual Industrial Organization : Theory and Practice (3rd Ed., Wal=

```
dman & Jensen)
Solution Manual Modern Industrial Organization (4th Ed., Carlton & Perloff)
Solution Manual Modern Labor Economics : Theory and Public Policy (9th Ed.,=
 Ehrenberg & Smith)
Solution Manual Law and Economics (4th Ed., Cooter & Ulen)
Solution Manual Law and Economics (5th Ed., Cooter & Ulen)
Solution Manual Market Regulation (Roger Sherman)
Solution Manual Public Finance and the American Economy (2nd Ed., Neil Bruc=
e)
Solution Manual The Economics of Sports (2nd Ed., Leeds & von Allmen)
Solution Manual The Economics of Sports (3rd Ed., Leeds & von Allmen)
Solution Manual Introduction to Econometrics, Brief Edition (James H. Stock=
 & Mark W. Watson)
Solution Manual Introduction to Econometrics (2nd ed., James H. Stock & Mar=
k W. Watson)
Solution Manual Econometrics : A Modern Introduction (Michael P. Murray)
Solution Manual Using Econometrics : A Practical Guide (5th Ed., A.H. Stude=
nmund)
Solution Manual Mathematical Methods for Economics (2nd Ed., Michael Klein)
Solution Manual Personal Finance with Financial Planning Software (3rd Ed.,=
 Jeff Madura)
Solution Manual Finance : Investments, Institutions, and Management - Updat=
e (2nd Ed., Stanley G. Eakins)
Solution Manual Introduction to Finance (Lawrence J. Gitman & Jeff Madura)
Solution Manual Principles of Managerial Finance Brief (4th Ed., Lawrence J=
. Gitman)
Solution Manual Principles of Managerial Finance (11th Ed., Lawrence J. Git=
man)
Solution Manual Corporate Finance (Jonathan Berk & Peter DeMarzo)
Solution Manual Corporate Finance (7th Ed., Stephen A. Ross, Randolph W. We=
sterfield, Jeffrey Jaffe)
Solution Manual Principles of Corporate Finance (7th Ed., Richard A. Breale=
y, Stewart C. Myers)=20
Solution Manual Risk Takers : Uses and Abuses of Financial Derivatives (Joh=
n Marthinsen)
Solution Manual Theory of Asset Pricing (George Pennacchi)
Solution Manual Multinational Business Finance (10th Ed., Eiteman, Stonehil=
l & Moffett)
Solution Manual Multinational Business Finance (11th Ed., Eiteman, Stonehil=
l & Moffett)
Solution Manual Fundamentals of Multinational Finance (1st Ed., Moffett, St=
onehill & Eiteman)
Solution Manual Fundamentals of Multinational Finance (2nd Ed., Moffett, St=
onehill & Eiteman)
Solution Manual Fundamentals of Multinational Finance (3rd Ed., Moffett, St=
onehill & Eiteman)
Solution Manual Cases in International Finance (2nd Ed., Dufey & Giddy)
Solution Manual Fundamentals of Investing (9th Ed., Gitman & Joehnk)
Solution Manual Fundamentals of Investing (10th Ed., Gitman & Joehnk)

List of Solutions Manuals and Test Banks
----

contact to :   mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR :   CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

I do not review the forums, just send me an email. Please do not use emails from servers "LIVE" , all they are take as spam emails in my inbox.

- Materials Engineering :

Solution Manual Introduction to Manufacturing Processes (Mikell Groover)
Solution manual Fundamentals of Modern Manufacturing : Materials, Processes, and Systems (3rd Ed., Mikell Groover)
Solution manual Fundamentals of Modern Manufacturing : Materials, Processes, and Systems (4th Ed., Mikell Groover)
Solution manual Fundamentals of Modern Manufacturing : Materials, Processes, and Systems (5th Ed., Mikell Groover)
Solution manual Fundamentals of Manufacturing (2nd Ed., Philip D. Rufe)
Solution manual Principles of Metal Manufacturing Processes (Beddoes & Bibby)
Solution manual Materials Science for Engineering Students (Traugott Fischer)
Solution manual Essentials of Modern Materials Science and Engineering (James Newell)
Solution manual Materials Science and Engineering : An Introduction (6th Ed., William Callister)
Solution manual Materials Science and Engineering : An Introduction (7th Ed., William Callister)
Solution manual Materials Science and Engineering : An Introduction (8th Ed., William Callister)
Solution manual Fundamentals of Materials Science and Engineering : Integrated Approach (2nd Ed., William Callister)
Solution manual Fundamentals of Materials Science and Engineering : Integrated Approach (3rd Ed., William Callister)
Solution manual Fundamentals of Materials Science and Engineering : Integrated Approach (4th Ed., William Callister & David G. Rethwisch)
Solution manual Fundamentals of Materials Science and Engineering - SI Version (4th Ed., William Callister & David G. Rethwisch)
Solution manual Science and Design of Engineering Materials (2nd Ed., Schaffer, Saxena, et al)
Solution manual Manual of Mineral Science (23rd Ed., Cornelis Klein & Barbara Dutrow)
Solution manual Materials and Processes in Manufacturing (9th Ed., E. Paul DeGarmo, J. T. Black, Ronald A. Kohser)
Solution manual DeGarmo's Materials and Processes in Manufacturing (10th Ed., E.

Paul DeGarmo, J. T. Black, Ronald A. Kohser)
Solution Manual DeGarmo's Materials and Processes in Manufacturing (11th Ed., J. T. Black, Ronald A. Kohser)
Solution manual Foundations of Materials Science and Engineering (3rd Ed, Smith)
Solution manual Foundations of Materials Science and Engineering (4th Ed, Smith & Hashemi)
Solution manual Foundations of Materials Science and Engineering (5th Ed, Smith & Hashemi)
Solution manual Engineering Materials Science (Milton Ohring)
Solution manual Metal Fatigue in Engineering (2nd Ed., Stephens, Fatemi & Fuchs)
Solution manual Mechanical Behavior of Materials (3rd Ed., Dowling)
Solution Manual Mechanical Behavior of Materials (4th Ed., Dowling)
Solution manual Mechanical Behavior of Materials (W.F. Hosford)
Solution manual Mechanical Behavior of Materials (Keith Bowman)
Solution manual Deformation and Fracture Mechanics of Engineering Materials (4th Ed., Richard Hertzberg)
Solution Manual Deformation and Fracture Mechanics of Engineering Materials (5th Ed., Richard Hertzberg, Richard Vinci, Jason Hertzberg)
Solution manual From Polymers to Plastics (A.K. van der Vegt)
Solution manual Nanoengineering of Structural, Functional and Smart Materials (Mark Schulz, Ajit Kelkar, Mannur Sundaresan)
Solution manual Principles Of Polymer Systems (5th Ed., by Ferdinand Rodriguez, Claude Cohen, Christopher Ober, Lynden Archer)
Solution manual Introduction to the Thermodynamics of Materials (4th Ed. David Gaskell)
Solution manual Structure and Properties of Engineering Materiales (5th Ed., Daniel Henkel & Alan Pense)
Solution manual Plastics : Materials and Processing (3rd Ed., Strong)
Solution manual Engineering Materials : Properties and Selection (8th Ed., Budinski)
Solution manual Engineering Materials : Properties and Selection (9th Ed., Budinski)
Solution manual Introduction to Materials Science for Engineers (6th Ed., Shackelford)
Solution manual Introduction to Materials Science for Engineers (7th Ed., Shackelford)
Solution manual Introduction to Materials Science for Engineers - International Edition (7th Ed., Shackelford)
Solution manual Creative Design of Products and Systems (Saeed Niku)
Solution manual Materials : Engineering, Science, Processing and Design (1st Ed., Michael Ashby, Hugh Shercliff & David Cebon)
Solution manual Materials : Engineering, Science, Processing and Design (2nd Ed., Michael Ashby, Hugh Shercliff & David Cebon)
Solution manual Engineering Materials Vol. 1 : An Introduction to Properties, Applications and Design (3rd Ed., Michael Ashby & David Jones)
Solution manual Engineering Materials Vol. 1 : An Introduction to Properties, Applications and Design (4th Ed., Michael Ashby & David Jones)
Solution manual Engineering Materials Vol. 2 : An Introduction to Microstructures, Processing and Design (3rd Ed., Michael Ashby & David Jones)
Solution manual Materials and the Environment : Eco-informed Material Choice (Michael Ashby)
Solution manual Materials and the Environment : Eco-informed Material Choice (2nd Ed., Michael Ashby)

Solution manual Principles of Corrosion Engineering and Corrosion Control (Zaki Ahmad)
Solution manual Corrosion and Corrosion Control : An Introduction to Corrosion Science and Engineering (4th Ed., R. Winston Revie & Herbert H. Uhlig)
Solution manual Analysis and Performance of Fiber Composites (3rd Ed., Bhagwan Agarwal, Lawrence Broutman & K. Chandrashekhara)
Solution manual Basic Engineering Plasticity : An Introduction with Engineering and Manufacturing Applications (David Rees)
Solution manual Steels : Microstructure and Properties (3rd Ed. Bhadeshia & Honeycombe)
Solution manual Theory of Plasticity (3rd Ed. Jagabanduhu Chakrabarty)
Solution manual Plastics : Microstructure and Engineering Applications (3rd Ed., Nigel Mills)
Solution manual Laser Processing of Engineering Materials : Principles, Procedure and Industrial Application (John Ion)
Solution manual Sintering : Densification, Grain Growth and Microstructure (Suk-Joong Kang)
Solution manual Biomaterials : An Introduction (3rd Ed., Joon Park & R.S. Lakes)
Solution manual Biomaterials : The Intersection of Biology and Materials Science (Temenoff & Mikos)
Solution manual Biomaterials Science : An Introduction to Materials in Medicine (2nd Ed., Ratner, Hoffman, Schoen & Lemons)
Solution manual Tissue Engineering (Bernhard O. Palsson & Sangeeta N. Bhatia)
Solution manual Tissue Engineering (Clemens van Blitterswijk, et al.)
Solution manual Introduction to Materials Management (6th Ed., Arnold, Chapman & Clive)
Solution manual Fundamentals of Solid State Engineering (2nd Ed., Manijeh Razeghi)
Solution manual Smart Electronic Materials : Fundamentals and Applications (Jasprit Singh)
Solution manual Composite Materials : Science and Engineering (2nd Ed., Krishan K. Chawla)
Solution manual Composite Materials : Science and Engineering (3rd Ed., Krishan K. Chawla)
Solution manual Laminar Composites (George Staab)
Solution manual Physical Metallurgy and Advanced Materials (7th Ed., R.E. Smallman & A.H.W. Ngan)

===========================
A metal enclosure (apart for mechanical protection)  can be avoided by
using toroid transformers ,similar to RF toroids ,not requiring a
shielding can like cylinder shape inductors with or without a ferrous
core ,which need a screening can.

I just got a Quad Sideband signal yesterday.

Here's how it works for AM.

When you modulate 100%, you get one on each side, 200% two on each side.

They act like additional amplitude, like an amplifier.

The more sidebands there are, the louder it will be x1,x2,x3,x4 louder.

You should see the original 1994 thread, whre someone speculates
about something but is making some sort of sense, if ill informed, and the
eight replies that the message got back then.

Yes indeed, this is yet another case of someone replying to an old message
via google, and as is the case virtually every time, the first person
replying has really nothing to add.

Too bad he didn't wait until Monday; it would be appropriate then!

I have electronic and radio books that are 70 years old and nothing inside of any of them ever came close to the confabulations this person proposes.

You have a carrier - which does nothing except carry the intelligence and you have a upper and a lower side band - which is the intelligence that rides upon the carrier. And that is it for AM!

In single side band you suppress one side band which forces the energy up into the other side band.

When Regency came out with Double Suppressed Side Band, they suppressed both the carrier and one side band.. The model I had was the Range Gain II or the Imperial. Either model required another radio that could do the same thing in order for it to work - else you ended up talking to yourself.

When the Japanese came into the market with the cheap CB radios, all that technology was forgotten and the companies that made it were soon forced to do other things or get out of the business because the days of quality American Made CB radios came to an end when Cobra came out with a $39.00 AM CB that did the same thing as the more expensive units - just didn't have SSB or DSSB...

Television used a mode called Vestigial side band where part of the one side band was suppressed and the remaining energy was diverted up into the remaining side band.

If there was a way to double the power, don't you think that someone would have came up with it long before now?
AM for the most part is dead as far as commercial broadcast goes and the only people who participates in it on Amateur Radio are the ones with the old boat anchors who wants to keep their tubes warm, who thinks that they are doing something when they broadcast with their old equipment.

It usually ends up being a bunch of old lids who talks just to hear themselves talk, with nothing of no importance to say and just looking for an audience...

AmateurLogic.TV Episode 52

Posted: 27 Mar 2013 03:00 AM PDT

http://www.podtrac.com/pts/redirect.wmv/www.amateurlogic.tv/transmitter/video/amlogic52_hi.wmv

George visited GigaParts in Huntsville Alabama for Ham Radio Day on March 16th. We take a look at the store and visit with

some of the manufacturers reps to find out what’s new. It was a great event at a great ‘Candy Store’.

38:45 of extra ALTV fun!
This posting includes a media file:

Do digital receivers get discussed here much? I am working on a receiver for the WWVB signal at 60 kHz and am looking at a very low power all digital design in an FPGA. Of course some aspects are still analog such as the antenna. I have been reading about loop antennas for low frequency work. I don't plan on having an analog amplifier unless it is needed. I may be able to sample the RF signal directly and use processing to boost the signal out of the noise.

Has anyone done anything like this? Right now I am looking at how to
synchronize the sample rate with the carrier so that I can accumulate
the signal in a coherent manner.

Any pointers on where I could find more info?

Rick

PS I posted this to rec.radio.amateur.equipment by mistake. I don't
that is the right group for home made equipment.

Summary: Recruitment announcement for ham-radio-related FAQ articles
Keywords: FAQ, Intro, amateur, ham, radio, recruit, recruitment

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted twice monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/
```

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

We are seeking a replacement maintainer for the following information bulletin formerly posted to rec.radio.amateur.* (and currently archived at http://www.faqs.org/faqs/radio/personal-intro/):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

```
One significant omission, requiring immediate updates, for this article      |
is that it does not mention newer amateur radio newsgroups created since      |
it was written, including:                                                    |

 rec.radio.amateur.antenna                                                    |
 rec.radio.amateur.boatanchors                                                |
 rec.radio.amateur.dx                                                         |
 rec.radio.amateur.equipment                                                  |
 rec.radio.amateur.homebrew                                                   |
 rec.radio.amateur.moderated                                                  |

Search for "SDR". Software defined radio. It is hot these days.

You will need the mathematical background to understand and create
designs like this. Of course there are many articles explaining
the digital signal processing, and how to build a program that does
what you want.

At 60 kHz it should be easy. People do this at 30 MHz.

Is the SL312 still available? Texas Instruments' TL026 is still new from
DigiKey and Mouser, even through-hole parts. Av of > 55 and 50dB of AGC
range.

Cheers,
Dana K6JQ

It looks like I got a reply to this post, but something goofed up in my
reader or the server and instead of Rob's message I see the twice
monthly announcement.

Rick

There it is! I had to restart my newsreader to see this message.

Yes, the term SDR is very broad. I was thinking there might be some
folks here doing work in this area.

Yes, the math is rather intense. While the math is always essential,
there are often times when a good seat of the pants feel for the job is
important too. DSP is just the digital version of analog signal
processing. It is the "signal processing" part that is important.

True. I thought I should just mention that because many people are able to construct such a receiver using analog techniques and discrete parts, using standard "building blocks" they are familiar with like an LC bandfilter, an amplifier, an AM detector etc, but would find themselves in unknown charters when they would have to write down the mathematical equivalent of what they constructed in hardware.
When you can do that, and are familiar with the usual conversions between time domain and frequency domain, it should be possible to write the code (and/or construct it from existing modules).

I have been able to write some DSP code that way, even on a dedicated DSP in asm (which has the extra complication that you need to learn the instruction set, that looks quite different from a normal CPU), and it was fun.

However, before that DSP experiment I sometimes wrote code that looked for zerocrossings and timed the duration between them, and tries to decode data from that, and that is the wrong approach when you want good performance.

DSP doesn't have to be code. In this case it will be hardware in an FPGA. So the calculations will all be done in dedicated hardware. I don't plan on doing multiplies, but that might happen. These chips don't have dedicated multiplier. I've done multiplier designs with the shift and add algorithm, not so hard.

Actually I did a commercial design that way for demodulating a time code signal. It only needed to measure amplitude to get the data, but had to sync to the carrier for "precise" timing. Looking for the zero crossings was a very effective method with an 8 kHz sample rate on a 1 kHz carrier that had a very high SNR.

Yikes! Here you over here too!
     Loop antennas sure have more "capture area" than ferrite loopsticks,
using "seat of the pants" engineering, I always wondered just how the
marked directivity of the loop antenna could be put to use in a "dual
Diversity"
scheme for noise cancelling. It was used (and perhaps still is) for
"selective
fading" and interference rejection on large, HF antenna farms.
     Marine and aircraft beacon band receivers used both rotatable loops
and loopsticks in conjunction with a "sense" antenna for enhanced
directional reception.
     I'm over my head, so I'm bailing. Please keep us informed of progress!

Yeah, I think this is where I should be. The other group sounds like it
is more about bought equipment than homemade.

It seems to be the null that is highly directional. I expect when they
used loops for DF they turned the antenna until the signal faded and
used the null as the directional part.

I ordered some RG-6 with a solid copper center conductor. The shield is
aluminum so I'm hoping that doesn't hurt. A number of sources talk
about the importance of keeping the conductor resistance low to maximize
the Q of the tuning. I need to do my calculations and select the loop
size and number of turns. I don't think I want to make it very large,
so I'm hoping more turns will compensate for a modest size.

I'll let you know. This group is a little quiet, but that's better than
all the noise in some other groups. As I'm sure you know, what is
important is not the signal level, but the SNR!

Look up Refrigeration oils viscosity varies largely 100 to 700
and if you really want good oil lookup Diffusion pump oils
diffusion oil is high temp. and high vacuum oil.

I've been doing more work on the low frequency tuned loop antenna and have two problems. One is that I can't find any info on how effective the antenna will be in relation to the design parameters. That would be the diameter of the loop, the number of turns and the spacing of the turns. From the formulas I find for inductance, I would guess that the spacing of the turns will want to be as small as possible, but I'm not sure the factors that optimize self inductance are the same as what will optimize antenna effectiveness.

What equations determine the signal strength from a low frequency tuned loop antenna?

The other problem is finding an accurate formula for the inductance of this design. I've found a number of equations for coil inductance, but most are for coils with length longer than diameter. One I found doesn't say what it's limitations are and doesn't agree with the others. In fact, I can't find two formulas that approximate each other over the range of interest which is 1 to 20 turns or d/l from 4 on up.

I've consulted the Radiotron Designer's Guide, Nagaoka's and Lundin's papers on inductance of coils as well as a number of web pages. I'm getting tired of looking... Is there a reasonable formula for calculating the inductance of a short coil that works for a number of turns from 1 to 20?

Rick

 The National Radio Club has many publications on loop antennas, and those can
answer your questions and more.

Just to give an update...

I got a response from Randy Yates in the comp.dsp group who gave me a formula for the loop antenna signal strength which I'm including below for reference. He said it came from the ARRL Handbook.

```
 > They dedicate an entire chapter (5) to loop antennas. Equation one
 > is the voltage at the loop terminals:
 >
 >   V = (2 * pi * A * N * E * cos(theta)) / lambda,
 >
 > where
 >
 >   A = area of loop, in m^2
 >   N = number of turns in loop
 >   E = RF field strength in V/m
 >   theta = angle between plane of the loop and the signal source
 >   lambda = wavelength in meters.
 >
 > Note that I know nothing about antennas - just acting as a scribe...
```

This is the expression for an untuned antenna. Shortly after this, they provide the equation for a tuned antenna, which is identical except for the addition of a Q in the numerator.
-- Randy Yates Digital Signal Labs http://www.digitalsignallabs.com

I did the calculations and at 100 uV/m with 50 foot of coax in a two turn loop I get a bit over 1 uV, not so good. I'm going to see what I can find about the signal level from ferrite cores. I had the impression they would be lower, but I seem to recall better numbers than this in the ones I've seen before.

When I was working with loop antennas, it became rather obvious that
optimal receiving loops too are 1 turn, with material of the largest practical
circumference. That one turn loop was coupled to one turn as the primary of a
coil / tuned transformer and on VLF / LF that concerned a potcore of the proper
material. The amount of turns for the secondary could be as much as 100  and
with a Q factor of 100 or more that meant at least 10,000 times the voltage of
the one turn loop - more than enough.

I have come to a similar conclusion, but not about using a single loop. The single loop is the best antenna if your constraint is the total length of cable. But if your limitation is the size of the loop, it will be improved by more turns at the same diameter.

When I wrote the message you replied to I had left the Q factor out of the equation. I calculated the Q factor at slightly over 100 considering just the resistance of the center conductor. I am also aware of the idea of coupling using a ferrite core. I don't know anything about ferrite cores (I suppose I'll need to learn that soon) and I don't know what the optimal turns ratio would be. I assume that the resistance of the load reflects back into the antenna as a parallel resistance? Using your numbers that would mean a 1 Mohm input impedance would result in a 10 kohm load. At the frequency of 60 kHz and with an antenna inductance of about 90 uH that gives a reactance of 34 ohms. So 10 kohms shouldn't be a problem. But I read one reference that indicated the Q needs to be factored in as well which means it would be 100 ohms vs. 33 ohms, and so 1 Mohm might not be high enough.

The input impedance of the device I am using is not characterized. I'll have to measure it, but I expect it will be rather high, easily 10 Mohm which should be good enough (30x).

I'm also not sure if there will be a loss of Q due to capacitance of the cable. I haven't found a clear reference on this. Some say inter-winding capacitance will reduce the Q, but I don't think this will be subject to inter-winding capacitance because of the shield. So the question is will the distributed capacitance to ground create any sort of problem? This cable has 16.2 pF per foot and I plan to use 50 feet. I expect this will simply appear as part of the resonating capacitance.

Rick

The antique booklet I have on potcores (Soft Ferrites, October 1973) lists the Q realized with a core of certain dimensions as a function of ue of the material. At 60 KHz, a P 11/7 core with material FXC 3B7/3H1 and ue=68 has the lowest Q, 220. The use of material with ue=220 delivers a Q of 420. This might serve as an estimate of what could be expected: the 11/7 is the smallest potcore and the bigger ones result in higher maximum Q, to well over 1,000.

When using a FET device as input, at 60 KHz the input impedance can be neglected.

The impedance of a source-follower will be much higher than 10 M - at 60 KHz.

With a one turn loop coupled to the one turn primary of an RF transformer, there's no need for a shield. It's fairly easy to provide the piece of wire used for the primary with a center tap that will be grounded so the loop is symmetrical. That also obviates the need for a differential amplifier. A 50 feet loop is huge. I once (in Europe) designed a frequency standard synchronized to DCF77 and reception was OK at distances over 2,000 Km with just a ferrite rod of 12 cm length and 1 cm diameter. In order to keep it easy for constructors, the coil had just 140 turns with 2n2 to resonate the LC. I don't think the approach for WWVB at 60 KHz could be much different (apart from the modulation format). I had designed the ferrite antenna amp as a small device that could be fed via coax, so one could install it in a place with the lowest noise.

>

Some of the issue may be habit. Over the decades, various WWVB receivers were described, and I remember them all as using some sort of larger loop. It may have nothing to do with design so much as habit, once an idea is planted, others continue it.

In the early days of "amateur radio", everything was so low in frequency, big loops and 60KHz probably weren't that foreign. So the collective memory may retain that, a long time after hams were relegated to those "uselss" shortwave frequencies.

The fact that all those WWVB clocks have relatively small loops is an indicator that not much is needed. I don't know how complicated the receivers have become, if at all. I can get WWVB here in Montreal on my Casio Waveceptor watch, and whatever that uses has to be way smaller than the loops in the small WWVB clocks.

The better the loop, of course, the more selectivity it provides. I don't have any of those WWVB receiver articles handy, but again I remember them as being relatively simple amplifiers, fairly depending on the loop for selectivity. The larger the loop, the more directional it can be, which presumably helps with all the local junk generated that can cause issues.

The analog part (or what most people were interested in until recent times), wsa the antenna and selectivity and a good amplifier. Simple and complicated at the same time. And it's a spectrum area often "unkonwn", not many receivers to tune down there, so one wonders if the signal is there, or it's the equipment, until the equipment becomes right enough for the signal to appear. if I'm building a WWV receiver, it's easy to check for the signal since I have a few receivers that cover the frequency range.

It's not a new field. There was one guy, I can't remember his name, who wrote a number of articles in QST about WWVB and WWVL reception, and high stability frequency standards, I can picture on in the summer of 1971.

Don Lancaster did an article about WWVB, more an introduction, and he has it on his webpage at www.tinaja.com, titled something like "Experiments in WWVB Reception".

Ken Cornell spent a lot of time writing about low frequency work, he had a "cookbook" out at one point, initially self-published but a later edition published by Ham Radio Magazine. But he died, and access to the book other than used died with him.

Ralph Burhan, who was a ham, wrote a lot about low frequencies. Using Loran as a frequency standard (or was it time?), all kinds of articles in various hobby magazines about low frequency antennas (sometimes loops, but often short whips, directly coupled to a very high impedance buffer). I'm not sure any of that is online, but it might be worth a search.

There have been quite a few WWVB receiver articles in the ham magazines, though I have no dates. I think one wsa in September 1971 "73". The ones I saw all predate WWVB's more recent visibility as a feed to all those "atomic clocks". Most were interested in the station as a frequency standard, though as early as that seventies Don Lancaster article, people were thinking about decoders to get the time.

I think there are groups and pages devoted to this sort of thing, but I don't follow it so anyone's search is as good as mine would be.

The interest may be picking up, talk of a low frequency ham band (or is it already in place? I forget). And of coruse, there is the 160-190KHz "license free band" that some have put a lot of effort into, "lowfers", searching for that sort of thing might turn up useful information, albeit needind scaling down to 60KHz.

I remember years ago someone suggested the following to make a 'simple' multi-turn loop:

Get a length of 'flat computer cable' -- e.g., like the IDE cables for

PC HD's. Such cable can be found in 'surplus' outlets -- sometimes as an 'end piece' on a cable reel.

Form your loop -- cutting the flat cable to the length you desire. Connect every-other cable wire to every-other-other (HI!HI!) cable wire. Your ends, then, are the two outside wires on either side of the cross-over connection zone.

Such cable can be re-'sized' to just the loop count you want by un-zipping unwanted runs of the cable.

Depending on how neatly you mount your loop, you should have no problems with wires shifting position with relation to one another and de-tuning the resultant lash-up.

I am making a shielded loop so I'm using coax to make the construction
simple. Multiturn won't be a problem.

I'm not sure I understand. This sounds more like a ferrite core antenna
where the ferrite is an integral part of the antenna itself. I was
asking about the type of ferrite for a ferrite loop to use as the core
of a transformer to couple the output using multiple turns to boost the
voltage.

> When using a FET device as input, at 60 KHz the input impedance can be

This will be driving an input on an IC so I don't have much info on it.
  I expect it is very high impedance just like the FET.

The loop won't be 50 foot in diameter, it is 50 feet of coax wound in
some 8 turns give or take. At 8 turns that is 2 foot diameter or 300 mm
radius.

As to the shield, I'm told the shield will be a big help in eliminating
local interference from E-field sources. I read that household
appliances are a major source of electrical noise and I know from
experience that my radio controlled clocks seem to have trouble working
near my computers.

Yes, if I can get away with it, I'll use a ferrite rod. But I want to
eliminate the front end amp and will be driving the input directly from
the antenna. The inductance of this coil will be much lower than a
ferrite core and will need a lot more capacitance to resonate. The coax
coil is what I'm starting with and can always back off to a ferrite
antenna if needed.

Thanks for the input.

Rick

Thanks for that, Michael! For several months I had been trying to pump my feeble brain to recall
that brilliant author/engineer, Don Lancaster. I was so bummed out when they booted him off
the last of the great magazines published by the ??????? group. Now, darn it, even forgot the
name of the old time publishing outfit that had the good stuff.
Thanks again, Michael!

Old Chief Lynn, W7LTQ since 1948

It could be a habit indeed because calculation would show that unless outside the intended range, a fairly small loop is required. Another topic where habit shows well regards PLL: even for AM reception, design resembles that for FM reception (limiter).

Low in frequency and power, big loops might be useful. Here in Panama with many months of thunderstorm activity, a broadband loop with S/N comparable to a long wire but without the QRN would be rather useful. It's a work in progress but if it would be easy, it would already exist.

>

With DCF77 it's the same. Good enough reception with a ferrite antenna as used in small MW portables. After a source-follower eventually an amp with more selectivity, when (back then) interference from TV sets would be a problem (harmonics of line output transformer).

When the major issue was a reference frequency, I used a 10 MHz VCXO,
and with the proper dividers that resulted in a mixer as the first or second stage, with an IF so low that simple RC audio filters could be used. The selectivity was phenomenal.
>

Several of my receivers can be tuned down to a few KHz as well, and on the 85

meter long wire, despite complete mismatch to 50 ohm, WWVB can be received
though not more than ~10 dB above noise - on a rare day without thunderstorm.
Panama is clearly outside the intended service area.

Nice site, the article including a WWVB receiver leaves no questions.
The web has quite a few photos of WWVB receivers, also indicating how simple the
loop can be. One: http://www.nixiemagic.com/
>

I started reading Ham Radio in 1975 so probably missed that. The importance of
LF is without doubt, just count the number of (military) FSK transmitters below
~400 KHz. With an online SDR in the Netherlands they can even be heard below 10
KHz.
>

>were thinking about decoders to get the time.

The use as frequency standard was very popular in Europe too, hence I had to
design one for DCF77 (77.5 KHz) and later for DLF, a LW transmitter at 153 KHz.
The output had to be a synchronized 10 MHz clock and an error indicator, when
the signal was temporarily interrupted.

>
>I think there are groups and pages devoted to this sort of thing, but I
>don't follow it so anyone's search is as good as mine would be.

Since the timing info also was sent as phase modulation, I lost interest.
Although the average frequency remains the same, the modulation is transferred

```
to the VCXO which makes short time measurements inaccurate. In Europe, LW
transmitters were phase modulated with program info to facilitate automatic
receiver tuning so DLF no longer was useful either.

In Panama, ham radio regulation follows that of the US, with exception of CB
which is prohibited. The new ham band (136 KHz) might be a good idea here too,
plenty of room for a balloon antenna like the one described here:
http://www.alg.myzen.co.uk/radio/136/experi_vert.htm

> It may have nothing to do with design so much as habit, once an idea is planted, others continue it.

Hi Michael,

I certainly don't have a habit in this area. I am a total newbie in antenna and even radio design. What I know somewhat is DSP and my goal is to design a 100% digital RCC (Radio Controlled Clock). I am also trying to make it as low power as possible so that it can be powered from scavenged energy sources... no batteries, no wall plug. Just set it on the wall and it runs.

> In the early days of "amateur radio", everything was so low in frequency, big loops and 60KHz probably weren't that foreign. So the collective memory may retain that, a long time after hams were relegated to those "uselss" shortwave frequencies.
>

I can get WWVB here in Montreal on my Casio Waveceptor watch, and whatever that uses has to be way smaller than the loops in the small WWVB clocks.

Yes, they aren't terribly high power either. As I've said elsewhere, I am starting with a loop antenna because it can give me the largest output voltage without an amp and I can save that amount of power. If it turns out that I can find an amp that will provide adequate gain and not use much power I can go that route. For now I want to try the large loop antenna.

> The better the loop, of course, the more selectivity it provides. I don't have any of those WWVB receiver articles handy, but again I remember them as being relatively simple amplifiers, fairly depending on the loop for selectivity. The larger the loop, the more directional it can be, which presumably helps with all the local junk generated that can cause issues.

I've seen a number of these designs, none are optimized for low power using load resistance in the 10 kohm or lower range.

> Don Lancaster did an article about WWVB, more an introduction, and he has it on his webpage at www.tinaja.com, titled something like "Experiments in WWVB Reception".

Yes, I have this article.

> Ralph Burhan, who was a ham, wrote a lot about low frequencies. Using Loran as a frequency standard (or was it time?), all kinds of articles in various hobby magazines about low frequency antennas (sometimes loops, but often short whips, directly coupled to a very high impedance buffer). I'm not sure any of that is online, but it might be worth a search.

I've found tons of self-construction web pages on loop antennas, but no so many cover the theory a lot. I've found a small number that are better than most and have useful info. It was Randy Yates in the comp.dsp forum who gave me the formula for received signal strength from a loop antenna from the ARRL handbook. That helped tremendously and allowed me to understand a similar formula I had found for antenna equivalent height.

> The interest may be picking up, talk of a low frequency ham band (or is it already in place? I forget). And of coruse, there is the 160-190KHz "license free band" that some have put a lot of effort into, "lowfers", searching for that sort of thing might turn up useful information, albeit needind scaling down to 60KHz.

One of the antenna pages I read was about using a low frequency band with "special" permission. He wanted a loop receiving antenna so he could steer the null to his transmitting antenna. This was 2 turns, 10 foot in diameter, a big one! He is the one that used a ferrite doughnut to transformer couple the output with 10 turns IIRC.

Rick

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35f23326

```
the rec.radio.amateur.moderated Moderation Team had decided to consider       |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup.  After a successful trial         |
period (90 days, through early July 2009), we decided to adopt this           |
change permanently.                                                           |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

  http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date.  In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved.  We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

Kosmas-

I found that same schematic on the web. I did not take my microphone apart to verify, but assume the resistor is 1800 Ohms (1.8 KOhm). If you look closely, you can see a speck where the dot should be.

That resistor, along with the 10K Ohm resistor, determines Voltage at the transistor base, which is about 0.65 Volts higher than at the emitter, which sets the transistor current.

Suppose the collector Voltage is about 5 Volts. Base voltage would be 5 times 1.8/(1.8+10), or 0.76 Volts. Emitter voltage would be about 0.1 Volts, so current would be about 0.1/22 or 4.5 ma if I did the math correctly. If the resistor were 18 KOhms instead, current would be unreasonably high.

You can get a better idea if you look at the circuit of the rig the microphone goes to. I'm fairly sure the HM-7 was used with an IC-22U, which is where my microphone came from. (Mine is not marked as HM-7.)

My error - the IC mentioned should be SL612C and nowadays it's available from
China via eBay:
http://www.ebay.com/itm/120922014405?
ssPageName=STRK:MEWNX:IT&_trksid=p3984.m1497.l2649
It has a much wider AGC range than the TL026, up to 70 dB IOW higher than the
stage gain.

If it's an electret microphone element, you could check out the datasheet
and see what it recommended. (The kind with the built in FET, and about
the only kind that Japanese have seemed to have used for decades).
I have a vague memory of the Panasonic listing in the Digikey catalog with
recommended resistors in the 2k to 5k range.

Kosmas-

I dug out my old Icom microphone and found it was the one for an IC-22S, which does not have an amplifier. So far, I have not found a copy of the IC-22U diagram, so do not know what the amplifier load resistor is. It appears the HM-7 would work with newer radios such as the IC-718, which has a DC load resistance of about 1200 Ohms (1K AC + 220 DC).

I assumed that the radio has a regulated voltage to feed the microphone amplifier, probably 8 Volts like the IC-718. The Base-Emitter junction of the transistor might be around 0.6 volts for silicon.

If the unknown resistor is 1800 Ohms, current in the transistor would be relatively low, and collector voltage would probably be a little higher than 4 Volts depending on the load resistor.

If the unknown resistor is 18,000 Ohms, current in the transistor would be higher, and collector voltage would probably be lower than 4 Volts. For this value, the circuit might work as well without it!

Perhaps it would work with either value resistor, but I prefer the 1800 Ohm choice. I wish someone would come along with an HM-7 who can open it up and check resistors.

Mark-

The Icom HM-7 is at least 30 years old. It has a 600 Ohm dynamic element with a 2SD661 silicon transistor amplifier. The HM-7 design is similar to a transistorized carbon microphone replacement. The resistor equivalent to the one you refer to, is inside the radio.

This discussion is about a bias resistor. Picture a 10K Ohm resistor connected between the transistor collector and base, with another resistor connected from base to ground. This second resistor is either 1800 Ohms or 18,000 Ohms. (Actually the microphone element is connected between the resistor junction and transistor base.)

I found the diagram in an Icom IC-22U owners manual, but it is hard to see if the value is 1.8K or 18K. There is a tiny fly-speck where a decimal point could be.

I think the only way we will know for sure, is if someone has an HM-7 and will open it up to see.

Hello Kosmas, I looked inside my HM7 mic. which
came with my Icom 740, the resistor is one point eight K.
(1.8k), and is in parallel with the 4.7uf. capacitor as shown
in the schematic. I checked the value of this resistor with
digital meter,and it confirmed this resistance value.

Let's see. SL612, $8+ each. TL026 $1.50 each.
-3dB bandwidth - SL612 up to maybe 15MHz. TL026 up to 50MHz.
SL612 AGC range 70dB, gain of 34dB. TL026 AGC range 50dB, gain of 38dB.
SL612 obsolete. TL026 in production.

An AGC range far in excess of stage gain isn't much use if the stage
is overloading anyway.

Why again would I consider the SL612? :-)

In order to connect a 2m/70cm radio and a 1.25m radio to a triband antenna (2m/1.25m/70cm), one requires a triplexer and diplexer. I'd like to cut down on the number and size of equipment to do this.

I asked Comet about making a single compact unit that takes 2m/70cm on one port and 1.25m on the other. Mick Stwertnik told me that they designed and specced it out, but the cost would be a prohibitive $200-ish.

So I investigated making my own and found Jim Tonne's Diplexer program. I asked him if he could extend the program to allow for designing triplexers. He had some hackish solution that sort of worked, but he doesn't know the math to do it correctly in the first place.

Where should I go from here?

I found a schematic at an japanese site too.
The resistor is 1.8Kohm.
I finish it and it is working loud and clear.
I have an icom ic-738 transceiver. I have both
hm-36 and sm-20 microphones. The hm-326 has very
low output and can't drive the transceiver to full
output on ssb. The sm-20 has enough power but it
picks up any surround noise (blowers, my children,
telephon rings, TV etc etc). So i need a
dynamic microphone with enough power to drive well
my transceiver without too much sensitivity.
I have an old dynamic handy microphone from a CB
transceiver and I put inside a preamplifier on a
small pcboard and it works fine.

Thanks to all for your help.

David-

I take it your 2m/70cm radio has a single input with an internal
diplexer. I use a Comet CFX-324 triplexer, but my Kenwood TM-742 has

three separate inputs.

It seems to me that your radio's input might satisfy the need for a
2m/70cm diplexer. What would happen if you connected your triplexer's
2m and 70cm ports together with a co-ax T?

You might check SWR looking into the T, to see if it was close to 1 to 1
on both bands with the antenna and 1.25m ports terminated.

Rather than using the triplexer/diplexer combination, there might be
less loss if you use a separate antenna for 1.25m, with just a diplexer
for 2m/70cm.

The data sheet of the TL026 doesn't mention the maximum input signal that can be processed. For the SL612 that is 250 mV rms. Then there's the supply current: less than 5 mA for the SL612 but for the TL026 it's 6 times as much. Not to mention the issue of stability.

For an IF higher than 10 MHz, the SL611 has -3 dB at 80 MHz and for the SL610 that is 120 MHz. On SW, an IF amp with low NF allows for a passive mixer as long as the overall NF stays below ~10 dB. The SL612 has a 3 dB NF and a passive mixer like the VAY1 a loss of ~ 5.5 dB so even with some input filter losses, one can design a radio with high dynamic range, low power consumption and NF <10dB. Who would need a TL026? :-D

Posting-Frequency: posted twice monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

We are seeking a replacement maintainer for the following information bulletin formerly posted to rec.radio.amateur.* (and currently archived at http://www.faqs.org/faqs/radio/personal-intro/):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |

```
 rec.radio.amateur.space                                                   |
```

We are willing to provide any technical support necessary to get this article updated and automatically posted again at a regular interval. This would include establishing contact with the original maintainer for any necessary permissions. We would prefer to seek a new, dedicated maintainer at this time, rather than start auto-posting the original article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Actually, the datasheet mentions it - ~200mV.

With so many data sheet archives online, I could have hit the wrong one. But what didn't fail to get my attention was the remark "Other Characteristics Similar to NE592 and uA733". With those ICs I'm not only familiar but they are from the era when customarily, the equivalent internal diagram was published so uninitiated application engineers could use the IC in a fashion, not intended by the designer. The NE592 and uA733 employ negative feedback which is at odds with

voltage controlled gain - unless the gain control is before the stage(s) with
feedback, and then the S/N under application of feedback deteriorates.
So the TL026 isn't my choice even if it's modern ;-)

Jan

David-

I was not thinking. With a separate 1.25m antenna, no duplexer would be needed with your radio for the 2m/70cm antenna! That might be the simplest arrangement.

Has anyone here successfully replaced the antenna jack on a Yaesu
FT-7900 with an N-connector?  How about for an Alinco DR-235TMKIII?

Mahesh Babu and Venkatesh=92s upcoming multi stared movie is Seethamma
Vakitlo Sirimalle Chettu. SVSC movie Mahesh and Venkatesh are acting
as brothers. The actresses=92 in SVSC movie is Samantha and Anjali. SVSC
movie is directed by Srikanth Addala. SVSC movie is produced by
successful producer Dil Raju under Sri Venkateswara Productions. SVSC
movie Nazar is playing a role of father for Mahesh and Venkatesh. The
trailer of SVSC movie is awesome. SVSC movie music director is Mickey
J Meyer.

Since the TL026 is a currently-produced part by TI, there's no need to sift through online archives. Just go to http://www.ti.com/ and look up the part number.

> But what didn't fail to get my attention was the remark "Other
> Characteristics Similar to NE592 and uA733".

Fair enough. Of course, the TL026 *isn't* either of those parts, and the statement suggests to me that the TL026 has input and output characteristics similar to those non-AGC parts - relatively easy to use. Nothing at all about internal architecture. Perhaps you're reading something that isn't in the datasheet at all. Given how cheap the TL026 is, perhaps you might try one instead of an SL612 and see if your assumption is true.

But, seriously, you're quite passionate about the SL612 and that's a wonderful thing.

Cheers,
Dana K6JQ

What remains is the large current consumption - typ. 22 mA.
For the SL612 the typ. value is 3.5 mA.

Cost is a nonissue as is production. Another 30 mA just for the IF amplifier of
a noise blanker is an issue though.
>
>But, seriously, you're quite passionate about the SL612 and
>that's a wonderful thing.
>
>Cheers,
>Dana K6JQ

No, for the noise blanker it's the best solution. The IF minus impulse noise
will be processed by another no longer available IC, the TCA440. Its mixer and
IF combined have an AGC range of ~100 dB with max input to the mixer, 500 mV
rms, current consumption ~11mA. With the 30 dB AGC range of the 2nd mixer, > 120
dB AGC range. That mixer will convert to 25 KHz, a nice value for razor-sharp
notch filters and ideally working (synchronous) demodulators. Why be satisfied
with less when it's so easy to design a radio that functions well with input
signals between 0.1 uV and 100 mV and yet has a low power consumption? ;-)

If the nuke power plants can store nuke waste on site I should be able to s=
tore PCB's on site in my transformers and capacitors, PCB's are the best di=
electric insulator since sliced bread and have been around since the 1930's=
 banning PCB's is bull, containment is the answer.

Viet Nam still uses PCB's I can get them there.

> I have built 2 examples, a 9 MHZ AGC controlled amplifier and a 20 dB wideband amp for a noise cancelling system.
>
> BIG problems! The diode string in the source of the FET always biases the J310 OFF.

According to the spec sheet curves:
The j310 gets turned off with a bias of 3.7vdc,

Quiescent of 3ma that is called for gets set at 3.3vdc bias.

Meaning the resistor in series with the diodes is going to drop .54vdc at 3ma.

so it is going to fly on the Vdrop of the diodes Vdrop that changes with temp also? Might work in a spice sim but not in real life.

> Result, no gain or a loss!!!
>
> It took me an hour or two to twig what was going on. The trouble is that I cannot see how it can possibly work when the gate is referenced to ground. It is equivalent biasing off a valve!

> Not only that, but the AGC circuit published at the same time had extreme instability in the front end of the AGC amplifier. I am a VERY experienced electronics person (60 years) and was unable to find any obvious reason for this.
>

Yeah this is a cascode amplifier, great for eliminating miller effect, and gain that is the gain of the bipolar times the gain of the fet. Another reason they swamp the gate with 2200 ohms with all that gain. well except in your case.

> SO Now I have actually began to lose faith in one of my favourite engineers.
>
> Or, have I done something really stupid in my old age.
>
> FYI the circuits were built "dead bug" style with extensive shielding and full decoupling.

Lastly Since they are using diode drops for bias I would have used a TL431 precision and temp compensated regulator, would be alot easier to set that 3ma quiescent current.

Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently listed in the latest version of the "List of Big Eight Newsgroups" which is crossposted monthly to news.announce.newgroups, news.groups, and news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those that have been created consistent with the suggestions in "So You Want to Create an Alt Newsgroup" at:

  http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either "radio.amateur" or "ham-radio" in their names, including uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved newsgroups up-to-date. In case we have overlooked any, and a submission is rejected in error as a result, the rejected submitter can E-mail us at our administrative contact address (in the signature at the bottom of this article, and the default Reply-To for the rejection message) requesting that it be added, and that the article be approved. We may still choose to reject articles crossposted to any alt.* newsgroup with an inappropriate name, including obscene language, embedded name-calling, or encouragement of unlawful conduct.

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

"Understanding Digital Signal Processing" by Richard G. Lyons is a good
source of information.

If you plan to do the FPGA code yourself check out: www.myhdl.org

For the antenna consider: www.febo.com/time-freq/wwvb/antenna

At 60 KHz RG-58 would be as good as RG-6 for a loop antenna and much easier
to work with. PCV pipe is a good material for the frame. email me directly
and I'll send you a photo of a 1m VLF antenna I made.

Unless you are located in Boulder, CO you will probably need an analog
amplifier.

Hi Gary,

Thanks for the info. I am familiar with Richard's book. He seems like a good guy and will provide errata for anyone who has bought his book. I am familiar with DSP in general and digital receivers specifically. I have most of that part of the design analyzed enough to begin coding.

It is the ADC that I have had some trouble analyzing. I have been planning to construct a Sigma-Delta converter in the FPGA. Turns out this might be a little power hungry and I won't be able to use the special dithering that shapes the noise. My primary goal is to do this entire project with very, very little power consumption. If I can get a strong enough signal I can just use an LVDS input without the integration of a Sigma-Delta converter, but I won't know until I get some of this built and tested.

I am very experienced with HDL so I should be ok there.

I have found any number of sites that talk about loop antenna construction, but most don't really explain how to analyze them. I have finally cobbled together a good picture of the technical aspects from a number of web sites and have an antenna plan. I am looking at using 50 feet of RG-6 with copper inner conductor to optimize the Q. My initial pass is a compromise between optimizing the signal strength and making the final unit easy to construct and support. It will be 8 turns on 2 foot diameter wooden spokes. I expect the stiffness of the RG-6 to help support the cable. This would likely be a decent design up to four foot diameter.

In the end I may find I can use a ferrite loop. But the signal strengths I have seen from commercial ferrite antennas do not seem to be good enough, around 8 uV for 100uV/m field strength which is about what I expect to see here on the east coast.

As to the amp, we will see. I have an equation to predict signal strength at the antenna output and I am expecting a decent signal level if I have a good Q and transformer couple the output. Total gain (Q and transformer) over an untuned antenna will approach 10,000.

But there is many a slip between cup and lip. I hope to make some progress on this over the holidays and have some test results.

Can you explain why you think RG-58 will be as good as the RG-6? The inner conductor of RG-6 has only a small impact from skin effect, I think it is around 21%. At 32 mil the inner conductor of RG-58 (compared to 40 mil for RG-6) will have even less impact from skin effect, but will have a higher resistance and so a lower Q. The capacitance per foot is nearly twice that of RG-6 as well although I'm still not clear on the specific details of this effect. I believe higher capacitance will lower the self resonant frequency although I don't expect this to be a problem in my application.

Rick

I don't understand how you intend to use an LVDS input for the WWVB signal? Could you explain.

Have you considered using a WWVB receiver IC? I don't know what kind of power they require but they generate the 1pps PWM signal which could be processed by a low-power microprocessor very easily.

http://www.c-max-time.com/products/showProduct.php?id=2
http://www.pvelectronics.co.uk/index.php?main_page=product_info&products_id=7
http://www.ntp-time-server.com/wwvb-receiver/wwvb-receiver.htm

I've constructed loop antennas using both RG-58 (60 KHz) and RG-6, or
something similar to RG-6 (~20 KHz) and had good luck with both. I haven't
compared the outputs of both tuned to 60 KHz so I can't say much about how
their electrical performance compare. The RG-6 with the aluminum shield is a
PITA
because you can't make a solder connection to it. Self-resonance will not be
a problem. 100' of RG-58 on a 1 meter dia. frame required about 25 nF to
resonate at 60 KHz. One advantage of the febo-type antenna with the 1-turn
pickup loop is that its output impedance is very low which means that the
antenna can be located away from the receiver.

I guess you didn't read my initial post. My intent is to create an all-digital receiver at very low power. The receiver ICs around use standard analog technology to detect the AM signal. WWVB has added phase modulation which should be receivable at a lower SNR. I also want to detect both modulation schemes and compare the results.

They are fairly low power as can be CPU chips when cycled on and off as needed. But I want to do this in an FPGA so I can see just how low power it can be.

The cable I have already has F type connectors on the ends, so I don't care about the aluminum shield. I did have to shop around a bit to find one with an all copper inner conductor. Seems they use copper coated steel for CATV. I think my numbers are for a bit less than 80 nF of capacitance so I bought a bunch of 15 nF silver mica parts and some other small values to tune it in closely, then I have a triple bank, 0-500 pF tuner cap from an old receiver for final tuning. Once I have the rest of the system working well, I'll likely use fixed values of caps to tune the antenna without the variable cap. I saw one antenna that used a bank of roughly power of 2 caps with switches to allow the antenna to be tuned easily, cute.

I am thinking of using a ferrite core as a coupling transformer as it will give me a lot of voltage gain. I am looking to get towards 10,000 gain from combined Q and transformer.

The LVDS input on the FPGA will act as a 1 bit ADC. I was planning to use this in a Sigma-Delta converter and produce a 4 bit value at 240 kHz (4x carrier rate). I'm not sure I need the Sigma-Delta converter and might end up just using the 1 bit from the LVDS directly. By downconverting to DC and downsampling to 30 Hz I will get a *lot* of processing gain with an SNR improvement of some 33 dB (assuming uncorrelated noise). Another way to look at the digital design is as a very long FIR filter resulting in a filter with a very narrow bandpass or one bin of a DFT. Turns out they are all the same math in this case (multiply by 1, 0, -1, 0 sequence).

There are a few wrinkles I haven't figured out yet. I need a sample clock that is both accurate and low power. I have yet to find that. XO oscillators I have found over 1 MHz are all in the mA range. I'm thinking of using the very poor internal oscillator in the FPGA and calibrating it to a 32.768 kHz reference which can be both accurate and low power. But I don't yet know if the internal oscillator is low power enough. I need to fire up the eval board (gratis from NuHorizons) and measure the power consumption with and without the internal oscillator enabled. If the power consumption is low enough I can frequency lock it to the clock oscillator and come up with a calibration factor. Then the sample clock can be generated internally using a DCO updated with each calibration.

Thanks for discussing this with me. I like to bounce ideas off of other people.

Rick

I thought I would cross post this to rec.radio.amateur.moderated. They
have made a number of announcements about this and seem to be
encouraging the practice.

Summary: Recruitment announcement for ham-radio-related FAQ articles
Keywords: FAQ, Intro, amateur, ham, radio, recruit, recruitment

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted twice monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

We are seeking a replacement maintainer for the following information bulletin formerly posted to rec.radio.amateur.* (and currently archived at http://www.faqs.org/faqs/radio/personal-intro/):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |

rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this article updated and automatically posted again at a regular interval. This would include establishing contact with the original maintainer for any necessary permissions. We would prefer to seek a new, dedicated maintainer at this time, rather than start auto-posting the original article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Solution Manual Fundamentals of Renewable Energy Processes (1st Ed., Aldo d=
a Rosa)=20
Solution Manual Fundamentals of Renewable Energy Processes (2nd Ed., Aldo d=
a Rosa)
Solution Manual Alternative Energy Systems (B. K. Hodge)
Solution Manual Modeling, Analysis and Optimization of Process and Energy S=
ystems (F. Carl Knopf)=20
Solution Manual Solar Energy Engineering : Processes and Systems (Soteris K=
alogirou)
Solution Manual Solar Engineering of Thermal Processes (2nd Ed., John Duffi=
e & William Beckman)
Solution Manual Solar Engineering of Thermal Processes (3rd Ed., John Duffi=
e & William Beckman)
Solution Manual Energy Technology and Directions for the Future (Fanchi)
Solution Manual Power Generation Technologies (Paul Breeze)
Solution Manual Foundations of Engineering (2nd Ed, Holtzapple & Dan Reece)

Solution Manual Industrial Mechanics and Maintenance (3rd Ed., Larry Chasta=
in)
Solution Manual Mechanical and Electrical Equipment for Buildings (10th Ed.=
, Stein, Reynolds, Grondzik, Kwok)
Solution Manual Mechanical and Electrical Equipment for Buildings (11th Ed.=
, Grondzik, Kwok, Stein & Reynolds)
Solution Manual Mechanical & Electrical Systems in Buildings (4th Ed., Rich=
ard Janis & William Tao)
Solution Manual Engineering Drawing And Design (7th Ed., Jensen, Helsel & S=
hort)=20
Solution Manual Pipe Drafting and Design (3rd Ed., Roy A. Parisher)=20
Solution Manual Autodesk Inventor (James M. Leake)=20
Solution Manual Engineering Design Graphics : Sketching, Modeling, and Visu=
alization (1st Ed., James Leake & Jacob Borgerson)
Solution Manual Orthopaedic Biomechanics : Mechanics and Design in Musculos=
keletal Systems (Donald Bartel, Dwight Davy & Tony Keaveny)
Solution Manual Science for Engineering (3rd Ed., John Bird)

List of Solutions Manuals and Test Banks=20
----

contact to :   mattosbw1@gmail.com   mattosbw1(at)g=
mail.com

=20

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR :   CHINA, INDIA, RUSSIA, PAKIST=
AN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MAL=
DIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is =
available (it is a partial list). Then if you need solutions manual only co=
ntact me by email.=20

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TE=
ST BANKS.

I do not review the forums, just send me an email. Please do not use emails=
 from servers "LIVE" , all they are take as spam emails in my inbox.

- Electrical, Electronics & Computer Engineering :

Solution Manual Design for Electrical and Computer Engineers (J. Eric Salt =
& Robert Rothery)
Solution Manual Electrical Systems Design (Theodore R. Bosela)
Solution Manual Electrical Engineering : Concepts and Applications S.A. Rez=
a Zekavat)
Solution Manual Electrical Engineering : Principles and Applications (3rd E=
d., Hambley)

```
Solution Manual Electrical Engineering : Principles and Applications (4th E=
d., Hambley)
Solution Manual Electrical Engineering : Principles and Applications (5th E=
d., Hambley)
Solution Manual Electronics (2nd Ed., Hambley)
Solution Manual Electronics : A Systems Approach (4th Ed., Neil Storey)
Solution Manual Foundations of Electric Circuits (J.R. Cogdell)
Solution Manual Foundations of Electric Power (J.R. Cogdell)
Solution Manual Foundations of Electronics (J.R. Cogdell)
Solution Manual Foundations of Electrical Engineering (2nd Ed., John R. Cog=
dell)
Solution Manual Essentials of Electrical and Computer Engineering (David V.=
 Kerns, Jr., J. David Irwin)
Solution Manual Physics of Semiconductor Devices (Jean-Pierre Colinge, Cynt=
hia A. Colinge)
Solution Manual Electronics and Communications for Scientists and Engineers=
 (Martin Plonus)
Solution Manual Cryptography & Network Security (Behrouz A Forouzan)
Solution Manual Data Communications and Networking (3rd Ed., Behrouz A. For=
ouzan)
Solution Manual Data Communications and Networking (4th Ed., Behrouz A. For=
ouzan)
Solution Manual TCP/IP Protocol Suite (2nd Ed., Behrouz Forouzan)
Solution Manual TCP/IP Protocol Suite (3rd Ed., Behrouz Forouzan)
Solution Manual TCP/IP Protocol Suite (4th Ed., Behrouz Forouzan)
Solution Manual Local Area Networks (Behrouz A Forouzan)
Solution Manual Microcontroller Theory and Applications with the PIC18F (M.=
 Rafiquzzaman)
Solution Manual Communication Systems : Analysis and Design (Harold P.E. St=
ern & Samy A. Mahmoud)
Solution Manual Introduction to Communication Systems (3rd Ed., Ferrell G. =
Stremler)
Solution Manual Introduction to Digital Communications (Michael B. Pursley)
Solution Manual Digital Communications : A Discrete-Time Approach (Michael =
Rice)
Solution Manual Introduction to Digital Communication (2nd Ed., Rodger E. Z=
iemer & Roger W. Peterson)
Solution Manual Introduction to Spread Spectrum Communications (Rodger E. Z=
iemer, Roger L. Peterson & David E. Borth)
Solution Manual Micro and Smart Systems (G. K. Ananthasuresh, K. J. Vinoy, =
S. Gopalakrishnan, K. N. Bhat, V. K. Aatre)
Solution Manual Analog Integrated Circuit Design (2nd Ed., Tony Chan Caruso=
ne, David A. Johns, Kenneth W. Martin)
Solution Manual Analog Integrated Circuits for Communication : Principles, =
Simulation and Design (2nd Ed., Donald Pederson & Kartikeya Mayaram)
Solution Manual Satellite Communications (2nd Ed, Pratt, Bostian, Allnutt)
Solution Manual Business Data Communications (Behrouz A Forouzan)
Solution Manual Logic and Computer Design Fundamentals (4th Ed., Mano & Kim=
e)
Solution Manual Linear Robust Control (Michael Green, David J. N. Limebeer)
Solution Manual Adaptive Control (2nd Ed., Karl Johan Astrom, Bjorn Wittenm=
ark)
Solution Manual Advanced Engineering Electromagnetics (2nd Ed., Constantine=
```

 A. Balanis)=20
Solution Manual Digital Logic Circuit Analysis and Design (Victor P. Nelson=
, H. Troy Nagle, Bill D. Carroll, David Irwin)
Solution Manual Digital Control Engineering : Analysis and Design (M. Sami =
Fadali & Antonio Visioli)
Solution Manual Computer-Controlled Systems : Theory and Design (3rd Ed., K=
arl Johan Astrom & Bjorn Wittenmark)
Solution Manual Electric Circuits (7th Ed., Nilsson & Riedel)
Solution Manual Electric Circuits (8th Ed., Nilsson & Riedel)
Solution Manual Electric Circuits (9th Ed., Nilsson & Riedel)
Solution Manual Introductory Circuits for Electrical and Computer Engineeri=
ng (James Nilsson, Susan Riedel)
Solution Manual Electromagnetic Noise and Quantum Optical Measurements (Her=
mann A. Haus)
Solution Manual Optical Fiber Communications (4th Ed., Gerd Keiser)
Solution Manual Fiber Optic Communications (5th Ed., Joseph C. Palais)
Solution Manual Electromagnetics (Branislav M. Notaros)
Solution Manual Electromagnetics for Engineers (Fawwaz T. Ulaby)
Solution Manual Fundamentals of Applied Electromagnetics (5th Ed., Fawwaz T=
. Ulaby)
Solution Manual Applied Electromagnetics : Early Transmission Lines Approac=
h (Stuart Wentworth)=20
Solution Manual Fundamentals of Electromagnetics with Engineering Applicati=
ons (Stuart Wentworth)
Solution Manual Electromagnetics for Engineers : With Applications to Digit=
al Systems and Electromagnetic Interference (Clayton Paul)
Solution Manual MEMS & Microsystems : Design and Manufacture (1st Ed., Tai-=
Ran Hsu)
Solution Manual MEMS & Microsystems : Design, Manufacture, and Nanoscale En=
gineering (2nd Ed., Tai-Ran Hsu)
Solution Manual Probability and Statistics for Engineering and the Sciences=
 (7th Ed., Jay L. DeVore)=20
Solution Manual Probability and Stochastic Processes : A Friendly Introduct=
ion for Electrical and Computer Engineers (2nd Ed., Roy Yates & David Goodm=
an)
Solution Manual Process Systems Analysis and Control (3rd Ed. Donald Cougha=
nowr, Steven LeBlanc)=20
Solution Manual Fuel Cell Engines (Matthew M. Mench)
Solution Manual Fuel Cell Fundamentals (1st Ed., Ryan O'Hayre, et. al)
Solution Manual Fuel Cell Fundamentals (2nd Ed., Ryan O'Hayre, Whitney Cole=
lla, Suk-Won Cha, Fritz Prinz)
Solution Manual Control Systems Engineering (4th Ed., Norman Nise)
Solution Manual Control Systems Engineering (5th Ed., Norman Nise)
Solution Manual Control Systems Engineering (6th Ed., Norman Nise)
Solution Manual Automatic Control Systems (8th Ed., Benjamin C. Kuo, Farid =
Golnaraghi)
Solution Manual Automatic Control Systems (9th Ed., Farid Golnaraghi, Benja=
min C. Kuo)
Solution Manual Basic Electricity for Industry : Circuits and Machines - Ca=
nadian Edition (Doug Edgar)
Solution Manual Basic Engineering Circuit Analysis (8th Ed., Irwin & Nelms)
Solution Manual Basic Engineering Circuit Analysis (9th Ed., Irwin & Nelms)
Solution Manual Basic Engineering Circuit Analysis (10th Ed., Irwin & Nelms=

)
Solution Manual A Brief Introduction to Circuit Analysis (J. David Irwin)
Solution Manual Semiconductor Devices : Basic Principles (Jasprit Singh)
Solution Manual Semiconductor Device Fundamentals (Robert F. Pierret)
Solution Manual Advanced Semiconductor Fundamentals (2nd Ed., Robert F. Pie=
rret)
Solution Manual Device Electronics for Integrated Circuits (3rd Ed., Richar=
d S. Muller, Theodore I. Kamins)
Solution Manual Fundamentals of Semiconductor Devices (Anderson)
Solution Manual Scientific Computing (2nd Ed., Michael T. Heath)
Solution Manual System Identification : An Introduction (Karel J. Keesman)
Solution Manual Scientific Computing with Case Studies (Dianne P. O'Leary)
Solution Manual Pattern Recognition and Machine Learning (Christopher M. Bi=
shop)
Solution Manual Modern Semiconductor Devices for Integrated Circuits (Chenm=
ing C. Hu)
Solution Manual Analysis and Design of Analog Integrated Circuits (4th Ed.,=
 Paul Gray, et al.)
Solution Manual Analysis and Design of Analog Integrated Circuits (5th Ed.,=
 Paul Gray)
Solution Manual Analysis and Design of Digital Integrated Circuits (3rd Ed.=
, Hodges)=20
Solution Manual Introduction to Electric Circuits (6th Ed., Dorf & Svoboda)
Solution Manual Introduction to Electric Circuits (7th Ed., Dorf & Svoboda)
Solution Manual Introduction to Electric Circuits (8th Ed., Dorf & Svoboda)
Solution Manual Modulation, Detection and Coding (Tommy =D6berg)
Solution Manual Principles of Communications: Systems, Modulation, and Nois=
e (5th Ed., R.E. Ziemer & W.H. Tranter)=20
Solution Manual Principles of Communications (6th Ed., R.E. Ziemer & W.H. T=
ranter)=20
Solution Manual The Analysis and Design of Linear Circuits (4th Ed, Thomas =
& Rosa)
Solution Manual The Analysis and Design of Linear Circuits : Laplace Early =
(4th Ed, Thomas & Rosa)
Solution Manual The Analysis and Design of Linear Circuits (5th Ed, Thomas)
Solution Manual The Analysis and Design of Linear Circuits (6th Ed, Thomas,=
 Rosa & Toussaint)
Solution Manual The Analysis and Design of Linear Circuits (7th Ed, Thomas,=
 Rosa & Toussaint)
Solution Manual Dynamic Modeling and Control of Engineering Systems (2nd Ed=
., J. Lowen Shearer, Bohdan Kulakowski, John Gardner)
Solution Manual Modern Control Systems (11th Ed., Dorf & Bishop)
Solution Manual Modern Control Systems (12th Ed., Dorf & Bishop)
Solution Manual System Dynamics (4th Ed., Katsuhiko Ogata)
Solution Manual System Dynamics (1st Ed., William Palm III)
Solution Manual System Dynamics (2nd Ed., William Palm III)
Solution Manual System Dynamics and Response (S. Graham Kelly)
Solution Manual System Dynamics for Engineering Students : Concepts and App=
lications (Nicolae Lobontiu)
Solution Manual Optimal Control (2nd Ed., Frank Lewis & Vassilis Syrmos)
Solution Manual Optimal Control (3rd Ed., Frank Lewis, Draguna Vrabie & Vas=
silis Syrmos)
Solution Manual Optimal Control Theory : An Introduction (Donald E. Kirk)

Solution Manual Power Electronics (1st Ed., Daniel W. Hart)
Solution Manual Power Electronic Circuits (Issa Batarseh)
Solution Manual Power Electronics : Circuits, Devices and Applications (3rd=
 Ed., Muhammad H. Rashid)
Solution manual Power Electronics : A First Course (Ned Mohan)
Solution Manual Power Electronics : Converters, Applications, and Design (3=
rd Ed., Ned Mohan, Tore Undeland & William Robbins)
Solution Manual Electric Power Systems : A First Course (Ned Mohan)
Solution Manual Electric Machines and Drives : A First Course (Ned Mohan)
Solution Manual Intuitive Probability and Random Processes using MATLAB (St=
even Kay)
Solution Manual Signals and Systems using MATLAB (Luis Chaparro)
Solution Manual Analog Signals and Systems (Erhan Kudeki & David C. Munson,=
 Jr.)
Solution Manual Continuous and Discrete Time Signals and Systems (Mrinal Ma=
ndal, Amir Asif)
Solution Manual Digital Signal and Image Processing (Tamal Bose)
Solution Manual Digital Image Processing (2nd Ed., Rafael Gonzalez, Richard=
 Woods)
Solution Manual DSP First : A Multimedia Approach (James H. McClellan, Rona=
ld W. Schafer, Mark A. Yoder)
Solution Manual Discrete-Time Signal Processing (2nd Ed., Alan Oppenheim, R=
onald Schafer, John Buck)
Solution Manual Discrete-Time Signal Processing (3rd Ed., Alan Oppenheim & =
Ronald Schafer)
Solution Manual Signal Processing First (James H. McClellan, Ronald W. Scha=
fer, Mark A. Yoder)
Solution Manual Statistical Digital Signal Processing and Modeling (Monson =
Hayes)
Solution Manual Digital Signal Processing (Thomas J. Cavicchi)
Solution Manual Digital Signal Processing System Design : LabVIEW-Based Hyb=
rid Programming (2nd Ed., Kehtarnavaz)
Solution Manual Digital Signal Processing (2nd Ed., Mitra)
Solution Manual Digital Signal Processing (3rd Ed., Mitra)
Solution Manual Digital Signal Processing (4th Ed., Mitra)
Solution Manual Digital Signal Processing (4th Ed., John G. Proakis, Dimitr=
is K Manolakis)
Solution Manual Digital Signal Processing (Charles Schuler & Mahesh Chugani=
)
Solution Manual Digital Signal Processing : Fundamentals and Applications (=
Li Tan)
Solution Manual Digital Signal Processing : An Experimental Approach (Shlom=
o Engelberg)
Solution Manual Digital Signal Processing : System Analysis and Design (Pau=
lo S. R. Diniz)
Solution Manual Digital Signal Processing : A Modern Introduction (Ashok Am=
bardar)
Solution Manual Engineering Optimization : Theory and Practice (4th Ed., Si=
ngiresu S. Rao)
Solution Manual Applied Optimization with MATLAB Programming (1st Ed., P. V=
enkataraman)
Solution Manual Applied Optimization with MATLAB Programming (2nd Ed., P. V=
enkataraman)

Solution Manual Introduction to Applied Optimization (2nd Ed., Urmila Diwek=
ar)
Solution Manual Logic Synthesis and Verification Algorithms (Gary Hachtel &=
 Fabio Somenzi)
Solution Manual Adaptive Filtering : Algorithms and Practical Implementatio=
n (3rd Ed., Paulo S. R. Diniz)
Solution Manual Introduction to Scientific Computation and Programming (Dan=
iel T. kaplan)
Solution Manual Principles of Signal Detection and Parameter Estimation (Be=
rnard C. Levy)=20
Solution Manual Electric Machines Analysis and Design Applying MatLab (Cath=
ey)
Solution Manual Fundamentals of Electrical Engineering (Giorgio Rizzoni)
Solution Manual Principles and Applications of Electrical Engineering (4th =
Ed, Rizzoni)
Solution Manual Principles and Applications of Electrical Engineering (5th =
Ed, Rizzoni)
Solution Manual Fundamentals of Electric Circuits (2nd Ed., Alexander & Sad=
iku)
Solution Manual Fundamentals of Electric Circuits (3rd Ed., Alexander & Sad=
iku)
Solution Manual Fundamentals of Electric Circuits (4th Ed., Alexander & Sad=
iku)
Solution Manual MSP430 Microcontroller Basics (John Davies)
Solution Manual Programming Massively Parallel Processors : A Hands-on Appr=
oach (David Kirk & Wen-mei Hwu)
Solution Manual Embedded Systems and Software Validation (Abhik Roychoudhur=
y)
Solution Manual Embedded Systems Design with Platform FPGAs : Principles an=
d Practices (Ronald Sass, Andrew Schmidt)
Solution Manual Embedded DSP Processor Design : Application Specific Instru=
ction Set Processors (Dake Liu)
Solution Manual Embedded Microcontrollers and Processor Design (Charles Gre=
g Osborn)
Solution Manual Embedded System Design : A Unified Hardware/Software Introd=
uction (Vahid & Givargis)
Solution Manual Embedded Microcomputer Systems : Real Time Interfacing (2nd=
 Ed., Jonathan W. Valvano)
Solution Manual Introduction to Programming with C++ (2nd Ed., Y. Daniel Li=
ang)
Solution Manual Matlab : A Practical Introduction to Programming and Proble=
m Solving (Stormy Attaway)
Solution Manual Matlab : A Practical Introduction to Programming and Proble=
m Solving (2nd Ed., Stormy Attaway)
Solution Manual Principles of Computer System Design : An Introduction (Jer=
ome Saltzer & M. Frans Kaashoek)
Solution Manual The Illustrated Network : How TCP/IP Works in a Modern Netw=
ork (Walter Goralski)
Solution Manual Electronic Design Automation : Synthesis, Verification, and=
 Test (Laung-Terng Wang, Yao-Wen Chang & Kwang-Ting Cheng)
Solution Manual Digital Design (Frank Vahid)=20
Solution Manual Digital Design with RTL Design, Verilog and VHDL (2nd Ed., =
Frank Vahid)

Solution Manual Digital Logic Design Principles (Balabanian & Carlson)
Solution Manual Fundamentals of Logic Design (5th Ed., Charles H. Roth)
Solution Manual Real-Time Systems and Software (Alan Shaw)
Solution Manual Introduction to VLSI Circuits and Systems (John P. Uyemura)
Solution Manual Chip Design for Submicron VLSI : CMOS Layout & Simulation (=
John Uyemura)
Solution Manual Classical Electrodynamics (2nd Ed., John David Jackson)
Solution Manual Objects, Abstraction, Data Structures and Design : Using C+=
+ (Elliot B. Koffman & Paul A. T. Wolfgang)
Solution Manual Objects, Abstraction, Data Structures and Design Using Java=
 Version 5.0 (Elliot B. Koffman & Paul A. T. Wolfgang)
Solution Manual Computer Architecture and Organization : An Integrated Appr=
oach (Murdocca & Heuring)
Solution Manual Wiley Pathways Networking Basics (1st Ed., Ciccarelli, Faul=
kner, FitzGerald, Dennis & Miller)=20
Solution Manual Software Engineering : Principles and Practice (3rd Ed., Ha=
ns van Vliet)
Solution Manual Software Design : From Programming to Architecture (Eric Br=
aude)
Solution Manual Software Engineering : An Object-Oriented Perspective (Eric=
 Braude)
Solution Manual Software Engineering : Modern Approaches (2nd Ed., Eric Bra=
ude & Michael Bernstein)
Solution Manual Neural and Adaptive Systems : Fundamentals through Simulati=
ons (Jos=E9 Principe, Neil Euliano & W. Curt Lefebvre)=20
Solution Manual Fundamentals of Electronic Circuit Design (David J. Comer &=
 Donald T. Comer)
Solution Manual Microelectronic Circuit Design (2nd Ed., Jaeger & Blalock)
Solution Manual Microelectronic Circuit Design (3rd Ed., Jaeger & Blalock)
Solution Manual Microelectronic Circuit Design (4th Ed., Jaeger & Blalock)
Solution Manual Introduction to Microelectronic Fabrication : Volume 5 of M=
odular Series on Solid State Devices (2nd Ed., Richard Jaeger)
Solution Manual Microelectronic Circuits (5th Ed., Adel S. Sedra, K. C. Smi=
th)=20
Solution Manual VHDL for Engineers (Kenneth Short)
Solution Manual Fundamentals of Digital Logic with VHDL Design (1st Ed., Br=
own & Vranesic)
Solution Manual Fundamentals of Digital Logic with VHDL Design (2nd Ed., Br=
own & Vranesic)
Solution Manual Fundamentals of Digital Logic with VHDL Design (3rd Ed., Br=
own & Vranesic)
Solution Manual CMOS Analog Circuit Design (2nd Ed., Phillip E. Allen, Doug=
las R. Holberg)
Solution Manual Design of Analog CMOS Integrated Circuits (Behzad Razavi)
Solution Manual Design of Integrated Circuits for Optical Communications (B=
ehzad Razavi)
Solution Manual Fundamentals of Microelectronics, Preliminary Edition (Behz=
ad Razavi)
Solution Manual Fundamentals of Microelectronics (1st Ed., Behzad Razavi)
Solution Manual RF Microelectronics (2nd Ed., Behzad Razavi)
Solution Manual Design with Operational Amplifiers and Analog Integrated Ci=
rcuits (3rd Ed., Sergio Franco)
Solution Manual Your UNIX : The Ultimate Guide (1st Ed., Sumitabha Das)

Solution Manual Your UNIX : The Ultimate Guide (2nd Ed., Sumitabha Das)=20
Solution Manual Microwave Engineering (Annapurna Das)
Solution Manual Microwave Engineering (3rd Ed., David M. Pozar)
Solution Manual Microwave Engineering (4th Ed., David M. Pozar)
Solution Manual Microwave and RF Design of Wireless Systems (David M. Pozar=
)
Solution Manual Introduction to Wireless Systems (P. M. Shankar)=20
Solution Manual Microwave Transistor Amplifiers : Analysis and Design (2nd =
Ed., Guillermo Gonzalez)
Solution Manual Control Systems (Madan Gopal)
Solution Manual A First Lab in Circuits and Electronics (Yannis Tsividis)
Solution Manual Power System Analysis : Analysis and Design (John Grainger)
Solution Manual Power Systems Analysis (2nd Ed., Hadi Saadat)
Solution Manual Power Systems Analysis and Design (4th Ed., J.Duncan Glover=
 and Mulukutla S. Sarma)
Solution Manual An Introduction to Digital and Analog Communications (2nd E=
d., Simon Haykin & Michael Moher)
Solution Manual Communication Systems (4th Ed., Simon Haykin)
Solution Manual Communication Systems (5th Ed., Simon Haykin)
Solution Manual Communication Systems (4th Ed., A. Bruce Carlson, Paul B. C=
rilly, Janet Rutledge)
Solution Manual Communication Systems (5th Ed., A. Bruce Carlson, Paul B. C=
rilly)
Solution Manual Signals and Systems (2nd Ed., Simon Haykin & Barry Van Veen=
)
Solution Manual Introduction to Computing Systems : From bits & gates to C =
& beyond (1st Ed., Patt and Patel)
Solution Manual Introduction to Computing Systems : From bits & gates to C =
& beyond (2nd Ed., Patt and Patel)
Solution Manual Elements of the Theory of Computation (2nd Ed., Lewis & Pap=
adimitriou)
Solution Manual Introduction to Languages and the Theory of Computation (3r=
d Ed., John Martin)
Solution Manual Introduction to Languages and the Theory of Computation (4t=
h Ed., John Martin)
Solution Manual Mechanical & Electrical Systems in Buildings (4th Ed., Rich=
ard Janis & William Tao)
Solution Manual Silicon VLSI Technology : Fundamentals, Practice, and Model=
ing (Plummer, Deal & Griffin)
Solution Manual Dynamic Electromagnetics (Paul Diament)
Solution Manual Engineering Electromagnetics (2nd Ed., Nathan Ida)=20
Solution Manual Engineering Electromagnetics (Kenneth Demarest)
Solution Manual Engineering Electromagnetics (Umran S. Inan & Aziz Inan)
Solution Manual Field and Wave Electromagnetics (1st Ed., David Cheng)
Solution Manual Fundamentals of Engineering Electromagnetics (David Cheng)
Solution Manual Database Design and Implementation (Edward Sciore)
Solution Manual Information Modeling and Relational Databases (2nd Ed., Ter=
ry Halpin & Tony Morgan)
Solution Manual Probability, Statistics, and Random Processes For Electrica=
l Engineering (3rd Ed., Alberto Leon-Garcia)
Solution Manual Detection and Estimation Theory (Thomas Schonhoff & Arthur =
Giordano)
Solution Manual The Intel Microprocessors (8th Ed., Barry B. Brey)

```
Solution Manual Wireless Networking (Kumar, Manjunath & Kuri)
Solution Manual Wireless Communications : Principles and Practice (2nd Ed.,=
 Theodore S. Rappaport)
Solution Manual Digital Electronics and Design with VHDL (Volnei A. Pedroni=
)
Solution Manual System-on-Chip Test Architectures : Nanometer Design for Te=
stability (Wang, Stroud & Touba)
Solution Manual Digital Design (Verilog) : An Embedded Systems Approach Usi=
ng Verilog (Peter Ashenden)
Solution Manual Digital Design (VHDL) : An Embedded Systems Approach Using =
VHDL (Peter Ashenden)
Solution Manual Computer Organization and Design : The Hardware/Software In=
terface (3rd Ed., Patterson & Hennessy)
Solution Manual Computer Organization and Design : The Hardware/Software In=
terface (4th Ed., Patterson & Hennessy)
Solution Manual Fundamentals of Computer Organization and Design (Sivarama =
P. Dandamudi)
Solution Manual Wireless Communications & Networking (Vijay Garg)
Solution Manual Network Flows : Theory, Algorithms, and Applications (Ravin=
dra K. Ahuja, Thomas L. Magnanti, James B. Orlin)
Solution Manual Network Analysis, Architecture, and Design (3rd Ed., James =
McCabe)
Solution Manual Computer Networks : A Systems Approach (4th Ed., Peterson &=
 Davie)
Solution Manual Computer Networks ISE : A Systems Approach (4th Ed., Peters=
on & Davie)
Solution Manual Computer Networks : A Systems Approach (5th Ed., Peterson &=
 Davie)
Solution Manual Digital Design and Computer Architecture (David Harris & Sa=
rah Harris)
Solution Manual Digital Design and Computer Architecture (2nd Ed., David Ha=
rris & Sarah Harris)
Solution Manual Fault-Tolerant Systems (Israel Koren & C. Krishna)
Solution Manual Computer Architecture : Pipelined and Parallel Processor De=
sign (Michael J. Flynn)=20
Solution Manual Computer Architecture : A Quantitative Approach (4th Ed., H=
ennessy & Patterson)
Solution Manual Computer Architecture : A Quantitative Approach (5th Ed., H=
ennessy & Patterson)
Solution Manual High-Performance Embedded Computing : Architectures, Applic=
ations, and Methodologies (Wayne Wolf)
Solution Manual Pattern Recognition (3rd Ed., Theodoridis & Koutroumbas)
Solution Manual Pattern Recognition (4th Ed., Theodoridis & Koutroumbas)
Solution Manual Data Mining : Concepts and Techniques (2nd Ed., Han & Kambe=
r)
Solution Manual Data Mining : Concepts and Techniques (3rd Ed., Han , Kambe=
r & Pei)
Solution Manual Cyber Attacks : Protecting National Infrastructure, STUDENT=
 EDITION (Edward Amoroso)
Solution Manual Distributed and Cloud Computing : From Parallel Processing =
to the Internet of Things (Kai Hwang , Jack Dongarra & Geoffrey Fox)
Test bank Making Media : Foundations of Sound and Image Production (3rd Ed.=
, Jan Roberts-Breslin)
```

Solution Manual Commonsense Reasoning (Erik Mueller)
Solution Manual Introduction to Data Compression (3rd Ed., Khalid Sayood)
Solution Manual Programming Language Pragmatics (2nd Ed., Michael Scott)
Solution Manual Programming Language Pragmatics (3rd Ed., Michael Scott)
Solution Manual Computer Graphics for Java Programmers (2nd Ed., Leen Ammer=
aal & Kang Zhang)
Solution Manual Database Modeling and Design : Logical Design (4th Ed., Teo=
rey, Lightstone & Nadeau)
Solution Manual Database Modeling and Design : Logical Design (5th Ed., Teo=
rey, Lightstone, Nadeau & Jagadish)
Solution Manual Computers As Components : Principles of Embedded Computing =
System Design (1st Ed., Wayne Wolf)
Solution Manual Computers As Components : Principles of Embedded Computing =
System Design (2nd Ed., Wayne Wolf)
Solution Manual Computers As Components : Principles of Embedded Computing =
System Design (3rd Ed., Marilyn Wolf)
Solution Manual Virtual Machines : Versatile Platforms for Systems and Proc=
esses (Jim Smith & Ravi Nair)
Solution Manual Comprehensive Functional Verification : The Complete Indust=
ry Cycle (Wile, Goss & Roesner)
Solution Manual User Interface Design and Evaluation (Stone, Jarrett, Woodr=
offe & Minocha)
Solution Manual Network Algorithmics : An Interdisciplinary Approach to Des=
igning Fast Networked Devices (George Varghese)
Solution Manual Data Modeling Essentials (3rd Ed., Simsion & Witt)
Solution Manual A Student Guide to Object-Oriented Development (Carol Britt=
on & Jill Doake)
Solution Manual Routing, Flow, and Capacity Design in Communication and Com=
puter Networks (Pioro & Medhi)
Solution Manual Knowledge Representation and Reasoning (Brachman & Levesque=
)
Solution Manual Communication Networking : An Analytical Approach (Anurag K=
umar, D. Manjunath & Joy Kuri)
Solution Manual Principles and Practices of Interconnection Networks (Dally=
 & Towles)
Solution Manual Game Physics (David Eberly)
Solution Manual Engineering a Compiler (Keith Cooper & Linda Torczon)
Solution Manual Constraint Processing (Rina Dechter)
Solution Manual Design Methods for Reactive Systems : Yourdon, Statemate, a=
nd the UML (R. J. Wieringa)
Solution Manual Temporal Data & the Relational Model (C.J. Date, Darwen & L=
orentzos)
Solution Manual Java Made Simple (2nd Ed., P. K. McBride)
Solution Manual The Firmware Handbook (Jack Ganssle)
Solution Manual Optical Networks : A Practical Perspective (2nd Ed., Ramasw=
ami & Sivarajan)
Solution Manual Optical Networks : A Practical Perspective (3rd Ed., Ramasw=
ami, Sivarajan & Sasaki)
Solution Manual Usability Engineering : Scenario-Based Development of Human=
-Computer Interaction (Rosson & Carroll)
Solution Manual The Designer's Guide to VHDL (2nd Ed., Peter Ashenden)
Solution Manual Transactional Information Systems : Theory, Algorithms, and=
 the Practice of Concurrency Control and Recovery (Weikum & Vossen)

Solution Manual Parallel Computer Architecture : A Hardware/Software Approa=
ch (Culler, Singh & Gupta)
Solution Manual Advanced Compiler Design and Implementation (Steven Muchnic=
k)
Solution Manual Parallel Programming with MPI (Peter Pacheco)
Solution Manual An Introduction to Parallel Programming (Peter Pacheco)
Solution Manual Distributed Algorithms (Nancy Lynch)
Solution Manual Electrical and Electronic : Principles and Technology (3rd =
Ed., John Bird)
Solution Manual Electrical and Electronic : Principles and Technology (4th =
Ed., John Bird)
Solution Manual Electrical Circuit Theory and Technology (3rd Ed., John Bir=
d)
Solution Manual Electrical Circuit Theory and Technology (4th Ed., John Bir=
d)
Solution Manual Electronic Circuits : Fundamentals & Applications (3rd Ed.,=
 Mike Tooley)
Solution Manual A Practical Guide to SysML : The Systems Modeling Language =
(Friedenthal, Moore & Steiner)
Solution Manual Multidimensional Signal, Image, and Video Processing and Co=
ding (John Woods)
Solution Manual Multidimensional Signal, Image, and Video Processing and Co=
ding (2nd Ed., John Woods)
Solution Manual Bioelectrical Signal Processing in Cardiac and Neurological=
 Applications (Leif S=F6rnmo & Pablo Laguna)
Solution Manual Foundations of Analog and Digital Electronic Circuits (Anan=
t Agarwal & Jeffrey Lang)
Solution Manual Introduction to Linear Circuit Analysis and Modelling : Fro=
m DC to RF (Luis Moura & Izzat Darwazeh)
Solution Manual Embedded Systems Architecture : A Comprehensive Guide for E=
ngineers and Programmers (Tammy Noergaard)
Solution Manual Bioimpedance and Bioelectricity Basics (2nd Ed., Grimnes & =
Martinsen)
Solution Manual Simulation with Arena (5th Ed., Kelton, Sadowski & Swets)
Solution Manual Simulation Modeling and Analysis with ARENA (Tayfur Altiok =
& Benjamin Melamed)
Solution Manual The Visual Story : Creating the Visual Structure of Film, T=
V and Digital Media (2nd Ed., Bruce Block)
Solution Manual The Shut Up and Shoot Documentary Guide : A Down & Dirty DV=
 Production (Anthony Artis)
Solution Manual Portable Video : ENG & EFP (5th Ed., Medoff & Fink)
Solution Manual Voice and Vision : A Creative Approach to Narrative Film an=
d DV Production (Mick Hurbis-Cherrier)
Solution Manual Writing for Multimedia and the Web : A Practical Guide to C=
ontent Development for Interactive Media (3rd Ed., Timothy Garrand)
Solution Manual Developing and Maintaining a Design-Tech Portfolio : A Guid=
e for Theatre, Film & TV (Rafael Jaen)
Solution Manual Producing for TV and Video : A Real-World Approach (Cathrin=
e Kellison)
Solution Manual Producing for TV and New Media : A Real-World Approach for =
Producers (2nd Ed., Cathrine Kellison)
Solution Manual Placing Shadows : Lighting Techniques for Video Production =
(3rd Ed., Gloman & Tom LeTourneau)

Solution Manual Film Directing Fundamentals : See Your Film Before Shooting=
 (3rd Ed., Nicholas Proferes)
Solution Manual Introduction to Media Production : The Path to Digital Medi=
a Production (3rd Ed., Musburger & Kindem)
Solution Manual Introduction to Media Production : The Path to Digital Medi=
a Production (4th Ed., Kindem & Musburger)
Solution Manual Directing the Documentary (5th Ed., Michael Rabiger)
Solution Manual Video Production Handbook (4th Ed., Gerald Millerson & Jim =
Owens)
Solution Manual Making Media : Foundations of Sound and Image Production (J=
an Roberts-Breslin)
Solution Manual Prepare to Board! Creating Story and Characters for Animati=
on Features and Shorts (Nancy Beiman)
Solution Manual Light and Lens : Photography in the Digital Age (Robert Hir=
sch)
Solution Manual The Radio Station : Broadcast, Satellite & Internet (7th Ed=
., Michael Keith)
Solution Manual Developing Story Ideas (2nd Ed., Michael Rabiger)
Solution Manual Radio Production Worktext : Studio and Equipment (5th Ed., =
Reese, Gross & Gross)
Solution Manual Broadcast News Writing, Reporting, and Producing (4th Ed., =
Ted White)
Solution Manual Problem Solving and Programming Concepts (7th Ed., Sprankle=
)
Solution Manual Problem Solving and Programming Concepts (8th Ed., Sprankle=
 & Hubbard)
Solution Manual A Balanced Introduction to Computer Science (2nd Ed., David=
 Reed)
Solution Manual Introduction to Computing and Programming with Java : A Mul=
timedia Approach (Guzdial & Ericson)
Solution Manual Starting Out with Programming Logic and Design (Tony Gaddis=
)
Solution Manual Starting Out with Programming Logic and Design (2nd Ed., To=
ny Gaddis)
Solution Manual Tools For Structured and Object-Oriented Design (7th Ed., B=
ohl & Rynn)
Solution Manual Programming with Alice and Java (Lewis & DePasquale)
Solution Manual e-Business and e-Commerce How to Program (Harvey M. Deitel,=
 Paul J. Deitel, Tem R. Nieto)
Solution Manual XML How to Program (Harvey M. Deitel, Paul J. Deitel, Tem R=
. Nieto, Ted Lin, Praveen Sadhu)
Solution Manual Python How to Program (Harvey M. Deitel, Paul J. Deitel, Jo=
nathan P. Liperi Ben Wiedermann)
Solution Manual Perl How to Program (Harvey M. Deitel, Paul J. Deitel, Tem =
R. Nieto, D. C. McPhie)
Solution Manual C How to Program (4th Ed., Harvey & Paul Deitel)
Solution Manual C How to Program (5th Ed., Harvey & Paul Deitel)
Solution Manual C++ How to Program (6th Ed., Harvey & Paul Deitel)
Solution Manual Visual Basic.NET How to Program (2nd Ed., Harvey M. Deitel,=
 Paul J. Deitel, Tem R. Nieto)
Solution Manual Visual C++ 2008 How to Program (2nd Ed., Harvey & Paul Deit=
el)
Solution Manual Internet & World Wide Web : How to Program (4th Ed., Harvey=

 & Paul Deitel)=20

mond R. Panko)
Solution Manual Business Data Networks and Telecommunications (7th Ed., Ray=
mond R. Panko)
Solution Manual Business Data Communications (Allen Dooley)
Solution Manual Object-Oriented Programming in C++ (4th Ed., Robert Lafore)
Solution Manual C++ : Classes and Data Structures (Jeffrey Childs)
Solution Manual Data Structures Outside-In with Java (Sesh Venugopal)
Solution Manual Data Structures and Abstractions with Java (2nd Ed., Frank =
M. Carrano)
Solution Manual Data Structures and Algorithms in Java (Peter Drake)
Solution Manual Practical Introduction to Data Structures and Algorithm Ana=
lysis : C++ Edition (2nd Ed., Clifford A. Shaffer)
Solution Manual Computer Vision : A Modern Approach (David Forsyth & Jean P=
once)
Solution Manual Computer Graphics Using Java 2D and 3D (Hong Zhang & Y. Dan=
iel Liang)
Solution Manual Computer Graphics Using OpenGL (3rd Ed., Francis Hill Jr. &=
 Stephen Kelley)
Solution Manual Computer Graphics with OpenGL (3rd Ed., Donald Hearn & M. P=
auline Baker)
Solution Manual User-Centered Web Site Development : A Human-Computer Inter=
action Approach (McCracken & Wolfe)
Solution Manual Fundamentals of Game Design (Ernest Adams & Andrew Rollings=
)
Solution Manual Introduction to The Game Industry (Moore & Sward)
Solution Manual Fundamentals of Math and Physics for Game Programmers (Wend=
y Stahler)
Solution Manual Usability Engineering : Process, Products & Examples (Laura=
 Leventhal & Julie Barnes)
Solution Manual Web Usability : A User-Centered Design Approach (Jonathan L=
azar)
Solution Manual Structured Computer Organization (5th Ed., Andrew S. Tanenb=
aum)
Solution Manual Assembly Language for Intel-Based Computers (5th Ed., Kip I=
rvine)
Solution Manual Assembly Language for x86 Processors (6th Ed., Kip R. Irvin=
e)
Solution Manual Fundamentals of Multimedia (Ze-Nian Li & Mark Drew)
Solution Manual Digital Media Primer (Yue-Ling Wong)
Solution Manual Essentials for Design Macromedia Director MX 2004 Comprehen=
sive (Tara Gray)
Solution Manual Modern Systems Analysis and Design (4th Ed., Jeffrey Hoffer=
, Joey George, & Joseph Valacich)
Solution Manual Modern Systems Analysis and Design (5th Ed., Jeffrey Hoffer=
, Joey George, & Joseph Valacich)
Solution Manual Modern Systems Analysis and Design (6th Ed., Jeffrey Hoffer=
, Joey George, & Joseph Valacich)
Solution Manual Modern Database Management (8th Ed., Hoffer, Prescott & Top=

i)
Solution Manual Modern Database Management (9th Ed., Hoffer, Prescott & Top=
i)
Solution Manual Modern Database Management (10th Ed., Hoffer, Ramesh & Topi=
)
Solution Manual Database Systems Using Oracle (2nd Ed., Nilesh Shah)
Solution Manual An Advanced Course in Database Systems : Beyond Relational =
Databases (Dietrich & Urban)
Solution Manual Data and Text Mining : A Business Applications Approach (Th=
omas Miller)
Solution Manual Network Management : Concepts and Practice, A Hands-On Appr=
oach (J. Richard Burke)
Solution Manual Computer and Communication Networks (Nader F. Mir)
Solution Manual High Performance TCP/IP Networking (Mahbub Hassan & Raj Jai=
n)
Solution Manual Computer Security : Principles and Practice (William Stalli=
ngs & Lawrie Brown)
Solution Manual Computer Forensics : Principles and Practices (Volonino, An=
zaldua & Godwin)
Solution Manual Disaster Recovery : Principles and Practices (April Wells, =
Charlyne Walker & Timothy Walker)
Solution Manual Firewalls and VPNs : Principles and Practices (Richard Tibb=
s & Edward Oakes)=20
Solution Manual Network Defense and Countermeasures : Principles and Practi=
ces (Chuck Easttom)
Solution Manual Corporate Computer and Network Security (1st Ed., Raymond P=
anko)
Solution Manual Corporate Computer and Network Security (2nd Ed., Raymond P=
anko)
Solution Manual IP Telephony Using CallManager Express Lab Portfolio (Chery=
l Schmidt & Ernie Friend)
Solution Manual High-Speed Networks and Internets : Performance and Quality=
 of Service (2nd Ed., William Stallings)
Solution Manual Object-Oriented Modeling and Design with UML (2nd Ed., Mich=
ael Blaha & James Rumbaugh)
Solution Manual Operating Systems : Internals and Design Principles (5th Ed=
., William Stallings)
Solution Manual Operating Systems : Internals and Design Principles (6th Ed=
., William Stallings)
Solution Manual Distributed Systems : Principles and Paradigms (2nd Ed., Ta=
nenbaum & Van Steen)
Solution Manual Modern Operating Systems (3rd Ed., Andrew Tanenbaum)
Solution Manual Computer Networks (4th Ed., Andrew S. Tanenbaum)
Solution Manual Computer Networks (5th Ed., Andrew S. Tanenbaum, David J. W=
etherall)
Solution Manual Operating Systems Design and Implementation (3rd Ed., Andre=
w Tanenbaum & Albert Woodhull)
Solution Manual UNIX Unbounded : A Beginning Approach (5th Ed., Amir Afzal)
Solution Manual Introduction to Operating Systems and Networks (Ruth Watson=
)
Solution Manual Operating Systems (3rd Ed., Harvey Deitel, Paul Deitel & Da=
vid Choffnes)
Solution Manual Operating Systems Principles (Lubomir Bic & Alan Shaw)

Solution Manual A Practical Guide to Linux : Commands, Editors, and Shell P=
rogramming (Mark Sobell)
Solution Manual A Practical Guide to Red Hat Linux : Fedora Core and Red Ha=
t Enterprise Linux (2nd Ed., Mark Sobell)
Solution Manual A Practical Guide to Red Hat Linux : Fedora Core and Red Ha=
t Enterprise Linux (3rd Ed., Mark Sobell)
Solution Manual A Practical Guide to Fedora and Red Hat Enterprise Linux: C=
ollege Edition (Mark Sobell)
Solution Manual A Practical Guide to Ubuntu Linux (Mark Sobell)
Solution Manual Automata, Computability and Complexity : Theory and Applica=
tions (Elaine Rich)
Solution Manual Modern Digital Electronics (R.P. Jain)
Solution Manual Linear Systems and Signals (B.P. Lathi)
Solution Manual Modern Digital and Analog Communications Systems (3rd Ed., =
B. P. Lathi)
Solution Manual Introduction to Digital Systems (Milo D. Ercegovac, Lang & =
Moreno)
Solution Manual Embedded Systems : Architechture, Programming and Design (R=
aj Kamal)
Solution Manual Modern Power System Analysis (D. P. Kothari & I. J. Nagrath=
)
Solution Manual Basic Electrical Engineering (2nd Ed., D.P. Kothari, I.J. N=
agrath)
Solution Manual Electric Machines (3rd Ed., D.P. Kothari, I.J. Nagrath)
Solution Manual Circuits and Networks (A. Sudhakar & S. Palli Shyammohan)
Solution Manual Electrical and Electronic Technology (9th Ed., Edward Hughe=
s, John Hiley, Keith Brown & Ian McKenzie-Smith)
Solution Manual Electrical and Electronic Technology (10th Ed., Edward Hugh=
es, John Hiley, Keith Brown & Ian McKenzie-Smith)
Solution Manual Electric Motors and Drives : Fundamentals, Types and Applic=
ations (3rd Ed., Austin Hughes)=20
Solution Manual Modern Processor Design : Fundamentals of Superscalar Proce=
ssors (John P. Shen)
Solution Manual Computer Networks : Principles, Technologies and Protocols =
for Network Design (N. Olifer & V. Olifer)=20
Solution Manual Computer Networking : Internet Protocols in Action (Jeanna =
Matthews)
Solution Manual Computer Organization (5th Ed., Hamacher et al.)
Solution Manual CMOS Digital Integrated Circuits : Analysis and Design (3rd=
 Ed., Sung-Mo Kang & Yusuf Leblebici)
Solution Manual Introduction to Logic Design (1st Ed., Alan B Marcovitz)=20
Solution Manual Introduction to Logic Design (2nd Ed., Alan B Marcovitz)=20
Solution Manual Introduction to Logic Design (3rd Ed., Alan B Marcovitz)=20
Solution Manual Introduction to Logic and Computer Design (Alan B Marcovitz=
)
Solution Manual Digital Principles and Design (Donald D. Givone)
Solution Manual Programmable Logic Controllers (3rd Ed., Frank Petruzella)
Solution Manual Programmable Logic Controllers (4th Ed., Frank Petruzella)

NOTE :  "THIS SERVICE IS NOT AVAILABLE FOR :   CHINA, INDIA, RUSSIA, PAKIST=
AN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MAL=
DIVES, BHUTAN & COLOMBIA".
```

If your wanted solutions manual is not in this list, also can ask me if is =
available (it is a partial list). Then if you need solutions manual only co=
ntact me by email.=20

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TE=
ST BANKS.

I do not review the forums, just send me an email. Please do not use emails=
 from servers "LIVE" , all they are take as spam emails in my inbox.

- Electrical, Electronics & Computer Engineering :

Solution Manual Antenna Theory and Design (2nd Ed., Stutzman & Thiele)
Solution Manual Antenna Theory and Design (3rd Ed., Stutzman & Thiele)
Solution Manual Antennas for All Applications (3rd Ed., John Kraus & Ronald=
 Marhefka)
Solution Manual Principles of Neurocomputing for Science and Engineering (F=
redric M. Ham & Ivica Kostanic)
Solution Manual Introduction to Algorithms (2nd Ed., Cormen, et al.)
Solution Manual Algorithms (Dasgupta, et al.)
Solution Manual Introduction to Random Signals and Applied Kalman Filtering=
 with Matlab Exercises (4th Ed., Robert Grover Brown, Patrick Y. C. Hwang)
Solution Manual Applied Operating Systems Concepts (Silberschatz, Galvin & =
Gagne)
Solution Manual Operating System Concepts (6th Ed., Silberschatz, Galvin & =
Gagne)
Solution Manual Operating System Concepts (7th Ed., Silberschatz, Galvin & =
Gagne)
Solution Manual Operating System Concepts (8th Ed., Silberschatz, Galvin & =
Gagne)
Solution Manual Operating Systems Concepts with Java (6th Ed., Silberschatz=
, Galvin & Gagne)
Solution Manual Operating System Concepts with Java (7th Ed., Silberschatz,=
 Galvin & Gagne)
Solution Manual Operating System Concepts with Java (8th Ed., Silberschatz,=
 Galvin & Gagne)
Solution Manual C++ Program Design (3rd Ed., Cohoon & Davidson)
Solution Manual Java : Program Design 5.0 (Cohoon & Davidson)
Solution Manual Programming in C++ : Lessons and Applications (Timothy B. D=

'Orazio)
Solution Manual Applied C : An Introduction and More (Alice Fischer)
Solution Manual Programming Languages : Principles and Paradigms (1st Ed., =
Allen Tucker & Robert Noonan)
Solution Manual Programming Languages : Principles and Paradigms (2nd Ed., =
Allen Tucker & Robert Noonan)
Solution Manual Introduction to Parallel Computing (2nd Ed., Grama, Karypis=
, Kumar & Gupta)
Solution Manual Parallel Programming in C with MPI and Open MP (Michael J Q=
uinn)
Solution Manual Data Communications and Network Security (Houston H. Carr &=
 Charles Snyder)
Solution Manual Data Communications and Networks (David Miller)
Solution Manual Management Information Systems (3rd Ed., Post & Anderson)
Solution Manual Management Information Systems (4th Ed., Post & Anderson)
Solution Manual Database Management Systems (3rd Ed. Post)
Solution Manual Management Information Systems (9th Ed., James A. O'Brien, =
George Marakas)
Solution Manual Introduction to Systems Analysis and Design (Whitten & Bent=
ley)
Solution Manual Systems Analysis & Design : An Active Approach (2nd Ed., Ma=
rakas)
Solution Manual An Introduction to Object-Oriented Programming with Java (4=
th Ed., C. Thomas Wu - Otani)
Solution Manual An Introduction to Object-Oriented Programming with Java (5=
th Ed., C. Thomas Wu - Otani)
Solution Manual A Comprehensive Introduction to Object-Oriented Programming=
 With Java (C. Thomas Wu)
Solution Manual Data Structures and the Java Collections Framework (1st Ed.=
, William Collins)
Solution Manual Data Structures and the Java Collections Framework (2nd Ed.=
, William Collins)
Solution Manual Data Structures and the Standard Template Library (William =
Collins)
Solution Manual Database System Concepts (4th Ed., Silberschatz)
Solution Manual Database System Concepts (5th Ed., Silberschatz)
Solution Manual Database System Concepts (6th Ed., Silberschatz, Korth & Su=
darshan)
Solution Manual Database Management Systems (3rd Ed., Ramakrishnan & Gehrke=
)
Solution Manual Fundamentals of Network Security (Eric Maiwald)
Solution Manual Computing Concepts (1st Ed., Haag, et al.)
Solution Manual Computing Concepts (2nd Ed., Haag et al.)
Solution Manual Microsoft Office 2003 (Haag et al.)
Solution Manual Advanced Programming Using Visual Basic .NET (2nd Ed., Juli=
a Case Bradley & Anita Millspaugh)
Solution Manual Advanced Programming Using Visual Basic 2005 (3rd Ed., Juli=
a Case Bradley & Anita Millspaugh)
Solution Manual Programming with Java (Julia Case Bradley & Anita Millspaug=
h)
Solution Manual Programming in C#.Net (1st Ed., Julia Case Bradley & Anita =
Millspaugh)
Solution Manual Programming in Visual C# 2005 (2nd Ed., Julia Case Bradley =

& Anita Millspaugh)
Solution Manual Learning Programming Using Visual Basic.Net (Bill Burrows &=
 Joe Lanford)
Solution Manual Programming in Visual Basic.NET : Visual Basic.NET 2005 (6t=
h Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming in Visual Basic .Net : 2003 Update Edition (5th=
 Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Survey of Operating Systems (2nd Ed., Jane Holcombe & Charl=
es Holcombe)
Solution Manual Principles of Voice and Data Communications (Regis J. Bates=
 & Marcus Bates)
Solution Manual Mike Meyers' Network+ Guide To Managing and Troubleshooting=
 Networks (Michael Meyers)
Solution Manual Introduction to Windows Server 2003 (Eric Ecklund)
Solution Manual Programming The Web : An Introduction (Barrie Sosinsky & Va=
lda Hilley)
Solution Manual Programming The Web Using XML (Ellen Pearlman & Eileen Mull=
in)
Solution Manual Internet Marketing : Building Advantage in a Networked Econ=
omy (2nd Ed., Rafi Mohammed et al.)
Solution Manual Internet Technologies at Work (Fred T. Hofstetter)
Solution Manual Internet Literacy (4th Ed., Fred T. Hofstetter)
Solution Manual Software Engineering : A Practitioner's Approach (5th Ed., =
Roger Pressman)
Solution Manual Software Engineering : A Practitioner's Approach (6th Ed., =
Roger Pressman)=20
Solution Manual Software Engineering : A Practitioner's Approach (7th Ed., =
Roger Pressman)
Solution Manual Web Engineering : A Practioner's Approach (1st Ed., Roger S=
. Pressman & David Lowe)
Solution Manual Object-Oriented Software Engineering (Stephen Schach)
Solution Manual Object-Oriented and Classical Software Engineering (5th Ed.=
, Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (6th Ed.=
, Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (7th Ed.=
, Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (8th Ed.=
, Steve Schach)
Solution Manual Introduction to Object-Oriented Analysis and Design (Steve =
Schach)
Solution Manual Communication Networks (2nd Ed., Alberto Leon-Garcia & Indr=
a Widjaja) =20
Solution Manual Fundamentals of Digital Logic with Verilog Design (1st Ed.,=
 Stephen Brown & Zvonko Vranesic)
Solution Manual Fundamentals of Digital Logic with Verilog Design (2nd Ed.,=
 Stephen Brown & Zvonko Vranesic)
Solution Manual Continuous and Discrete Control Systems (John Dorsey)
Solution Manual Engineering Circuit Analysis (6th Ed., William Hayt, Jack K=
emmerly & Steven Durbin)=20
Solution Manual Engineering Circuit Analysis (7th Ed., William Hayt, Jack K=
emmerly & Steven Durbin)=20
Solution Manual Engineering Electromagnetics (7th Ed., William Hayt & John =

Buck)
Solution Manual Engineering Electromagnetics (8th Ed., William Hayt & John =
Buck)
Solution Manual Principles of Electronic Materials and Devices (2nd Ed., Sa=
fa O. Kasap)
Solution Manual Principles of Electronic Materials and Devices (3rd Ed., Sa=
fa O. Kasap)
Solution Manual Programming in Haskell (Graham Hutton)
Solution Manual Probability and Random Processes With Applications to Signa=
l Processing and Communications (Miller & Childers)
Solution Manual Logic in Computer Science : Modelling and Reasoning about S=
ystems (2nd Ed., Michael Huth & Mark Ryan)
Solution Manual Introduction to Distributed Algorithms (2nd., Gerard Tel)
Solution Manual Information Theory, Inference and Learning Algorithms (Davi=
d J. C. MacKay)
Solution Manual Digital Systems Engineering (William Dally & John Poulton)
Solution Manual Concepts in Programming Languages (by John Mitchell)
Solution Manual Simulation Modeling and Analysis (3rd Ed., Averill Law & Da=
vid Kealton)
Solution Manual Simulation Modeling and Analysis with Expertfit Software (4=
th Ed., Averill Law)
Solution Manual System Modeling and Analysis : Foundations of System Perfor=
mance Evaluation (Hisashi Kobayashi & Brian Mark)
Solution Manual Wireless Communications (Andrea Goldsmith)
Solution Manual Testing of Digital Systems (N. K. Jha & S. Gupta)
Solution Manual Space-Time Coding (Hamid Jafarkhani)
Solution Manual Space-Time Block Coding for Wireless Communications (Erik L=
arsson & Petre Stoica)
Solution Manual Smart Electronic Materials : Fundamentals and Applications =
(Jasprit Singh)
Solution Manual Radio-Frequency Electronics : Circuits and Applications (Jo=
n Hagen)
Solution Manual Photonic Devices (Jia-ming Liu)
Solution Manual Networking Wireless Sensors (Bhaskar Krishnamachari)
Solution Manual Mobile Wireless Communications (Mischa Schwartz)
Solution Manual Introduction to Color Imaging Science (Hsien-Che Lee)
Solution Manual Fundamentals of Wireless Communication (David Tse & Pramod =
Viswanath)
Solution Manual Fundamentals of Modern VLSI Devices (Yuan Taur & Tak H. Nin=
g)
Solution Manual Electronic and Optoelectronic Properties of Semiconductor S=
tructures (Jasprit Singh)
Solution Manual An Introduction to Statistical Signal Processing (Robert M.=
 Gray)
Solution Manual An Introduction to Radio Frequency Engineering (Christopher=
 Coleman)
Solution Manual Algebraic Codes for Data Transmission (Richard Blahut)
Solution Manual Fundamentals of Solid State Electronics (C.T. Sah)
Solution Manual Fundamentals of Solid State Engineering (2nd Ed., Manijeh R=
azeghi)
Solution Manual Robot Modeling and Control (Spong, Hutchinson & Vidyasagar)
Solution Manual Theory of Applied Robotics : Kinematics, Dynamics and Contr=
ol (Reza N. Jazar)

Solution Manual Control of Robot Manipulators in Joint Space (R. Kelly, V. =
Santib=E1=F1ez, A. Lor=EDa)
Solution Manual Modelling and Control of Robot Manipulators (2nd Ed., Loren=
zo Sciavicco, Bruno Siciliano)=20
Solution Manual Robotics : Modelling, Planning and Control (Bruno Siciliano=
, Lorenzo Sciavicco, Luigi Villani & Giuseppe Oriolo)
Solution Manual Fundamentals of Semiconductor Fabrication (Gary S. May, Sim=
on M. Sze)
Solution Manual Semiconductor Devices : Physics and Technology (2nd Ed, Sim=
on M. Sze)
Solution Manual Semiconductor Devices : Physics and Technology (3rd Ed, Sim=
on M. Sze & Ming-Kwei Lee)
Solution Manual Electric Machinery (6th Ed., Fitzgerald)
Solution Manual Electric Machinery Fundamentals (4th Ed., Chapman)
Solution Manual Electric Machinery Fundamentals (5th Ed., Chapman)
Solution Manual Electric Machinery and Power System Fundamentals (Chapman)
Solution Manual Local Area Networks (2nd Ed., Keiser)
Solution Manual Signals and Systems : Analysis of Signals Through Linear Sy=
stems (1st Ed., M.J. Roberts)
Solution Manual Fundamentals of Signals and Systems (M.J. Roberts)
Solution Manual Introduction to Signals and Systems (Lindner)
Solution Manual Semiconductor Physics and Devices : Basic Principles (3rd E=
d., Donald Neamen)
Solution Manual Semiconductor Physics and Devices : Basic Principles (4th E=
d., Donald Neamen)
Solution Manual An Introduction to Semiconductor Devices (Donald Neamen)
Solution Manual Microelectronic Circuit Analysis and Design (3rd Ed., Donal=
d Neamen)
Solution Manual Microelectronic Circuit Analysis and Design (4th Ed., Donal=
d Neamen)
Solution Manual Electronic Circuit Analysis and Design (2nd Ed., Donald Nea=
men)
Solution Manual Design for Electrical and Computer Engineers (1st Ed., Ralp=
h Ford & Chris Coulston)=20
Solution Manual Fundamentals of Modeling and Analyzing Engineering Systems =
(Cha, Rosenberg, Dym)

Solution Manual XML: Language Mechanics and Applications (Dwight Peltzer)
Solution Manual Practical Perl with CGI Applications (Elizabeth Chang)
Solution Manual Developing Web Applications with Active Server Pages (Thom =
Luce)
Solution Manual Structure and Interpretation of Signals and Systems (Edward=
 A. Lee & Pravin Varaiya)
Solution Manual Languages and Machines : An Introduction to the Theory of C=
omputer Science (2nd Ed., Thomas Sudkamp)
Solution Manual Languages and Machines : An Introduction to the Theory of C=
omputer Science (3rd Ed., Thomas Sudkamp)
Solution Manual How to Break Software Security (James A. Whittaker & Herber=
t H. Thompson)
Solution Manual Software Quality Assurance : From Theory to Implementation =
(Daniel Galin)
Solution Manual Object Oriented Software Development Using Java (2nd Ed., X=

```
iaoping Jia)
Solution Manual Introduction to the Team Software Process (Watts S. Humphre=
y)
Solution Manual Software Project Management : A Real-World Guide to Success=
 (Joel Henry)
Solution Manual Software Engineering (7th Ed., Ian Sommerville)
Solution Manual Software Engineering (8th Ed., Ian Sommerville)
Solution Manual Software Engineering (9th Ed., Ian Sommerville)
Solution Manual Software Engineering (3rd Ed., Shari Lawrence Pfleeger & Jo=
anne Atlee)
Solution Manual Software Engineering : Theory and Practice (4th Ed., Shari =
Lawrence Pfleeger & Joanne Atlee)
Solution Manual Object-Oriented Programming featuring Graphical Application=
s in Java (Michael Laszlo)
Solution Manual Project-Based Software Engineering : An Object-Oriented App=
roach (Evelyn Stiller & Cathie LeBlanc)
Solution Manual Engineering of Software, The: A Technical Guide for the Ind=
ividual (Dick Hamlet & Joe Maybee)
Solution Manual Concepts of Programming Languages (7th Ed., Robert W. Sebes=
ta)
Solution Manual Concepts of Programming Languages (8th Ed., Robert W. Sebes=
ta)
Solution Manual Concepts of Programming Languages (9th Ed., Robert W. Sebes=
ta)
Solution Manual Advanced Java : Internet Applications (2nd Ed., Art Gittlem=
an)
Solution Manual Objects to Components with Java 2 Platform (Art Gittleman)
Solution Manual C for Java Programmers (Tomasz Muldner)
Solution Manual Pointers on C (Kenneth Reek)
Solution Manual C++ Programming with Design Patterns Revealed (Tomasz Muldn=
er)
Solution Manual The C++ Programming Language (3rd Ed., Bjarne Stroustrup)
Solution Manual Operating Systems : A Systematic View (6th Ed., William S. =
Davis & T.M. Rajkumar)
Solution Manual Unix: The Textbook (2nd Ed., Syed Mansoor Sarwar, Robert Ko=
retsky & Syed Aqeel Sarwar)
Solution Manual Operating Systems (3rd Ed., Gary Nutt)
Solution Manual LINUX & UNIX Programming Tools : A Primer for Software Deve=
lopers (Syed Mansoor Sarwar & Khaled H. Al-Saqabi)
Solution Manual Addison-Wesley's Interactive Linux Tutorial and Reference (=
Edutrends, Inc.)
Solution Manual Linux : The Textbook (Syed Mansoor Sarwar, Robert Koretsky =
& Syed Aqeel Sarwar)
Solution Manual Kernel Projects for Linux (Gary Nutt)
Solution Manual OSP : An Environment for Operating System Projects (Michael=
 Kifer & Scott A. Smolka)
Solution Manual Distributed Computing : Principles and Applications (M.L. L=
iu)
Solution Manual Distributed Operating Systems and Algorithm Analysis (Randy=
 Chow & Theodore Johnson)
Solution Manual Mastering Networks : An Internet Lab Manual (Jorg Liebeherr=
 & Magda El Zarki)
Solution Manual Computer Networking Complete Package (3rd Ed., James Kurose=
 & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach Featuring the Int=
ernet (3rd Ed., James Kurose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach (4th Ed., James K=
urose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach (5th Ed., James K=
urose & Keith Ross)
Solution Manual Producing Great Sound for Film and Video (3rd Ed., Jay Rose=
)
Solution Manual Network Management : Principles and Practice (Mani Subraman=
ian)
Solution Manual Computer Security : Art and Science (Matt Bishop)
Solution Manual Introduction to Computer Security (Matt Bishop)
Solution Manual Creating Powerful Brands (4th Ed., Leslie de Chernatony, Ma=
lcolm McDonald, Elaine Wallace)
Solution Manual How to Break Software Security (James A. Whittaker & Herber=
t H. Thompson)
Solution Manual Parallel Programming in C with MPI and Open MP (Michael Qui=
nn)
Solution Manual Modern Recording Techniques (6th Ed., Miles Huber & Runstei=
n)
Solution Manual Creating Powerful Radio : Getting, Keeping and Growing Audi=
ences News, Talk, Information & Personality Broadcast, HD, Satellite & Inte=
rnet (Valerie Geller)
Solution Manual Electronic Media Law and Regulation (5th Ed., Kenneth Creec=
h)
Solution Manual Electronic Media Management, Revised (5th Ed., Pringle & St=
arr)
Solution Manual Convergent Journalism an Introduction: Writing and Producin=
g Across Media (Quinn & Filak)
Solution Manual Flash Journalism : How to Create Multimedia News Packages (=
Mindy McAdams)

List of Solutions Manuals and Test Banks=20
----------------------------------------

contact to :         mattosbw1@gmail.com                     mattosbw1(at)g=
mail.com
  =20

NOTE :  "THIS SERVICE IS NOT AVAILABLE FOR :   CHINA, INDIA, RUSSIA, PAKIST=
AN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MAL=
DIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is =
available (it is a partial list). Then if you need solutions manual only co=
ntact me by email.=20

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TE=
ST BANKS.

I do not review the forums, just send me an email. Please do not use emails=
 from servers "LIVE" , all they are take as spam emails in my inbox.
```

```
- Math, Statistics & Probability :
----------------------------------

Solution manual Advanced Engineering Mathematics (8th Ed., Erwin Kreyszig)
Solution manual Advanced Engineering Mathematics (9th Ed., Erwin Kreyszig)
Solution manual Advanced Engineering Mathematics (10th Ed., Erwin Kreyszig)
Solution manual Advanced Engineering Mathematics (2nd Ed, Michael Greenberg=
)
Solution manual Advanced Engineering Mathematics (6th Ed., Peter O'Neil)=20
Solution manual Statistics and Finance : An Introduction (David Ruppert)
Solution manual A Survey of Classical and Modern Geometries : With Computer=
 Activities (Arthur Baragar)
Solution manual Differential Equations for Engineers and Scientists (Yunus =
A. Cengel, William J. Palm III)=20
Solution manual Mathematics for Carpentry and the Construction Trades (3rd =
Ed., Alfred P. Webster & Kathryn E. Bright)
Solution manual Calculus : Early Transcendental Functions (3rd Ed., Robert =
T. Smith & Roland B. Minton)
Solution manual Calculus : Early Transcendental Functions (4th Ed., Robert =
T. Smith & Roland B. Minton)
Solution manual Elements of Engineering Probability and Statistics (Rodger =
E. Ziemer)
Solution manual Statistics and Probability for Engineers and Scientists, Pr=
eliminary Edition (Bhisham C. Gupta, Irwin Guttman)
Solution manual Statistics and Data Analysis : From Elementary to Intermedi=
ate (Ajit Tamhane, Dorothy Dunlop)
Solution manual Statistics and Data Analysis for Financial Engineering (Dav=
id Ruppert)
Solution manual Mathematical Physics with Partial Differential Equations (J=
ames Kirkwood)
Solution manual Essential Statistics, Regression, and Econometrics (Gary Sm=
ith)
Solution manual Mathematical Methods for Physicists : A Comprehensive Guide=
 (7th Ed., George Arfken, Hans Weber & Frank Harris)
Solution manual Statistics for Physical Sciences - An Introduction (Brian M=
artin)
Solution Manual Mathematical Statistics for Economics and Business (Ron C. =
Mittelhammer)
Solution manual Advanced Modern Engineering Mathematics (3rd Ed., Glyn Jame=
s)
Solution manual Modern Engineering Mathematics (4th Ed., Glyn James)
Solution manual Foundations of Geometry (2nd Ed., Gerard Venema)
Solution manual Discrete Mathematics and Its Applications (7th Ed., Kenneth=
 Rosen)
Solution manual Differential Equations and Dynamical Systems (3rd Ed., Lawr=
ence Perko)=20
Solution manual Introductory Differential Equations with Boundary Value Pro=
```

blems (3rd Ed., Martha Abell & James Braselton)
Solution manual A Modern Introduction to Differential Equations (2nd Ed., H=
enry J. Ricardo)=20
Solution manual Elementary Differential Equations (7th Ed., Boyce)
Solution manual Elementary Differential Equations (8th Ed., Boyce & Diprima=
)
Solution manual Elementary Differential Equations (9th Ed., Boyce & Diprima=
)
Solution manual Elementary Differential Equations and Boundary Value Proble=
ms (7th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations and Boundary Value Proble=
ms (8th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations and Boundary Value Proble=
ms (9th Ed., Boyce & Diprima)
Solution manual Differential Equations : An Introduction to Modern Methods =
and Applications (James Brannan & William Boyce)
Solution manual Differential Equations with Boundary Value Problems : An In=
troduction to Modern Methods and Applications (James Brannan & William Boyc=
e)
Solution manual Calculus (Briggs & Cochran)
Solution manual Calculus - Single Variable (Briggs & Cochran)
Solution manual Calculus - MultiVariable (Briggs & Cochran)
Solution manual Calculus : Early Transcendentals (Briggs & Cochran)
Solution manual Calculus : Early Transcendentals - Single Variable (Briggs =
& Cochran)
Solution manual Calculus : Early Transcendentals - MultiVariable (Briggs & =
Cochran)
Solution manual Calculus for Scientists and Engineers : Early Transcendenta=
ls (Briggs, Cochran & Gillett)
Solution manual Calculus for Scientists and Engineers : Early Transcendenta=
ls - Single Variable (Briggs, Cochran & Gillett)
Solution manual Calculus for Scientists and Engineers : Early Transcendenta=
ls - Multivariable (Briggs, Cochran & Gillett)
Solution manual An Introduction to Mathematical Cryptography (J. Hoffstein,=
 J. Pipher, J.H. Silverman)
Solution manual Practical Business Statistics (Andrew Siegel)
Solution manual Advanced Calculus : A Transition to Analysis (Thomas Dence =
& Joseph Dence)
Solution manual Calculus : Early Transcendentals Combined (8th Ed., Anton, =
Bivens & Davis)
Solution manual Calculus : Early Transcendentals Combined (9th Ed., Anton, =
Bivens & Davis)
Solution manual Calculus : Multivariable (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Multivariable (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Early Transcendentals Single Variable (8th Ed., =
Anton, Bivens & Davis)
Solution manual Calculus : Early Transcendentals Single Variable (9th Ed., =
Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Combined (8th Ed., Anton, B=
ivens & Davis)
Solution manual Calculus : Late Transcendentals Combined (9th Ed., Anton, B=
ivens & Davis)
Solution manual Calculus : Late Transcendentals Single Variable (8th Ed., A=

nton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Single Variable (9th Ed., A=
nton, Bivens & Davis)
Solution manual Introduction to the Finite Element Method : Theory, Program=
ming and Applications (Erik G. Thompson)
Solution manual A Physicist's Guide to Mathematica (2nd Ed., Patrick Tam)
Solution manual Mathematics for Engineers : A Modern Interactive Approach (=
3rd., Anthony Croft & Robert Davison)
Solution manual Measurement and Data Analysis for Engineering and Science (=
Patrick F Dunn)
Solution manual Elementary Linear Algebra (4th Ed., Stephen Andrilli & Davi=
d Hecker)
Solution manual Elementary Linear Algebra Edition Abridged (9th Ed., Anton =
& Rorres)
Solution manual Elementary Linear Algebra (9th Ed., Anton)
Solution manual Elementary Linear Algebra with Applications (9th Ed., Anton=
 & Rorres)
Solution manual Boundary Value Problems and Partial Differential Equations =
(6th Ed., David Powers)
Solution manual Introductory Statistics : Using Technology (5th Ed., Prem S=
. Mann)
Solution manual Introductory Statistics (6th Ed., Prem S. Mann)
Solution manual Introductory Statistics (7th Ed., Prem S. Mann)
Solution manual Basic Real Analysis (Houshang H. Sohrab)
Solution manual Essentials of Integration Theory for Analysis (Daniel W. St=
roock)
Solution manual Statistical Methods (3rd Ed., Rudolf Freund, Donna Mohr, Wi=
lliam Wilson)
Solution manual Doing Bayesian Data Analysis : A Tutorial Introduction with=
 R (John Kruschke)
Solution manual Modern Algebra : An Introduction (6th Ed., John Durbin)
Solution manual The Art and Craft of Problem Solving (2nd Ed., Paul Zeitz)
Solution manual Numerical Linear Algebra (Gr=E9goire Allaire, Sidi Mahmoud =
Kaber, K. Trabelsi)
Solution manual Introductory Statistics for the Behavioral Sciences (6th Ed=
., Welkowitz, Cohen & Ewen)
Solution manual Statistics : Principles and Methods (5th Ed., Richard Johns=
on)
Solution manual Statistics : Principles and Methods (6th Ed., Richard Johns=
on)
Solution manual Statistical Bioinformatics : with R (Sunil K. Mathur)
Solution manual A Modern Introduction to Differential Equations (2nd Ed., H=
enry Ricardo)
Solution manual Parameter Estimation and Inverse Problems (Richard Aster, B=
rian Borchers & Clifford Thurber)
Solution manual Parameter Estimation and Inverse Problems (2nd Ed., Richard=
 Aster, Brian Borchers & Clifford Thurber)
Solution manual Codes : An Introduction to Information Communication and Cr=
yptography (Norman L. Biggs)
Solution manual Geometry and Its Applications (2nd Ed., Walter A. Meyer)
Solution manual Elementary Differential Geometry (2nd Ed., A.N. Pressley)
Solution manual Fractal Geometry : Mathematical Foundations and Application=
s (2nd Ed., Kenneth Falconer)

Solution manual Analytical and Computational Methods of Advanced Engineerin=
g Mathematics (Grant B. Gustafson & Calvin H. Wilcox)
Solution manual How to Read and Do Proofs : An Introduction to Mathematical=
 Thought Processes (4th Ed., Daniel Solow)
Solution manual How to Read and Do Proofs : An Introduction to Mathematical=
 Thought Processes (5th Ed., Daniel Solow)
Solution manual A Probability Path (Sidney Resnick)
Solution manual Adventures in Stochastic Processes (Sidney I. Resnick)
Solution manual Probability, Reliability, and Statistical Methods in Engine=
ering Design (Achintya Haldar, Sankaran Mahadevan)
Solution manual An Engineers Guide to MATLAB (3rd Ed., Magrab, Azarm, Balac=
handran, Duncan, Herold & Walsh)
Solution manual Intuitive Probability and Random Processes using MATLAB (St=
even Kay)
Solution manual Modeling Random Processes for Engineers and Managers (James=
 Solberg)
Solution manual Probability and Random Processes with Applications to Signa=
l Processing (3rd Ed., Henry Stark & John W. Woods)
Solution manual Probability, Statistics, and Random Processes for Engineers=
 (4th Ed., Henry Stark & John W. Woods)
Solution manual Probability, Statistics, and Random Processes For Electrica=
l Engineering (3rd Ed., Alberto Leon-Garcia)
Solution manual Probability Concepts in Engineering : Emphasis on Applicati=
ons to Civil and Environmental Engineering (2nd Ed., Ang & Tang)
Solution manual Applied Statistics for Engineers and Physical Scientists (3=
rd Ed., Johannes Ledolter & Robert Hogg)
Solution manual Applied Statistics and Probability for Engineers (3rd Ed., =
Montgomery & Runger)
Solution manual Applied Statistics and Probability for Engineers (4th Ed., =
Montgomery & Runger)
Solution manual Applied Statistics and Probability for Engineers (5th Ed., =
Montgomery & Runger)
Solution manual Engineering Statistics (3rd Ed., Montgomery, Runger & Hubel=
e)
Solution manual Engineering Statistics (4th Ed., Montgomery, Runger & Hubel=
e)
Solution manual Engineering Statistics (5th Ed., Montgomery, Runger & Hubel=
e)
Solution manual Introduction to Statistical Quality Control (5th Ed., Montg=
omery)
Solution manual Introduction to Statistical Quality Control (6th Ed., Montg=
omery)
Solution manual Introduction to Statistical Quality Control (7th Ed., Montg=
omery)
Solution manual Statistical Quality Control : A Modern Introduction - Inter=
national Student Version (6th Ed., Montgomery)
Solution manual Statistical Quality Control : A Modern Introduction - Inter=
national Student Version (7th Ed., Montgomery)
Solution manual Calculus : One Variables (10th Ed., Salas, Hille, Etgen)
Solution manual Calculus : One and Several Variables (8th Ed., Salas, Hille=
, Etgen)
Solution manual Calculus : One and Several Variables (10th Ed., Salas, Hill=
e, Etgen)

Solution manual Squaring the Circle : Geometry in Art and Architecture (Pau=
l Calter)
Solution manual Technical Mathematics (5th Ed., Paul Calter & Michael Calte=
r)
Solution manual Technical Mathematics with Calculus (5th Ed., Paul Calter &=
 Michael Calter)
Solution manual Technical Mathematics with Calculus, Canadian Edition (Paul=
 Calter & Michael Calter)
Solution manual Technical Mathematics with Calculus, 2nd Canadian Edition (=
Paul Calter, Michael Calter, Paul Wraight, Don Spencer)
Solution manual Technical Mathematics with Calculus (6th Ed., Paul Calter &=
 Michael Calter)
Solution manual Techniques of Problem Solving (Luis Fern=E1ndez, Haedeh Goo=
ransarab)
Solution manual Probability and Statistics in Engineering (4th Ed., Hines, =
Montgomery, Goldsman & Borror)
Solution manual A First Course in Design and Analysis of Experiments (Gary =
W. Oehlert)
Solution manual Design and Analysis of Experiments (6th Ed., Douglas Montgo=
mery)
Solution manual Design and Analysis of Experiments (7th Ed., Douglas Montgo=
mery)
Solution manual Design and Analysis of Experiments (8th Ed., Douglas Montgo=
mery)
Solution Manual Experimental Methods for Engineers (8th Ed., Jack P. Holman=
)
Solution manual Introduction to Engineering Experimentation (2nd Ed., Wheel=
er & Ganji)
Solution manual Introduction to Engineering Experimentation (3rd Ed., Wheel=
er & Ganji)
Solution manual Introduction to the Design & Analysis of Experiments (Canav=
os & Koutrouvelis)
Solution manual Modern Methods For Quality Control and Improvement (2nd Ed.=
, Wadsworth, Stephens, Godfrey)
Solution manual Essential Statistics for Economics, Business and Management=
 (Teresa Bradley)
Solution manual Statistics and Econometrics : Methods and Applications (Ash=
enfelter, Levine & Zimmerman)
Solution manual Applied Combinatorics (5th Ed., Alan Tucker)
Solution manual Applied Combinatorics (6th Ed., Alan Tucker)
Solution manual Vector Calculus (Miroslav Lovric)
Solution manual Applied Multivariate Techniques (Subhash Sharma)
Solution manual Mathematical Modeling (3rd Ed., Mark Meerschaert)
Solution manual Discrete Mathematics : Mathematical Reasoning and Proof wit=
h Puzzles, Patterns, and Games (Douglas Ensley, J. Winston Crawley)
Solution manual Probability, Random Variables and Random Signal Principles =
(4th Ed., Peyton Z., Jr. Peebles)
Solution manual Introduction to C++, Excel MATLAB & Basic Engineering Numer=
ical Methods V1.1 (Harvey Stenger & Charles Smith)
Solution manual Numerical Methods for Engineers and Scientists : An Introdu=
ction with Applications Using MATLAB (1st Ed., Amos Gilat & Vish Subramania=
m)
Solution manual Numerical Methods for Engineers and Scientists : An Introdu=

```
ction with Applications Using MATLAB (2nd Ed., Amos Gilat & Vish Subramania=
m)
Solution manual MATLAB : An Introduction with Applications (2nd Ed., Amos G=
ilat)
Solution manual MATLAB : An Introduction with Applications (3rd Ed., Amos G=
ilat)
Solution manual MATLAB : An Introduction with Applications (4th Ed., Amos G=
ilat)
Solution manual Matlab : A Practical Introduction to Programming and Proble=
m Solving (Stormy Attaway)
Solution manual Matlab : A Practical Introduction to Programming and Proble=
m Solving (2nd Ed., Stormy Attaway)
Solution manual Data, Statistics, and Decision Models with Excel (Harnett &=
 Horrell)=20
Solution manual Understanding Analysis (Stephen Abbott)
Solution manual Time Series Analysis With Applications in R (2nd Ed., Jonat=
han D. Cryer & Kung-Sik Chan)
Solution manual Time Series Analysis and Its Applications : With R Examples=
 (2nd Ed., Robert Shumway & David Stoffer)
Solution manual Doing Statistics for Business with Excel : Data, Inference,=
 and Decision Making (2nd Ed. Pelosi & Sandifer)
Solution manual Engineering with Excel (3rd Ed., Ronald W. Larsen)
Solution manual Spreadsheet Tools for Engineers Using Excel 2007 (Byron Got=
tfried)
Solution manual Spreadsheet Tools for Engineers using Excel (2nd Ed. Byron =
Gottfried)
Solution manual Spreadsheet Tools for Engineers using Excel (3rd Ed. Byron =
Gottfried)
Solution manual Introduction to Matlab 7 (Etter, Kuncicky & Moore)
Solution manual Introduction to Matlab 6 for Engineers (1st Ed., William Pa=
lm III)
Solution manual Introduction to Matlab 7 for Engineers (2nd Ed., William Pa=
lm III)
Solution manual Introduction to Matlab for Engineers (3rd Ed., William Palm=
 III)
Solution manual A Concise Introduction to MATLAB (William J Palm III)
Solution manual Numerical Methods for Engineers (Bilal M. Ayyub, Richard H.=
 McCuen)
Solution manual Numerical Methods for Engineers (4th Ed. Steven Chapra, Ray=
mond Canale)
Solution manual Numerical Methods for Engineers (5th Ed. Steven Chapra, Ray=
mond Canale)
Solution manual Numerical Methods for Engineers (6th Ed. Steven Chapra, Ray=
mond Canale)
Solution manual Applied Numerical Methods with MATLAB for Engineers and Sci=
entists (1st Ed., Steven Chapra)
Solution manual Applied Numerical Methods with MATLAB for Engineers and Sci=
entists (2nd Ed., Steven Chapra)
Solution manual Applied Numerical Methods with MATLAB for Engineers and Sci=
entists (3rd Ed., Steven Chapra)
Solution manual MATLAB for Engineers (1st Ed., Holly Moore)
Solution manual MATLAB for Engineers (2nd Ed., Holly Moore)
Solution manual Statistics for Engineers and Scientists (1st Ed., William N=
```

avidi)
Solution manual Statistics for Engineers and Scientists (2nd Ed., William N=
avidi)
Solution manual Statistics for Engineers and Scientists (3rd Ed., William N=
avidi)
Solution manual Principles of Statistics for Engineers and Scientists (Will=
iam Navidi)
Solution manual Elementary Statistics (1st Ed., William Navidi, Barry Monk)
Solution manual Probability (Jim Pitman)
Solution manual Basic Probability Theory (Robert B. Ash)
Solution manual An Introduction to Stochastic Modeling (3rd Ed., Samuel Kar=
lin & Howard M. Taylor)
Solution manual An Introduction to Stochastic Modeling (4th Ed., Mark Pinsk=
y & Samuel Karlin)
Solution manual Stochastic Calculus for Finance (Steven E. Shreve)
Solution manual Markov Processes for Stochastic Modeling (Oliver Ibe)
Solution manual Mathematical Statistics with Applications (K.M. Ramachandra=
n & Chris Tsokos)
Solution manual Probability : A Graduate Course (Allan Gut)=20
Solution manual Linear Algebra Done Right (2nd Ed., Sheldon Axler)
Solution manual Precalculus : A Prelude to Calculus (Sheldon Axler)=20
Solution manual Statistics for Business (Derek Waller)
Solution manual An Introduction to the Mathematics of Financial Derivatives=
 (2nd Ed., Salih Neftci)
Solution manual Elementary Number Theory with Applications (2nd Ed., Thomas=
 Koshy)
Solution manual Introduction to Probability Models (9th Ed., Sheldon Ross)
Solution manual Introduction to Probability Models (10th Ed., Sheldon Ross)
Solution manual Introductory Statistics (2nd Ed., Sheldon Ross)
Solution manual Introductory Statistics (3rd Ed., Sheldon Ross)
Solution manual Introduction to Probability and Statistics for Engineers an=
d Scientists (4th Ed., Sheldon Ross)
Solution manual Basic Mathematics through Applications (4th Ed. by Akst, Br=
agg)
Solution manual Developmental Mathematics (6th Ed., Bittinger & Beecher)
Solution manual Developmental Mathematics (7th Ed., Bittinger & Beecher)
Solution manual Developmental Mathematics : Basic Mathematics and Algebra (=
1st Ed., Lial, Hornsby, McGinnis, Salzman & Hestwood)
Solution manual Developmental Mathematics : Basic Mathematics and Algebra (=
2nd Ed., Lial, Hornsby, McGinnis, Salzman & Hestwood)
Solution manual Essential Mathematics (2nd Ed., Margaret Lial & Stanley Sal=
zman)
Solution manual Essential Mathematics (3rd Ed., Margaret Lial & Stanley Sal=
zman)
Solution manual Prealgebra & Introductory Algebra (2nd Ed. by Elayn El Mart=
in-Gay)
Solution manual Prealgebra (5th Ed., Bittinger, Ellenbogen & Johnson)
Solution manual Prealgebra (5th Ed., Elayn El Martin-Gay)
Solution manual Prealgebra : An Integrated Approach (Lial & Hestwood)
Solution manual Integrated Arithmetic and Basic Algebra (4th Ed., Jordan & =
Palow)
Solution manual Introductory Algebra through Applications (1st Ed., Akst & =
Bragg)

Solution manual Introductory Algebra through Applications (2nd Ed., Akst & =
Bragg)
Solution manual Beginning Algebra (10th Ed., Lial, Hornsby & McGinnis)
Solution manual Elementary Algebra Early Graphing for College Students (3rd=
 Ed., Allen R. Angel)
Solution manual Intermediate Algebra with Applications & Visualization (3rd=
 Ed., Rockswold & Krieger)
Solution manual Intermediate Algebra (10th Ed., Lial, Hornsby & McGinnis)
Solution manual Beginning and Intermediate Algebra (4th Ed., Lial, Hornsby =
& McGinnis)
Solution manual Elementary and Intermediate Algebra : Graphs & Models (3rd =
Ed., Bittinger, Ellenbogen & Johnson)
Solution manual Algebra for College Students (4th Ed., Mark Dugopolski)
Solution manual Algebra for College Students (5th Ed., Mark Dugopolski)
Solution manual Algebra For College Students (6th Ed., Robert F Blitzer)
Solution manual Algebra for College Students (3rd Ed., Allen R. Angel)
Solution manual Algebra for College Students (6th Ed., Lial, Hornsby & McGi=
nnis)
Solution manual Statistics, Data Analysis, and Decision Modeling (3rd Ed., =
James Evans)
Solution manual Statistics, Data Analysis, and Decision Modeling (4th Ed., =
James Evans)
Solution manual College Geometry : A Discovery Approach (2nd Ed., David Kay=
)
Solution manual College Geometry : Using The Geometer's Sketchpad - Prelimi=
nary Edition (Barbara Reynolds & William Fenton)
Solution manual College Geometry : A Problem Solving Approach with Applicat=
ions (2nd Ed., Musser, Trimpe & Maurer)
Solution manual A Survey of Mathematics with Applications (8th Ed., Angel, =
Abbott & Runde)
Solution manual A Survey of Mathematics with Applications: Expanded Edition=
 (8th Ed., Angel, Abbott & Runde)
Solution manual Mathematical Ideas (11th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas: Expanded Edition (11th Ed., Miller, Hee=
ren & Hornsby)
Solution manual Mathematical Thinking : Problem-Solving and Proofs (2nd Ed.=
, John P. D'Angelo & Douglas B. West)
Solution manual Thinking Mathematically (4th Ed., Robert F. Blitzer)
Solution manual Introduction to Mathematical Thinking: Algebra and Number S=
ystems (Will J. Gilbert & Scott A. Vanstone)
Solution manual Mathematical Reasoning : Writing and Proof (1st Ed., Ted A.=
 Sundstrom)
Solution manual Mathematical Reasoning : Writing and Proof (2nd Ed., Ted A.=
 Sundstrom)
Solution manual Mathematical Reasoning for Elementary Teachers (4th Ed., Ca=
lvin T. Long & Duane W. DeTemple)
Solution manual Mathematical Reasoning for Elementary Teachers (5th Ed., Lo=
ng, DeTemple & Millman)
Solution manual Mathematics for Elementary School Teachers (4th Ed., O'Daff=
er, Charles, Cooney, Dossey & Schielack)
Solution manual Mathematics for Elementary Teachers (2nd Ed., Sybilla Beckm=
ann)
Solution manual Finite Mathematics and Calculus with Applications (7th Ed.,=

Lial, Greenwell & Ritchey)
Solution manual Finite Mathematics and Calculus with Applications (8th Ed.,=
Lial, Greenwell & Ritchey)
Solution manual Additional Calculus Topics (11th Ed., Barnett, Ziegler & By=
leen)
Solution manual College Mathematics for Business, Economics, Life Sciences =
& Social Sciences (11th Ed., Barnett, Ziegler & Byleen)
Solution manual Introductory Mathematical Analysis for Business, Economics =
and the Life and Social Sciences (12th Ed., Haeussler, Paul & Wood)
Solution manual Finite Mathematics for Business, Economics, Life Sciences a=
nd Social Sciences (11th Ed., Barnett, Ziegler, Byleen)
Solution manual Finite Mathematics (9th Ed., Lial, Greenwell & Ritchey)
Solution manual Calculus and Its Applications (9th Ed., Bittinger & Ellenbo=
gen)
Solution manual Calculus for Business, Economics, Life Sciences & Social Sc=
iences (11th Ed., Barnett, Ziegler & Byleen)
Solution manual Calculus with Applications (9th Ed., Lial, Greenwell & Ritc=
hey)
Solution manual Calculus with Applications : Brief Version (9th Ed., Lial, =
Greenwell & Ritchey)
Solution manual Concepts of Calculus with Applications (Martha Goshaw)
Solution manual University Calculus : Elements with Early Transcendentals (=
Hass, Weir & Thomas, Jr.)
Solution manual Thomas' Calculus, Early Transcendentals: Media Upgrade (11t=
h Ed., Thomas Jr., Weir, Hass & Giordano)
Solution manual Thomas' Calculus: Media Upgrade (11th Ed., Thomas Jr., Weir=
, Hass & Giordano)
Solution manual University Calculus : Alternate Edition (Hass, Weir & Thoma=
s, Jr.)
Solution manual Differential Equations Computing and Modeling (4th Ed., Edw=
ards & Penney)
Solution manual Differential Equations and Boundary Value Problems : Comput=
ing and Modeling (4th Ed., Edwards & Penney)
Solution manual Elementary Differential Equations with Boundary Value Probl=
ems (6th Ed., Edwards & Penney)
Solution manual Elementary Differential Equations (6th Ed., Edwards & Penne=
y)
Solution manual Fundamentals of Differential Equations (7th Ed., Nagle, Saf=
f & Snider)
Solution manual Fundamentals of Differential Equations with Boundary Value =
Problems (5th Ed., Nagle, Saff & Snider)
Solution manual Differential Equations and Linear Algebra (3rd Ed., Goode &=
Annin)
Solution manual College Algebra with Trigonometry (9th Ed., Raymond A. Barn=
ett)
Solution manual College Algebra Enhanced with Graphing Utilities (5th Ed., =
Sullivan & Sullivan III)
Solution manual College Algebra (10th Ed., Lial, Hornsby & Schneider)
Solution manual College Algebra : Graphs and Models (3rd Ed., Bittinger, Be=
echer, Ellenbogen & Penna)
Solution manual College Algebra : Graphs and Models (4th Ed., Bittinger, Be=
echer, Ellenbogen & Penna)
Solution manual College Algebra Essentials (8th Ed., Michael Sullivan)

Solution manual College Algebra (3rd Ed., Judith A. Beecher, Judith A. Penn=
a & Marvin L. Bittinger)
Solution manual College Algebra (8th Ed., Michael Sullivan)
Solution manual College Algebra (9th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry for College Readiness (Margaret L.=
 Lial & John Hornsby)
Solution manual Algebra and Trigonometry Enhanced with Graphing Utilities (=
5th Ed., Sullivan & Sullivan III)
Solution manual Algebra and Trigonometry : Graphs & Models (4th Ed., Bittin=
ger, Beecher, Ellenbogen & Penna)
Solution manual Trigonometry : A Unit Circle Approach (8th Ed., Michael Sul=
livan)
Solution manual Precalculus (3rd Ed., Lial, Hornsby & Schneider)
Solution manual Precalculus (4th Ed., Lial, Hornsby & Schneider)
Solution manual Precalculus : Enhanced with Graphing Utilities (5th Ed., Su=
llivan & Sullivan III)
Solution manual Precalculus : Functions and Graphs (3rd Ed. Mark Dugopolski=
)
Solution manual Precalculus : Graphs & Models and Graphing (4th Ed., Bittin=
ger, Beecher, Ellenbogen & Penna)
Solution manual Discrete and Combinatorial Mathematics (5th ed., Ralph P. G=
rimaldi)
Solution manual Discrete Mathematics (Sherwood Washburn, Thomas Marlowe & C=
harles T. Ryan)
Solution manual Discrete Mathematics (5th ed., John Dossey, Albert Otto, La=
wrence Spence & Charles Vanden Eynden)
Solution manual Mathematics for New Technologies (Don Hutchison & Mark Yann=
otta)
Solution manual Fundamental Finite Element Analysis and Applications: with =
Mathematica and Matlab Computations (Asghar Bhatti)
Solution manual Advanced Topics in Finite Element Analysis of Structures: W=
ith Mathematica and MATLAB Computations (Asghar Bhatti)=20
Solution manual The Finite Element Method in Engineering (4th Ed., by Rao)
Solution manual An Introduction to the Finite Element Method (3rd Ed., J. N=
. Reddy)
Solution manual Fundamentals of Finite Element Analysis (1st Ed., David V. =
Hutton)=20
Solution manual Simulation Modeling and Analysis (3rd Ed., Averill Law & Da=
vid Kelton)
Solution manual Simulation Modeling and Analysis (4th Ed., Averill Law)
Solution manual The Finite Element Method : Its Basis and Fundamentals (6th=
 Ed., Zienkiewicz, R. L. Taylor & J.Z. Zhu)
Solution manual Algebra : Form and Function (William McCallum, Eric Connall=
y & Deborah Hughes-Hallett)
Solution manual Algebra : Form and Function, Preliminary Edition (William M=
cCallum, Eric Connally & Deborah Hughes-Hallett)
Solution manual Applied Calculus (2nd Ed., Deborah Hughes-Hallett, et al.)
Solution manual Applied Calculus (3rd Ed., Deborah Hughes-Hallett, et al.)
Solution manual Applied Calculus (4th Ed., Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Multivariable (3rd Ed., William G. McCallum, Deb=
orah Hughes-Hallett, et al.)
Solution manual Calculus : Multivariable (4th Ed., William G. McCallum, Deb=
orah Hughes-Hallett, et al.)

```
Solution manual Calculus : Multivariable (5th Ed., William G. McCallum, Deb=
orah Hughes-Hallett, et al.)
Solution manual Calculus : Single Variable (3rd Ed., Deborah Hughes-Hallett=
, Andrew M. Gleason, et al.)
Solution manual Calculus : Single Variable (4th Ed., Deborah Hughes-Hallett=
, Andrew M. Gleason, et al.)
Solution manual Calculus : Single Variable (5th Ed., Deborah Hughes-Hallett=
, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (3rd Ed., Deborah Hughe=
s-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (4th Ed., Deborah Hughe=
s-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (5th Ed., Deborah Hughe=
s-Hallett)
Solution manual Functions Modeling Change : A Preparation for Calculus - Te=
xas Edition (2nd Ed., Eric Connally, Deborah Hughes-Hallett & Andrew M. Gle=
ason)
Solution manual Functions Modeling Change : A Preparation for Calculus (2nd=
 Ed., Eric Connally, Deborah Hughes-Hallett, et al.)
Solution manual Functions Modeling Change : A Preparation for Calculus (3rd=
 Ed., Eric Connally)
Solution manual Differential Equations (A. King, J. Billingham, S. Otto)=20
Solution manual Regression Methods in Biostatistics : Linear, Logistic, Sur=
vival, and Repeated Measures Models (Eric Vittinghoff, David Glidden, Steph=
en Shiboski, Charles McCulloch)
Solution manual A Modern Introduction to Probability and Statistics : Under=
standing Why and How (F.M. Dekking, C. Kraaikamp, H.P. Lopuha=E4, L.E. Mees=
ter)
Solution manual Statistical Methods for the Analysis of Repeated Measuremen=
ts (Charles S. Davis)
Solution manual Bayesian Core : A Practical Approach to Computational Bayes=
ian Statistics (Jean-Michel Marin, Christian Robert)
Solution manual The Bayesian Choice : From Decision-Theoretic Foundations t=
o Computational Implementation (2nd Ed., Christian Robert)
Solution manual Essentials of Stochastic Processes (Rick Durrett)
Solution manual Methods of Multivariate Statistics (Muni Srivastava)
Solution manual Regression Analysis : Theory, Methods, and Applications (As=
hish Sen & Muni Srivastava)
Solution manual Applied Probability and Statistics (Mario Lefebvre)
Solution manual Basic Probability Theory with Applications (Mario Lefebvre)
Solution manual Foundations of Hyperbolic Manifolds (2nd Ed., John Ratcliff=
e)
Solution manual Fourier and Laplace Transforms (R. J. Beerends , H. G. ter =
Morsche)
Solution manual Infinite-Dimensional Dynamical Systems (James C. Robinson)
Solution manual Mathematical Methods for Physics and Engineering, (3rd Ed.,=
 Riley, Hobson & Bence)
Solution manual Numerical Methods in Engineering with MATLAB (Jaan Kiusalaa=
s)=20
Solution manual Numerical Methods in Engineering with Python (Jaan Kiusalaa=
s)
Solution manual An Introduction to Numerical Analysis (Endre Suli and David=
 Mayers)
```

```
Solution manual Fundamentals of Engineering Numerical Analysis  (Parviz Moi=
n)
Solution manual Statistical Design (George Casella)
Solution manual Statistical Inference (2nd Ed., George Casella, Roger L. Be=
rger)
Solution manual Monte Carlo Statistical Methods (2nd Ed., Christian P. Robe=
rt, George Casella)
Solution manual Introducing Monte Carlo Methods with R (Christian Robert & =
George Casella)
Solution manual Introduction to Mathematical Structures and Proofs (Larry J=
. Gerstein)
Solution manual Analyzing Categorical Data (Jeffrey S. Simonoff)=20
Solution manual Fundamentals of Complex Analysis with Applications to Engin=
eering, Science, and Mathematics (3rd Ed., E. Saff & Arthur Snider)
Solution manual Probability & Statistics for Engineers & Scientists (8th Ed=
., Walpole, Myers, Ye)
Solution manual Probability & Statistics for Engineers & Scientists (9th Ed=
., Walpole, Myers, Ye)
Solution manual Statistics for Engineering and the Sciences (5th Ed., Mende=
nhall & Sincich)

Subject: 4175 Solution manuals & Test banks to Math, Statistics and
 Probability Books - part2
From: salvator45@gmail.com
Injection-Date: Fri, 28 Dec 2012 11:13:09 +0000
Content-Type: text/plain; charset=ISO-8859-1
Content-Transfer-Encoding: quoted-printable

List of Solutions Manuals and Test Banks=20
----

contact to :   mattosbw1@gmail.com   mattosbw1(at)g=
mail.com
  =20

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR :   CHINA, INDIA, RUSSIA, PAKIST=
AN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MAL=
DIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is =
available (it is a partial list). Then if you need solutions manual only co=
ntact me by email.=20

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TE=
ST BANKS.

I do not review the forums, just send me an email. Please do not use emails=
 from servers "LIVE" , all they are take as spam emails in my inbox.

- Math, Statistics & Probability :

Solution manual A Second Course in Statistics : Regression Analysis (6th Ed=

., Mendenhall & Sincich)
Solution manual A Second Course in Statistics : Regression Analysis (7th Ed=
., Mendenhall & Sincich)
Solution manual Miller & Freund's Probability and Statistics for Engineers =
(7th Ed., Johnson, Miller, Freund)
Solution manual Miller & Freund's Probability and Statistics for Engineers =
(8th Ed., Johnson, Miller, Freund)
Solution manual Numerical Methods Using Matlab (4th Ed., Mathews & Fink)
Solution manual Applied Numerical Analysis Using MATLAB (2nd Ed., Laurene v=
. Fausett)
Solution manual Applied Numerical Analysis (7th Ed., Curtis F. Gerald, Patr=
ick O. Wheatley)
Solution manual Friendly Introduction to Numerical Analysis (Bradie)
Solution manual Elementary Linear Algebra (2nd Ed., Spence, Insel & Friedbe=
rg)
Solution manual Elementary Linear Algebra with Applications (9th Ed., Kolma=
n & Hill)
Solution manual Introductory Linear Algebra : An Applied First Course (8th =
Ed., Kolman & Hill)
Solution manual Linear Algebra with Applications (6th Ed., S. Leon)
Solution manual Linear Algebra with Applications (7th Ed., S. Leon)
Solution manual Linear Algebra with Applications (8th Ed., S. Leon)
Solution manual Linear Algebra for Engineers and Scientists Using Matlab (H=
ardy)
Solution manual Linear Algebra with Applications (3rd Ed., Bretscher)
Solution manual Linear Algebra with Applications (4th Ed., Bretscher)
Solution manual Modern Matrix Algebra (Hill & Kolman)
Solution manual Matrix Methods : Applied Linear Algebra (3rd Ed., Richard B=
ronson & Gabriel B. Costa)
Solution manual A Transition to Abstract Mathematics : Learning Mathematica=
l Thinking and Writing (2nd Ed., Randall Maddox)
Solution manual Partial Differential Equations and Boundary Value Problems =
with Fourier Series (2nd ed., Asmar)
Solution manual Applied Partial Differential Equations (4th Ed., Haberman)
Solution manual Technical Calculus (5th Ed., Dale Ewen, Joan S. Gary & Jame=
s E. Trefzger)
Solution manual Technical Mathematics (2th Ed., Dale Ewen, Joan S. Gary & J=
ames E. Trefzger)
Solution manual Technical Mathematics with Calculus (2th Ed., Dale Ewen, Jo=
an S. Gary & James E. Trefzger)
Solution manual Introductory Mathematics (4th Ed., Cook)
Solution manual Mathematics for the Technical Trades (Cook)
Solution manual College Mathematics (7th Ed., Cleaves & Hobbs)
Solution manual Fundamentals of Statistics (2nd Ed., Michael III Sullivan)
Solution manual Fundamentals of Statistics (3rd Ed., Michael III Sullivan)
Solution manual Statistics : Informed Decisions Using Data (2nd Ed., Michae=
l III Sullivan)
Solution manual Statistics : Informed Decisions Using Data (3rd Ed., Michae=
l III Sullivan)
Solution manual Statistics : Informed Decisions Using Data (4th Ed., Michae=
l III Sullivan)
Solution manual Modern Elementary Statistics (12th Ed., John E. Freund, Ben=
jamin M. Perles)

Solution manual Statistics : The Art and Science of Learning From Data (Agr=
esti & Franklin)
Solution manual Statistics : The Art and Science of Learning From Data (2nd=
 Ed., Agresti & Franklin)
Solution manual Statistics : The Art and Science of Learning From Data (3rd=
 Ed., Agresti & Franklin)
Solution manual Elementary Statistics : Picturing the World (3rd Ed., Larso=
n & Farber)
Solution manual Elementary Statistics : Picturing the World (4th Ed., Larso=
n & Farber)
Solution manual Elementary Statistics : Picturing the World (5th Ed., Larso=
n & Farber)
Solution manual A First Course in Statistics (9th Ed., McClave & Sincich)
Solution manual A First Course in Statistics (10th Ed., McClave & Sincich)
Solution manual A First Course in Statistics (11th Ed., McClave & Sincich)
Solution manual Statistics (10th Ed., McClave & Terry Sincich)
Solution manual Statistics (11th Ed., McClave & Terry Sincich & William Men=
denhall)
Solution manual Statistics (12th Ed., McClave & Terry Sincich)
Solution manual Interactive Statistics (3rd Ed., Martha Aliaga & Brenda Gun=
derson)
Solution manual Statistics for the Life Sciences (3rd Ed., Samuels & Witmer=
)
Solution manual Statistics for the Life Sciences (4th Ed., Samuels, Witmer =
& Schaffner)
Solution manual Applied Statistics and the SAS Programming Language (5th Ed=
., Cody & Smith)
Solution manual Biostatistics for the Health Sciences (R. Clifford Blair & =
Richard Taylor)
Solution manual Biostatistics : How It Works (Steve Selvin)
Solution manual Business Statistics : First Course (4th Ed., Levine, Krehbi=
el & Berenson)
Solution manual Business Statistics : First Course (5th Ed., Levine, Krehbi=
el & Berenson)
Solution manual Business Statistics : First Course (6th Ed., Levine, Krehbi=
el & Berenson)
Solution manual Course in Business Statistics (4th Ed., Groebner, Shannon, =
Fry & Smith)
Solution manual Business Statistics : A Decision Making Approach (6th Ed., =
Groebner, Shannon, Fry & Smith)
Solution manual Business Statistics : A Decision-Making Approach (7th Ed., =
Groebner, Shannon, Fry & Smith)
Solution manual Business Statistics : A Decision-Making Approach (8th Ed., =
Groebner, Shannon, Fry & Smith)
Solution manual Statistics for Business & Economics (10th Ed., McClave, Ben=
son & Sincich)   =20
Solution manual Statistics for Managers Using Excel (5th Ed., Levine)=20
Solution manual Statistics for Managers Using Microsoft Excel (4th Ed., Lev=
ine, Stephan, Krehbiel & Berenson)
Solution manual Statistics for Business and Economics (5th Ed., Newbold, Ca=
rlson & Thorne)
Solution manual Statistics for Business and Economics (6th Ed., Newbold, Ca=
rlson & Thorne)

Solution manual Statistics for Business and Economics (7th Ed., Newbold, Ca=
rlson & Thorne)
Solution manual Basic Business Statistics : Concepts and Applications (10th=
 Ed., Berenson, Krehbiel & Levine)
Solution manual Basic Business Statistics (11th Ed., Berenson, Levine & Kre=
hbiel)
Solution manual John E. Freund's Mathematical Statistics with Applications =
(7th Ed., Miller)=20
Solution manual Probability and Statistical Inference (7th Ed., Hogg & Tani=
s)
Solution manual Probability and Statistical Inference (8th Ed., Hogg & Tani=
s)
Solution manual Introduction to Mathematical Statistics (6th Ed., Hogg, Cra=
ig & McKean)
Solution manual Introduction to Mathematical Statistics (7th Ed., Hogg, Cra=
ig & McKean)
Solution manual Introduction to Mathematical Statistics and Its Application=
s (4th Ed., Larsen & Marx)
Solution manual Introduction to Mathematical Statistics and Its Application=
s (5th Ed., Larsen & Marx)
Solution manual A Brief Course in Mathematical Statistics (Hogg & Tanis)
Solution manual Fundamentals of Probability, with Stochastic Processes (3rd=
 Ed., Saeed Ghahramani)
Solution manual A First Course in Probability (7th Ed., Sheldon Ross)
Solution manual A First Course in Probability (8th Ed., Sheldon Ross)
Solution manual Applied Multivariate Statistical Analysis (6th Ed., Johnson=
 & Wichern)
Solution manual Multivariate Data Analysis (6th Ed., Hair, Black, Babin, An=
derson & Tatham)
Solution manual Multivariate Data Analysis (7th Ed., Hair, Black, Babin, An=
derson)
Solution manual Essential MATLAB for Engineers and Scientists (3rd Ed., Bri=
an Hahn & Dan Valentine)
Solution manual Essential MATLAB for Engineers and Scientists (4th Ed., Bri=
an Hahn & Dan Valentine)
Solution manual Introduction to Applied Statistical Signal Analysis : Guide=
 to Biomedical and Electrical Engineering Applications (3rd Ed. Richard Shi=
avi)
Solution manual Construction Mathematics (Surinder Virdi & Roy Baker)
Solution manual Numerical Methods in Biomedical Engineering (Stanley Dunn, =
Alkis Constantinides & Prabhas Moghe)
Solution manual Probability and Statistics with Integrated Software Routine=
s (Ronald Deep)
Solution manual Finite Element Analysis with Error Estimators : An Introduc=
tion to the FEM and Adaptive Error Analysis for Engineering Students (J. Ak=
in)
Solution manual Basic Engineering Mathematics (4th Ed., John Bird)
Solution manual Engineering Mathematics (4th Ed., John Bird)
Solution manual Engineering Mathematics (5th Ed., John Bird)
Solution manual Higher Engineering Mathematics (5th Ed., John Bird)
Solution manual Construction Mathematics (Virdi & Baker)
Solution manual Mathematics for Electrical Engineering and Computing (Mary =
Attenborough)

Solution manual Probability and Random Processes : With Applications to Sig=
nal Processing and Communications (Miller & Childers)
Solution manual Introductory Statistics for Engineering Experimentation (Pe=
ter Nelson, Karen Copeland & Marie Coffin)
Solution manual Understanding Engineering Mathematics (Bill Cox)
Solution manual Statistics And Probability For Engineering Applications Wit=
h Microsoft Excel (Decoursey)
Solution manual Business Math Using Calculators : With 10-Key Computer Assi=
sted Instruction (Burton)
Solution manual Mathematics for Economics and Business (5th Ed., Ian Jacque=
s)
Solution manual Business Math, Brief (7th Ed., Cleaves & Hobbs)
Solution manual Math for Merchandising: A Step-by-Step Approach (3rd Ed., M=
oore)
Solution manual Mathematics for Business (7th Ed., Salzman , Miller & Clend=
enen)
Solution manual Mathematics for Business (8th Ed., Salzman , Miller & Clend=
enen)
Solution manual Basic College Mathematics with Early Integers (K. Elayn Mar=
tin-Gay)
Solution manual Developmental Mathematics (K. Elayn Martin-Gay)
Solution manual An Introduction to Analysis (3rd Ed., William Wade)
Solution manual An Introduction to Analysis (4th Ed., William Wade)
Solution manual A Friendly Introduction to Analysis (2nd Ed., Witold A.J. K=
osmala)
Solution manual Advanced Calculus (Gerald Folland)
Solution manual Analysis : With an Introduction to Proof (4th Ed., Steven R=
. Lay)
Solution manual Essentials of Basic College Mathematics (John Jr Tobey, Jr.=
, Jeffrey Slater)
Solution manual Basic College Mathematics (5th Ed., John Tobey & Jeffrey Sl=
ater)
Solution manual Prealgebra (3rd Ed., Jamie Blair, John Tobey & Jeffrey Sla=
ter)
Solution manual Elementary Algebra Early Graphing for College Students (3rd=
 Ed., Allen Angel)
Solution manual Elementary Algebra (Michael Sullivan III, Katherine R. Stru=
ve & Janet Mazzarella)
Solution manual Elementary Algebra for College Students (7th Ed., Allen R. =
Angel)
Solution manual Experiencing Introductory and Intermediate Algebra Through =
Functions and Graphs (3rd Ed., JoAnne Thomasson & Robert Pesut)
Solution manual Introductory Algebra (3rd Ed., K. Elayn Martin-Gay)
Solution manual Beginning Algebra (6th Ed., John Jr Tobey & Jeffrey Slater)
Solution manual Beginning Algebra : Early Graphing (Jamie Blair, John Tobey=
 & Jeffrey Slater)
Solution manual Beginning and Intermediate Algebra (2nd Ed., Jamie Blair, J=
ohn Tobey & Jeffrey Slater)
Solution manual Introductory Algebra (4th Ed., Robert Blitzer)
Solution manual Introductory and Intermediate Algebra (2nd Ed., Robert Blit=
zer)
Solution manual Intermediate Algebra for College Students (7th Ed., Allen A=
ngel)

```
Solution manual Intermediate Algebra (Michael Sullivan III & Katherine Stru=
ve)
Solution manual Intermediate Algebra (3rd Ed., K. Elayn Martin-Gay)
Solution manual Essentials of Intermediate Algebra for College Students (Ro=
bert Blitzer)
Solution manual Intermediate Algebra (4th Ed., Robert Blitzer)
Solution manual Intermediate Algebra for College Students (5th Ed., Robert =
Blitzer)
Solution manual Algebra A Combined Approach (3rd Ed., K. Elayn Martin-Gay)
Solution manual Elementary & Intermediate Algebra (Michael Sullivan III, Ka=
therine R. Struve & Janet Mazzarella)
Solution manual Essentials of Introductory and Intermediate Algebra for Col=
lege Students (Robert F. Blitzer)
Solution manual Algebra for College Students (3rd Ed., Allen R. Angel)
Solution manual Algebra for College Students (5th Ed., Robert F Blitzer)
Solution manual College Algebra Essentials (8th Ed., Michael Sullivan)
Solution manual College Algebra (4th Ed., Robert Blitzer)
Solution manual College Algebra Essentials (2nd Ed., Robert F. Blitzer)
Solution manual College Algebra : An Early Functions Approach (Robert F. Bl=
itzer)
Solution manual College Algebra : Concepts Through Functions (1st Ed., Mich=
ael Sullivan III & Michael Sullivan)
Solution manual College Algebra : Concepts Through Functions (2nd Ed., Mich=
ael Sullivan III & Michael Sullivan)
Solution manual College Algebra Enhanced with Graphing Utilities (4th Ed., =
Michael Sullivan III & Michael Sullivan)
Solution manual Essentials of College Algebra : Enhanced with Graphing Util=
ities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Algebra and Trigonometry (8th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry (3rd Ed., Robert F. Blitzer)
Solution manual Algebra and Trigonometry: An Early Functions Approach (Robe=
rt Blitzer)=20
Solution manual Algebra & Trigonometry (7th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry Enhanced With Graphing Utilities (=
4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Trigonometry (7th Ed., Michael Sullivan)
Solution manual Trigonometry (8th Ed., Michael Sullivan)
Solution manual Trigonometry Enhanced with Graphing Utilities (4th Ed., Mic=
hael Sullivan III & Michael Sullivan)
Solution manual Precalculus (8th Ed., Michael Sullivan)
Solution manual Precalculus (3rd Ed., Robert Blitzer)
Solution manual Precalculus (4th Ed., Robert Blitzer)
Solution manual Precalculus (1st Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual Precalculus : A Right Triangle Approach (2nd Ed., J. S. Rat=
ti & Marcus S. McWaters)
Solution manual Precalculus Essentials (2nd Ed., Robert Blitzer)
Solution manual Precalculus Essentials (3rd Ed., Robert Blitzer)
Solution manual Precalculus : Concepts Through Functions, A Unit Circle App=
roach to Trigonometry (1st Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus : Concepts Through Functions, A Unit Circle App=
roach to Trigonometry (2nd Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus : Concepts Through Functions, A Right Triangle =
Approach to Trigonometry (1st Ed., Michael Sullivan III & Michael Sullivan)
```

Solution manual Precalculus : Concepts Through Functions, A Right Triangle =
Approach to Trigonometry (2nd Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus Enhanced with Graphing Utilities (4th Ed., Mich=
ael Sullivan III & Michael Sullivan)
Solution manual Precalculus Enhanced with Graphing Utilities (5th Ed., Mich=
ael Sullivan III & Michael Sullivan)
Solution manual Precalculus Essentials : Enhanced with Graphing Utilities (=
4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Excursions in Modern Mathematics (5th Ed., Peter Tannenbaum=
)
Solution manual Excursions In Modern Mathematics with Mini-Excursions (6th =
Ed., Peter Tannenbaum)
Solution manual Quantitive Reasoning & the Environment (Greg Langkamp & Jos=
eph Hull)
Solution manual Fundamentals of Mathematics (10th Ed., William M Setek & Mi=
chael A Gallo)
Solution manual Learning Math in Elementary and Middle School & IMAP Packag=
e (4th Ed., Cathcart, Pothier, Vance & Bezuk)
Solution manual Understanding the Math You Teach: Content and Methods for P=
rekindergarten Through Grade 4 (Anita C. Burris)
Solution manual Algebra Connections (Ira J. Papick & UMO University of Miss=
ouri)
Solution manual Calculus Connections (Asma Harcharras, Dorina Mitrea)
Solution manual Data Analysis and Probability Connections: Mathematics for =
Middle School Teachers (Debra A. Perkowski & Michael Perkowski)
Solution manual Geometry Connections (John K. Beem)
Solution manual Elementary Math Modeling Updated (2nd Ed., Mary Ellen Davis=
 & C. Henry Edwards)
Solution manual Additional Calculus Topics (11th Ed., Raymond Barnett, Mich=
ael Ziegler & Karl Byleen)
Solution manual Finite Math and Its Application (9th Ed., Larry J Goldstein=
, David I Schneider & Martha J. Siegel)
Solution manual Finite Mathematics and Its Application (10th Ed., Larry J G=
oldstein, David I Schneider & Martha J. Siegel)
Solution manual Introductory Mathematical Analysis for Business, Economics =
and the Life and social Sciences (11th Ed., Haeussler, Paul & R.J. Wood)
Solution manual Introductory Mathematical Analysis for Business, Economics =
and the Life and Social Sciences (12th Ed., Haeussler, Paul & R.J. Wood)
Solution manual Additional Calculus Topics (9th Ed., Raymond Barnett, Micha=
el Ziegler & Karl Byleen)
Solution manual College Mathematics for Business, Economics, Life Sciences =
and Social Sciences (10th Ed., Raymond Barnett, Michael Ziegler & Karl Byle=
en)
Solution manual Brief Calculus and Its Applications (11th Ed., Larry Goldst=
ein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Brief Calculus and Its Applications (12th Ed., Larry Goldst=
ein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Calculus and its Applications (10th Ed., Larry Goldstein, D=
avid Schneider, David Lay)
Solution manual Calculus and its Applications (11th Ed., Larry Goldstein, D=
avid Schneider, David Lay & Nakhle Asmar)
Solution manual Calculus and its Applications (12th Ed., Larry Goldstein, D=
avid Schneider, David Lay & Nakhle Asmar)

Solution manual Calculus for Business, Economics, Life Sciences and Social =
Sciences (10th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual Calculus, Early Transcendentals (6th Ed., C. Henry Edwards =
& David Penney)
Solution manual Calculus, Early Transcendentals (7th Ed., C. Henry Edwards =
& David Penney)
Solution manual Calculus (9th Ed., Dale Varberg, Edwin Purcell & Steve Rigd=
on)
Solution manual Calculus Early Transcendentals (Dale Varberg, Edwin Purcell=
 & Steve Rigdon)
Solution manual Calculus (3rd Ed., Monty Strauss, Gerald Bradley & Karl Smi=
th)
Solution manual Calculus (6th Ed., Henry Edwards & David E. Penney)
Solution manual Single Variable Calculus (3rd Ed., Monty Strauss, Gerald Br=
adley & Karl Smith)
Solution manual Vector Calculus (3rd Ed., Susan Colley)
Solution manual Applied Linear Algebra (Peter Olver & Cheri Shakiban)
Solution manual Differential Equations and Linear Algebra (2nd Ed., Jerry F=
arlow, James E. Hall, Jean Marie McDill & Beverly West)
Solution manual Differential Equations and Linear Algebra (2nd Ed., C. Henr=
y Edwards & David Penney)
Solution manual Differential Equations and Linear Algebra (3rd Ed., C. Henr=
y Edwards & David Penney)
Solution manual Differential Equations (2nd Ed., John Polking, Al Boggess &=
 David Arnold)
Solution manual Differential Equations with Boundary Value Problems (2nd ed=
., John Polking, Al Boggess & David Arnold)
Solution manual Discrete Mathematics with Graph Theory (3rd Ed., Edgar Good=
aire & Michael Parmenter)
Solution manual Essential Discrete Mathematics (Todd Feil & Joan Krone)
Solution manual Statistical Methods for the Social Sciences (4th Ed., Agres=
ti & Finlay)
Solution manual A Brief Course in Mathematical Statistics (Tanis & Hogg)
Solution manual Business Mathematics, 10th Ed. (Miller, Salzman & Clendenen=
)
Solution manual Elementary Statistics (6th Ed., Weiss)
Solution manual Elementary Statistics (7th Ed., Weiss)
Solution manual Elementary Statistics (8th Ed., Weiss)
Solution manual Elementary Statistics Using the Graphing Calculator: For th=
e TI-83/84 Plus (Mario Triola)
Solution manual Elementary Statistics Using the TI-83/84 Plus Calculator (2=
nd Ed., Mario Triola)
Solution manual Elementary Statistics Using the TI-83/84 Plus Calculator (3=
rd Ed., Mario Triola)
Solution manual Elementary Statistics Update (9th Ed., Mario Triola)
Solution manual Elementary Statistics (10th Ed., Mario Triola)
Solution manual Elementary Statistics (11th Ed., Mario Triola)
Solution manual Elementary Statistics - Technology Update (11th Ed., Mario =
Triola)

In my haste to get the last newsletter out, I forgot one important item.

During the last Nebraska ARRL State Convention, Elmer Squad Leader and Assistant Section Manager Dar Piatt, W9HZC, donated one of his qrp projects to Harold Kramer, WJ1B, Chief Operating Officer of the ARRL. Harold said he would display it at ARRL HQ.

Imagine Dar's surprise and delight when he saw his "ham can" version of a RockMite QRP transciever on the cover of the January 2013 issue of QST! Dar was given full credit in the cover description on page 5.

Congratulations, Dar! That's one small can for a ham and one giant leap for qrp.

73, Art K0AIZ

ARRL Nebraska Section
Section Manager: Arthur I Zygielbaum, K0AIZ

Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |

change permanently.

Approved rec.radio.amateur.* newsgroups are those that are currently listed in the latest version of the "List of Big Eight Newsgroups" which is crossposted monthly to news.announce.newgroups, news.groups, and news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those that have been created consistent with the suggestions in "So You Want to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either "radio.amateur" or "ham-radio" in their names, including uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved newsgroups up-to-date. In case we have overlooked any, and a submission is rejected in error as a result, the rejected submitter can E-mail us at our administrative contact address (in the signature at the bottom of this article, and the default Reply-To for the rejection message) requesting that it be added, and that the article be approved. We may still choose to reject articles crossposted to any alt.* newsgroup with an inappropriate name, including obscene language, embedded name-calling, or encouragement of unlawful conduct.

Please direct any comments, questions, or criticisms to rec-radio-amateur-moderated-request@panix.com.

TEXAS BOARD OF PROFESSIONAL ENGINEERS
February 28, 2008 Board Meeting Disciplinary Actions

W. Gary Sokolich , Newport Beach, California �V File B-29812 - It was alleged that. Sokolich unlawfully offered or attempted to practice engineering in Texas (...) Sokolich chose to end the proceedings by signing a Consent Order that was accepted by the Board to cease and desist from representing himself as an ��Engineer�� in Texas, from any and all representations that he can offer or perform engineering services and from the actual practice of engineering in Texas (...) Sokolich was also assessed a $1,360.00 administrative penalty.

----

http://articles.latimes.com/1988-04-14/local/me-1922_1_ucla-researcher

A former UCLA employee has agreed to provide copies of his research to the school to settle a lawsuit the university filed against him in 1985, lawyers in the case said.

(...)

The University of California Board of Regents filed a $620,000 lawsuit against Sokolich, accusing him of taking research on the hearing

capabilities of animals in June, 1982. Sokolich was dismissed by UCLA
(...).

Hey OM:

Here I thought this was the homebrew forum. The separate antenna is the easy way out,

I'd go with sum pin diode switching and a frequency sense circuit to switch the pin diodes. Or there are some good mercury wetted relays out there that can handle 100 watts.

On Thursday, December 6, 2012 4:15:39 AM UTC-5, David Griffith wrote:

Maybe I am out of line here, but what you are asking is dumb.

Diplexers / Duplexers - what ever you want to call them are by nature
only about 50% efficient.
This means that you are throwing away half of your transmitted power and
half of your capiable receive in the diplexer.. DUMB!

Antenna manufacturers makes multiple tri band antenna's.
But in order to do it efficiently - you have to start with a resonant
antenna.

Because 70 cm and 1.25 CM are not multiples of wavelengths of 2 meters -
the best you can come up with is a compromise antenna...

The Diamond V2000 is a good example of this.
It does 2 meters, 70 cm and also 6 meters...

They do this by making the antenna into segments and placing capacitors
between the sections. The capacitors divides the antenna into
segments.

The RF looks down the array, till it finds the length it is looking for
and then it uses it, much like a Yagi Uda antenna for television...

The Diamond X 510 is another example - it uses 3 segments and has
excellent gain.... Problem is when you make a 2 meter antenna 18' long,
you end up with a top heavy vertical that snaps off when it is placed in
too much wind or when it gets old and brittle.

The antenna you are looking for was already designed a long time ago.
It is called a Discone antenna...

You make the vertical whip one length, you place at least two ground radials underneath of a resonant length and put the radial system directly under the antenna.

Diamond makes a excellent example.
No need to home brew a antenna in this day and age, except for experimental purposes.

I get disgusted when I listen to the 2 meters and a couple of noob's comes on and starts telling me how they are hams because they build a J Pole antenna and are using walkie talkies and they are able to get into the one local repeater and can talk to people because the repeater is part of a linked repeater system - VOIP.....

If it was not for that repeater being linked, they would have no one to talk to, and when the 10 years comes up for the license, their call sign would be beside all the others from their VE test session that did not advance to General or higher, or did not put their license to good use while they held it.

It is not the diplexer that is dumb, it is your remark that is dumb.

Most of CJ's remarks are that way. I doubt he has ever measured or checked on the splitters. I have and they are usually less than a half of a DB loss in them. I am thinking more like a .3 or so of a db loss, but it has been a while. Anyway from the best I could tell, it met the spec on the case of the splitter. That was with a HP 8924C test set.

Fine - but if you want to be right - you first have to prove why you think that you are right.
A good example comes to mind.
In the 1970's Avanti came out with a antenna called the Moonraker IV
It was horizontally as well as vertically polarized.
Probably not a new idea, but one thing that you could get with that antenna was a switch which allowed the use of one coax for two antenna's.

Don't you think that it would be easier to use a Diamond X 510 antenna and a 220 MHz and switch them up on the tower then it would be to use a duplexer and try to use both at the same time.

220 is dead except for maybe in the city somewhere where someone has a repeater... No manufacturer makes a 220 transceiver, except as a after thought - the only one I see listed in the AES / HRO catalog has a output of 1 watt.. I guess they use it to control a repeater site or something like that.

200 Mhz offers the benefits of being a little more ground following - like 2 meters, while being a little quieter - like 70 cm.. Rule of thumb - noise is inverse the square of the frequency.. The higher in frequency you go, the less noise you have to overcome. Probably the reason why cell phones are 869 - 913 Mhz and public service is going to 800 Mhz and the T band.

Now I know I am dealing with a CB'r

You cannot use a splitter to connect two antenna's together, and a
splitter is not a diplexer.
Even if all you are going to do is use the antenna's for receive only,
you will still run into problems..
If it was a television antenna - we use a con - joiner - it basically
isolates each antenna from each other, is real good for isolation to
prevent multipath, but again, you throw away half of the signal in the
Con - Joiner.

A splitter by nature is wasteful, a 2 way splitter should be unilateral,
each port receives 50% of the signal.
BUT
When you advance to a 3 way splitter, they are not unilateral.
Unless it is a expensive splitter, you usually end up with one port
having about 45% of the signal and the other two sharing the remaining
25% / 30% - between the two remaining ports.
This is the problem I deal with most often with reception issues.

The op buys a splitter, then figures that the television reduces the
amount of received antenna power and so they buy a distribution
amplifier and they figure that if they amplify the signal it will get
better.
The problem being that you not only amplify the signal, you also amplify
the noise, plus the amplifier makes some of its own noise.

So we steer them towards a mast head pre amplifier and it solves some
problems but not all.
If the antenna is not aimed at the strongest part of the signal - we get
little or not reception, or the reception we do get with digital signals
is sometimes corrupted by radio waves arriving at the antenna at
different times.

I've already explained dipole antenna's - which are a balanced antenna,
or a vertical antenna.. So there isn't much of anything else to say
except good bye on this one.

A Diplexer filters out the other frequency signal - and con - joins the
two antenna's together on one feed line. Or makes believe to the
receiver that there is two seperate antenna's, or keeps the rf out of
the other side of the transceiver on a dual band transceiver.

Why are you posting all this irrelevant crap?

When it is not clear to you that there is a big difference in operation
between a diplexer and a splitter, why bother?

I guess that I did add to the confusion by saying splitter when I should have said either duplexer or diplexer. It is already bad enough that Comet and maybe some other makers of diplexers are calling them duplexers.

I use Comet because that is one that I had handy and did check the loss in it with a HP 8924C. It has duplexer on it and meets the specs that are marked on it. I do not have them handy now, but think it was .2 db for one range of frequencies and .3 for the other.

I just loosely used splitter instead of saying duplexer/diplexer.
And Yes, I know the differance in all of the above. I had a First Classs Radio Telephone license back in 1972 at the age of 22 if that makes any differance.
Been an Extra class ham for over 10 years.
Repaired the CB radios for several years to about 1976 to pick up some spending money.

Summary: Recruitment announcement for ham-radio-related FAQ articles
Keywords: FAQ, Intro, amateur, ham, radio, recruit, recruitment
Bytes: 3542

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted twice monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

We are seeking a replacement maintainer for the following information bulletin formerly posted to rec.radio.amateur.* (and currently archived at http://www.faqs.org/faqs/radio/personal-intro/):

 radio/personal-intro
 Subject: Guide to the rec.radio Newsgroups
 Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
 Last Posted: 9 Nov 2001 06:18:17 GMT
 Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

 rec.radio.amateur.antenna |
 rec.radio.amateur.boatanchors |
 rec.radio.amateur.dx |
 rec.radio.amateur.equipment |
 rec.radio.amateur.homebrew |
 rec.radio.amateur.moderated |
 rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this article updated and automatically posted again at a regular interval. This would include establishing contact with the original maintainer for any necessary permissions. We would prefer to seek a new, dedicated maintainer at this time, rather than start auto-posting the original article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Hi, Ralph, am enjoying the give and take here! I also repaired CB radios
for extra meat on the table in the mid 1960's. Extra class very nearly
43 years! First class Radiotelephone licensed about the same time,
 Don't let "em get to 'ya! You've "been there, done that"!

Hoooooyah!

Old Chief Lynn, W7LTQ

Well not anytime soon, unless Mr. Sun gets a lot more active.....
So far this cycle has been a BUST....

NNTP-Posting-Date: Tue, 15 Jan 2013 07:00:03 +0000 (UTC)
Summary: Short reminder for unmoderated newsgroups that crossposting is permitted
Keywords: FAQ, ham, amateur, radio, moderated, unmoderated, crossposting, permitted

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently listed in the latest version of the "List of Big Eight Newsgroups" which is crossposted monthly to news.announce.newgroups, news.groups, and news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those that have been created consistent with the suggestions in "So You Want to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either "radio.amateur" or "ham-radio" in their names, including uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved newsgroups up-to-date. In case we have overlooked any, and a submission is rejected in error as a result, the rejected submitter can E-mail us at our administrative contact address (in the signature at the bottom of this article, and the default Reply-To for the rejection message) requesting that it be added, and that the article be approved. We may still choose to reject articles crossposted to any alt.* newsgroup with an inappropriate name, including obscene language, embedded name-calling, or encouragement of unlawful conduct.

Please direct any comments, questions, or criticisms to rec-radio-amateur-moderated-request@panix.com.

Hi Old Chief Lynn,

I faced it earlier too with a 20A supply. It didn't strike me then and I
had to be content with partial loading on CW using an old Yaesu
FT-747GX.

Many thanks.

73,

Nandu.

Lip kisses?

There are videos/ images on the web that would shock Larry Flynt.

Loser.

Subject: PCB123 tutorial ne1?
From: raypsi <rborowiak@gmail.com>
Injection-Date: Sun, 20 Jan 2013 15:24:46 +0000
Content-Type: text/plain; charset=ISO-8859-1

I want to make a minus 400vdc supply for my grounded screen QRO PA. I have iron on resist for masking, for solder masking silk screening and PCB etching I'd like to make it look professional. The Solder Masking Iron on is blue and can be used to etch and silk screen I have 5 sheets of 8.5X11. I have PCB material and ferric chloride

I thought PCB123 had schematic layouts that went to PCB layouts so I could just print that on clear mylar on my printer and expose it to

```
the iron on resist.

I could do every thing by hand then I need a drafting table.

Anybody have a link to a good tutorial?

 I got laptop wit 32bit XP pro and an HP printer

I have a nice auto multimeter. The continuity buzzer's out so I wanted to test it, replace with a radio shack element.

The meter turned itsself on inside the snapbox. Apparemtly the contacs touched killing the buzzer or driver.

When I tried it last, the buzzer buzzed twice then died.

Positive inside contact circle or outside ring ? Probably a standard

I suppose you are referring to the piezo element alone. In that case the
answer is 'no polarity' as the element responds to an ac signal only.

OK, this is not the answer, but a little tale about piezo buzzers.

I got a new "stud finder" (for locating wall studs in a building). It was superb! Got the job done. Three or
four years later, I had occasion to use it again. Worked fine, except the "buzzer" didn't sound. Tore it down
and found the little devil piezo element. Located a similar Radio Shack element, and replaced the original.
Still didn't work. SWMBO said "hope you get tired of playing with that noisy thing"....... HUH?
Well, piezo worked just fine. Ears had aged embarrassingly.

Old Chief Lynn, W7LTQ

there's an inverter inside my multimeter ? why are peizo buzzers listed in Radio Shack under DC voltages ?

for Ears, H202...

I lost a Wal Multimeter, giving a negative rating, when packing for a Xrosscountry trip. The meter was packed deep. It began screaming on Texas 1016 (?). bing bong bing....and down there it died.

The silent one now is an Acton from Summit Racing. It needs revival. I hope the buzzers dead so the prebuzz circuit remains alive.

But you should never keep a meter on ohms or continuity. Because those are vulnerable ranges. You turn it on and measure some voltage, and bang you blew a fuse if you were lucky, you've damaged the meter if you weren't lucky. Keep it on a voltage range, which can handle anything that would come across the leads. Put it on a higher voltage range if you really worry, though the meter should be protected for overvoltage.

Content-Transfer-Encoding: quoted-printable

I have written a numerical optimizer (solver) for LTSpice.  It automaticall=
y adjusts component values to meet circuit performance targets you set.  Fo=
r example maximum power output and minimum supply current.  It uses a fast =
evolutionary algorithm to get good results quickly. You can get good result=
s in anything from 5 minutes to a few hours depending on the complexity of =
the circuit.  It is much faster and better than using any of the genetic al=
gorithms available or the Simplex method. =20
Anyway I have provided a free trial usable until 5 August with a 3000 itera=
tion limit.  I am thinking about providing a 3 month trial with an iteratio=
n limit of about 500 afterwards.
You can try it here:
http://www.evospice.site88.net/evospice/evospice.html
I think it is a good add-on to LTSpice for homebrewers.  It can help you de=
sign filter circuits, rf circuits and many other things. It would be a bit =
complicated for beginners because it uses things like .measure in LTSpice. =
 For the more advanced homebrewer it could be ideal.  If your ham-radio clu=
b would like a special evaluation version they can send me an e-mail at the=
 address given on the web-site.
Best Regards,
Sean O'Connor

I have found that a relay controlled by the microphone PTT can be useful for solving the problem. Let a set of contacts from the relay key the radio and another control the transverter.

Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently listed in the latest version of the "List of Big Eight Newsgroups" which is crossposted monthly to news.announce.newgroups, news.groups, and news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those that have been created consistent with the suggestions in "So You Want to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either "radio.amateur" or "ham-radio" in their names, including uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved newsgroups up-to-date. In case we have overlooked any, and a submission is rejected in error as a result, the rejected submitter can E-mail us at our administrative contact address (in the signature at the bottom of this article, and the default Reply-To for the rejection message) requesting that it be added, and that the article be approved. We may still choose to reject articles crossposted to any alt.* newsgroup with an inappropriate name, including obscene language, embedded name-calling, or encouragement of unlawful conduct.

Please direct any comments, questions, or criticisms to rec-radio-amateur-moderated-request@panix.com.

Summary: Recruitment announcement for ham-radio-related FAQ articles
Keywords: FAQ, Intro, amateur, ham, radio, recruit, recruitment

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/
```

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

We are seeking a replacement maintainer for the following information bulletin formerly posted to rec.radio.amateur.* (and currently archived at http://www.faqs.org/faqs/radio/personal-intro/):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this article updated and automatically posted again at a regular interval. This would include establishing contact with the original maintainer for any necessary permissions. We would prefer to seek a new, dedicated maintainer at this time, rather than start auto-posting the original article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to rec-radio-info-request@panix.com.

Summary: Short reminder for unmoderated newsgroups that crossposting is permitted
Keywords: FAQ, ham, amateur, radio, moderated, unmoderated, crossposting, permitted
Bytes: 3773

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently listed in the latest version of the "List of Big Eight Newsgroups" which is crossposted monthly to news.announce.newgroups, news.groups, and news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those that have been created consistent with the suggestions in "So You Want to Create an Alt Newsgroup" at:

  http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either "radio.amateur" or "ham-radio" in their names, including uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved newsgroups up-to-date. In case we have overlooked any, and a submission is rejected in error as a result, the rejected submitter can E-mail us at our administrative contact address (in the signature at the bottom of this article, and the default Reply-To for the rejection message) requesting that it be added, and that the article be approved. We may still choose to reject articles crossposted to any alt.* newsgroup with an inappropriate name, including obscene language, embedded name-calling, or encouragement of unlawful conduct.

Please direct any comments, questions, or criticisms to rec-radio-amateur-moderated-request@panix.com.

Come on, you've just replied to a message that is 18 years old.  Nobody
reading the newsgroup back then is reading it now.

if you have a question, ask it.  Don't reply to an old message, google
should be fixing that bug, and don't ask some nonsensical question that
doesn't seem to have any relationship to the original post.

Summary: Recruitment announcement for ham-radio-related FAQ articles
Keywords: FAQ, Intro, amateur, ham, radio, recruit, recruitment

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted twice monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

We are seeking a replacement maintainer for the following information bulletin formerly posted to rec.radio.amateur.* (and currently archived at http://www.faqs.org/faqs/radio/personal-intro/):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this article updated and automatically posted again at a regular interval.

This would include establishing contact with the original maintainer for any necessary permissions. We would prefer to seek a new, dedicated maintainer at this time, rather than start auto-posting the original article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to rec-radio-info-request@panix.com.

A circuit diagram for a very useful regenerative receiver circuit is here:
http://evospice.site88.net/regen/regen.html
It uses some well thought out design ideas to create a powerful radio from 3 transistors.

Summary: Looking for recent QST article
X-Newsreader: trn 4.0-test76 (Apr 2, 2001)
Bytes: 1881

I had my hearing checked recently, and the (not-unexpected) results
were "age-onset hearing loss" of about 10dB per octave.
(It actually onset'ted 10-20 years ago!-)

I'm pretty sure that, within the last year, there was a QST article
about a do-it-yourself hearing aid (I don't think it was called a
"hearing aid", but that's what it was, with selectable 6dB/octave
and 12dB/octave gain) for geezers like me, and I thought I had
saved/clipped that article, but I can't find it.

I tried looking at the table of contents of the digital QST, but
the download speed is so slooooooow that it's not worth the wait.

If you are a current QST subscriber and remember the article and could
tell me where to find it, or if you could even scan it, I'd sure
appreciate it.

Summary: Short reminder for unmoderated newsgroups that crossposting is permitted
Keywords: FAQ, ham, amateur, radio, moderated, unmoderated, crossposting,
permitted
Bytes: 3851

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html
```

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader opinions in March of 2009:

```
http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/
d7d337db35f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider       |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup.  After a successful trial         |
period (90 days, through early July 2009), we decided to adopt this           |
change permanently.                                                           |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

  http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date.  In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved.  We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

Summary: Recruitment announcement for ham-radio-related FAQ articles
Keywords: FAQ, Intro, amateur, ham, radio, recruit, recruitment
Bytes: 3875

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted twice monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

We are seeking a replacement maintainer for the following information bulletin formerly posted to rec.radio.amateur.* (and currently archived at http://www.faqs.org/faqs/radio/personal-intro/):

 radio/personal-intro
 Subject: Guide to the rec.radio Newsgroups
 Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
 Last Posted: 9 Nov 2001 06:18:17 GMT
 Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

 rec.radio.amateur.antenna |
 rec.radio.amateur.boatanchors |
 rec.radio.amateur.dx |
 rec.radio.amateur.equipment |
 rec.radio.amateur.homebrew |

```
 rec.radio.amateur.moderated                                                     |
 rec.radio.amateur.space                                                         |
```

We are willing to provide any technical support necessary to get this article updated and automatically posted again at a regular interval. This would include establishing contact with the original maintainer for any necessary permissions. We would prefer to seek a new, dedicated maintainer at this time, rather than start auto-posting the original article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to rec-radio-info-request@panix.com.

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently listed in the latest version of the "List of Big Eight Newsgroups" which is crossposted monthly to news.announce.newgroups, news.groups, and news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those that have been created consistent with the suggestions in "So You Want to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either "radio.amateur" or "ham-radio" in their names, including uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved newsgroups up-to-date. In case we have overlooked any, and a submission is rejected in error as a result, the rejected submitter can E-mail us at our administrative contact address (in the signature at the bottom of this article, and the default Reply-To for the rejection message) requesting that it be added, and that the article be approved. We may still choose to reject articles crossposted to any alt.* newsgroup with an inappropriate name, including obscene language, embedded name-calling, or encouragement of unlawful conduct.

Please direct any comments, questions, or criticisms to rec-radio-amateur-moderated-request@panix.com.

That's not completely true. They aren't going to lock to an RC oscillator, the reference oscillator has to be crystal controlled.

QRP still uses crystals, it's simpler and takes up less space and dowsn't draw much current.

Anyone using an old analog receiver still has as much use for a crystal calibrator as in the old days. That TMC GPR-90 I got at a garage sale in August for 20.00 came with a crystal calibrator.

There can be various standalone items where simplicity or small size is more important than changing frequency. So some sort of signal generator, if you don't need variable frequency, a crystal oscillator makes it simple. A lot of digital circuitry is clocked at a high frequency, there again one uses a crystal, though sometimes in the form of a crystal oscillator module.

If one wants a spare receiver for the local repeater, one might as well resurrect an old crystal controlled receiver, be it a consumer "plublic service band" receiver or a commercial two-way receiver, and so long as you can live with one or a frew frequencies, crystals still make it simple.

We beacon operators still use crystals. Even the PLL synthesizers need
a reference frequency and that is most often a crystal oscillator.

N0EDV/B
432.324 MHz
EN45fa
Crystal Controlled GE MastrII Exciter strip
:)

Summary: Recruitment announcement for ham-radio-related FAQ articles
Keywords: FAQ, Intro, amateur, ham, radio, recruit, recruitment

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted twice monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team.  We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

 radio/personal-intro
 Subject: Guide to the rec.radio Newsgroups
 Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
 Last Posted: 9 Nov 2001 06:18:17 GMT
 Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article       |
is that it does not mention newer amateur radio newsgroups created since      |
it was written, including:                                                    |

 rec.radio.amateur.antenna                                                    |
 rec.radio.amateur.boatanchors                                                |
 rec.radio.amateur.dx                                                        |
 rec.radio.amateur.equipment                                                 |
 rec.radio.amateur.homebrew                                                  |
 rec.radio.amateur.moderated                                                 |
 rec.radio.amateur.space                                                     |
```

We are willing to provide any technical support necessary to get this article updated and automatically posted again at a regular interval. This would include establishing contact with the original maintainer for any necessary permissions. We would prefer to seek a new, dedicated maintainer at this time, rather than start auto-posting the original article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Summary: Short reminder for unmoderated newsgroups that crossposting is permitted
Keywords: FAQ, ham, amateur, radio, moderated, unmoderated, crossposting, permitted

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently listed in the latest version of the "List of Big Eight Newsgroups" which is crossposted monthly to news.announce.newgroups, news.groups, and news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those that have been created consistent with the suggestions in "So You Want to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either "radio.amateur" or "ham-radio" in their names, including uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved newsgroups up-to-date. In case we have overlooked any, and a submission is rejected in error as a result, the rejected submitter can E-mail us at our administrative contact address (in the signature at the bottom of this article, and the default Reply-To for the rejection message) requesting that it be added, and that the article be approved. We may still choose to reject articles crossposted to any alt.* newsgroup with an inappropriate name, including obscene language, embedded name-calling, or encouragement of unlawful conduct.

Please direct any comments, questions, or criticisms to rec-radio-amateur-moderated-request@panix.com.

I have an old Magnadyne SWR-72 for 11 meter (CB). I want to modify it so I can use it on 2 meter (VHF).

The only frequency sensitive components I can see are a couple .001 caps in parallel with a couple 150 ohm resistors. Can i change the meter's frequency response by changing the RC combination in the circuit?

I would submit a photo but I don't know how to attach to this message.
Thanks in advance.

```

That appears to be the same as several types of SWR meters with a differant name. Most of them were rated to go to 150 mhz. Some were in about the same box with two meters on the box and no forward/reverse switch. I have used one up to 220 mhz and it seemed ok for adjusting for minimum SWR. They will not work at all at 440 mhz for swr.

The resistor is to match the internal line to the impedance. The .001 cap is just an RF bypass. The main things that determin the frequency are the two wires that are parallel to the wire going from the centers of the two pl259 connectors. If too short, they will not pick up enough signal to set the meter to full scale. If too long, they will not respond to the direction of the forward to reverse power.

If the meter is built like that, it will probably work from 0 meters to two meters just as it is.

Ralph, Thanks for your informative reply. You're right, there were several manufacturers that made these units (Midland, Pace, Numark, etc.). I did try to hook it up, but the SWR was 1.3:1 (almost the same as I got with a dummy load), which I thought was too good to be true, but maybe it was due to the low wattage being used (<4 watts). I'll get some proper cables built and go from there. Thanks again.

If you can get two 50 ohm dummy loads you can put them into a T connector and the swr should be around 2:1.   That is one way to run a quick check.

Some times using low power will cause the swr to show differant as the diodes will not have enough voltage to act the same as they do with a higher voltage. That is called the square law reagon. While the readings may not be accurate, the lower the reverse reading, the better.

I should qualify that statement about the SWR. The actual SWR will be the same nomater what power you use, but some meters will show a differant ammount due to the way the diodes act.

Depending on the antenna and the ammount of coax, the swr can be shown as very low. If you have around 100 feet of rg58, the swr the meter shows will be very low and not too much you do at the antenna will change it.
I made that mistake about 40 years ago when I built a 2 meter antenna and fed it with 100 feet of rg-8. The swr was about 3:1 and nothing I did would change it. Turns out that the center wire was not hooked to the antenna.
The coax has enough loss that it will only show about 3:1 with nothing connected to it at 2 meters.

I'm not sure I believe this, what do you think? thanks in advance

Summary: Recruitment announcement for ham-radio-related FAQ articles
Keywords: FAQ, Intro, amateur, ham, radio, recruit, recruitment

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
```

Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

We are seeking a replacement maintainer for the following information bulletin formerly posted to rec.radio.amateur.* (and currently archived at http://www.faqs.org/faqs/radio/personal-intro/):

 radio/personal-intro
 Subject: Guide to the rec.radio Newsgroups
 Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
 Last Posted: 9 Nov 2001 06:18:17 GMT
 Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

 rec.radio.amateur.antenna |
 rec.radio.amateur.boatanchors |
 rec.radio.amateur.dx |
 rec.radio.amateur.equipment |
 rec.radio.amateur.homebrew |
 rec.radio.amateur.moderated |
 rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this article updated and automatically posted again at a regular interval. This would include establishing contact with the original maintainer for any necessary permissions. We would prefer to seek a new, dedicated maintainer at this time, rather than start auto-posting the original article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to rec-radio-info-request@panix.com.

Tom,That was what I came up with too. At first I thought it looked overly c=
omplicated. I was hoping there would be a simpler way that I was missing.

Close Dave, I need to modify this for H type balanced pads so I am thinking 4PDT
switches.

Thanks for your suggestion and time.
Jimmie

I'm trying to get some accurate power readings with a low power rig (<5 W) and an RF Ammeter. The trouble is that the ammeter doesn't read quite up to the highest level of the transmitter and I need to reduce the power to the meter by about half. I'm thinking a 3 dB attenuator, but how am I going to find the oddball resistances and what about resistor wattage? Is there any other way to reduce power to the meter? Need something simple, quick-- but accurate. Thanks.

Use the calculator at
http://chemandy.com/calculators/matching-pi-attenuator-calculator.htm to
find resistor values. This calculator lets you adjust the resistor values
to values that you have, or can easily construct, and the recalculates the
attenuation with your new values.
Don't forget that you can use parallel/series combinations to get pretty
close to the ideal values. Mouser and Digikey stock a pretty wide variety
of resistor types and values. Be sure to check them out.

You'll need to know the impedances of your transmitter output and the
antenna in order to get correct R values.

Cheers,
--

I'm not sure there are any simple answers to obtaining "accurate" power
readings
with an "inline" RF Ammeter. (due to variable input and output impedances
and response
of MOST RF Ammeters, and such). However it is relatively easy to increase
the
range of an RF Ammeter by shunting it (paralleling it) with a low
resistance, low
impedance resistor made from a short length of wire. (bailing wire, iron,
fence or
what have you)
The Ammeter will have a very low resistance to begin with, so a very
low resistance
homemade shunt wire resistor can be fairly short, and length determined by
quick
experimentation. Run RF through the meter and take a reading at almost (or
at) the
top end of the scale. Then temporarily jumper the meter with the homemade
shunt
and adjust it's length until the meter reads half scale (if you want to
double the meter's
range), and tighten things up. Done. At less than 5 watts you can do this
hot, with your
fingers. (assuming your final is not a tube type with plate voltage
appearing at the
antenna terminal... YIKES!!!!!
Results will definitely not be accurate, but should be repeatable for
most comparative purposes.

That's my story, and I'm sticking to it.

Old Chief Lynn, W7LTQ

This is exactly how I would do it (in fact, I'm sure I did this about 50 years ago). As you say, a thermocouple RF ammeter will have a very low resistance between the terminals - and there's no reason why you can't measure it with a (probably digital) multimeter. You will then have a good idea of the value of shunt you will need. You can then do the final adjust-on-test 'make it read half' procedure.

I just bought a 50/60 hz transformer rated 575VAC
pri to 230VAC sec
rated at 2.5KVA on ebay. I remember reading some time ago that
transformer companies rated their transformers to 1000 hz.

I'm needing like a 3KVDC at about 1.5KVA semi regulated supply but don't like to use lots of mfd's of filtering at higher voltages to get there. For a 4X1 PA ima building.

So I figure getting there by using a tl494 and bridge switching 4 IGBT's at 1000hz square wave on a 130VDC supply to the 230VAC winding on the transformer. AT square wave I figure 325 VAC output, from the 575VAC side.

Running a 10 step ladder multiplier, that would be 5 steps negative and 5 step positive I should get around 3250VDC. On a half wave multiplier I figure the last step being hit by 200 hz pulses at each end of the ladder.

So Am I just spinning my Wheels? and stick with 60hz and lots of mfd's with a autoformer configuration getting more VDC per step and going with 6 steps, 3 up and 3 down at 60hz? And no easy way of regulation?

Raypasi,

Running the transformer at 1KHz will likely cook the core. The laminations will be much too thick at that frequency to keep the eddy current heating to an acceptable level. Generally the higher the frequency the thinner the laminations have to be. At some point the core material is changed to something else, like ferrite, to keep the heating down.

73's

Leland C. Scott

Hey OM:

I've seen 400 Hz transformers from old air force airplanes it's true
the lamination's are thinner but the physical size per unit power is
1/6 that of a 60 hz transformer. To wit a 2.5 k VA transformer made
for 400 Hz would weigh in at about 6 pounds compared to my Hammond
Canadian made performer at 40 pounds.

Looks like I'm going to be switching 230 v Dc from 2 separate 115 vac
lines on the same side of the main 230 vac line. I'll keep the switch
speed down to 120 Hz Since I found a stacked doubler that gives a
quadruple output. Thus the output capacitor charges twice as fast over
a ladder style multiplier.

Though one fellow ham told me to just buy a 1.5 k VA isolation
transformer to convert 115 to 230 vac. He is a Canadian ham also since
I have a Canadian Transformer.

Thanks for the advise

Summary: Short reminder for unmoderated newsgroups that crossposting is permitted
Keywords: FAQ, ham, amateur, radio, moderated, unmoderated, crossposting, permitted
X-Received-Bytes: 3691

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently listed in the latest version of the "List of Big Eight Newsgroups" which is crossposted monthly to news.announce.newgroups, news.groups, and news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those that have been created consistent with the suggestions in "So You Want to Create an Alt Newsgroup" at:

  http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either "radio.amateur" or "ham-radio" in their names, including uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved newsgroups up-to-date. In case we have overlooked any, and a submission is rejected in error as a result, the rejected submitter can E-mail us at our administrative contact address (in the signature at the bottom of this article, and the default Reply-To for the rejection message) requesting that it be added, and that the article be approved. We may still choose to reject articles crossposted to any alt.* newsgroup with an inappropriate name, including obscene language, embedded name-calling, or encouragement of unlawful conduct.

Please direct any comments, questions, or criticisms to rec-radio-amateur-moderated-request@panix.com.

Summary: Recruitment announcement for ham-radio-related FAQ articles
Keywords: FAQ, Intro, amateur, ham, radio, recruit, recruitment

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
```

Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

We are seeking a replacement maintainer for the following information bulletin formerly posted to rec.radio.amateur.* (and currently archived at http://www.faqs.org/faqs/radio/personal-intro/):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this article updated and automatically posted again at a regular interval. This would include establishing contact with the original maintainer for any necessary permissions. We would prefer to seek a new, dedicated maintainer at this time, rather than start auto-posting the original article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to rec-radio-info-request@panix.com.

Nandu, why not just leave the new instrument and the commercial RF ammeter connected in series, and then adjust the power level (by detuning) of the power source (transmitter) and make a calibration table by comparing known current to that which you are reading on dial of new instrument?

Some of us "old school" would make a new instrument dial by disassembling the instrument, and reversing the dial plate (flipping it over).
or creating a new paper dial plate with a computer, and glueing it over the old one.

Good luck,
Lynn, W7LTQ since December 1948

Hi Old Chief Lynn,

Many thanks for your suggestions. Yes, I should do it one of these days.
The existing dial is well suited for marking with a fine 'permanent
marker' pen.

73

Nandu.

Hi there,
I am having troubles with the Alinco trying to find a voltage that goes high

or low on transmit.This is to switch the transverter into transmit mode.I have looked at the circuit diagram but have had no success.Has anyone been down this path and if they did how was it done?Any replies appreciated.
Steve VK4ADA

Summary: Short reminder for unmoderated newsgroups that crossposting is permitted
Keywords: FAQ, ham, amateur, radio, moderated, unmoderated, crossposting,
permitted

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/
d7d337db35f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider       |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup.  After a successful trial         |
period (90 days, through early July 2009), we decided to adopt this           |
```

change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently listed in the latest version of the "List of Big Eight Newsgroups" which is crossposted monthly to news.announce.newgroups, news.groups, and news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those that have been created consistent with the suggestions in "So You Want to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either "radio.amateur" or "ham-radio" in their names, including uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved newsgroups up-to-date. In case we have overlooked any, and a submission is rejected in error as a result, the rejected submitter can E-mail us at our administrative contact address (in the signature at the bottom of this article, and the default Reply-To for the rejection message) requesting that it be added, and that the article be approved. We may still choose to reject articles crossposted to any alt.* newsgroup with an inappropriate name, including obscene language, embedded name-calling, or encouragement of unlawful conduct.

Please direct any comments, questions, or criticisms to rec-radio-amateur-moderated-request@panix.com.

Built a Heathkit tube tester in 1975; and had reason to use it the other day.

Just wondering if there is any source for updated tube data since then?

How many new tubes were released after 1975? Power tubes yes, but they
likely didn't fit the tester anyway. It was past the time of Nuvistors
and Compactrons, and the 12V tubes for use in cars. Yes, people still used
tubes in 1975, but they were fading (there were already articles about
solid state replacements for tubes by 1975) and not much was being made
with tubes.

Funny this topic just popped up. I mentioned to one of our younger techs at work (30 years old) that I was thinking of building a tube radio receiver from scratch just a couple days ago. Maybe for the FM broadcast band or maybe some amateur band and set it on the shelf over my bench at work. :)

I have a 1975 version of the "RCA Receiving Tube Manual"; anything not listed on the Heathkit list can probably be figured out from this.

BTW: there's a circuit included in the back for a FM tuner utilizing 3
tubes (two 6CW4 nuvistors and a 6KE8).

Have fun!

I WILL BUY YOUR BROKEN/TRASHED ICOM H.F. RADIO

I WILL BUY YOUR BROKEN/TRASHED ICOM H.F. RADIO

Hi,

I want to get back on the air by seeing if I can fix a trashed or non-working Icom h.f. radio.

Has to be cheap.

Thank you.

W5BRY

Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/
```

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

We are seeking a replacement maintainer for the following information

```
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

 radio/personal-intro
 Subject: Guide to the rec.radio Newsgroups
 Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
 Last Posted: 9 Nov 2001 06:18:17 GMT
 Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article       |
is that it does not mention newer amateur radio newsgroups created since      |
it was written, including:                                                    |

 rec.radio.amateur.antenna                                                    |
 rec.radio.amateur.boatanchors                                                |
 rec.radio.amateur.dx                                                         |
 rec.radio.amateur.equipment                                                  |
 rec.radio.amateur.homebrew                                                   |
 rec.radio.amateur.moderated                                                  |
 rec.radio.amateur.space                                                      |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions.  We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Good luck! I had a 745 until the late 90s. I loved that radio. Wore the heck out of it but it reached the point to where it was like an old car. Always needed some tinkering.

I live in the Caribbean so the environment was a big factor. Cleaning cards and sockets and plugs became routine every time I wanted to use it. No major failures (it got new finals and a new ROM board in the early 90s).

Wish I could get another new one like it these days!

I was surprised to get $180 as-is out of it on ebay with a pockmarked front panel.

-Bill

Hey, Bill.

Where in the Caribbean are you? My wife is from Antigua. W.I.

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either "radio.amateur" or "ham-radio" in their names, including uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved newsgroups up-to-date. In case we have overlooked any, and a submission is rejected in error as a result, the rejected submitter can E-mail us at our administrative contact address (in the signature at the bottom of this article, and the default Reply-To for the rejection message) requesting that it be added, and that the article be approved. We may still choose to reject articles crossposted to any alt.* newsgroup with an inappropriate name, including obscene language, embedded name-calling, or encouragement of unlawful conduct.

Please direct any comments, questions, or criticisms to rec-radio-amateur-moderated-request@panix.com.

Summary: Recruitment announcement for ham-radio-related FAQ articles
Keywords: FAQ, Intro, amateur, ham, radio, recruit, recruitment
```

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

```
The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team.  We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

 radio/personal-intro
 Subject: Guide to the rec.radio Newsgroups
 Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
 Last Posted: 9 Nov 2001 06:18:17 GMT
 Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article       |
is that it does not mention newer amateur radio newsgroups created since      |
it was written, including:                                                    |

 rec.radio.amateur.antenna                                                    |
 rec.radio.amateur.boatanchors                                                |
 rec.radio.amateur.dx                                                         |
 rec.radio.amateur.equipment                                                  |
 rec.radio.amateur.homebrew                                                   |
 rec.radio.amateur.moderated                                                  |
 rec.radio.amateur.space                                                      |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions.  We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

I've relisted several items; Several listings going on at the moment -
Bussmann 3AG
silver-plated fuse clips, sealed MicroSwitch brand toggle switches, 8
pc.
lots of C&K / Dialight / etc. electronics switches,  and some old
unrelated Soviet Union / CCCP memorabilia... see them all here;

http://www.ebay.com/sch/bobsx/m.html

Thanks for your time.

IVe never used stepper motors before and would like to use a couple to cont=
rol a simple L antenna tuner with just one roller inductor and one vacuum v=
ariable capacitor. My plan is to use a track ball I salvaged from an old ar=
cade game as the human interface. The outputs of the trackball assembly are=
 TTL level pulses when the ball is moved and a signal that is either high o=
r low depending on which direction the ball is moved. There are two sets of=
 these signals one each for X and Y axis. I was hoping someone could recomm=
end a controller motor combination preferably a controller that will interf=
ace directly with the TTL voltage.
TIA=20

1975 is probably fairly current as tube data goes.

No it doesn't matter.  But it sounds like you just have a bare piezo
element, not the whole buzzer.  What is driving it?

Huh?

If it's just the element, it probably doesn't matter. But if it's an
actual buzzer, of course polarity matters, since there's an active device
in there to make the sound, and it is polarity sensitive.

Summary: Recruitment announcement for ham-radio-related FAQ articles
Keywords: FAQ, Intro, amateur, ham, radio, recruit, recruitment

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

We are seeking a replacement maintainer for the following information bulletin formerly posted to rec.radio.amateur.* (and currently archived at http://www.faqs.org/faqs/radio/personal-intro/):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this article updated and automatically posted again at a regular interval. This would include establishing contact with the original maintainer for any necessary permissions. We would prefer to seek a new, dedicated maintainer at this time, rather than start auto-posting the original article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

I have a Realistic PRO-2003 AM/FM scanning receiver for sale. It is in very good shape and comes with the manual. I'm asking $45 plus postage for it. You may contact me off the newsgroup.

Thanks

Henry

hey guys,

if you are interested in non icom hardware working very well - look here : www.dvrptr.de
  and soon C4FM / 4FSK 4800baud (APCO P.25 Phase I)

For order info just press the link http://flyheli.dyndns.org/dv/dvorder/Default.aspx

Find here the news posted in the yahoo group :

Starting in April 2012 we will have two additional boards which can be plugged on the DV-RPTR board:

1) AMBE Speech Codec Board

This tiny board has connectors for Microphone and Speaker. Together with the DV-RPTR and an FM transceiver you get a real DV transceiver.

This board has two modes:
* DV Transceiver to make QSOs via DV Repeaters or direct
* DV Dongle Mode to talk via Reflectors in the internet

2) FM Transceiver Board

a little add-on board to be plugged on the DV-RPTR. It has a simplex transceiver based on the well known chipset which is also used in the UV-3R. It covers 2m and 70cm HAM bands. The output power is 2 watts max.
It turns your DV-RPTR into a wireless hotspot.

Both boards can be connected to the DV-RPTR at the same time. Then you have a real DV-Transceiver. In this configuration it does not fit into the little metal box, you will need another box.

Please help us !
We need to know how many AMBE Chips and Transceiver Chip we have to buy. If you are interested then please go to www.dvrptr.de and register the quantity of boards you need.
Thank you
Your DV Developer Group

A solution to that is to make it more like they used to do AM broadcast transmitters: feed the RF stage its DC through an audio choke, and capacitor-couple the audio into the RF deck end of the choke (from one of the plate connections on the audio transformer). If the audio amplifier and the RF deck use the same plate voltage, the capacitor doesn't need to handle the full DC voltage, but it should be non-polar. The problem then becomes one of finding (or winding) an audio choke with enough inductance and that can handle the current. In AM broadcast transmitters, the modulation choke was typically the largest component. Since for voice you should only need to get down to 300Hz or so, 10 henries inductance should be OK (about 20k ohms impedance), and you might be OK with less. A 4.7uF coupling capacitor should work OK, as it would be just over 100 ohms reactance at 300Hz. 4.7uF film capacitors aren't unreasonable to find. You wouldn't ever get to 100% modulation, since the audio side doesn't go to zero volts on the plate of the conducting side, but you could add the voice coil winding in the proper phase to get a bit more modulating voltage.

I've also seen a design where the modulator was single-ended but used a push-pull transformer; the RF amp was fed its DC through the other side of the center tapped winding. That allowed reasonable balance of the DC in the transformer, and worked decently.

Cheers,
Tom

Thanks for sharing that, Ian. The webpage says "1960's." You
wouldn't happen to know any closer than that, would you? The one I'm
thinking of was a homebrew unit that as far as I know was developed by
Dick "Mitch" Mitchell in Washington state. I forget his call. He
developed it before I became a ham, so it must have been mid 1950's.
He used a 6146 RF PA, and 6146 modulator output. It was a minimalist
design, using a carbon mic with a mic transformer to directly drive
the modulator grid. I think he had a couple tubes in the RF chain
before the 6146, but I don't remember. It was very compact, built
entirely inside a 3" high aluminum chassis box, probably 10" x 12".
It used an external power supply: a dynamotor in mobile applications,
typically. We typically used one on Field Day, and given how much
power was dissipated inside that small box, I was a little surprised
that we pretty much never had any problem with it. I don't recall now
if he built them as single-band units, or had some band switching.

Cheers,
Tom

No really. It was just that the mention of the centre-tapped modulation
choke immediately reminded me of the Codar AT5 and the matching
receiver, the matching receiver, the T28. I used the pair mobile back in
the 1960s, and although such equipment is hardly up to today's
more-exacting standards, I had great fun with them. You occasionally see
the odd one (or pair) on sale at the various amateur radio rallies, for
around $50.

this is of course a perfectly good solution, at least from a technical=20
point of view, but... audio chokes are nowadays precious rare modern art =

masterpieces :) and the only practical way to get a suitable one is to=20
wind it yourself, which is more or less the same as winding your own=20
transformer :)

> ...I've also seen a design where the modulator was single-ended but use=
d
> a push-pull transformer; the RF amp was fed its DC through the other
> side of the center tapped winding.  That allowed reasonable balance of
> the DC in the transformer, and worked decently. ...

been there, done that - it sure works, in a fashion... but not very=20
satisfactorily. At the time when I tried it, I reasoned that using a=20
single ended audio tube with a plate current more or less similar to=20
that of the RF amp tube, the total core flux in the transformer should=20
be more or less balanced - what I did not know then (I was *very*=20
young...) was that average plate currents mean very little, saturation=20
occurs because of peaks! :)

This Varmint XL1000 Is bad to the bone you can key it up with 1 watt
everthing works as it should.The tubes are all new and they are 6jt6
Driving 6lr6.It has been completely gone threw.

===

To my knowledge it is called Heising modulation.As a young
(radio-unlicenced) boy I made a single 6K7 valve(tube) oscillator for
the 80m band with the anode fed by the anode voltage of a single EL3
output valve 4 Watts audio amplifier meant to feed a loudspeaker. With
a long wire antenna the results were an amazingly clean AM signal
getting out well in excess of 100 km
Those were the days before SSB.

Frank   GM0CSZ / KN6WH   only licenced since 1985.

Summary: Short reminder for unmoderated newsgroups that crossposting is permitted
Keywords: FAQ, ham, amateur, radio, moderated, unmoderated, crossposting,
permitted

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/
d7d337db35f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those that have been created consistent with the suggestions in "So You Want to Create an Alt Newsgroup" at:

  http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either "radio.amateur" or "ham-radio" in their names, including uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved newsgroups up-to-date. In case we have overlooked any, and a submission is rejected in error as a result, the rejected submitter can E-mail us at our administrative contact address (in the signature at the bottom of this article, and the default Reply-To for the rejection message) requesting that it be added, and that the article be approved. We may still choose to reject articles crossposted to any alt.* newsgroup with an inappropriate name, including obscene language, embedded name-calling, or encouragement of unlawful conduct.

Please direct any comments, questions, or criticisms to rec-radio-amateur-moderated-request@panix.com.

Summary: Recruitment announcement for ham-radio-related FAQ articles
Keywords: FAQ, Intro, amateur, ham, radio, recruit, recruitment
X-Received-Bytes: 3537

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

We are seeking a replacement maintainer for the following information bulletin formerly posted to rec.radio.amateur.* (and currently archived at http://www.faqs.org/faqs/radio/personal-intro/):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |

```
 rec.radio.amateur.dx                                                        |
 rec.radio.amateur.equipment                                                 |
 rec.radio.amateur.homebrew                                                  |
 rec.radio.amateur.moderated                                                 |
 rec.radio.amateur.space                                                     |
```

We are willing to provide any technical support necessary to get this article updated and automatically posted again at a regular interval. This would include establishing contact with the original maintainer for any necessary permissions. We would prefer to seek a new, dedicated maintainer at this time, rather than start auto-posting the original article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to rec-radio-info-request@panix.com.

Most multi-meters only measure voltages up to 1000 volts. How do you measure voltages often used with tubes like 3-500z or 3cx1500a7 tubes?   Will the range extended from Fluke listed below work with a 1000v 10 mega ohm multimeter?

80K-6 High Voltage Probe
http://www.fluke.com/fluke/usen/accessories/high-voltage-probes/80k-6.htm?PID=55358

The multimeter I have is the Radio Shack 22-801 which is rated for up to 1000 volts.

Radio Shack 22-801 owner's manual
http://www.radioshack.com/graphics/uc/rsk/Support/ProductManuals/2200801_PM_EN.pdf

Thanks

Michael

Yes, the probe will work with your multimeter. The probe description says
that it will work with any multimeter that has a 10 Megohm input impedance.
Your multimeter manual says that it has a 10 Megohm input impedance on DC
and AC functions.

I have a couple SN75161AN GPIB (HP-IB) bus transceivers that I'll post
to the first person who wants/claims them, to save them from the

trash... These are unused HP surplus parts, in conductive foam.

(I'm also liable to soon have a bunch more DIP-packaged logic
available. Anyone out there still use this stuff? It's still fine
for playing with, but I just don't see myself doing anything with it.)

Cheers,
Tom

Hi All:
Just picked up a TS-118A/AP Wattmeter. I'm missing the MX 1785/U, the MX-1782/U, the tuning shunt MX-1784/U and the chart for the chart for the MX-1781 and MX-1785 elements. Does anyone know where I can get these elements? and can anyone send me a copy of the charts?

Thanks in advance.
Richief

Go to the BAMA mirror site at
http://bama.edebris.com/manuals/military/ts118/ and download the DJVU manual
for the TS118A. It has the charts that you're looking for.

I am very new in electronic circuits and I am using NE612 as a frequency mixer. In the datasheet a sample circuit for this purpose is shown. Nevertheless, it is for 45 MHz. There are some capacitors and inducers shown in the circuit diagram. However, I need to use some other frequencies as well. I was wondering if the values of capacitance and inductance which are shown in the datasheet should be changed for

frequencies other than 45 MHz. I am not using it in radio applications,
so I only need to have the IF produced in the output. I am really
looking forward to hearing some help. If I have to change them, how
should I measure them?
Thanks a lot for all helps
Best regards
Mohsen Erfanzadeh

I suggest you refer to the application notes for the device. This will probably be your best source of information.

DO THIS WITH EXTREME CAUTION. Knowing the input resistance of the meter it =
is easy to use a series resistance to scale the input voltage. I have inser=
ted 11M
in the front end of my 11M input impedance meter to make a 2X voltage divid=
er. I connected the meter to the circuit, placed it in a Pyrex baking dish =
for insulation, stood at a distance and energize the power supply. I used s=
everal HV resistors removed from an old TV because I figured there was a da=
nger of arc over using common resistors. I was truly surprise the meter did=
nt melt down annd the house main breaker didnt trip.

Bridge the pad with a DPST switch or relay. Switch "on" pad "off".

I have several 1kW Larcan television transmitter modules available.
These are "low-split" modules and do not require modification for
6-meters. They will also cover the 70MHz / 4-meter band with no changes.

A full write up and pictures are available at
http://www.gemoto.com/LarcanPA.htm
(Note: This is NOT my web page and is supplied for information purposes
only)

With some work, these amplifiers will produce well over 1kW on 2 meters.

RF input and DC input connectors are included. Other parts such as DC
power supply 50V @ 50A, RF coaxial relays, cooling fans, etc are needed
to get operational. Some assembly required.

Packaged weight is about 20kg / 44 pounds. The amplifier module itself
weighs about 14kg / 31 pounds.

Price is $370 plus packing and shipping from Nova Scotia, Canada. Total
cost approx $455 - $485 throughout the USA. Proceeds of the sale go
towards my local club. PayPal preferred.

Further information, pictures, etc available on my web page.

I actually built a HV meter for an amplifier project years ago using a
surplus 0-1ma panel meter and a string of 10 meg ohm resistors.  The
resistors were 1/2 W 5% and the entire string was covered with two
layers of heat shrink tubing for insulation (heated to shrink it around
the resistor string).  I hand selected the resistors measuring their
value with my Fluke mutimeter so I actually had an accuracy better than
5% in the multiplier chain.   The panel meter I used was intended to be
inserted into a HV circuit so the case was insulated to withstand the
voltage with the meter panel mounted.   While I connected the meter
across the full plate supply voltage, if you are using series connected
capacitors in your plate supply (with divider resistors across each cap)
you can connect your voltmeter 'tapped down' on the divider chain and
multiply the reading by the divider ratio.  This will be safer than
measuring the full voltage directly, but you will lose some accuracy
depending on the tolerance of the divider/bleeder resistors across the
capacitors.  In most cases you don't need to know the plate voltage to
better than 5% anyway.

Thanks a lot Jimmie, I am exactly trying to learn what I have to do
with. I suppose I should learn more about LC filters and oscillator
stabilizers. Am I right?
Thanks again.

=======================
Perhaps it is useful to mention that non-HV resistors should not be
�exposed� to more than 500 V , meaning that for a measuring range of for
example 5000 V any string should have not less than 10 resistors
(whatever the resistance values required)
Personally I would tap a relatively low voltage from a loop string with
on the tap a ten-turn trimpot in series with a fixed resistor.
If the DVM would have a max range of 1000 V I would first by means of a
variac adjust the PSU�s output to 1000 V ,directly measured with the
DVM . Thereafter with the string in place I would connect the DVM to the
tap and adjust the ten-turn trimpot for the correct multiplication
factor with the DVM range set at a range lower than 1000V . The ten-turn
trimpot would be exposed to a low voltage differential and serve only
for fine adjustment. All this would result in a measuring uncertainty
of better than 5%.(assuming the DVM has a measuring uncertainty equal or
better than 2%)

Summary: Short reminder for unmoderated newsgroups that crossposting is permitted
Keywords: FAQ, ham, amateur, radio, moderated, unmoderated, crossposting, permitted

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently listed in the latest version of the "List of Big Eight Newsgroups" which is crossposted monthly to news.announce.newgroups, news.groups, and news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those that have been created consistent with the suggestions in "So You Want to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either "radio.amateur" or "ham-radio" in their names, including uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved newsgroups up-to-date. In case we have overlooked any, and a submission is rejected in error as a result, the rejected submitter can E-mail us at our administrative contact address (in the signature at the bottom of this article, and the default Reply-To for the rejection message) requesting that it be added, and that the article be approved. We may still choose to reject articles crossposted to any alt.* newsgroup with an inappropriate name, including obscene language, embedded name-calling, or encouragement of unlawful conduct.

Please direct any comments, questions, or criticisms to rec-radio-amateur-moderated-request@panix.com.

I am conducting ongoing experiments with regenerative radio receivers. One problem I have repeatedly encountered is low frequency squigging/motorboating. Particularly when using somewhat higher CE transistor currents. Oddly, changing the values of any of the capacitors in the circuit did not change the frequency of the squigging. There was nothing wrong with the decoupling and even adding additional decoupling capacitors had no effect. Almost certainly the unwanted low frequency oscillations are due to electrothermal effects.

Directing hot air from a hairdryer at the transistors for less that a second stopped the low frequency oscillation. After stopping the hairdryer the circuit started squigging again after a couple of seconds.

The fact that regenerative receivers are operated with the amount of positive feedback (regeneration) so close to the threshold of oscillation makes the extremely sensitive to the gain of the sustaining amplifier.

Even slight changes in the gain of the transistors (caused by self-heating or the environment) can then have a big effect. This is almost certainly the basis of the low frequency squigging in the circuit.

Errrrp. That leaves the pad in-circuit across the line...not good in most situations. Better if the switch also disconnects the pad from the line. You probably need a 4PDT switch: the four moveable contacts to the input and output lines, the four fixed contacts on one side to the four terminals of the pad, and the four fixed contacts on the other side wired so the line connects straight through. You can do it a bit more simply by bridging the pad with the DPST as suggested, but also adding a SPST that is N.O. if the DPST is N.C., with the SPST opening up the shunt path in the H-attenuator.

If you leave the H-pad in the circuit, bridging it with a DPST and not opening up the shunt path, assuming the pad is the same impedance as the line (=3DR in the following...), you shunt the line with 8.7*R for a 1dB pad (not terrible...), 2.9*R for a 3dB pad (not so good), and 0.95*R for a 10dB pad (pretty awful).

Cheers,
Tom

This is probably what you're looking for:
http://www.arrl.org/files/file/Technology/tis/info/pdf/9506033.pdf
With careful construction, you should get pretty accurate results at HF and
VHF frequencies. Using SMD resistors in the construction should yield even
better performance than described in the construction article, since it
looks like the author used metal or carbon film resistors, which are
somewhat inductive. Use of a PCB and good shielding between the sections
should give you a really good attenuator.

Granted, the article describes a Pi-type attenuator, but the technique
should be applicable to an H-type circuit as well..

But that's "normal".

Howard Armstrong noticed it early on, and never pursued it. Then later, I think when he was doing some work on regeneration preparatory to the court battle over the patent, he noticed it again. And then he pursued it, and got superregeneration. So his original regen circuit could oscillate at ultrasonic frequencies as well as at radio frequencies if the regen was turned up too much. It was just incidental, later he tried an external ultrasonic oscillator to "modulate" the regen receiver, but for most of the time ever since, the same active device has been both the RF transistor and the ultrasonic oscillator. It was all very black box for most of that time, as it got relegated to secondary status, the explanations dropping off and few pursuing it much.

It's really a scheme similar to reflex (where one stage is both amplifying radio frequency and audio frequency) or "autodyne" circuits, where the same stage is both a rf mixer and rf oscillator.

One project in QST and later their VHF manual had a receiver chain that used converters feeding an IF strip and then a regen detector, the regen detector configured so it could go into ultrasonic oscillation too so it could be either regen (for CW) or superregen.

Turn down regen. That may fix the problem. Or try another circuit. Realistically, it's not the sort of thing that people report, so it would seem plenty of regen circuits, tube and transistor, don't have a problem.

Michael VE2BVW

>> switch in the forward power position, set the adjustment for full scale. Now, without touching anything, swap the coax connections so that the rig is connected to the "ANT" side of the meter, and the antenna is connected to the "XCVR" side. The reading you see on the meter will be very close to your real SWR. The closer to 1:1 your SWR is, the more accurate it will be. It would be more convenient to have a real SWR meter or antenna analyzer if you do a lot of testing, but for a quick antenna check after a mobile install or whatever, the $5 CB meters work OK.
>
> I'm not sure I believe this, what do you think? thanks in advance

For the meter you have, it is mostly true. I don't know if it is really any more accurate,but it will work just fine. Usually when you get under about 1.8 or 1.5 to 1 that is close enough. The main thing is just to tune for the lowest reflected power. As long as it is low enough the rig puts out full power, that is the main thing in most cases.

Most any of the SWR or directional watt meters will work fine in either direction. You can take the meter you have and hook it up the way you are suspose to and see what you have. The reverse the coax. You also have to keep it in your head the forward/reverse switch will work backwards. That is you set it for reflected power and adjust for full scale. The switch it to forward to read the SWR. That is one way to run a quick check to see if the SWR meter is working like it should. You may see a small differance,but should not be too much.

The meter you have has two coupling wires. One is used to measuer the forward power and one measuers the reflected power. They should be exectally the same. Those 150 ohm resistors should be exectally the same also, but they are ofter eithe r 5 or 10 percent resistors. As with most mass produced items, on line may be a fraction of an inch longer or closer the the center line. This is not usually a problem. After all , this is not a lab grade instrument. Even the much praised Bird meter is not really that accurate if you read the specifications.

Watt meters are not normally needed to be super accurate. I have a service monitor that origionally cost around $ 50,000. Bought it for under $ 1000 as it was mainly for the old cell phone stuff that is not used any more, but it also works great for other servicing.

The frequecny readout is almost dead on. The specs is something like being within 85 Hz at 850 Mhz. The wattmeter is still only rated for about 5%.

Dear OM's,

Im looking for the SM of the both TRX mentioned in the subject line.
Would be nice if someone of you could drop me a mail with the corresponding
attachment - if possible.

I get both boxes from Ebay in a defect state and would like to get them running.
I know a big effort but it's a kind of hobby for me.

Many thanks in advance for your help.

```
PS.: The IC245E is receiving in all modes, but don't like to transmit rf.
     The IC211E seems to had a defect in the PSU.
```

Thanks again for your educational and informative response. I have certainly learned a lot with your help. Thank You!

As luck would have it, today I picked up another one with 2 UHF cables at a thrift store for $5, I couldn't pass it up (the cables alone were worth it) . This one is a Midland 26-126 and it's damaged. One of the 150 ohm R is burned and open, not sure of any other damage.   I'm going to replace both resistors and try to get a matched set (close as possible). I have yet to test the meter movement, that's next.

Thanks again Ralph. It is appreciated.

Summary: Recruitment announcement for ham-radio-related FAQ articles
Keywords: FAQ, Intro, amateur, ham, radio, recruit, recruitment

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted twice monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/
```

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

We are seeking a replacement maintainer for the following information bulletin formerly posted to rec.radio.amateur.* (and currently archived at http://www.faqs.org/faqs/radio/personal-intro/):

```
 radio/personal-intro
 Subject: Guide to the rec.radio Newsgroups
 Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
 Last Posted: 9 Nov 2001 06:18:17 GMT
 Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article       |
is that it does not mention newer amateur radio newsgroups created since      |
it was written, including:                                                    |

 rec.radio.amateur.antenna                                                    |
 rec.radio.amateur.boatanchors                                                |
 rec.radio.amateur.dx                                                         |
 rec.radio.amateur.equipment                                                  |
 rec.radio.amateur.homebrew                                                   |
 rec.radio.amateur.moderated                                                  |
 rec.radio.amateur.space                                                      |
```

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Markus -

The Icom IC-245, IC-211, and IC-251 are from the mid to late 1970s.
It is not uncommon for the internal switch-mode power supply to have electr=
olytic capacitor issues (~ 35 years).

Scott Malcom, KA7MEF at MTS has outlined the most frequent issues with thes=
e Icom radios. =20
Scott worked at Icom America service (during this period) so is very famili=
ar with these radio models.

Malcom Technical Support (MTS)
5130 Jackson Hwy
Toledo, WA 98591-8680
USA
http://www.angelfire.com/biz2/mts/

ICOM 211/245(S)/251/451/701
http://www.angelfire.com/biz2/mts/Oldies.html

The most common problem is bad solder connections in the PLL unit and Displ=
ay driver unit.

BRIEF History: The 211/701 came out in 1976 (give or take a few months), Ja=
pan was trying a new type of PCB, with plated thru holes, it didn't work ve=
ry well so the plated thru holes were replace with pins, these pins were co=
ated to bond with copper and solder, and it almost worked, these pins are b=
reaking down now, and can cause anything from open connections to low resis=
tive connections.
What we are calling updates, are to remove these pins and replace them with=
 copper wire bent over on top and bottom, then resolder the connection. It =
is important to remove all the old solder. The better method is to add jump=
er wires on the bottom side of the board (this is what we do, more reliable=
), I will try to post some pictures of where the wires go, it will take a w=
hile though.=20
The IC-701 only has a few pins, and most of the boards stayed with the plat=
ted thru holes.=20
The IC-211 had 4 generations of PLL's and 3 generations of Display drivers.=
=20
The IC-245 uses the same PLL, and had 2 generations of Display drivers.

211 PLL Alignment: The PLL alignment is straight forward, does require a ac=
curate frequency counter and patience. If the frequency is off by more than=

```
 4Khz, there are other problems and the alignment sheets won't help.=20
Most common causes of problems are bad solder joints, dried out caps (elect=
rolytics) and the -9v regulator's (DC/DC converter) associated parts. (it i=
s very rare for the -9v reg. (DP1) to fail!).=20
Align A,=20
http://www.angelfire.com/biz2/mts/aligna.jpg

Align B
http://www.angelfire.com/biz2/mts/alignb.jpg

PLL Updates This is a picture of updating (wiring) a mid production version=
 PLL (400Kb)211 PLL,
http://www.angelfire.com/biz2/mts/images/211pll.jpg

and this is the older version (200Kb)211 PLL Older Version,=20
http://www.angelfire.com/biz2/mts/211old2.jpg

and this is the newer version normally called the black board (200Kb) 211 P=
LL Newer version,=20
http://www.angelfire.com/biz2/mts/211pllN2.jpg

there is one version newer than this, but it was a version that came out af=
ter the production stopped, it was a service upgrade, there are very few of=
 these versions out there and once installed, I am not aware of any problem=
s.=20
I will try to find a picture of it and post it.
=3D=3D
IC-251.  The 251 is basically a more advanced version of the 211. The Main =
unit is almost the same. The PLL and Logic are very different. The biggest =
issue with the 251 is the CMOS logic. It "glitches" and is very static sens=
itive. The CPU and Expander are no longer available new. Generally it is ve=
ry reliable, and needs very little maintenance.
=3D=3D
Good luck !

Joseph2010-

Ralph is right on the money with his advice.  I've had a couple of the
CB-type bridges that worked well on Two Meters.

I think your 1.3:1 measurement may be due to mismatch of the 150 Ohm
resistors in the bridge.  But it also could be telling you the truth!
Some dummy loads are not good on Two Meters.

Hooking it up backwards should work the same as forward, except the
switch works backwards.

You normally adjust an antenna for best SWR assuming the meter is
telling the truth.  In fact, 1.3:1 is not so bad.  If you did not have
that dummy load, you might have adjusted the antenna for a reading of
1:1 and never found out it was not perfect.

Markus-

One place that is likely to have the manuals, is www.mods.dk.  Because
of abuse, they require you to register, and only allow one download per
day unless you donate money.

Other possible sources are www.eserviceinfo.com/browse.php and
ftp.qrz.ru/pub/hamradio/schemes/.

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently listed in the latest version of the "List of Big Eight Newsgroups" which is crossposted monthly to news.announce.newgroups, news.groups, and news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those that have been created consistent with the suggestions in "So You Want to Create an Alt Newsgroup" at:

  http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either "radio.amateur" or "ham-radio" in their names, including uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved newsgroups up-to-date. In case we have overlooked any, and a submission is rejected in error as a result, the rejected submitter can E-mail us at our administrative contact address (in the signature at the bottom of this article, and the default Reply-To for the rejection message) requesting that it be added, and that the article be approved. We may still choose to reject articles crossposted to any alt.* newsgroup with an inappropriate name, including obscene language, embedded name-calling, or encouragement of unlawful conduct.

Please direct any comments, questions, or criticisms to rec-radio-amateur-moderated-request@panix.com.

HI,

I've several VHF transistor that could run about 50W.
I wonder if they are able to work under 3,5, 7 or 14 MHz ?

Thanks a lot for your answers

Teo

Generally, a transistor designed for VHF will work well on HF, and with (much) higher gain. When that is ignored, it could be a reason for instability though.

hi,

Thanks a lot for your answers.

For a long time, I've :

BLY94	50W
2N5643	40W
BLY21	15W
2N5591	5W
2N5945	4W
2N3927	20W
MRF238	30W

I never use them in vhf but they can help me to build amplifiers for my qrp.

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

```
We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

 radio/personal-intro
 Subject: Guide to the rec.radio Newsgroups
 Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
 Last Posted: 9 Nov 2001 06:18:17 GMT
 Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article       |
is that it does not mention newer amateur radio newsgroups created since      |
it was written, including:                                                    |

 rec.radio.amateur.antenna                                                    |
 rec.radio.amateur.boatanchors                                                |
 rec.radio.amateur.dx                                                         |
 rec.radio.amateur.equipment                                                  |
 rec.radio.amateur.homebrew                                                   |
 rec.radio.amateur.moderated                                                  |
 rec.radio.amateur.space                                                      |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions.  We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Dear Fred,
dear OM W9GB,

many thanks for your help and all detailed infos.

Meanwhile I managed to get a schematic from a German
om.

I will check all connections corresponding to your
description and hints.
```

I will keep you informed on any progress concerning this
repair issue.

Hello Homebrewers,

I wrote an article for my website showing how to make a home brew 9 volt battery clip from recycled parts. Makes a good excuse to fire up the soldering iron.

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently listed in the latest version of the "List of Big Eight Newsgroups" which is crossposted monthly to news.announce.newgroups, news.groups, and news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those that have been created consistent with the suggestions in "So You Want to Create an Alt Newsgroup" at:

  http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either "radio.amateur" or "ham-radio" in their names, including uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved newsgroups up-to-date. In case we have overlooked any, and a submission is rejected in error as a result, the rejected submitter can E-mail us at our administrative contact address (in the signature at the bottom of this article, and the default Reply-To for the rejection message) requesting that it be added, and that the article be approved. We may still choose to reject articles crossposted to any alt.* newsgroup with an inappropriate name, including obscene language, embedded name-calling, or encouragement of unlawful conduct.

Please direct any comments, questions, or criticisms to rec-radio-amateur-moderated-request@panix.com.

```

Hi all,

I've just completed a FOXX-3 radio kit. 40MTR 1W 12V.

I've played with crystal sets, many years ago, when I would try a million set-ups for aerial and earth, but now i would like to be a bit more precise.

I've made an aerial somewhere near the suggested ideas (end feed 1/2 wave), but on switching on. I don't get any signal from the earphone.

What I would like to know is, should any aerial work, just to find out if the radio works, or if the aerial is out of tune, will there be no signal.

Cheers, Camerart.

On 40 meters just about any wire more than 20 feet long outside should bring lots of signals. For receive only, you could just stick a 20 foot or longer wire in the antenna jack and hear something unless you are inside a building that has lots of material that radio waves will not penetrate.

If you have an antenna up that is even within 50% of being intune it should
receive lots of signals.

Thanks Ralph,

All I get is a click when I touch a 30ft wire. I've tried moving it
through the circuit and it goes from clicks to a mains hum about 1/2
way.

There is a filter circuit, after the aerial.

Cheers, Camerart.

30ft is near enough to a quarter wavelength on 7 MHz so that should be long enough to pick up signals, especially if you've got an earth connection. An end-fed half wave is a high impedance antenna and your transceiver is low impedance. If you do use an end-fed half wave you need a L-match type antenna coupler to ensure good power transfer.

I'm guessing the mains hum is heard when tapping at the input of the audio amplifier. This proves that the audio chain is working at least.

If not there's a problem with the receiver's detector that in this design is the final amplifier stage. Have you tried a locally generated signal to see if that's heard? If it isn't I'd be checking to see if the xtal osc is functioning.

It should work given the number built, but I haven't had great performance from similar circuits; and the Foxx receiver is very much a compromise. Something with a few more parts will deliver appreciably better performance. Also stages that do only one thing are easier to optimise and troubleshoot than those that try to do lots in a few stages.

I find it interesting that a design that uses 3 transistors for switching and 1 transistor for sidetone can't afford to add 4 diodes and maybe an audio preamp to form a decent receiver with a good balanced mixer. My own bias would be to compromise on the switching but not on the receiver performance. A good but still simple DC receiver is something like http://www.phonestack.com/farhan/dc40.html   My version is demonstrated at http://www.youtube.com/watch?v=Tc2ofe7T7Rw

Still, the above is a bit of a rant and if lots of others have got it working fine, yours should work too. When you do it pays to use a resonant 40 metre dipole rather than a random wire (better receivers are less critical due to higher sensitivity & selectivity).

Has anyone else tried these circuits?
I have built 2 examples, a 9 MHZ AGC controlled amplifier and a 20 dB wideband amp for a noise cancelling system.
BIG problems! The diode string in the source of the FET always biases the J310 OFF.
Result, no gain or a loss!!!
It took me an hour or two to twig what was going on. The trouble is that I cannot see how it can possibly work when the gate is referenced to ground. It is equivalent biasing off a valve!
Not only that, but the AGC circuit published at the same time had extreme instability in the front end of the AGC amplifier. I am a VERY experienced electronics person (60 years) and was unable to find any obvious reason for this.
SO Now I have actually began to lose faith in one of my favourite engineers.
Or, have I done something really stupid in my old age.
FYI the circuits were built "dead bug" style with extensive shielding and full decoupling.

Thanks vk3ye,

I've just joined a Ham culb and this is my first radio. I got my
licence in 1985, so I must have learned this all before, and forgotten
it?? There is also someone at this club who is making one. He will
help me as well. I asked this forum, as a way of getting a perhaps

different view, also as a crash course for me.

I'm puzzled about one transisor, at the point where I get a mains hum between it and the earphone and I can check there is a connection from the aerial conector and this transistor. I tried an oscilloscope on the transistor, there is a crystal frequency at the Base, but not much on the pin that goes on towards the earphone. I don't know what to expect. but I feel suspicious.

Thanks, Camerart.

Summary: Recruitment announcement for ham-radio-related FAQ articles
Keywords: FAQ, Intro, amateur, ham, radio, recruit, recruitment
Bytes: 3549

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted twice monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

We are seeking a replacement maintainer for the following information bulletin formerly posted to rec.radio.amateur.* (and currently archived at http://www.faqs.org/faqs/radio/personal-intro/):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this article updated and automatically posted again at a regular interval. This would include establishing contact with the original maintainer for any necessary permissions. We would prefer to seek a new, dedicated maintainer at this time, rather than start auto-posting the original article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to rec-radio-info-request@panix.com.

FOXX-3 update,

Last night, I remembered there is an offset side tone control, that I hadn't touched yet. I tried turning it, and this seemed to start it up. I could hear faint morse code. This morning I'm going to try to tune the aerial, and see if I can get clearer signals.

Cheers, Camerart..

FOXX -3 further update.

Yesterday I changed the 10yrd wire to the recommended 20.1 MTR wire.
Before there was the faintest morse signal, now I'm back to nothing.

One question, I notice that aerials have insulators on them, I have wrapped the other end o0f the aerial round a nail on my bottom fence, is this ok.

Today I'm going to change the toroid windings, and experiment a bit.

Any tips welcome

Cheers, Camerart.

On Tue, 6 Nov 2012 02:18:14 -0800 (PST), clifford wright <crite40@gmail.com> wrote:

>Has anyone else tried these circuits?

No, but I saw that in theory they might work.

>I have built 2 examples, a 9 MHZ AGC controlled amplifier and a 20 dB wideband amp for a noise cancelling system.
>BIG problems! The diode string in the source of the FET always biases the J310 OFF.
>Result, no gain or a loss!!!

The spread in FETs is rather high so you might have had the bad luck that the ones you used have a cut-off Vgs lower than ~ 1.8V. One issue is strange though: maximum gain occurs not at the limit of V(AGC) of 4V but at a higher voltage.
At 8V at the base, one stage (J310 +2N3409) provides for some 16 dB (voltage gain) then but about 10 dB of it is due to transformation from 50 to 2200 ohm at the input LC.

>It took me an hour or two to twig what was going on. The trouble is that I cannot see how it can possibly work when the gate is referenced to ground. It is equivalent biasing off a valve!
>Not only that, but the AGC circuit published at the same time had extreme instability in the front end of the AGC amplifier. I am a VERY experienced electronics person (60 years) and was unable to find any obvious reason for this.

It could be useful to try the circuit with a FET with much higher cut-off gate voltage. An example is BF246C and BF247C. It should work with the diodes in series with the source resistor.

>SO Now I have actually began to lose faith in one of my favourite engineers.
>Or, have I done something really stupid in my old age.
>FYI the circuits were built "dead bug" style with extensive shielding and full decoupling.

I wonder why you didn't try to get an oldie like the Plessey SL312. Look it up, and see that it's perfect for the job - it provides some 30 dB gain without an input up-transformation and with a larger AGC range.

Regards,
Jan

We don't want cooking oil.

If transformer oil is toxic, the MSDS would say so.

Not cooking oil; vegetable or animal derived oils will go rancid over
time and don't handle really high temperatures very well. Mineral oil is
much more appropriate.

Traditional transformer oil contained PCBs. The new stuff doesn't.

MFJ sells 1 gallon bottles for $30.
